Identifiers-ERIC, *Resources in Education

Resources in Education (RIE) is a monthly abstract journal which announces (catalogs, indexes, abstracts) documents of interest to the educational community (including researchers, teachers, students, school board members, school administrators, counselors, etc.). Each issue announces approximately 1,500 documents and provides indexes by Subject, Personal Author, Institution, Publication Type, and ERIC Clearinghouse Number. This Special Computer Output Microfiche (COM) edition is prepared directly from the ERIC magnetic tape data base prior to publication of the printed journal and therefore is lacking the cover and other regular introductory and advertising matter contained in the printed journal. The first accession in each issue of RIE is the issue itself. In this way, the monthly microfiche collection for each issue is immediately preceded by a microfiche index to that collection. This practice began with the RIE issue for MAY 1979. (LRS/WTB)

Identifiers-Arab Literacy Strategy, *Iraq, Third Alexandria Conference

This issue of Literacy Discussion explains the joint Arab strategy for illiteracy eradication and reviews Iraq's particular situation. The first of six articles traces literacy development in the Arab World leading up to the adoption of the Arab Literacy strategy at the 1976 Third Alexandria Conference in Baghdad, Iraq. It also presents information drawn from a literacy survey of Arab countries covering the period from 1970-74. The second article describes the Arab Literacy Strategy which includes analyzing the situation, defining objectives, reviewing principles and trends, and proposing implementation procedures. The third article, from the secretariat general, reviews the early steps in illiteracy eradication beginning in 1922 and continuing up to and following Iraq's 1968 revolution. Papers 4-6 are presented by the educational planning division of the ministry of education. Article 4 concerns staff recruitment and training, and it emphasizes linking staff development efforts to a long-term plan for adult and non-formal education. The final articles discuss the status, development, and selection of curricula and textbooks for Iraq's national campaign against illiteracy. A resume is present in French, Spanish, and Arabic. The issue concludes with reviews, responses, and discussion on (1) the use of radio in adult literacy education and (2) adult education and individual modernity. (CSS)

Identifiers-Bartholomew Consolidated School Corporation IN, Indiana, *Indiana (Columbus), Indiana Vocational Technical College Columbus, Purdue University IN

A study was conducted to identify and clarify the stated missions, goals, and relationships of three institutions (Bartholomew Consolidated School Corporation (BCSC), Indiana Vocational Technical College (IVTC), and the Indiana University-Purdue University Indianapolis Campus (IUPUI)) to each other and the Columbus community to determine the potential for cooperative efforts in managing resources. Based on data obtained from the institutions, business and industry leaders, and representatives of the community, some conclusions were (1) the institutions have central threads of agreement in their missions and broad goals; (2) many programs/courses appear to be duplicates; (3) the institutions do not serve exactly the same geographical areas; (4) each institution projects a need in the late 1970's and early 1980's for additional facilities; and (5) the institutions appear to have functional and flexible organizational structures that encourage coordination and cooperation. On the basis of the findings recommendations were developed for five phases. The phase 1 recommendation is to have the institution cooperate with business, industry, and community representatives to develop a community education council for joint planning. A phase 2 recommendation is for the institutions to continue developing a cooperative program of sharing learning resources. (Appendixes include DCSC, IVTC, and IUPUI programs and enrollment information and profiles of Indiana economic regions 10, 11, and 12. (CSS)

Because most high school counselors have not had the opportunity to explore job opportunities in their own community, this project's purpose was (1) to provide the counselor with first hand information concerning the various job opportunities available to students in their own community; (2) to implement programs in the schools of the vocational school cooperative; and (3) to follow up the previous year's graduating class with a prepared instrument to improve curriculum and program offerings. A survey instrument was used to collect data from over one hundred fifty businesses in three school districts. A vocational guidance advisory committee assisted with project development and evaluation. A follow up survey was sent to the previous year's graduates to test a state-prepared instrument and to develop a procedure to follow up school leavers. Employers listed the following comments on how the school could better prepare graduates for work: students need better attitudes toward work, more job seeking skills, more pride in work, more dependability and willingness to work, and more communication skills; teachers should be more informed about the needs of the community; and teachers should work in industry in the summer. This dissemination and diffusion handbook for the Florida State Department Division of Vocational Education is divided into ten chapters. Chapter 1 describes the functions of the dissemination and diffusion (D&D) section of the division of vocational education. Identifying the procedures and processes to be followed, chapter 2 focuses on the dissemination unit which is responsible for distributing new as well as established products. Chapter 3 presents and explains a model illustrating the publication request process for educational materials. Chapter 4 describes the functions of the D&D acquisitions and processing unit. Chapter 5 focuses on the diffusion unit which is primarily concerned with educational change; a model illustrating the diffusion process is presented and explained in detail in this chapter, and various diffusion strategies are presented in chapter 6. The role of the regional D&D consultant is defined in chapter 7. The activities involved in the dissemination and diffusion of V-TECS (Vocational-Technical Education Consortium of States) products are described in chapter 8, and dissemination and diffusion activities for career education are presented in chapter 9. Finally, chapter 10 describes the theoretical and research foundation of Impact Assessment, its relation to the basic D&D model, the basic questions that Impact Assessment answers, and the available methodologies and types of reports. Impact Assessment tools and examples of Impact Assessment reports are appended. (BM)

Divided into six chapters, this user's manual accompanies a battery of tests developed by the Educational Progress in Careers (EPIC) project which was organized to develop and validate a system for evaluating career, economic, and community education projects in Florida schools. Chapter 1 presents an action checklist of steps to be followed by local personnel in planning and implementing the EPIC evaluation system. Chapter 2 describes the project organization, purposes of EPIC, the ten components of career/ economic/ and community education, the instrument battery, instrument reliability and validation procedures, and other related topics. Chapter 3 provides guidelines for selecting the evaluation coordinator and the evaluation committee. Finally, chapters 4 through 6 provide guidelines for planning the evaluation, conducting the data collections, and using the results. Additional information concerning interpretation of results and uses of the instruments is appended. (See CE 017 406 for a full description of EPIC project activities and instrument validation.) Identifiers-Educational Progress in Careers, Florida

Educational Progress in Careers (EPIC), Inc., was organized (1) to develop and validate a system for evaluating career, economic, and community education projects in Florida schools and to assist educators and school district administrators in assessing the status of career, economic, and community education programs; (2) to develop valid data collection procedures at each educational level (elementary, middle/junior high and senior high); and (3) to develop a method for continually involving business representatives, parents, and educators in this evaluation as members of a local evaluation committee in each Florida school district. The final products of this two-year effort include a battery of evaluation instruments (CE 017 394 and CE 017 396-406) for collecting data from students (grades 2 through adult), staff, administrators, and parents and a set of evaluation guidelines (CE 017 395). Some of the findings are the following: (1) over 50% of all students reported a gain in occupational knowledge and/or career planning as a result of the exposure to the instruments; (2) EPIC instruments which measured the knowledge components of the EPIC battery were able to discriminate between treatment, county, and/or grade groups in twenty-two of thirty-one comparisons; and (3) of the eighteen student performance instruments developed, ten are valid and reliable requiring little or no modifications and seven contain valid and reliable items which require modification of items and/or scoring procedures. (Only one instrument was deleted from the battery.) (BM)

In this group of presentations from the 1978 National Conference on Higher Education, three researchers examine the need for the educational community to become more creatively responsive to the learning needs of adults. K. Patricia Cross delineates the difference between adult education'' and adult learning''. She discusses findings on adult learning behavior patterns and suggests ways that educators can help adults become more self-directed lifelong learners. In Major Learning Efforts,'' Allen Tough describes the pervasiveness of individual learning efforts that are undertaken without the assistance of an instructor. He outlines research and practices that would enable educators to assist a society of individual learners in choosing and guiding its learning efforts. In Life Stages and Learning Interests,'' Rita Weathersby combines psychological and social society of research findings with case studies of students, illustrating why the educational community should made its resources adaptable and available to persons at all stages of life. This report describes the development and effectiveness of a manual created for use in developing state plans for vocational education. The task of developing the manual involved six kinds of activities, including the selection and use of an advisory committee, utilization of a technical review panel, and assessment of the manual. Topics covered in the manual as finally approved include the following: the need to improve state plans for vocational education, the planning process, planning for the preparation and submission of state plans for vocational education, and using employment data in vocational education planning. Pre- and post-tests on the manual's contents were given to two groups of nine persons. One group consisted of staff members from two state divisions of vocational education, while the second was composed of local vocational education directors and planners. The results showed that both groups made significant gains in their knowledge about state plan development after reading the manual. (The appendix comprises three-fourths of this report and includes a list of the project consultants, advisory committee members, and technical advisory panel members; an abstract of the manual's contents; and the pre- and post-test with instructions and answer key. The manual itself is available in ERIC as ED 164 798.) (EM)

Four units of instruction are provided in this curriculum guide designed for vocational agriculture teachers in planning and conducting classes for students with supervised occupational experience (SOE) placement programs. Unit 1 contains three lessons on starting an SOE program. Lesson topics are placement programs to consider, getting started in a placement program, and keeping placement records. Unit 2 provides three lessons on expanding the placement program: placement program up-date, summarizing placement records, and evaluating program success. Unit 5 contains three lessons on starting an agriculture cooperative (co-op) placement program. Lesson topics include co-op placement programs available, making arrangements for a co-op program, and obtaining a co-op placement position. The last unit provides three lessons on improving a co-op placement program. These are on summarizing records, evaluating the placement program, and opportunities in agribusiness as an employee/owner. Each lesson in the units generally includes an outline of the teaching procedure, transparency masters, forms or handouts, and a unit test with answer key. (JH)

This teacher's guide contains resources to facilitate the study of the world food situation in home economics classes. It provides terms, historical elements of famine, and the effects of hunger and dietary deficiency on humans. Brief overviews of the basic factors influencing the world food situation and some of the proposed measures to solve the problems are also presented. The guide contains a list of objectives (e.g., describe seven effects of hunger on humans), suggested activities for instructor and student, and instructional materials (information sheets, e.g., terms and definitions; influences on the world food situation), transparency masters (e.g., food supply-demand balance), assignment sheets (e.g., nutritional deficiencies and diseases), tests (matching and essay), and answer key. The guide also includes a list of reference books and audiovisual materials. (CT)

Identifiers-*Portugal

Education is one of the major problems connected with the economic and social distribution of the total resources of the world. Examples of the educational gap between rich and poor countries can be seen by statistical comparisons between Peru and Czechoslavakia and between Guatemala and Denmark which show how unevenly educational resources are distributed throughout the world. The term socioeconomy'' deals not only with economic values but also with the welfare of the individual. Like education, socioeconomic status depends on the social distribution of resources. The goals for adult education to work in a politically distributive way are as follow: (1) to reach those who lack education or have a bad education, and (2) to raise the socioeconomic status and improve the conditions of life for individuals. Socioeconomic obstacles to prevent the fulfillment of these goals are inherent in demographic and social structure. For adult education to overcome these obstacles it must satisfy criteria on both societal and individualistic levels. In Portugal various regions have different socioeconomic structures which must be studied through interviews, statistical descriptions, and analysis before the proper form of adult education can be recommended

for them. (This paper is the first in a series resulting from research conducted on Portugal by Sweden under a cooperative agreement between the two governments.) (ELC)

Identifiers-Education Amendments 1974, Missouri (Saint Louis), *Project ICE

A final evaluation (two interim evaluations were previously conducted) was made of Project ICE (Implementing Career Education), which attempted to infuse career education into elementary and secondary school curriculum in St. Louis. While the earlier evaluations concentrated on the elementary level, this third one assessed the program's operation in K-12. Areas studied were as follow: teacher training, curriculum development, community involvement, and student outcomes. Each was judged according to its success in meeting the objectives established for it in the project plan. The evaluators monitored workshops, reviewed curriculum products, conducted surveys, and administered pre- and post-tests. Fifteen target, one pilot, and fifteen non-target schools were involved, with a sample of 2,130 students being tested. It was concluded that (1) fifty-three percent of the project's objectives were met; (2) nearly two-thirds of the objectives not met were student outcomes and the project was weakest in satisfying its objectives in this area; (3) the project was well designed; (4) the inservice training program produced significant results in teachers' knowledge of career education and their attitudes toward the program; (5) classroom infusion, while varying from teacher to teacher, was generally increased; (6) written lessons/units on the high school level were produced for science, math, social studies, and communication skills; and (7) the Community Advisory Council functioned very well, and a community resource guide was published. Identifiers-Australia, *Australia (Sydney)

As a result of studies on fitting and machining apprentices attitudes toward employers, a study was conducted to obtain the attitudes of a sample of employers toward apprenticeship. Three hundred questionnaires were distributed to employers of fitting and machine students studying at a number of Sydney (Australia) Technical Colleges. An examination of the response pattern on the thirty-five questionnaires that were returned indicated that (1) in contrast to what some technical college teachers believed, most employers did have set policies for selecting apprentices; (2) more than half offered some form of incentive to apprentices to do a high quality job; (3) the majority had a favorable attitude toward technical colleges and would continue to send their apprentices to technical colleges even if the legal requirement was withdrawn; (4) only one-third believed that they were obligated to fully train the apprentice; (5) the majority answered that apprenticeship was the most effective way of training young people for the skilled trades, but only about half believed apprenticeship would train a sufficient number of workers; and (6) half believed the government should finance and control the content of training. The career/vocational education section of the Oregon Department of Education developed a project to cope with exploratory work experience problems. Three school district models were selected: an urban/semiurban model, a semiurban/rural model, and a rural model. Problems and solutions were presented in three handbooks, and the urban model also produced the Nonpaid Exploratory Work Experience Handbook for Teachers.'' The project provided nonpaid work experiences in varying lengths for students in grades 7-12. Project accomplishments included (1) six junior high school staff and six high school teachers wrote curriculum, developed activities, and taught career education concepts, (2) a planned articulated effort was made in career awareness and exploration between a high school and a seventh and eighth grade, (3) an assessment of community interest and willingness to be involved was made, (4) an exploratory work experience in the family life role area was developed and implemented, and (5) three occupational cluster programs in high school were developed. Appendixes contain an exploratory work experience model, a miniresume form, a record in career education form, a junior high exploration packet, and a high school exploratory work experience packet. Three sets of lesson plans for junior and senior grade levels are presented to develop skills in (1) functioning in the social structure, (2) developing a democratic conscience, and (3) formulating personal values of work ethics. The lesson plans are designed to be taught in logical order for developing the hobby clubs concept throughout the school year. In general, the lesson title, objectives, time required, method, and reference point or class activities are provided. There are twenty lesson plans in each set. The sociability'' lesson plans cover such topics as orientation knowing names, meeting people first impressions, and casual conversation remembering names and faces. Hobby club information is also included. The democratic responsibility'' lesson plans are accompanied by twenty companion essays on topics such as Necessity to Help Control our School Society''; Regards for Other Peoples' Feelings and Freedoms''; and Regard for School Property.'' The final set of lessons on work ethics'' examines topics such as work ethics in job housekeeping, job safety, and personal appearance. (CSS)

Descriptors-*Curriculum Development, *Inservice Teacher Education, *Metric System, Pilot Projects, Teacher Workshops, *Teaching Techniques, *Vocational Education

To implement metric education in Pennsylvania's vocational curriculum, the following objectives were planned: (1) establish two pilot metric measurement sites; (2) reproduce 150 copies of the 55 metric measurement booklets developed by the National Center for Research in Vocational Education (NCRVE); (3) orient vocational administrators to the curricular implications of metrics and to the administrative support needed for implementation; (4) provide information to teacher educators on metrics and the strategy for the modification of curriculum; (5) prepare trainers who can offer workshops at the local level in the state; (6) conduct local workshops to prepare teachers to use the NCRVE metric materials; and (7) prepare students to use metric measuring devices and terminology in their trade areas. Some of the major outcomes of the project include the following: two metric measurement pilot sites were successfully started and a model program for other vocational schools was adopted; a total of 109 facilitators were successfully trained to teach metric measurement to the vocational teachers; local facilitators successfully trained over 1,200 vocational teachers on how to teach metric measurement to their students; the vocational teachers gave metric measurement instruction to over 17,000 vocational students; and over 7,000 students were able to master the metric measurement material to a level of 80% or better. Further, it is projected that by 1981 the 44 vocational schools and 18 correctional institutions that received funds for metric education will have given instruction to over 30,000 vocational students. To determine the effectiveness of the Appalachian Maryland Experience-Based Career Education (EBCE) Project in meeting its aims and objectives, a third-party evaluation was conducted for 1977-78. Forty students in grade 12 participated in the project, spending four days a week at selected career sites and a day at the EBCE Learning Center receiving instruction from learning coordinators. In order to gather evaluation data, the students, as well as their parents, employers, and EBCE staff members, were interviewed. They were also given pre- and post-tests, including the Career Skills Assessment Program of the College Entrance Examination Board. A follow-up process was used to identify career patterns of first- and second-year project students. Based on the data collected, it was concluded that (1) the project received substantial support from the community; (2) students made significant gains in academic subjects as well as career decision-making and employment-seeking skills; (3) students' motivation level toward school was increased; and (4) the project was well managed, implemented, and publicized. It was recommended that the job sites be analyzed for strengths and weaknesses; feedback about the students be formalized; a full set of academic tests be given on a pre/post test basis; graduate followup be continued; local dissemination be aimed at parents and non-EBCE personnel; and an action plan be formulated for local adoption of the program. This document, product of a review of eighty-one final performance and evaluation reports of elementary and secondary career education projects to identify needed improvements in career education program evaluation, has four parts. Part I, a critique of common evaluation practices, covers overall evaluation designs, reporting, questionnaires and interviews, sampling for student impact assessment, research designs, descriptions of evaluated programs, outcome measurement instruments and strategies, and statistical analyses and interpretation. Part II offers solutions to common evaluation problems, first presenting a problem and then suggesting a solution. Part III, addressed specifically to project directors, suggests how to get the most from a third-party evaluation. Part IV presents a checklist and explanation of terms used for reporting results of student outcome studies in career education. The section also applies the checklist to a fourth-grade model program to determine the program's impact on students. (LMS)

A policy-focus Delphi study was conducted to identify the barriers which prohibit handicapped students from entering or completing vocational technical programs in community colleges in Texas and to identify recommendations and tasks relating to the removal of these barriers. A seventy-two member participant group, which included a nineteen member steering committee, identified 29 tasks which might be implemented or considered for policy formulation by community colleges. These 29 tasks resulted from a content analysis and distillation of the group's 351 recommendations which had evolved from their 198 identified barriers. Fourteen of the 29 tasks correlated with 18 barriers identified by a majoritity (66%) of the participants as being the most severe. Ratios of desirability, feasibility, and cost effectiveness of implementing the tasks were derived and verified by the steering . committee. (The appendix, which is the bulk of the document, lists in tabular format the barriers, recommendations, and ratings of barrier severity and implementation feasibility.) (JH)

Descriptors-Adult Education, *Educational Equipment, Educational Finance, Educational Quality, Educational Specifications, *Equipment Evaluation, Equipment Maintenance, *Equipment Standards, Equipment Utilization, *Facility Inventory, Obsolescence, Secondary Education, *Vocational Education
Identifiers-*Ohio

Based on the feeling that the quality of any vocational program is directly and positively related to the quality of equipment used in the program, a study was undertaken of the vocational equipment used in secondary public schools in Ohio. Five questions were addressed by the study: (1) How does the equipment used in vocational education programs compare in technical quality with that used by employers? (2) Is the equipment in the proper state of repair to be useful? (3) At what rate is the equipment wearing out or becoming obsolete? (4) How are boards of education, administrators, and staff dealing with the problems of repair, replacement, and additional needs? and (5) What is the magnitude of resources needed to replace, acquire, and maintain equipment? Ninety-eight schools, representing all types and areas of the state, provided data. Besides survey questionnaires sent to each program, equipment lists were compiled for each, covering items by name, quantity, cost, estimated year of replacement, estimated cost of replacement, estimated maintenance, and estimated cost for miscellaneous equipment. While not a great deal of obsolete equipment was found in use, a considerable percent was classified as only adequate. It was concluded that more realistic attention should be given to equipment used in vocational programs, and a considerable financial effort is needed to correct deficiencies. (ELG)

Identifiers-Quality of Working Life

Diverse opinions are held by workers, union officials, and labor researchers about the importance of the quality of working life to workers. Major issues in this debate focus on the following questions: (1) Is there a workers' movement to improve the quality of working life? (2) Do workers seek meaning and self-fulfillment in their jobs? (3) Can work be redesigned and humanized without affecting profits and efficiency? (4) To what extent are employees alienated or dissatisfied (5) How reliable are the findings of studies on these issues? and (6) Why are experiments in job enrichment and restructuring considered successful in Europe, but not in the United States? The quality of working life is influenced by such factors as the application of technology to the work, economic structure of an industry, division of labor, private ownership and management, and society's emphasis on material success. Proposals for improving working conditions range from the utopian solutions of left-wing critics and sociologists which require vast changes in technology and social structure to the practical methods of union leaders which focus on the work environment, safety and health standards, and grievance procedures. While some experts contend job enrichment will not ultimately work, others feel it has already proven itself; both conclusions are premature as more time is needed before passing judgment. (ELG)

Descriptors-Communication Skills, Ethnic Stereotypes, *Industrial Arts, Inservice Programs, *Inservice Teacher Education, *Instructional Improvement, Interpersonal Competence, *Leadership Training, Needs Assessment, Program Planning, Sex Stereotypes, Special Education, Staff Improvement, *Supervisory Training, Technology Transfer, Vocational Education
Identifiers-New Jersey

The Industrial Arts Leadership Development Project was conducted to (1) provide inservice training for teachers to improve the quality of instruction and supervision; (2) provide inservice training for minorities and persons with limited English capability; and (3) provide leadership development for inservice teachers, service staff, and administrators. Thirty-five participants were selected through a combination of geographic, performance, and potential criteria. Following a needs assessment and pretest, participants attended eight seminars, including orientation, vocational education planning, funding skills, status of industrial arts, technology, concerns in industrial arts, special needs education, and interpersonal relationships. Following a posttest it was concluded that it would be advisable to develop a similar activity for industrial arts supervisors. In addition, it was concluded that the advisory council approach by the state's industrial arts teacher education institutions is of significant value and that a cooperative effort among the industrial arts profession, the colleges, and the state division of vocational education is essential to the success of personal development projects. It was also concluded that there are many needs in industrial arts which remain unaddressed. (Appendixes include the seminar content summaries, pretest and posttest instruments, needs assessment instrument, project evaluation instrument, project budget summary, and participant project evaluations). Identifiers-Indiana

Knowing that many vocational facilities differing in outward appearance have equally successful results, the Indiana State Advisory Council on Vocational Education conducted a study to assess the essential elements of a vocational facility and to determine if a cost formula could be developed that would be useful for vocational administrators and other leaders in making decisions concerning vocational education facilities. Project activities were conducted in the following five phases: a background information search; a modified Delphi study; development of facility assessment instruments and procedures; development of a cost estimation formula and the nature and use of the computer programs; and onsite assessments using the instrument developed for the project. Based on the findings and observations of the project team, some of the conclusions drawn were (1) that there is not now available and/or conveniently accessible information for facility planners to use for preplanning, designing, estimating, and projecting vocational education facility needs; (2) that reasonable standards/outlines are needed along with guidelines; (3) that the tools developed in this project could prove useful in coordinating and communicating vocational education facilities status and future needs to all state agencies involved in vocational program development and implementation; and (4) that the assessment packet is useful in planning as well as assessing facilities. (This document presents a brief overview of the project; a more detailed report is available in ERIC see note.) (BM)

This first of a two-part report describes a project designed to develop instruments and procedures for evaluating and assessing the status of vocational education facilities in Indiana. Chapter 1 of this report presents the goals of an Indiana project as follow: to develop, collect, and organize acceptable facility and fixed equipment criteria for vocational-technical programs in secondary schools in Indiana; to develop and test assessing instruments; to perform actual site inspections of a sample of vocational facilities in Indiana; to develop a cost analysis model for determining estimated costs of remodeling and/or new construction; and to develop a computer program to analyze the data from the building and site inspections. Chapter 2 describes the background information search conducted to determine guidelines for facility planning. Chapter 3 presents the procedures and results of the modified Delphi study which was undertaken to determine features of facilities for vocational education programs. The development of the assessment instruments and procedures are described in chapter 4, and the development of cost estimation models and computer programs are described in chapter 5. Chapter 6 discusses the field testing of the instrument and implications and uses of the packet. Finally, chapter 7 presents findings, conclusions, and recommendations. (BM)

School Building/Site Assessment Packet for Vocational Education Facilities: Instruction Manual.

Indiana State Advisory Council on Vocational Education, Indianapolis.
Pub Date-Jun 78
Note-53p.; For related documents see CE 020 199-201
Pub Type- Guides - Non-Classroom (055)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors-Educational Equipment, Educational Facilities, *Estimated Costs, *Evaluation Methods, Facility Improvement, *Facility Planning, *Guidelines, School Buildings, Secondary Education, Systems Building, *Vocational Education
Identifiers-Indiana

Developed as an aid to those responsible for facility planning in vocational education, this document contains the School Building/Site Assessment Packet'' and its instruction manual. The instruction manual provides background information, describes meanings, and presents ideas that are pertinent to consider and understand when using the assessment packet. The assessment packet is designed to provide local and state agencies with important and essential information for use in vocational education facility planning. The instrumentation has been field tested and validated to assess the extent of availability, nature of quality, range of acceptance, and potential of convertability of facilities and

fixed equipment for vocational education at the secondary level. (A full report on the development and validation of the instruments is available in ERIC see note.) (BM)

The Need for a National Policy for Vocational Education. Occasional Papers of the Western New York Educational Service Council.

State Univ. of New York, Buffalo. Western New York Educational Service Council.

Pub Date-3 Dec 78

Note-99p.; Paper presented at the National Association of State Directors of Vocational Education, American Vocational Association Conference (Dallas, Texas, December 3, 1978)

Pub Type- Information Analyses (070) - Opinion Papers (120) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors-Administrative Policy, *Educational Development, Educational Philosophy, *Educational Policy, Instructional Systems, Leader Participation, Needs Assessment, Policy Formation, *Program Design, Program Development, Program Planning, *Social Change, Social Environment, Systems Approach, Systems Development, *Vocational Education

The intent of this paper is to examine the issues, problems, implications, rationale, and basic assumptions behind the reexamination of the need for a generally accepted national policy for vocational education. The paper is divided into seven chapters. Chapter 1 establishes a framework to use in dealing with the main issues. The second chapter presents background information dealing with many of the questions regarding philosophy and policy as well as principles for vocational education. The third chapter presents the information received from an eight question survey mailed to twenty-three leaders across the country. For example leaders asked (1) Do we have a current national policy for vocational education?, (2) If we have a national policy, is it adequate?, (3) Do you believe we have a clearly defined philosophy of vocational education?, and (4) What relationship should exist between a philosophy and a national policy? The fourth chapter reviews policies of the past and present and their relationship to a changing society. Chapter 5 discusses the need for national policy and what function it should serve. Chapter 6 discusses the specifics of policy in the areas of program policy, personnel policy, and evaluation policy. The seventh chapter contains recommendations on national policy. (LRA)

Identifiers-Education Amendments 1974

To reduce the narrowing effects of sex-role stereotyping on the career options of secondary students, a project was conducted using curriculum activities and experiences with nontraditional role models in school and community settings. The vehicle for meeting this goal was the existing Jefferson County (Colorado) experience-based career education program. Objectives of the project included (1) establish and maintain community involvement; (2) prepare curriculum materials; (3) prepare and deliver a staff inservice program; (4) implement the program; (5) evaluate the learning outcomes and project processes; and (6) disseminate results of the project. Over 150 members of the local community served as resource persons. Curriculum materials, including guidance activities and curriculum units for secondary students, were produced. Inservice programs were conducted for 30 teachers, counselors, library media specialists, and administrators. The project was implemented during a nine-week period with 110 students at three schools. A third-party evaluation was conducted, with both formative and summative data collected; and a brochure describing project goals and activities was disseminated. (Student curriculum materials, staff inservice materials, and the final evaluation report are included.) (Author/LMS)

An evaluation was conducted to determine the effects of the General Electric Foundation Summer Institutes on Career Education and Guidance over a one to two year period in participating school districts and communities. The study evaluated the team-oriented institutes held in 1976 and 1977 at the University of South Carolina and Indiana University. The report describes the procedure used for designing the evaluation study, identifying the potential data, selecting the sample of school districts to be included in the study, and collecting and analyzing the data. Results show that the institutes had high impact on career education activity in two districts, moderate impact in one, and low impact in three. Substantial gains in personal and professional development were reported by most participants. Conclusions, policy implications, and recommendations were formulated for professional and personal development and team and team plan aspects of the institutes. It was recommended that the institutes be continued with modifications in the schedule and activities of the institutes and in pre-institute and post-institute operations. (Appended is a schedule of questions on impact and factors influencing impact.) (Author/CSS)

Descriptors-*Educational Finance, *Program Budgeting, *Program Evaluation, Program Planning, School Funds, State Legislation, State Programs, *Vocational Education
Identifiers-*California, *Proposition 13 (California 1978)

This is the summary report of a study conducted to measure the impact of the cutbacks necessitated by Proposition 13 on the availability and quality of vocational education in California, recommend reforms in the priority-setting process for vocational education given reduced levels of support, and recommend changes in regulations and/or legislation to mitigate any negative effects which occurred. Data were collected from a questionnaire survey directed at all of California's public deliverers of vocational education, site visits to a random sample of thirteen institutions throughout the state, telephone interviews with a random sample of twenty-six institutions throughout the state, and telephone contacts with the Employment Development Department and the State Comprehensive Employment and Training Administration (CETA) office. Findings include the following: responding institutions reported decreases in vocational education budgets of 9% from fiscal year 1977-78 to fiscal year 1978-79; the decreases in vocational education enrollments between the fall of 1977 and the fall of 1978 was 6%; twenty-five percent of responding institutions reported that they had eliminated selected vocational education programs as a result of Proposition 13; and sixty-seven percent of the respondents anticipated a still further reduction of income for fiscal year 1979-80. Recommendations include the following: a stable, dependable, and equitable funding base be developed for vocational education; application and reporting procedures for Vocational Education Act (VEA) funds be simplified; and districts develop contingency plans for status quo'' funding, increased revenues or decreased income in advance of legislative action. (A fuller, more technical report of this study is also available see note.) (JH)

Identifiers-*Oregon

A project was undertaken to update a handbook entitled ``Promising Practices in Oregon Career and Vocational Education'' (ED 130 140), which covered the vocational research and exemplary projects conducted during fiscal years 1970 through 1975. (An update was published previously for fiscal 1976 see ED 145 143.) Twenty such projects conducted during fiscal 1977/78 were identified for possible inclusion and were then judged according to significance of educational problem, effectiveness of performance, and transportability. Out of the twenty, eight were found to satisfy these requirements and were included in the handbook update. The educational levels impacted ranged from elementary to postsecondary, and the areas impacted included career awareness, exploration, and specialization. besides thorough documentation, the eight chosen projects were characterized by staff commitment and continuity of key project staff. Other innovations considered ``promising practices'' focused on handicapped students and the reduction of sex bias and sex-role stereotyping. Based on the selection process, it was concluded that (1) greater attention needs to be paid to planning, implementing, and managing projects and their evaluation; (2) adequate documentation is required; (3) more projects would have qualifited if they had accomplished all of their objectives; (4) funding of $5,000-$15,000 appears to provide optimum results; and (5) more projects should address the needs of the handicapped and disadvantaged and should provide documentation to substantiate efforts to reduce sex bias and sex-role stereotyping. Identifiers-Education Amendments 1974, Massachusetts (Boston), Massachusetts (Springfield)

The education directors from fifteen museums and performing companies in Boston and Springfield, Massachusetts, were trained to develop and pilot career education programs for K-12 students using the resources of their institutions. The project was divided into three segments and, during each segment, a series of training seminars were conducted to meet the specific objectives of the segment. Segment one acquainted the education directors with the general assumptions and goals of career education. Each director developed a career information package which incorporated the skills, training requirements, and attitudes which characterized jobs and careers within and related to their respective institutions. The second segment provided the directors with instructional skills to enable them to design and pilot career education programs. This involved joint planning sessions with partner schools. In the last segment, to insure the continued involvement of these cultural institutions in career education, the directors developed long-range plans for the implementation of career education programs at their institutions. A project evaluation indicated that the objectives were all essentially achieved. (This report discusses the training projects carried out during the project, analyzes the career information packages, and generally describes the pilot programs and the long-range plans. A report regarding the training seminars is appended.) (EM)

Three papers presented at a teacher education conference on the development of common core curriculum for vocational teacher education are contained in this booklet. The titles and authors are as follow: A Model Methods Course for Agricultural Education,'' by L. H. Newcomb; Preparing Teachers to Develop Courses of Study in Vocational Agriculture,'' by David McCracken; and Pre-Service Field Experience as Preparation for Teaching,'' by Leon Boucher. Each paper addresses six primary points of emphasis: (1) need for the proposed course, (2) objective, (3) content, (4) instructional strategies, (5) evaluation, both formative and summative, and (6) related resources. Appended to the third paper are a list of criteria to be considered in selecting cooperating teachers and cooperating schools, suggested guidelines for orientation of student teachers, trainee evaluation report for vocational agriculture experience, and an agreement form for use between a local school system and a teacher education training center regarding student teachers. Document Not Available from EDRS.
Descriptors-Articulation (Program), *Attendant Training, Developing Nations, Health Personnel, *Health Programs, Health Services, National Programs, *Program Development, *Program Evaluation, *Program Planning, Questionnaires
Identifiers-*Traditional Birth Attendants

Guidelines for the planning, implementation, and evaluation of nationwide programs for the training and utilization of traditional birth attendants (TBAs) are presented. The guide begins with a chart outlining the steps in the development and evaluation of TBA programs. The next section discusses the formulation of basic policies regarding the function of trained TBAs and the facilities made available to them by governments followed by a section on the gathering of information on material and child health family planning services, and local beliefs and practices. The planning and development of a training program are discussed in the next section that includes definitions of functions and tasks, the selection and preparation of trainers and trainees, and the development of a training course. The last two sections examine the evaluation of trainees and trainers, teaching materials and methods, learning objectives, and the program as a whole; and the articulation of TBAs with organized health systems including such aspects as the supervision and continuing education of TBAs to other health workers, and the regulation of the TBA's practice. Following these sections are eighteen figures including various questionnaires, forms, checklists, and tests actually used in a number of developing countries. Concluding the document are references and notes related to information presented in the guide. (JH)

Descriptors-*Adult Education, Classroom Environment, *Educational Philosophy, Educational Programs, *Educational Theories, Learning Activities, *Learning Theories, *Program Planning, Student Role, Teacher Role

This paper presents a codification of theory-based approaches that are applicable to adult learning situations. It also lists some general guidelines that can be used when selecting a particular approach or theory as a basis for planning instruction. Adult education's emphasis on practicality and the relationship between theory and practice is discussed in the first section of the paper. Section 2 presents theory-based approaches to teaching and learning in terms of those developed for youth and applied or applicable to adults and those that were developed specifically for adults. Approaches that are examined include John Dewey's problem solving, Ralph Tyler's identification of objectives, Kurt Lewin's group dynamics and change theory, and behaviorism, cognitivism, and humanism. The last section presents some general guidelines for choosing an approach for teaching or planning instruction for adults. (Author/CSS)

Identifiers-Education Amendments 1976

The lack of systematic, national data on the priority problems being experienced in the field operation of vocational education programs has been a barrier to the design of effective strategies for program improvement. The major purpose of this study was to provide a preliminary assessment of the field operation needs of vocational education. From a list of more than 6,000 nominations, an instrument designed to gather priority ratings for forty-eight needs was developed. The instrument was administered to local and state vocational education personnel. Findings indicate the following conclusions: (1) highest priority needs included improvements in collaboration with key segments of the employment community in communicating the benefits of vocational education and the relevance of curricula to job requirements; (2) high priority needs have an ``external'' orientation; (3) the major differences among groups concerning priorities were between state level and local level personnel; (4) while respondents agreed with priorities in the 1976 education amendments, they appear to have assigned lower priority to problems such as equal opportunity enrollment and sex sterotyping; and (5) six fundamental considerations appear (for example, data-based decision making and community interaction), to underlie the respondents' priority decisions. (The survey instrument is appended. (LRA)

Descriptors-*Aviation Mechanics, *Aviation Technology, Curriculum Development, Educational Improvement, Educational Quality, Employment Patterns, Flight Training, *Graduate Surveys, Job Placement, *Technical Education, *Technical Institutes, Vocational Followup
Identifiers-*University of Illinois

A graduate follow-up study was conducted for the University of Illinois Institute of Aviation by surveying all graduates for the period 1950-1978. Four major areas were covered in the written questionnaires: employment, education, flight related activities, and graduate satisfaction with the Institute. Based on the responses received from 513 individuals who represent 76 percent of those surveyed, it was concluded that (1) the Institute successfully prepares students for careers in aviation; (2) for the most part graduates are able to find aviation related employment; (3) a high number of respondents continue their education after leaving the Institute; (4) certification as an Airframe and Powerplant mechanic has been beneficial to most graduates' careers although few graduates actually work as mechanics; and (5) maximum graduate satisfaction is in flight instruction, maintenance instruction, and flight training equipment. Recommendations for improvements included the following: maintenance training equipment should be updated and larger physical facilities should be provided; the Airframe and Powerplant curriculum should be more theoretical; a flight engineers course should be offered; occupational placement and counseling services should be upgraded; and a degree program should be established. (The appendixes contain samples of the questionnaires, the reminder postcard, and cover letters; a classification of respondents by occupation; and a listing of additional comments.) (ELG)

Identifiers-*Idaho

In accordance with PL 93-380, Section 406, calling for the development of state plans for career education, this plan deals with elementary and secondary schools in Idaho. Following the definition of career education is a section on its conceptual base. The next section discusses career education as meeting a demand for educational reform. Then, previous career education efforts in Idaho are reviewed. Career education goals are identified for both the state department of education and the state itself. Target student learner outcomes are outlined for the following areas: (1) educational awareness, (2) self awareness, (3) occupational awareness, (4) decision making, (5) economic awareness, (6) leisure awareness, and (7) work entry preparation. Various program strategies are considered, such as curriculum infusion, special courses, guidance counseling, and placement. To aid in the successful local development of career education, a section is provided on activities shown to have functioned significantly in demonstration projects. Charts are included for both short- and long-range process goals, specifying activities, strategies, and parties responsible for meeting each goal. Evaluation of the state plan focuses on four aspects: content, input (which assesses attitudes and resources), process (which assesses strategies and activities), and product. Also included are plans for dissemination; funding; adult and postsecondary career education activities; planning, implementation, and administration by state education agency; organization and role of advisory council; assessment of career education needs; training and retraining of school personnel; and timelines for the state plan's development. Identifiers-*Idaho

Intended to provide developers of career education programs with a listing and analysis of career education resources, this guide is part of the state plan for career education in Idaho (see CE 020 441 for the 1978-79 plan). The resources which were selected by literature searches, program analyses, and interviews are divided into six categories. The first, instructional materials, describes resource centers for materials development and dissemination, catalogs and directories of curriculum materials, and selected instructional materials. The second, career education facilities, provides options for facility development and planning as well as descriptions of selected facilities. Next, personnel is covered by annotations on planning, implementation, and assessment guides for administrative staff and on staff development programs. Programs and practices, the fourth area, considers both state and national career education programs for K-12 and then reviews programs in Idaho. Fifth, business, labor, and other community resources, are listed in a directory of community resource learning sites following information on how to develop and utilize community resource sites. The last section, funding sources, discusses federal, state, and other sources of financial aid. Each of the six sections concludes with an analysis describing some possible uses of the materials listed and some potential benefits from their use. (ELG)

Identifiers-*Educational Setting

One in a series of National Business Education Yearbooks, this yearbook presents an overview of the various settings in which business education takes place and the methodology used in its teaching. The first part focuses on the following three settings: public and private schools at both the secondary and postsecondary levels; professional/organizational groups which provide continuing education; and nontraditional settings which are categorized by their learning philosophy, special clientele, special resources or facilities, administration and organization, or instructional approaches. Part II examines the following alternative methods of business education for secondary and postsecondary levels: (1) individualized instruction which includes programmed and computer-assisted instruction for self-paced learning; (2) simulations which may be commercially packaged or specially designed by the teacher; (3) games which, while often costly to implement, are usually enthusiastically endorsed by the students, (4) modular instruction which uses a series of learning units, each focusing on a limited skill or body of knowledge; (5) technological utilization which involves systems such as audiovisual recorders, closed-circuit television, and computers; (6) community-based projects which include independent study for students and assistance from business teachers in developing community programs; and (7) competency evaluation which covers competency-based education on the secondary level and the recognition, at the postsecondary level, of students who qualify for advanced placement either through competencies obtained at previous levels or through life experiences. Intended for use by SEAs and LEAs in the development of programs designed to address sex bias in vocational education, this booklet (which covers elementary to secondary education) provides strategies and evaluative procedures for problems or needs identified as resulting from sex bias and sex-role stereotyping. The thirty-one potential problem areas listed are adapted from 1978 Local Applications for Vocational Education. The strategies for eliminating sex bias (which are also for the most part adapted from the 1978 Local Applications) include the following: (1) conduct a study to determine problem areas and a meeting to explain the study's results; (2) develop a plan to help eliminate sex bias; (3) educate teachers, counselors, and administrators about PL 94-482 and Title IX and change their attitudes towards sex stereotyping; (4) distribute information to foster attitudinal change; (5) promote enrollment of both male and female students in all programs by the use of guest speakers, recruitment programs, and promotional activities; (6) screen textbooks and library books for sex bias; (7) review curriculum content for necessary revisions; (8) provide bibliographies and bulletin board displays; and (9) request state funds for research and program development. Sixteen evaluative procedures are provided to determine the effectiveness of the strategies in reducing bias. They include pre- and post-tests, student surveys, teacher and counselor feedback, review of curriculum content, and interviews with teachers and counselors. (ELG)

Rotary International and Career Education. Monographs on Career Education.

Office of Career Education (DHEW/OE), Washington, D.C.

Pub Date-Aug 78

Note-27p.

Available from-Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (Stock No. 017-080-01921-3)

Pub Type- Collected Works - Proceedings (021)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-*Career Education, *Community Involvement, *Community Organizations, Problems, *Program Improvement, *School Community Cooperation

Identifiers-*Rotary International

Based on a series of mini-conferences, this monograph presents ideas and thoughts of members of the Rotary International organization on the concept of collaboration in career education. First, a brief description of Rotary International is provided. Next, several specific examples are given of ways in which local clubs are already involved in career education. Also, the thoughts of conference participants regarding problems to be resolved prior to involving local Rotary Clubs in career education are summarized. The monograph concludes with a series of postive suggestions made by conference participants aimed at strengthening the involvement of local Rotary Clubs in community career education efforts. A list of conference participants and a list of issues and concerns raised by these participants are appended. (BM)

Identifiers-*Maine

To provide a basis for implementing the objectives of the Maine State Plan for Career Education, a study was conducted to determine Maine's teacher-perceived career education needs. The basic method used was a mailed questionnaire (appended) designed to assess public school teachers in terms of (1) their knowledge of career education; (2) their attitudes toward career education; (3) their present level of teaching skills and techniques used in career education; and (4) their perceptions of student needs relative to career education. Additional data was requested that provided descriptions of the sample in terms of grade level taught, subject area, years teaching, work experience other than education, and the number, if any, of career education workshops or conferences they had attended. The sample consisted of 500 Maine public school teachers randomly selected. Of the sample polled, 218 or 43.6% returned useable questionnaires. Although a majority of teachers had some basic knowledge about career education, it was found that very few had formal training in college courses and that the majority had not attended career education workshops or conferences. The teachers indicated that they needed assistance with teaching techniques and resources in several areas of career education. It also found that a large majority of the teachers were aware of students' needs relative to career education. Overall, it was concluded that the teachers are aware of career education, generally approve of it, but need help in fully understanding its theory and philosophy, and in its implementation. (BM)

Learning activity packages are presented for teaching tractor mechanics. The first of two sections deals with miscellaneous tasks and contains learning activity packages on cleaning the tractor and receiving new tractor parts. Section 2 is concerned with maintaining and servicing the electrical system, and it includes the following learning activity packages: testing the battery, servicing battery connections, activating a battery, charging a battery, testing the charging circuit, adjusting the voltage regulator, servicing the alternator, servicing the generator, replacing the amperage guage, servicing the ignition wires, servicing the distributor, testing the starter circuit, servicing the starter motor, replacing the starter motor, and replacing the ring gear on a flywheel. Typically the packages contain the following format: introduction, directions, objectives, learning activities, tools and equipment needed, materials and supplies needed, safety, instructions, student self-check, check-out activities, and instructor's final check list. The packages are illustrated. (CSS)

Identifiers-*Comprehensive Employment and Training Act, New Jersey, *Youth Employment and Demonstration Projects Act

On July 31, 1978, the U.S. Senate Committee on Human Resources held a hearing in Perth Amboy, New Jersey, on the problem of youth unemployment. In particular, the effectiveness of the CETA (Comprehensive Employment and Training Act) and YEDPA (Youth Employment and Demonstration Projects Act) programs concerned the Committee. Following an opening statement by Senator Harrison Williams, testimony and prepared statements were given by public officials of Perth Amboy and Middlesex County as well as by school officials, representatives of various community agencies, and CETA trainees. The majority of witnesses felt that CETA had achieved limited success in targeting services and jobs to those in need. The Puerto Rican Association of Human Development presented testimony and documentation on the failure of CETA to help Hispanics gain employment. It was recommended that CETA develop more sophisticated evaluation procedures, that local agencies have more input in funding distribution, bilingual programs be instituted, and CETA and the school districts increase their cooperative efforts. David H. Tyrrell of Middlesex County College testified on the relationship between CETA and colleges, stressing the need for ongoing commitment on the part of the government and the schools. He also emphasized the importance of bilingual education. (Also included are materials submitted by parties not present and an entry in the Congressional Record by Senator Williams summarizing the hearing.) (ELG)

Research to Practice in Adult Basic Education.

Pub Date-79
Note-15p.; Paper presented at the Maryland Association for Public Supported Continuing Education Conference (Baltimore, Maryland, 1979)
Pub Type- Information Analyses (070) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Access to Education, *Adult Basic Education, Adult Learning, *Cognitive Style, *Educational Interest, Educationally Disadvantaged, *Illiterate Adults, Learning, Learning Motivation, Literacy Education, *Participant Involvement, Problems, *Program Development, Research Utilization

Research can provide insights into problems related to adult basic education (ABE) program success. The potential ABE population is great; for example, the Maryland target group includes nearly 1,097,000. Several studies have revealed that those needing ABE most are least likely to be program participants. Various problems that often overwhelm the poor are unemployment, marital instability, and low self-esteem. In addition, other learning involvement barriers include costs, insufficient motivation, time factors, and discouragement. It is important to evercome these obstacles. One way is by providing relevant programs. Norvell Northcutt and Deborah Hickok have identified cogent (1) literacy program content areas (consumer economics, occupational knowledge, community resources, health, and government/law) and (2) primary skills (communication, computation, problem solving, and interpersonal relations). Various appeals to learners have been identified; for instance, Allen Tough's research suggests that adults are interested in learning something of immediate use. In addition, Patrick Penland found that adults like to set their own pace; Nan Booth found that low-income urban adults prefer the trial-and-error learning method. Daniel D. Pratt identified five important learning environment factors: developing adult-to-adult working relationships, developing mutual understanding, dealing with closure, establishing role clarity, and guarding the contract. Finally, in surveying where adults like to learn, several studies have discovered that adults prefer learning at home. (CSS)

Descriptors-*Academic Aspiration, *Adult Education, *Adult Students, Educational Interest, Educational Research, Full Time Students, *Learning Motivation, Postsecondary Education, Student Attitudes

To examine what motivates mature people to begin a full-time educational program, a study was made of students at the Institute of Continuing Education (Londonderry, Northern Ireland), which runs a one-year, full-time, academically intense program in liberal studies for mature students with or without formal educational qualifications. The study was conducted along the lines of a 1950s study by J. Blumler of students at Ruskin College (Oxford, England) and had similar findings. Interviews of twenty students were conducted, from which a questionnaire was developed which was administered to forty-one students. The Londonderry study detected three relatively independent components among the many reasons cited for application to the program: (1) a vocational or instrumental component, expressed as a desire for a formal qualification and university entrance; (2) a social relevence component, expressed as a desire for a job which is both satisfying and serves others; and (3) an intellectual/cultural component, expressed as a desire to complete education, to do some serious study, and to regain or build self-confidence. (Tables of data, notes, and references are included.) (LMS)

Identifiers-Comprehensive Employment and Training Act, *National Advisory Council on Vocational Education, Youth Employment and Development Projects Act

Examining the trends and issues in vocational education, this speech focuses on the historical basis for vocational education, the current situation in vocational education, vocational education in the 1980's, the role of vocational education in economic development, and research related to these topics. Issues which are currently being discussed in congress, industry, and education are listed along with current problems affecting the success of vocational education in the area of transition from school to work. The implications for vocational education research are presented in the following four questions: (1) What economic impact does vocational education have? (2) Does the training one receives in vocational education make a smoother transition from school to work? (3) How well are current vocational education programs doing? and (4) Can vocational education help solve problems relating to welfare, crime, health, urban and rural development. Included is a question and answer series relating to the Bakke decision, unemployment, inflation, the youth employment and development project, competency-based testing, career centers, and area vocational-technical schools. Identifiers-Appalachia, Experience Based Career Education, Mississippi

This annual report covers the second year of the three-year experience based career education (EBCE) project designed to provide educationally disadvantaged students (including secondary, postsecondary, adult and other types of clients) in the Appalachian area of Mississippi with on-site work experience, career exploration, current occupational information, and an individualized curriculum. Following a summary, the body of the report describes the EBCE program, initially a fifteen-week program but later expanded to be open-ended, as consisting of two phases: (1) orientation, including explanation of career exploration, testing inventories, introduction to the different training programs available at Itawamba Community Junior College, introduction to various occupations, and introduction to resources available for exploring careers; and (2) on-site experience, during which students explore two or more occupations. The document also contains a third party evaluation which gives background, a project description, evaluation results, discussion, and recommendations. Appendixes are entitled Learning Guide, Publicity Activities, Dissemination Activities, Community Advisory Council, Other Activities, EBCE Success Stories, Follow-up Survey, Enrollment Statistical Data, and Staff Development (LMS)

Identifiers-Local Education Agencies

A project was designed to develop an administrative policy guide concerning vocational education for handicapped students for use by local education agencies. The project was initiated by collecting policies and policy-related materials from state education agencies and from selected local education agencies operating vocational education programs that include handicapped students. These materials were used to develop an administrative decision point checklist which identified as many key decisions as possible that were required to create and operate a modern vocational education program for handicapped students. The decision point checklist served as an outline for writing the policy guide. The guide went through several stages of development and [illegible] first reviewed by the project's working advisory committee and local administrators of vocational education programs for handicapped students. The second draft was reviewed individually and in group assesment workshops by numerous experts at the local, state, and national level in the fields of vocational education, vocational rehabilitation, and special education. (Included in the appendixes is a copy of the second draft of the guide.) (Author/JH)

As a result of the concern for minority and disadvantaged students' ability to relate the values and culture promulgated in schools to their own culture, a training program conducted in three school districts attempted to improve the attitudes and behaviors of teachers and counselors toward these students. A research study was conducted to (1) determine the impact of Opportunities Industrial Centers of America's treatment on the attitudes of teachers and counselors; (2) understand what type of attitudes a treatment of this type can effect; and (3) determine what underlying predisposition towards attitude change in teachers and counselors may affect the nature and magnitude of attitude change. Three instruments were used to pretest each group and posttest the group's attitude change. Findings indicate that the treatment program did produce the expected attitude changes in teachers and counselors. Three types of changes identified were in terms of content presented, the change orientation dimension, and concept values. The groups were not found to be different in respect to predisposition to change. (Teacher and counselor modules, a training session example, and survey instruments are appended.) (LRA)

Descriptors-*Administrator Attitudes, Black Leadership, Black Students, Educational Administration, *Educational Needs, Employment Opportunities, Enrollment Influences, Federal Government, Financial Support, Graduation Requirements, *Job Training, *Policy Formation, Postsecondary Education, Program Development, Program Improvement, Relevance (Education), Secondary Education, *Vocational Education

A national survey of black leaders was conducted by federal vocational education administrators to help assure that programs meet the legislative mandate and are socially responsive to black students' needs. The first of three major survey questions ''Is it desirable for black students to enter and complete vocational education programs?'' was answered ''yes.'' This answer assumes that the program provides marketable skills and other benefits that outweigh negative aspects and preclude a tracking system. In answering question 2 ''What kind of vocational education programs will help more blacks successfully enroll in and complete the programs?'' six recommendations were formulated: relate training to available or emerging jobs; provide sound academic studies; arrange for on-the-job work experiences; increase the amount of stipends and number of scholarships; set high graduation requirements; provide placement services; and conduct follow-up studies. Question 3 ''How can vocational education programs better meet the training-employment needs of black students?'' was responded to with policy recommendations for training black youth to be employable. Based on study findings and policy panel and strategic advisors' opinions, the Office of Education made recommendations in seven areas: black involvement, goals and accountability, federal administration of vocational education, funding, occupational diversity, employment, and alternative occupational training programs. Identifiers-*Texas

The Texas Improving Vocational Administration (IVA) project was conceived to improve preservice and inservice programs for vocational education administrators. Primary objectives were to (1) develop a method, including a survey, to determine existing inservice and preservice administrative training program competencies; (2) determine, using the survey, the programs' influence on the administrator's ability to meet the needs of special groups; (3) identify professional administrator competencies for vocational program responsibilities; (4) develop modular materials to meet administrators' needs; and (5) design and validate a training package to increase administrators' management skills. As a result of the needs assessment of practicing superintendents and principals and twenty-eight Texas higher education institutions, areas were identified for the development of instructional materials. Preservice/inservice training materials were arranged in six units: legislation affecting vocational education, vocational education funding and fiscal management, advisory councils, organizational and administrative structure, administration and supervision, and program planning. The unit format includes description, goal, objectives; resource readings; learner activities; self-assessment and answer key; and transparency masters. The materials were sent to participating universities for review and field testing. In addition, four workshops were held to introduce the materials to vocational education administrators. (CSS)

Identifiers-*Florida

The Florida State Advisory Council on Vocational Education funded a study to determine the extent to which programs involved in vocational training represent a consistent, integrated, and coordinated approach to meeting vocational education, employment, and training needs of Florida, and to determine present and emerging patterns of governance of programs included in the study. Eight agencies who had working agreements with the Florida Division of Vocational Education and who deliver specific vocational instruction participated in the study. Data was collected through interviews with county and state level personnel in their respective agencies. Among the findings were (1) the various agencies have a high degree of consistency within their own agencies; (2) working relationships among agencies appear to correspond to the flow of money; (3) local agencies are not communicating to the same extent as state agencies; (4) program overlap was minimal; (5) the number of local agencies having working agreements with other agencies was low; (6) agencies studied were serving the minority population at a level equal to or greater than the minority representation in the county population; and (7) no attempt was being made at the local level to coordinate the number of trainees accepted in the various programs with labor market demands. (Recommendations of the authors are included.) (LRA)

Expanding Vocational Horizons: Innovative Approaches to Increasing Pre-Service Counselor Understanding of Vocational Education Opportunities.

Descriptors-Annotated Bibliographies, Audiovisual Aids, *Changing Attitudes, *Counselor Training, *Learning Activities, Resource Materials, *Role Playing, Simulation, *Vocational Counseling, *Vocational Education

Including primarily interaction exercises to increase the counselor's understanding of vocational education opportunities, this training manual for school counselors is intended to (1) raise the awareness of the trainee; (2) revise the attitudes of the trainee; and (3) encourage action by the trainee. The activities are divided into three units which correspond to the three purposes stated above. Each activity is described in detail and is immediately followed by relevant printed materials which can be xeroxed for the program. An annotated bibliography of additional resources and a list of references are found at the end of each unit. Audio visual materials suitable for each section have also been listed at the end of each unit. This manual provides an adaptable framework for the counselor educator to use in a workshop or class format. (BM)

Descriptors-Adult Vocational Education, Agricultural Education, *Bilingual Education, Business Education, Educational Research, *Learning Modules, *Metric System, *Office Occupations Education, Postsecondary Education, Spanish Speaking, Technical Reports, Trade and Industrial Education, *Vocational Education

A project was conducted to develop three metric education modules for use with bilingual (Spanish and English) students in postsecondary and adult vocational education programs. Developed for the first section of each module, five instructional units cover basic metric concepts: (1) measuring length and finding area, (2) measuring volume, (3) measuring time and finding speed and acceleration rates, (4) measuring mass and power, and (5) measuring temperature and energy. The second major section of each module was designed to illustrate applications (presented in 6-7 units) of metric measurement to task performance and problem solving in one of three occupational areas: agriculture (grounds keeper, private pesticide applicator, agricultural mechanic, veterinarian assistant, grain elevator foreman, fence builder, and gardener); business and office (mail clerk, proofreader, clerk-typist, secretary, bookkeeper, office manager, and word processor), and trade and industrial occupations (draftsman, machinist, welder, automotive tune-up mechanic, electrician, and electronics service technician). Each module unit is organized into the following elements: objectives, suggested activities for instructor and student, information sheets, transparency masters, assignment and job sheets, and tests and answer keys. Identifiers-Purdue University IN, State University College Utica Rome NY, Temple University PA, University of Rhode Island, Utah State University

The purpose of this project was to assist selected vocational teacher education institutions in progressing toward implementing more fully functioning and broadly based performance-based teacher education (PBTE) programs. PBTE implementation problems, strategies, and solutions were identified and documented for use as a resource by others interested in implementing PBTE. From forty-two eligible sites, five leadership sites and fifteen other sites were selected to participate. Participants met to identify and prioritize PBTE implementation problems, identify viable strategies for solving these problems, and develop plans of action at each site. A second meeting was held to assess progress made and initiate specific plans for a dissemination workshop to share implementation strategies and related materials. Each workshop participant received data concerning the progress made by each leadership site, narrative comments prepared by each leadership site concerning problems and strategies, and six resource packages covering six key problem areas. Fifteen appendixes include a project description, status study instrument, planning worksheets, slide-tape scripts, case studies, and evaluation reports. (Author/LRA)

Six units of instruction are provided in this manual designed for deaf students enrolled in an ornamental horticulture program. Unit 1 contains

eight lessons (pictures and names) on tool and equipment identification (e.g., cutting and pruning tools, lawn and garden equipment, and power equipment). Unit 2 provides ten lessons on the care of tools and equipment. Topics include the storage of tools, sharpening a hoe, starting a lawnmower, and changing the lawnmower oil. Unit 3 contains twenty-two lessons on greenhouse practices, including types of greenhouses, soil testing, starting seeds, repotting, and watering greenhouse plants. Nine lessons on nursery practices are provided in unit 4. These practices include moving a tree or shrub, plant propagation, and pesticide handling safety. Unit 5 contains fourteen lessons on grounds maintenance. Topics include pruning, seeding a lawn, staking trees, and fertilizing trees and shrubs. Finally, unit 6 provides eight lessons on floral design, including making a boutonniere, corsage, and Christmas wreath. A multiple choice test accompanies each unit. (JH)

Descriptors-Adult Education Programs, *Career Development, Career Education, *Career Planning, *Educational Programs, Females, Labor Force, *Occupational Guidance, Self Concept, Sex Discrimination, Sex Fairness, Sex Role, *Socialization, Status, Theories, *Working Women

This literature review for the project ``Career Planning Programs for Women Employees'' reviews the status of women in the labor force, the relationship between socialization and careers, career development theories, and women's career patterns. This material serves as background for the last section, which is on women's career planning programs cited in the literature. Information on a number of programs for adult women, employed or not, is included in the report. The authors, in summary, suggest that the review tends to reinforce the the beliefs that women (1) have made significant contributions to the nation's economy, (2) require further study in regard to their career patterns, and (3) like men, can benefit from support services. Descriptors-*Career Development, *Career Planning, College Programs, Employer Employee Relationship, *Program Design, *Program Development, Reports, Research, Womens Education, *Working Women

A project was conducted to develop three prototype comprehensive career planning programs and to offer those prototypes as models that could be used by both educators and personnel directors who are interested in helping employed women improve their occupational status. A national survey of programs in operation in community and junior colleges and in business and industry provided the basis for the development of a modified delphi instrument that was submitted to a panel of experts for their evaluation and recommendations. Instrument items consisted of possible career planning activities and various procedures for facilitating the implementation of a career planning program. Among the panel's conclusions were these: (1) a majority of the individual career planning activities are considered to be very important for inclusion within any programmatic effort to assist employed women in their career planning and developmental goals, and (2) those career planning activities that seem to be directed more at improving the knowledge and skills of employed women were judged to be more important than those various activities that related to women's individual personal needs. Development suggestions for career planning programs for employed women make up the bulk of the document. (CT)

Identifiers-Comprehensive Occupational Data Analysis Programs

Two major areas of concern to vocational education are cost benefit and job and task analysis. In recent years vocational education has broadened its outlook in terms of general human development, but the historical context of vocational education and concerns for accountability require evaluation of vocational education programs to consider cost factors and the relationship of programs to the world of work. The computer capabilities of the Comprehensive Occupational Data Analysis Program (CODAP) system and similar systems, such as the Vocational and Technical Education Consortium of the States (VTECS) that are in the process of being developed, have rather direct implications for planning and evaluation. Task analysis may serve as a basis for curriculum planning and can lead to statements of behavioral objectives and criterion-referenced measures that assess student learning. A CODAP-type system can help occupational educators derive listings of tasks that are required of employees at different levels. This system can be useful in evaluating program outcomes and estimates of the cost and benefits of these outcomes. Two concepts that have been useful in arriving at estimates in cost effectiveness studies are the staging concept and the seriousness index. (A sample task analysis is appended.) (LRA)

An analysis of statistical data is used to examine enrollments and programs in noncollegiate postsecondary schools. A number of factors are reviewed including enrollment and size of public and private noncollegiate postsecondary schools; sex characteristics, age, and racial/ethnic background of students; offerings, length, and charges of programs; employment facts, sex characteristics, and full-time/part-time status of staff; teacher/student ratios; and correspondence of school facts. A few of the reported findings are (1) in 1976 nearly 8,500 public and private noncollegiate postsecondary schools offered instructional programs leading to occupational objectives; (2) more than a fourth of the public schools had enrollments of 500 students or more compared with only 4% of the private schools in the same size category; (3) in 1976 women made up 51% of the total school enrollment in noncollegiate postsecondary schools; (4) the average enrollment age was 26.2 years; (5) the majority, 70.1% of students in schools that reported racial/ethnic groups, was white; and (6) nearly 27,300 programs were offered by public and private postsecondary schools in 1976. The appendixes contain the statistical tables on which the report is based, technical notes, and survey questionnaires sent to the school sample, correspondence schools, and schools not in the sample. Identifiers-Alberta

A study was commissioned to develop and validate a test to assess the attitudes of Alberta (Canada) students toward the world of work. The following five dimensions were delineated for consideration: (1) attitudes toward earning a living; (2) perceptions about employer expectations; (3) perceptions about available opportunities; (4) relevance of school preparation for employment; and (5) characteristics of desirable jobs. Two preliminary forms of the instrument were created, each consisting of 125 items. Approximately 360 students in grades eight and eleven were administered these forms. Based on these results, a revised instrument consisting of 75 items that were grouped into 15 scales was prepared and administered to 467 ninth grade students and 568 twelfth grade students. Overall item results indicated that the work ethic is deeply entrenched in Alberta students and that they appear confident in their ability to succeed. Validity of the scales were examined by checking differences based upon junior and senior high school responses, sex, school program, job aspiration, holders of part-time jobs, students with full-time summer job experience, and comparisons with certain groups selected for closer experimentation. The results of the analyses supported the validity of the revised instrument. Results of the reliability studies were not conclusive. (The instrument and administrator's manual are appended.) (BM)

Identifiers-Alberta

A study was commissioned to develop and validate a test to assess the attitudes of Alberta (Canada) students toward the world of work. An instrument was needed to examine the following five areas of concern: (1) attitudes toward earning a living; (2) perceptions about employer expectations; (3) perceptions about available opportunities; (4) relevance of school preparation for employment; and (5) characteristics of desirable jobs. Two pilot instruments were administered to approximately 360 students in grades eight and eleven. Analyses of the student opinions resulted in an instrument of 75 items which could be grouped into the following 15 scales: preparation by school, interest and variability in jobs, diligence, laziness, job security, positive employer characteristics, independence, money, ambition, locus of control, confidence in succeeding, negative employer characteristics, social relations, attitudes toward unemployment, and general attitudes toward earning a living. The revised instrument was administered to 467 ninth grade students and 568 twelfth grade students. The students were sampled from eight separate geographic locations in Alberta. Analyses of the student opinions indicated that the scales were relatively independent of each other, were structurally valid, and should be retained in the revised instrument. Several attempts were made to examine the validity and assess the reliability of the subscale scores. (Results are reported in detail in this technical report and are summarized in a companion document, CE 021 510.) (Author/BM)

Fourteen planning papers commissioned by the National Institute of Education in preparation for a study of vocational education are presented. The papers are organized into four sections. Section one deals with selected features of federal grant-in-aid programs and contains these papers: On Implementing the Vocational Amendments of 1976'', Distribution and Allocation of Funding for Vocational Education'', Federal and State Governance of Vocational Education'', and Research Issues for Vocational Education: Compliance and Enforcement of Federal Laws''. Two papers on quantitative data sources are presented in section two: The Vocational Education Data Base'' and Effects of Vocational Education Programs: Research Findings and Issues.'' The third section deals with issues in program evaluation. The papers are The Phoenix of Vocational Education: Implications for Evaluation'', The Effects of National Policy on Vocational Education Evaluation'', and Vocational Education: Education or Short-Run Training Program?''. The last section treats selected aspects of vocational education policy. Papers are The Role of Vocational Education in the Nation's Employment and Training Programs'', Vocational Education in Rural America: Current Problems and Prospects'', Race and Sex Compliance Issues in Vocational Education'', Vocational Education for Special-Needs Students'' and Vocational Education as a Strategy for Eliminating Poverty.'' Identifiers-Education Amendments 1966

Three papers focusing upon the beliefs and issues confronting professionals concerned with consumer and homemaking education programs are presented. The first paper Consumer and Homemaking Education Today'' (R. Hughes), examines the questions of content and audience from a curriculum development view. The status of programs using evidence of program effectiveness from existing data is discussed. Suggesting research needed and possible approaches for studies, the paper concludes with implications for programs, funding allocations, and legislation. The second paper, Assessment of Consumer and Homemaking Education'' (A. Cross), discusses criteria for determining the effectiveness of curriculum in consumer and homemaking education. Two major criteria are suggested: meeting needs of the various groups targeted by legislation and the competencies essential for the homemaker. Types of studies needed when evaluating a program are suggested. The paper concludes with a rationale for consumer and homemaking education as a part of vocational education. The third paper, Legislation for Consumer and Homemaking Education: Social Implication'' (E. Simpson), examines the role of consumer and homemaking education in the Education Amendments of 1966, and selected characteristics of the American family and relevant social issues having implication for home economics and for related legislation. The purposes of home economics and the role of such programs in vocational and general education are also presented. The paper concludes with a discussion of future alternatives. (JH)

Identifiers-Nurse Practitioners

In compliance with section 951 of Public Law 94-63, this second annual report presents and anlayzes information on the supply and distribution of and requirements for nurses. Chapter 1 presents three models on the requirements for nursing personnel in the nation: The Vector Model (impact of health system changes), Pugh Roberts Model (the system dynamics national model), and the Western Interstate Commission on Higher Education (NICHE) Model (the state model approach to requirements). Supply models and supply projections are discussed in chapter 2. Chapter 3 examines supply and requirements comparisons, including a national overview, registered nurses with advanced training, and nurse practitioners. Chapter 4 discusses factors affecting supply and requirements: new additions to the nursing population, characteristics of the licensed nurse population, employment distribution, and average compensation of nursing personnel. Chapter 5 examines the distribution of supply and requirements in the states. Finally, chapter 6 presents conclusions about aggregate national supply and requirements. The appendix includes a copy of section 951 and report tables. (JH)

Descriptors-Administrator Attitudes, Counselor Attitudes, *Enrollment, Enrollment Influences, Postsecondary Education, Secondary Education, *Sex Discrimination, *Sex Fairness, Teacher Attitudes, *Teacher Employment, *Vocational Education, Vocational Education Teachers

Identifiers-*Idaho

A study was conducted to determine the degree, if any, of sex discrimination resulting from sex bias within vocational programs in the state of Idaho. The following three objectives were developed: (1) to determine the proportion, by sex, of administrators, teachers, counselors, and students making up the population of participants in vocational programs presently being funded in the state; (2) to assess the degree of sex bias of administrators, teachers, and counselors of vocational programs in the state; and (3) to collect and assess data from leaders in the sex equity movement which might be used by the Idaho State Division of Vocational Education to develop guidelines for enrollment proportions for reimbursed vocational programs within the state. The study resulted in achievement of the first two objectives, but insufficient returns from the limited number of identified leaders in sex equity precluded attainment of the third objective. The study found that Idaho vocational educators feel more overall dissatisfaction with student male/female proportions than with teacher proportions. For those vocational areas in which disparity by sex exists in student enrollments, vocational educators felt that the disparities were neither satisfactory nor ideal. The enrollments were, however, considered both practical and satisfactory to the community. (BM)

Descriptors-*Enrollment Influences, *Parent Influence, Postsecondary Education, Secondary Education, *Vocational Directors, Vocational Education, *Vocational Education Teachers, *Vocational Schools
Identifiers-*Vermont

A study was conducted to identify factors which inhibit the ability of Vermont secondary school students to enroll or maintain enrollment in a vocational education program. At fifteen vocational centers and their feeder high schools, self-administered questionnaires were given to vocational program students and non-program students, as well as to their parents. Vocational center personnel teachers, counselors, etc. were also given the questionnaire. Among the results were the following: parents, followed by counselors, were identified as the individuals having had the most influence on choice of curriculum; and most centers conduct programs in the feeder high school to inform students about the vocational centers. Recommendations included: (1) a public relations program to inform parents and students about the opportunities in vocational education; (2) vocational centers must be flexible to meet the changing needs of the job market; and (3) a definite, written recruitment policy, worked out between the centers and the feeder schools, is needed. (Sample interviews, surveys, and worksheets are appended.) (CT)

Descriptors-Blacks, Career Development, Caucasians, *Cooperative Programs, *Educational Alternatives, Educational Research, Employer Attitudes, Females, Financial Problems, Jobs, Labor Force Nonparticipants, Males, Minimum Wage, Parent Attitudes, Part Time Jobs, Questionnaires, Secondary Education, Student Attitudes, *Unemployed, Vocational Education, *Work Attitudes, Work Experience Programs, *Youth Employment
Identifiers-*Mississippi

A study was conducted in six south central Mississippi counties (1) to determine the incidence of part-time employment of in-school youth by age, grade, sex, and race; (2) to determine types of part-time jobs held by youths while in public school and their available work experience alternatives; (3) to obtain employed youth and their parents' reactions toward youth work in relation to school and future career plans; and (4) to ascertain barriers to part-time youth employment as preceived by youth, parents, and employers. Through questionnaires and interviews data was obtained from 100 cooperative vocational program students, their parents and employers; and 100 students not in the cooperative program, their parents and employers. Major findings were: youth aged 14 and 15 accounted for 30.9% of those employed between ages 14 and 19; except in the cooperative program employed males outnumbered females two to one; black males held a proportionate job share, but black females did not. Chain stores and restaurants provided one-third of youth jobs. Youth, their employers, and parents viewed the minimum wage requirement as a major youth employment barrier. Cooperative students, their parents and employers were much more favorably disposed toward work than were their counterparts. The cooperative model was recommended for study by those interested in enhancing work and school experiences of employed youth. (Author/CSS)

Descriptors-*Computers, *Mathematical Models, Objectives, Operations Research, Postsecondary Education, Problems, Program Improvement, *Program Planning, Secondary Education, *Vocational Education

A project was developed to link together the computer and an operations research technique (goal programming) and to bring them to bear on problems in improving vocational education planning. The process involves using the computer to solve a mathematical model designed to determine trade-off values among alternative goals and plans. Simulating the relationships among goals, constraints, and variables enables the planner to explore the effects of alternative actions. Typical vocational education goals center on training-related placements, completers' labor force participation, number of students to be served, completers' continuing education, completers' wages. dropout reduction, increasing employment options, serving disadvantaged/handicapped, eliminating sex stereotyping, and social-political goals. Constraints include limited job openings, limited budget/facilities, students available, and student interest. Decision variables, goals, and constraints are placed into an equation. The final step in developing the model is the formulation of an achievement function. Steps involved in model application are: identify goals and constraints, gather relevant data, put data into computer, apply the model, and interpret the results. The model is applicable to planning at the state level (for example, it was applied in Missouri) or regionally within the state. (CSS)

Identifiers-University of Texas Austin

A study was developed to determine a profile of the University of Texas (U.T.) at Austin returning male student, his purpose for returning to higher education, his concerns related to his role as a student, and his preferences for programs. A questionnaire was prepared and mailed to 407 newly-admitted male Austin residents, 25 years old or over. Twenty-five percent of the questionnaires were returned. The questionnaire obtained demographic data, financial and employment data, military service information, period of interrupted study, academic information, concerns, and program needs. Survey results indicated (1) most are married, white, ages 25-29, with no children; most were Vietnam veterans; (2) they are career-oriented 76% checked this as the reason for returning to school; (3) financial concerns including budgeting for education and living on a reduced income were predominant; (4) 37% listed their income as $5,000 or below 66% listed veterans' benefits as a major income source; (5) 72% were pursuing advanced or professional degrees; and (6) 65% requested programs on U.T. student services, 40% requested a session on getting around U.T., and only 11% requested marriage counseling. Six recommendations were made. For example, the first recommendation was that school aid for those experiencing financial difficulties should be explored or established. (The questionnaire is appended.) (CSS)

Identifiers-*University of Texas Austin

The office of Services for Returning Students (SRS) at the University of Texas (U.T.) at Austin conducted a follow-up study of men and women students who had visited the office from February 1969 to the end of 1971. The study ascertained the average interval between periods of formal education, the fulfillment of educational goals, and the use of education for a subsequent career. A questionnaire was mailed to a random sample of 368 students who had visited SRS. Respondents included 102 women, 3 men and 2 unidentified respondents. Respondents were 25 to 60 years old. Due to this pattern, the findings relate to women. Findings indicated that (1) women compared to men utilized services approximately at a 3:1 ratio, yet there are twice as many men as women over 25 years old at U.T.; (2) the average educational interruption was 10-14 years; (3) most respondents were married; (4) 60% earned letter grades of between A and B; (5) after leaving U.T. 51% were employed almost one-fourth did not find employment in their academic area; (6) most carried a part-time course load; (7) 48% had completed their educational goals; (8) financial problems were most frequently indicated as the reason for dropping out of school; and (9) 58% knew about campus placement services. but only 21% used the services. (The survey instrument and results are included.) (CSS)

Identifiers-Hollands Occupational Typology

In order to learn how people may alter or reconcile their aspirations and jobs during their career development, this study examined the match between vocational aspirations and actual jobs of white young men and older men. Age trends in the match between vocational aspirations and actual jobs were studied in a nationally representative sample of 3,730 white men aged sixteen to twenty-eight who were interviewed yearly over a five-year period. Findings indicate that as the youth aged, higher agreement between jobs and aspirations (classified according to Holland's typology) occurred. In addition, the distributions of both aspirations and actual jobs differed with age. Larger proportions of the older men were engaged in enterprising work, and the distribution of aspirations, which at age sixteen diverged markedly from the distribution of jobs, resembled that distribution more closely by age twenty-eight. (Implications for changing strategies of vocational counseling and research are included.) (Author/CRA)

Identifiers-California, United States

In this guide four career education resource areas are identified in four sections. In section 1 community resources are discussed in terms of finding material and human resources, conducting a community survey, coordinating and consolidating resources, and examining exemplary practices. Four exhibits are included: (1) individual career resources questionnaire, (2) general career education opportunities survey, (3) survey of community resources for career education and placement, and (4) military installation education resources survey. The second section presents state and federal career education programs in California. Section 3 identifies the sixteen ERIC Clearinghouses, the San Mateo Educational Resources Center, and the National Center for Career Education. The final section lists publications of stable departments of education, regional career guidance centers, the federal government, and the California Personnel and Guidance Association. In addition, the section lists publications on establishing career centers, and it lists career education journals and newsletters, teacher guides and aids, and measures. Appendixes name state directors of education, national agencies and organizations, and publishers. (CSS)

Descriptors-Adult Education, *Child Rearing, Continuous Learning, Curriculum Development, Leaders Guides, Parent Child Relationship, *Parent Education, *Program Development, *Program Improvement
Identifiers-California

This monograph presents ideas for initiating and/or improving parent education programs. The first of eight sections examines the history of California's parent education since its beginning in 1926. Section 2 discusses developing a parent education philosophy; activities suitable for parent education programs are suggested. Section 3 provides guidelines for program development. Development includes determining community needs, putting the program into action, and establishing parent education classes. Various types of parent education classes are described. The fourth section examines the advantages of schools and/or other locations for the class site selection. Section 5 lists basic equipment needed for childbirth education or preschool education classes. Section 6 considers the selection of teachers, qualities of effective teachers, the use of teacher aides, and involvement of students. Section 7 suggests instructional unit titles which can be used in organizing the curriculum. The final section discusses working with schools for future planning. (CSS)

Identifiers-Europe, France, Germany, Great Britain

Examining the transition from school to work in Europe, this speech focuses on a comparison of initial occupational preparation for young people in France, Germany, and Great Britain. The desired competencies in new entrants to the labor market are listed in four categories: basic cognitive skills; personal qualities and work attitudes; interpersonal skills; analytical abilities and the ability to plan, organize, or make decisions; and specific occupational skills. A detailed description of national systems of skill training in France is provided. The following five issues regarding initial occupational preparation in Europe are presented: (1) What occupations should be designated for training purposes and how can one be separated from another? (2) How long should the training last? (3) In what setting should occupational skills be acquired? (4) Where in the educational and work cycle should this training occur? (5) Who should receive formal skill training? A question and answer section is included in which the author answers questions relating to topics such as apprenticeships, the vocational education system in France, women in vocational education, handicapped people in vocational education, teacher training programs in other countries, manpower and educational planning, and how vocational education in other countries will effect change in the United States' vocational education policy. Designed to aid in the identification of reasons why qualified women do not pursue careers in mathematics, this study surveyed nine schools. Fourth, ninth, and twelfth grade students were selected from inner city and suburban schools. Six schools were selected for the fourth grade, and three schools were selected at the ninth and twelfth grade levels. Four girls, four teachers, and two guidance counselors at each grade level were randomly selected for interviews from the participating schools. Instruments were developed to measure confidence in doing mathematics, to measure interest in mathematics, to determine future plans to study mathematics and reasons for the decisions, and to determine career plans and reasons for the choices. The only statistically significant result from the questionnaires appeared on the question of interest at the twelfth grade level. Girls scored significantly lower than boys at the .01 level of significance. Interview question responses indicated that there is a decrease in girls' interest in mathematics and a sharp increase in societal pressure against women in mathematics during the students' high school years. (Questionnaires and interview questions which were developed for each grade level are appended.) (LRA)

Identifiers-Optimizing Planning Techniques

The purpose of the Optimizing Planning Techniques (OPT) for Comprehensive Systems of Guidance, Counseling, Placement, and Follow-Through project was to help local educational agencies systematically plan and efficiently operate comprehensive guidance and counseling programs. The project (1) identified planning models for comprehensive systems of guidance, counseling, placement, and follow-through; (2) compiled a list of guidance and counseling planning models; (3) trained facilitators in ten states to instruct school district personnel in the use of a planning model; (4) prepared a variety of educational and community personnel in the use of guidance and counseling planning tools; (5) profiled, through a case-study approach, a career guidance planning model to demonstrate how planning models can be adapted to fit local school system needs; and (6) evaluated a planning model's effectiveness in various school system settings. (Sample workshop forms are included.) (Author/CSS)

Descriptors-*Banking, *Carpenters, *Credentials, Educational Research, *Employment Interviews, *Employment Qualifications, Job Applicants, *Job Application, Job Skills, Personnel Evaluation
Identifiers-*Oklahoma

A study was conducted to determine the type of documentation of students' skills desired by employers in the banking and residential carpentry industries. Data were collected by interviews with employers of random samples of banking institutions (thirty-one) and residential carpentry firms (thirty-five) in Oklahoma. Results of the study led to the following conclusions: (1) at present, employers look for those evidences that relate to interpersonal skills and the work ethic rather than vocational skills; (2) candidates able to present an appropriate credential which evaluates job competencies and interpersonal skills will have better opportunities to obtain a job; (3) very little interest was shown in documentation of cognitive skills and levels of education beyond a high school diploma; and (4) there were many commonalities desired in the credential by these two industries. The major recommendation of the study was that the Oklahoma State Department of Vocational and Technical Education staff provide leadership in the development and use of a credential for all vocational programs. Identifiers-Education Amendments 1974, *Michigan

The major goals of this project were (1) to provide high school staff members with an understanding of the process of infusing career education into the curriculum and the capability of applying it in daily classroom lessons, (2) to develop material suitable for use in the process of infusing career education into the high school curriculum, and (3) to provide high school students with a curriculum infused with career education concepts and skills. Thirty-two senior high school staff members were trained in the career development phase of the Michigan model of career education. In examining the specific objectives of the major goals, a third-party evaluator found that 223 of the expected 360 examples were written; students did not demonstrate an increase in self-awareness; and students did not demonstrate increased knowledge of careers. The third-party evaluator also found that training was provided for project teachers, criteria for infusion examples was established, and a slide-tape presentation was completed. (The slide-tape script and final evaluation report are appended.) (LRA)

This career education implementation guide is designed for Michigan school districts which have not yet developed their plans for career education, as well as for those that are already immersed in initial planning or experimental implementation. The introduction found in section one includes such information as an overview of the related federal legislation and an annotated outline of this handbook. Section two provides suggestions and information useful for planning and conducting awareness and understanding activities. It also includes a list of items useful in such an effort. Section three outlines suggestions and information regarding known effective techniques for organizing a Local Education Agency and a Career Education Planning District. Section four describes the planning formats, requirements, and needed resources. In addition, this section of the handbook includes a Goals Setting Package, a suggested approach to developing and prioritizing goals. Details pertaining to program development and operation are presented in section five, and policy and requirements for program evaluation are explained in section six. The final section provides a listing of resources available for planning, implementing, and evaluating a career education program. (BM)

Descriptors-Advisory Committees, Apprenticeships, *Career Education, Career Exploration, Cooperative Programs, Educational Policy, Employment Programs, *Experiential Learning, Job Training, *Policy Formation, Service Education, *Vocational Education, Work Experience Programs, Youth Programs

Sixteen guideline recommendations developed by an experiential education advisory panel are presented. Policy guidelines are intended for use in developing experiential education programs. Each issue is briefly delineated; major points that were offered for the panel's consideration are highlighted. The issue statements concern the following areas: learner objectives, site selection, evaluation, structure for learning, diversity of experiences, identification of learners, access to various employment levels, program expansion, commitment to programs, worker protection, legal requirements, paid experiences, academic credit, employment credit, preparation of educational personnel, and preparation of workplace personnel. Immediately following each issue statement is the panel's guideline recommendation including the rationale, safeguard, and potential benefits. For example, the first recommendation is that experiential education goals should be translated into specific learner objectives and should be stated in terms that reflect shared understanding among all participants. This primer provides resources for individuals seeking exemplary programs and effective policy in the field of experiential education. The first of three parts presents a descriptive overview of programs catalogued under the rubric of experiential learning. These include cooperative vocational education; employment, training, and education motivation programs; experience-based academic programs; career exploration programs; apprenticeship programs; supervised volunteer work; and general work experience programs. Section 2 contains descriptions by program directors/leaders of the policy making processes, guidelines, and participants in nine programs: The Academic Internship Program, The College Venture Program, The Executive High School Internships Program, 70001 Ltd., The Hampden County Manpower Programs, Recruitment and Training Program, Cooperative Vocational Education Programs, Walkabout, and Experience-Based Career Education. The final section contains abstracts of forty programs that were chosen because of their innovation, stability, and effectiveness. Abstracts include the following information where appropriate: program address; purpose; national model; publication; total enrollment; funding source; population served; selection procedure; pay; time at work/learning site;

graduation credit; evaluation of participants; cost; supervision at community site; business, labor, community involvement in program policy making; orientation information; coordination with classroom instruction; real work credit for experiential learning; program guidelines; legal problems; transportation to job site; follow-up studies; and comments. Descriptors-*Community Resources, *Educational Planning, *Instructional Materials, Occupational Clusters, *Occupational Information, *School Community Programs, *School Community Relationship

Identifiers-Indiana

The purpose of this guide is to help educators consider the community as an integral part of the total educational program. The document is divided into two major parts. Part one contains a guide for the use of community resources. These uses are categorized into the following five areas: (1) developing resource linkages; (2) the school as a community; (3) the community as a school; (4) communicating across linkages; and (5) personnel development. Part two contains a bibliography of different types of enterprises from which educational materials are available. These enterprises are categorized by the following occupational clusters: agriculture/forestry; construction; finance/insurance; government/public service; health/learning; manufacturing/mining; personal service/entertainment; transportation; wholesale/retail; and other (for those resources not classified by the previous categories). These enterprises make up the employment opportunities in Indiana communities. In most cases, the types of resources available are printed materials which emphasize the nature and opportunities of specific jobs or groups of jobs. An alphabetical index by occupation is appended. Descriptors-*Cooperative Programs, Economic Development, Educational Development, Human Resources, *Industry, Management Education, *Models, *Program Development, *Technology

Identifiers-British Columbia, *Entrepreneurship

This report examines a study to promote high-technology industries in British Columbia using an essentially integrated educational and economic development program. Human resources, skilled in high-technology and entrepreneurship, are recognized as prime sources of potential development of high-technology industries in the Province. An educational program integrating technological and managerial training is proposed for the development of such a resource, and is illustrated by examining the possibilities in the field of fine-chemicals and pharmaceuticals manufacturing. A model involving the discovery park'' concept working through an active cooperation between educational institution, different departments and levels of government, small-scale manufacturing units, and a cooperative-based large marketing corporation is proposed. The study suggests a number of benefits to be accrued from such a model. Finally, the proposed model is broadly examined in terms of the cost involved in its development, and some suggestions are given as to the most economical way to proceed. Appended materials include the basic proposal, a list of British Columbia and Canadian financial assistance programs, and a bibliography. (CT)

Identifiers-British Columbia, *British Columbia Institute of Technology

To examine the feasibility of introducing a program of cooperative education at the British Columbia Institute of Technology (BCIT), a task force assessed the problems encountered by other institutions which have introduced cooperative education. Attention was given to the support that might be expected for cooperative education among students, faculty, and employers. The committee considered the impact which cooperative education will have on course scheduling, labor/management relations, student supervision, departmental responsibilities, and resource use. The task force also examined the applicability of different models of cooperative education and the rate of implementation. The committee found that the introduction of cooperative education would require achievable changes in program scheduling, faculty working conditions, organizational structure, and resource allocation. It was concluded that several patterns of cooperative education, and in particular one in which periods of work experience are alternated with terms of classroom instruction, would be practical at BCIT. Recommendations supported cooperative education, suggested dates for implementation, and offered guidelines for dealing with the implications of the program. (Survey forms, plans for implementation, a sample training plan record, and articles relating to cooperative education are appended.) (LRA)

Identifiers-Free Library of Philadelphia, *Lifelong Learning

A study was conducted to assess client reaction to key activities of the Lifelong Learning Center (LLC) of the Free Library of Philadelphia and to identify particular patterns of client interest. A survey was developed to determine (1) clients' satisfaction with accessibility of services, quality of interaction with staff, and information provided; (2) clients' perception of their needs at first contact with the LLC; and (3) clients' reported outcomes developed from their LLC consultation experience. Other questions were asked about the clients' outlook on life, how the LLC contact "all turned out," and if the client had encouraged others to participate. From a random sample surveyed by mail, 51% (162 clients) responded. Most respondents were in their mid-twenties; 74% were female; 45% were married; and the average of schooling was two years collegiate experience. It was found that there was considerable satisfaction with the existential dimensions of contact with the LLC particularly with counseling. Employment-related concerns were ranked highest; this suggests the possibility that client expectations were focused on the immediate employment situation. Of the 162 respondents, 128 reported an action outcome; 60 persons reported starting or changing jobs; and 68 reported enrollment in some educational activity. (CSS)

Identifiers-*Lifelong Learning, Reading Public Library PA

The Lifelong Learning Center at the Reading Public Library conducted a study to determine how the clients perceived various aspects of the center's activities in terms of their needs and expectations. A survey was mailed to 329 clients; the response rate was 51%. Survey questions asked about (1) clients' satisfaction with access conditions, staff interaction, and information exchange; (2) clients' recollection of importance of needs and information at the time of contact; and (3) clients' perception of the outcomes and importance of the outcomes. Other questions concerned the clients' view of "how it all turned out," feelings about life generally, reactions to antonyms, and readiness to recommend to others. Interviews were conducted to determine how the experience fitted into the person's life. Analysis of responses revealed that persons who received either counseling or information reported high satisfaction levels with services accessibility, information quality, and staff relationships. The most valuable center asset was perceived as the interpersonal staff exchange. Outcomes included 69 enrollments in colleges, schools and courses and 32 reportedly favorable job adjustments. No serious program omissions were uncovered. There was a high level of satisfaction with the program's development and readiness to recommend it to others. (The survey instruments are included.) Identifiers-Adult Education Act, Adult Performance Level, United States

This catalog provides descriptions of specific adult education programs funded under Sections 306 (a) (4) and 309 (1 and 2) of the Adult Education Act. It consists of three sections: project summaries, a subject index, and statistical matrices. Project summaries are organized alphabetically by state of origin and grouped under headings of major emphasis. Each entry includes the title, a contact person, objectives, description, funding information, target audience, products, and evaluation method. The subject index provides a cross-reference to programmatic emphases of each project. It contains major subject categories with additional descriptive phrases to aid in determining the project's exact focus. The final section contains six matrices which provide a profile of demonstration, staff development, research, and special projects by identifying programmatic emphases and weaknesses, and a summary of projects that generate products. Identifiers-*Distributive Education Clubs of America, Virginia

A study was conducted to accomplish three objectives: (1) identify and validate the tasks performed by distributive education teacher coordinators in the role of Distributive Education Clubs of America (DECA) chapter advisors; (2) identify competencies needed by teacher-coordinators to perform these tasks; and (3) develop instructional modules for use in inservice or preservice distributive education teacher education. Questionnaires concerning ninety-seven tasks were mailed to a random sample of teacher-coordinators, and all assistant state supervisors, local supervisors, and teacher educators in Virginia. The questionnaire concerned the relevancy of the tasks, the extent to which coordinators performed the tasks in the role of advisors, and the location at which the tasks should be learned. Fifty percent or more of the responding teacher-coordinators indicated that they performed all of the ninety-seven talks listed in their role as DECA advisors. Fifty percent or more of the assistant state supervisors, local supervisors, and teacher educators indicated that teacher-coordinators should perform all ninety-seven tasks. The extent to which the tasks should be developed varied among the tasks. The major locations at which the tasks should be learned were identified as preservice and inservice programs. Instructional Modules were developed for each cluster of tasks and included objectives, learning activities, instructional materials, and evaluation instruments. (Author/JH)

This instruction manual was developed as a pilot by the National Assessment of Educational Progress (NAEP) to help educators conduct program and pupil evaluations and/or needs assessments in the area of career and occupational development (COD). An introduction presents the history of the National Assessment, explains the variety of uses for NAEP materials, and tells what is included in this assessment kit. The remainder of the manual is divided into four chapters. Chapter one contains the COD objectives, samples of the assessment items developed from these objectives, a description of the item format, general guidelines for using these materials, and guidelines for modifying the items and for generating other evaluation items. Chapter two provides instruction for administering the items, and chapter three provides instructions for using the results. Guidelines for scoring the items and tallying the results are presented in chapter four. The following information is appended: a discussion of survey sampling; a table of the items showing administration type, scoring type, and timings; definitions for NAEP reporting groups; and NAEP scoring rules for open-ended items. Technical Education Research Centers initiated the Career Change Project to discover, study, and publicize programs that assist adults to make major career changes. The project surveyed by mail and phone 800 businesses and industrial firms, 1500 postsecondary educational institutions and contacted twenty government agencies, professional associations, and labor unions in order to find career change programs. These programs ideally combined career and life counseling, education/training for a new career, job placement services, and follow-up mechanisms. Ten case histories were written to describe programs in four firms, three government agencies, two schools, and a professional association. An overview monograph also was written to present career counseling centers operated by or affiliated with nine postsecondary institutions. The major product of this study was a book entitled Career Change: A Handbook of Exemplary Programs in Business and Industrial Firms, Educational Institutions, Government Agencies, and Professional Associations.'' The handbook includes the case histories and monograph along with a general discussion of career change, an individual career change model, and a summary of the survey findings. (LRA/Author)

Identifiers-*Alabama

This publication reports background information, a rationale, and a proposed state system for classification and retrieval of vocational-technical education curriculum materials for Alabama - a result of the state/federal-funded project entitled ``Vocational Education Curriculum Operation Management Plan'' (VO-ED COMP). Major components of the recommended system are listed: planning, organizing, acquisition, processing, storage/filing, retrieval, and evaluation. Service is discussed from the viewpoint of a central focus, permeating all components. An automated, machine-readable documentation procedure is recommended, along with a centralized vocational-technical curriculum resources library. Recommendations for staffing and procedures for implementing and operating the library are made and sample forms are appended. (Author/CT)

Identifiers-Alabama

One aspect of the State/Federally funded project VO-ED COMP (Vocational Education Curriculum Operation-Management Plan carried out in Alabama during 1978) was the determination of priorities for curricular development and management functions in Alabama's vocational technical education programs. A needs assessment study was made at the 1978 secondary and postsecondary vocational work conferences. An instrument was developed, trial tested and administered during the registration at each conference. Respondents were primarily vocational teachers in trade and industrial, home economics or agribusiness educaiton. Audiovisuals were in greatest demand, followed by teacher guides and studen materials. Curriculum information most needed were lists of training aids, disadvantaged/handicapped materials and lists of references; curriculum services most needed were help with locating instructional materials, inservice workshops (industry- and school-sponsored) and college credit curriculum courses. The researchers called for yearly assesment of needs, broad representation of personnel in needs surveys, broadly-based development of instructional materials to meet diverse needs, increased availability of audiovisuals/student materials/teacher guides, and expansion of availability of the curriculum information and services checked by respondents. Program areas identified as top priority for curriculum development in Alabama included agricultural production, accounting/computing, practical nurse, carpentry, ornamental horticulture, apparel/accessories, drafting, and industrial electricity. This report entails background information and a proposed model for assessment of personnel responsible for curriculum development and management in Vocational-Technical education in Alabama (the result of a state/federal-funded project entitled Vocational Education Curriculum Operation Management Plan'' or VO-ED COMP). Four approaches to personnel evaluation are reviewed: (1) trait evaluation, (2) work measurement evaluation, (3) job description evaluation, and (4) evaluation by results. Examples and forms are provided for each type, and - major strengths and weaknesses are given. Possible evaluators are listed as (1) supervisors, (2) peers, (3) self, (4) subordinates, and (5) outsiders. Specific steps for implementing the model are listed, forms are included and a timetable is given. An annotated bibliography of pertinent literature is found at the end of the report. (Author/CT)

Identifiers-*Alabama, American Institutes for Research

A state/federal-funded project for the development of a coordinated curriculum development and management plan was carried out in Alabama in 1977-79 and was titled VO-ED COMP (Vocational Education Curriculum Operation Management Plan). The proposed model consisted of twelve steps: (1) identification of needs, (2) instructional material priority determination, (3) establishment of curriculum standards and policies, (4) state approval, (5) material review, (6) adaptation, development or procurement of materials, (7) pilot or field test, (8) printing or production, (9) dissemination/diffusion, (10) local utilization, (11) evaluation, and (12) recycling. An operation and management plan for administration of the model was outlined; functions of the Curriculum Development Unit (CDU) and its committees, units, and positions were delineated; staffing patterns and positions were indicated; and a pre-service/in-service professional development plan for vocational curriculum personnel was recommended. The latter plan advocated utilization of the Vocational Education Curriculum Specialist Materials developed by the American Institutes for Research, Palo Alto, California. (Author/CT)

This module is designed to enable the teacher working in an actual school situation with a special needs learner to develop an individualized instruction program based on a diagnostic, prescriptive teaching model. The first of three chapters contains three learning experience activities which are designed to help the teacher demonstrate knowledge of (1) the handicapping conditions and educational goals of special needs learners, (2) delivery systems used in designing instruction, and (3) the diagnostic prescriptive model as it relates to individual instruction. Each learning experience contains an objective, learning activity, optional learning activity, self check activity, and feedback. Chapter two is a review of related literature. The third chapter contains a training packet to help teachers develop affective and cognitive understanding of the mainstreaming concept and its implications for training people who have special needs to obtain and keep rewarding and satisfying jobs. Objectives, activities, evaluation methods, and learning materials are presented in chart form. (LRA)

Identifiers-Center for Career Education in the Arts RI

This report describes the Center for Career Education in the Arts' (CCEA) alternative training program for artistically gifted and talented high school students interested in pursuing careers in the visual arts, dance, music, theatre, and writing. Following an introduction, hypothesis statement, and identification of project goals, the first of three sections presents a review of the project setting, planning procedures, staff involvement, and pilot semester evaluation. Section 2 describes the activities used in implementing the curriculum goals which were to develop (1) the students' self-knowledge and understanding, (2) students' knowledge about work, (3) decision making skills, and (4) parents' understanding of their child's talents and values as related to career decision making. For each goal specific objectives are stated and activities are described. The third section contains an abstract of the third party evaluation, selected statements from students, and a retrospective review of the career education sequence as seen by students and faculty. The evaluation abstract states that the program was successful in increasing students' positive attitudes towards themselves and towards work in arts; and career decision making skills were increased. Conclusions and recommendations are also presented. (LRA)

Identifiers-Center for Career Education in the Arts RI

This curriculum strategy for career education in the arts is designed to be used as a supplement to a secondary education arts training program. The curriculum is divided into four goal areas: (1) developing self knowledge, (2) developing knowledge about work in the arts, (3) relating knowledge of self to knowledge of work in the arts, and (4) developing parental knowledge about careers in the arts. For each goal area there are goal indicators/strategies, objectives, procedures for planning, suggested resources, and suggested evaluation methods. It is suggested that training programs offer possibilities for interdisciplinary work as well as study with a single art form. (LRA)

Identifiers-*Center for Career Education in the Arts RI

The Center for Career Education in the Arts (CCEA) is a training program for high school students talented in the arts. Operating on a regional basis, the CCEA offers a full academic year of daily study in art, dance, music, theatre, and writing. Students who participate in the program take their academics at their home school and attend the CCEA for three hours in the afternoon. The program places special emphasis upon career education in the arts. The CCEA follows a vocational education approach, providing intensive, work related study with working artists. In order to participate in the CCEA program a student must fill out an application and go through an interview process. It is the intention of the auditions to find students who are most ready for an intensive and challenging training program. (Application forms, reference forms, audition forms, audition procedures, and the student evaluation form are appended.) (LRA)

This brief student workbook is designed to help students think about their needs, their motivations, how they like to work, what their interests are, and what kind of relationships they want to have with others. It is intended to start students thinking about what they would like to know about themselves, careers in the arts, and artists. The first of three sections in the workbook gives the students an opportunity to state why they want to work in the arts. The second section presents the following five ways to get involved with the arts: (1) making art objects, (2) performing for others, (3) collaborating with others, (4) sharing the arts with others, and (5) participating in arts related careers. The final section encourages students to write about the experiences they have received in the arts. (LRA)

Identifiers-Center for Career Education in the Arts RI

Policy Studies in Education (a department of the Educational Research Council of America) performed a third-party evaluation of the Career Education in the Arts program for gifted and talented secondary school students. The study focused primarily on a pretest and posttest of twenty-five students' career awareness and attitudes. Eighteen students were female and seven were male. The evaluators also visited the program site twice to discuss objectives and plans, review and revise the questionnaires, and to talk with students. Findings indicated that in both the pretest and posttest, students showed fairly favorable attitudes toward themselves, the arts, and the world of work in the arts. Students showed many positive changes in cognitive items which dealt with knowledge about work in the arts and career decision making. Through site visits and talking with students, it was determined that students' attitudes toward the program were very positive. Through the questionnaire, it was found that slightly over half of the students felt that students who participate in the program could expect to gain enough knowledge to make a final decision about pursuing a career in the arts. The two most pressing needs of the project are (1) rethinking parental involvement in the project, and (2) continuing to develop, revise, and refine the career education component of the program. Identifiers-*California (Ceres)

This compendium of career education activities serves as a guideline for teachers intending to infuse career education into their present activities. The eleven major subject areas are art, language arts, math, music, science, social studies, driver education, English as a second language, health, physical education, and Spanish. Each subject area is further broken down by course; i.e., courses offered under science include physics, health, and ecology. Further, each course is categorized by topic or unit'' and each of these topics or units are further divided into activities.'' Each activity is described fully; activities of significant value may be located in several subject areas. The final section of this document cross references the materials by occupational cluster. Descriptors-*Manpower Development, *On the Job Training, Participant Involvement, *Participant Satisfaction, Problems, Program Evaluation, Training Techniques
Identifiers-*Oregon (Portland), *Vouchered Manpower Training, Work Incentive Program

From 1974 through 1976, a program to test the feasibility of vouchering manpower training was incorporated into the existing Work Incentive (WIN) program in Portland, Oregon. The purpose of the second phase of the program was to evaluate the feasibility of incorporating vouchers into an on-the-job (OJT) program as an optional component that clients could choose. (Phase one dealt with the evaluation of vouchered training offered by educational institutions.) Vouchers were issued to a total of 345 clients. Training and follow-up data were collected for them and for a group of 139 WIN clients who were placed in regular OJT slots during the same period. Voucher clients experienced considerable difficulty in obtaining training positions; those who did succeed in making use of the voucher tended to locate more desirable positions than regular trainees in terms of pay and occupational preference. Dropout rates and longer-term labor force participation and welfare dependency did not differ significantly for the two groups. (Author/JH)

Health care is demanding increasing resources and attention in numbers of health care workers, in levels of skills required, in time spent in training, and in dollars expended. A greater spectrum of skills is required to cope with increasing health care demands, yet trends toward specialization and fracturing of responsibilities assigned to health care personnel often obstruct opportunity for application of the individual's full range of preparation. In the South, college allied health programs have registered a seven-fold increase in graduates and basic registered nursing programs have doubled, but geographical distribution problems prevent easing of worker shortages. To insure the quality of care, there is a trend to lengthen the educational preparation for entry into many allied health fields, yet there is evidence that many workers are overtrained for the task they perform. Lengthened programs can enhance the quality of preparation, but also raise the total cost of health care. In considering the many current proposals for allied health and registered nurse programs at higher degree levels, postsecondary education should distinguish between needs for selective advanced education versus a general lengthening of entry-level preparation. Descriptors-Aircraft Pilots, *Flight Training, Measurement Techniques, Military Training, *Simulators, Statistical Analysis, *Tables (Data), *Task Performance
Identifiers-Air Force, *Good Stick Index, United States

A study was conducted to investigate and statistically validate a performance measuring system (the Good Stick Index) in the Tactical Air Command Combat Engagement Simulator I (TAC ACES I) Air Combat Maneuvering (ACM) training program. The study utilized a twelve-week sample of eighty-nine student pilots to statistically validate the Good Stick Index (GSI) as an objective measure of pilot air combat skill, to compare GSI measures to the subjective judgment of ACM skill made by instructor pilots, to investigate improvements as a measure of ACM skill, and to evaluate GSI's utility as a training aid. (GSI utilizes four parameters as indicators of air combat skill: time in gun firing envelope, average mil error, offensive/ defensive time, and time to first kill.) It was concluded from analysis of the data that the GSI was a measure of ACM skill with contributory parameters consistent with intuitive expert opinion and with an acceptable level of accurate assessment of skill in the simulator. The GSI score was judged to be useful in evaluating individual and group learning within training programs in ACM. The individual parameters comprising the GSI were found usable as teaching guides. (JH)

Identifiers-*Indiana

This common core curriculum guide for agribusiness presents material for eight units of instruction. Following the objectives of the guide and a description of the curriculum materials, lessons are provided in the following subject areas: (1) orientation, (2) leadership, (3) careers, (4) supervised occupational education, (5) mechanics, (6) animal science, (7) horticulture, and (8) conservation of natural resources. Provided within each of the lessons are lesson objectives, motivation ideas, references, outlines, teaching learning activities, and a suggested evaluation. The leadership unit examines public speaking skills and provides practice in conducting meetings. Information on selecting a career and applying for and working at a job is given in the careers unit. The supervised occupational education unit presents information on how to summarize and analyze the job that the student selected in the previous year. The mechanics unit introduces skills that are of importance to people employed in agribusiness occupations. The three technical agribusiness units, animal science, horticulture, and conservation of natural resources, examine specialized information and provide practice in skills from each major agribusiness area. Identifiers-*Florida

The purpose of this study was to identify the reading-related teaching competencies that will be of potential use to vocational teachers if they are to develop the reading skills necessary for classroom instruction and job success. Questionnaires were sent to 591 teachers in all areas of vocational education. Questionnaire items were rated according to degree of importance as perceived by the vocational teachers for their particular program areas. Results revealed six tasks which were generic to all programs. Tasks included the following: (1) determine students' strengths and weaknesses; (2) select teaching techniques that meet the instructional needs of individual students; (3) assign students to master specialized technical vocabulary related to course of instruction; (4) encourage students to use the correct definitions of words; (5) encourage students to interpret information, draw conclusions, and predict outcomes when reading; and (6) assign students to read a sequence of events, methods or steps, or to follow written directions. Each individual program identified twelve to twenty-six competencies unique to their area. (Survey instruments are appended.) (LRA)

Descriptors-*Information Dissemination, *Metric System, Program Development, Secondary Education, *Skill Development, Teacher Education, Vocational Education, *Workshops
Identifiers-Pennsylvania

A workshop was conducted to train local representatives from area vocational-technical schools in Pennsylvania to implement the metric materials developed by the Center for Vocational Education at The Ohio State University. As a result of the workshop, the local representatives were to become part of the dissemination process by supporting other teachers through consultations or conducting local workshops. Participants developed lesson plans to incorporate instruction in metric measurement at the laboratory/shop level to assist local instructors. As a result of participant evaluation it was concluded that the participants exhibited increased awareness of the metric system, developed hands-on competencies in using metric tools, equipment and devices for measurement, and developed skills in the use of conversion tables and for slide rules. (A major portion of the document is comprised of attachments, including the workshop agenda, a handout describing the metric system, instructional packets learning activities , metric units-common and uncommon, use of metric slide rule, lesson plan samples, metric workshop evaluation, and metric measurement test.) Descriptors-*Adult Vocational Education, *Models, *Performance Based Education, *Program Evaluation, *Tests

This applied project recognized the priority to identify, describe, and evaluate existing vocational education programs that are coordinated with the adult performance level (APL) competency based approach. Furthermore, the project supported the value of developing and testing one or more models for APL/vocational education interface. In order to satisfy the objectives of the project, two monographs were prepared and an APL Curriculum Materials Catalog was compiled which used three criteria for materials included in the catalog. In field testing the project's competency-based Adult Vocational Model, pre- and post-testing of the adult learners, using the Adult APL Survey, was performed. When the results of the pre- and post-test scores, using the t-test of correlated means, were analyzed, a difference at the .05 level of significance was revealed. The instructors who field tested the model expressed an overall favorable attitude toward infusion of APL material into their vocational subjects. As a result of their support, recommendations were made that this study be replicated using a wider representation of vocational areas. Findings of the study included the recommendations that the State-of-the-Art and the APL Curriculum Catalog be updated yearly because of the continuing development of APL programs and materials. Identifiers-*Comprehensive Employment and Training Act, *Youth Employment Demonstration Projects Act

Designed to assist local education agency representatives and prime sponsors of the Comprehensive Employment and Training Act (CETA) programs in initiating and implementing awarding of academic credit for work experience, this report reviews the issues evolving from the Youth Employment and Demonstration Projects Act of 1977. Three major sections are contained in the report: (1) regulatory and policy aspects of academic credit for work experience, which discusses local laws, regulations, and policy affecting work experience programs and the awarding of credit; (2) the work experience section which relates learning in an out-of-school setting and efforts required to encourage the development of work experience competencies; and (3) the academic credit section which presents concerns regarding credentialing and assessment and possible future directions. These three sections provide an overview of the concerns surrounding work experience for youth and academic credit for such work experience. Recommendations are made to help local schools and CETA prime sponsors to provide youth with the success possible through credited work experience. The appendixes contain a series of models for awarding academic credit and a compilation of information from six selected states. (LRA)

Descriptors-*Career Education, Community Colleges, Junior Colleges, Postsecondary Education, *Private Schools, *Public Schools, Universities, *Vocational Education, Vocational Schools

This directory of schools which provide occupational training lists public and private schools which offer programs in preparation for a specific career. The types of listings include schools classified as vocational/technical, business/commercial, cosmetology/barber, flight, arts/design, hospital, and allied health; technical institutes, junior/community colleges; and four-year colleges and universities. Schools are listed alphabetically and are arranged in a format including address, telephone number, affiliation, type of school, enrollment figure, accreditation, eligibility, and types of programs offered. The appendixes include a list of schools offering occupational programs through correspondence, a program index, and a school and institution index. (CT)

Identifiers-United States

This handbook is divided into four major sections with the first section serving as a guide to the handbook. This introductory section tells how to use the handbook, where to go for more career information, how employment projections are made, and where tommorrow's jobs will be. The outlook for occupations in section 2 contains 300 occupational briefs grouped into thirteen clusters of related jobs. Clusters include occupations in areas such as industrial production; office occupations; service occupations; sales; transportation; scientific and technical occupations; mechanics; health occupations; social areas; and art, design, and communication occupations. For each specific occupation listed, information is given on the nature of the work, training requirements and other qualifications, opportunities for advancement, and expected earnings. The third section contains brief discriptions of thirty-five major industries. Major industry areas discussed are agriculture, mining and petroleum, construction, manufacturing, transportation, wholesale and retail trade, finance, service industries, and government. The fourth section provides an index of job titles by "Dictionary of Occupational Titles" code. An alphabetical index to occupations and industries found in the handbook is also included. (LRA)

Descriptors-Career Awareness, *Career Education, *Discussion (Teaching Technique), *Elementary Education, Individual Characteristics, Interpersonal Competence, *Learning Activities, *Sex Fairness, *Sex Stereotypes, Validated Programs

This teacher's guide contains short-term activities aimed at expanding K-6 grade students' awareness of attitudes concerning traditional sex-role stereotyping. Subject areas are language arts, social studies, career education, mathematics, and physical education. Activities are divided into 10-20 minute, 20-40 minute, and 40 minute plus activities. Each activity lists objectives and teacher and student instructions. Sample titles include Are Hammers Just for Men or Are They for People?'', Time Capsule Letter,'' and Research Project - Favorite Television Programs.'' The appendix includes definitions of such terms as work, role, and skill; fourteen facts on women workers; and listings of supplementary resources such as bibliographies, pamphlets, books, films, multi-media kits, records, and games. Descriptors-*Career Choice, *Career Education, *Discussion (Teaching Technique), Elementary Education, *Sex Fairness, *Sex Stereotypes, Validated Programs, *Working Women

This collection of photographs and discussion questions for elementary students is designed to complement and supplement already existing

instructional materials by showing females and males engaged in nonstereotyped jobs and activities. The guide provides definitions of terms such as work, career, duty, sexism, and stereotype; fourteen facts on women workers; possible uses of work pictures; concepts to keep in mind during discussions; use of discussion questions; and the work pictures. The work pictures (eighteen of children, twenty-nine of adults) include suggested discussion questions for each picture. Sample work pictures of children are newspaper carrier, watering plants, and school office assistant. Sample work pictures of adults are meat cutter, kindergarten teacher, and research biologist. Descriptors-*Community Cooperation, Community Involvement, *Community Organizations, Community Support, *Educational Policy, Job Skills, Labor Force, *Manpower Development, Objectives, *Policy Formation, Program Development, Skill Development, *Youth Employment

The principal aim of community work-education councils is to make the transition between the worlds of education and work more rational through a deliberative, collaborative process of public and private interests and initiatives. A cross section of the community must work together as peers in a flexible give and take spirit. Councils should avoid exotic or macroscopic problems. Articulation of a set of specific prioritized problems is a productive way to begin. The prerequisites and steps in the development of community work-education councils includes (1) propitious community climate, (2) optimum participation and representation of community interests, (3) informal idea-swapping and bread-breaking, (4) issue discernment and enumeration, (5) forming an ad hoc working committee, (6) goodwill building, (7) goal formulation, (8) building and sustaining commitment, (9) establishing a formal work-education council, and (10) ongoing issue discernment and goal formulation. As a product of the Career Change Project by the Technical Education Research Centers, this book describes specific career change programs currently operated by a variety of organizations and includes other information relevant to career change. The book is divided into six major sections. The first section is an introduction which includes chapters on career change in perspective, a career change model and support services, and identification of career change programs. The second section of the book describes four career change programs in business and industry. Section 3 discusses three programs in educational institutions. Three programs for career change in government agencies are presented in section 4. The fifth section discusses two programs which are organized by professional associations. The final section of the book presents a short discussion of other career change programs throughout the United States and briefly describes two current career change research projects. (A more detailed description of the career change programs discussed in this book may be found in the project's case histories see note.) (LRA)

Identifiers-*Tektronix Inc

This case history describes the Tektronix, Inc. program of career fulfillment for its 11,000 employees. The study is divided into seven major sections. The first four sections deal with the purpose and philosophy of the program, history and company culture, organizational structure and staff, funding and resources. The fifth section presents mechanisms facilitating employee career mobility. Included in these are the following formal and informal components: (1) traditional informal career discussions with the employee's manager or equivalent; (2) pilot programs to make career counseling more formal and accessible to employees; (3) formal education and training offerings, as well as educational counseling; and (4) an expanded job posting system. The sixth section contains examples of nine career changers at Tektronix. The final section discusses future possibilities for increased employee career change options. (LRA)

Identifiers-*Washington

This case history describes the Washington State Career Change Program which is designed to respond to the career needs of unemployed residents who have been laid off or unable to continue their jobs as a result of economic, technological, or health factors beyond their control. The career change program assists these individuals in identifying new career objectives, acquiring job-seeking skills and short-term career training, and in finding viable employment in their chosen career areas. In addition to discussing the overall structure and goals of the program, this case also describes the services offered by the nine contracting agencies which implement the program across the state. There is also a delineation of the program's strengths and weaknesses which have been identified during the first two years of operation, as well as a discussion of changes which are anticipated in the future. The program is operated by the Washington Employment Security Department and is funded through the Comprehensive Employment and Training Act and state funds. (LRA)

Identifiers-*National Association of Bank Women

This case description portrays the educational programs of the National Association of Bank Women designed to meet the special needs of women seeking advancement or career changes in the banking industry. After sketching several shorter programs, the case elaborates upon the collaborative Baccalaureate Degree Program in Management for Women, which is offered at Simmons College in Boston, Mundelein College in Illinois, and Pitzer College in California. This program combines liberal arts, management education, and special training in attitudes and skills less common for women than for men aspiring to executive positions. The program also concentrates college residential requirements in two-week, semi-annual institutes and allows bank women to obtain credits by means of transfer courses, prior work experiences, and independent study. With these credit vehicles and the cooperation of their banks, women can work full-time and still complete the degree in three years. (This case description also includes examples of students who are participating in the management degree program.) (LRA)

The Federal Aviation Administration's (FAA) retraining program is for air traffic controllers who have been removed from their jobs due to either operational or medical disqualifications. The FAA's New England region second career program deals mainly with older adults who have completed their child rearing and related family responsibilities by the time they enter the program. The services provided by the second career program include vocational counseling and assessment, training, monitoring client progress, and placement services. In the New England program, primary emphasis is placed on securing on-the-job training situations for clients. According to follow-up questionnaire responses, 25% of the program graduates are currently employed. (Interviews with program participants which represent a variety of career choices and training situations are included.) (LRA)

Identifiers-*Metropolitan State University MA

In the adult development and career change program of Metropolitan State University (Minneapolis-St. Paul), a student sets a career or personal enhancement goal and develops a plan detailing the competencies necessary to achieve that goal. The competencies and learning gained from prior experiences are then assessed and documented, while learning activities are designed to gain new competencies. Learning strategy options available to students include (1) group learning opportunities, (2) faculty-designed independent studies, (3) student-designed independent study, (4) internships, and (5) workshops. Metropolitan State University is unique in that it has no campus and only twenty-five permanent faculty members. It relies on community resources including the libraries of three dozen institutions and approximately 300 part-time community faculty members with special expertise. Students design and implement their own education with the guidance of a faculty advisor assigned by the institution. For this reason, the program is especially attractive to fulltime workers seeking career change. (Included in this case history are examples of students who have graduated from the program.) (LRA)

Bilingual Metric Education Modules for Postsecondary and Adult Vocational Education. Core Units, I - V (English and Spanish).

Five instructional units on the metric system of weights and measures are provided in this document designed for use with bilingual (English and Spanish) students in postsecondary and adult vocational education programs. (This document, divided into Spanish and English versions, is designed to be used with three documents CE 022 167, CE 022 168, and CE 022 169.) The unit titles are (1) measuring length and finding area, (2) measuring volume, (3) measuring time and finding speed and acceleration rates, (4) measuring mass and power, and (5) measuring temperature and energy. Each unit uses the common reference point approach to instruction and includes these elements: a statement of objectives, suggested activities for instructor and student, information sheets, assignment and job sheets, transparency masters, and a unit test with answer key. Identifiers-United States (Southeast)

To identify the issues, characteristics, barriers, and needs related to vocational education provisions in Southeastern correctional institutions, a project was developed. Survey data was collected through a 100% sample of adult and juvenile correctional facilities in seven states. Study procedures utilized a combination of state level interviews, a general survey of institutions, and site visits to nominated exemplary programs. Issues identifited as major topics of concern were (1) population served, (2) barriers and needs, (3) funding, (4) policy, (5) coordination and cooperation, (6) planning, (7) the organizational structure of the delivery system, (8) the character of existing programs, and (9) the nature of successful/exemplary programs. Major identified personnel needs included the need for counselors, additional vocational and academic teachers, special education teachers, reading specialists, and clerical support. Major identified programmatic needs included the need for a comprehensive follow-up system, a job referral service, and additional space. Furthermore, it was found that the character of vocational programs in terms of populations served, types of programs offered, the status of women, and entry requirements was highly similar to the rest of the nation. (Survey instruments are appended.) (Author/LRA)

Identifiers-United States (Southeast)

A study was conducted to identify and describe programmatic variables contributing to effective, successful, and innovative vocational education programs in Southeastern correctional institutions. Study sites were selected according to how effectively they promoted in-program success and post-release employment. Data was collected through interviews in twenty-one Southeastern adult and juvenile correctional institutions with program directors, participants (inmates/offenders), instructors, employers, and wardens/superintendents. Variables found to contribute to and to be correlated with successful programs were course development, instruction, inmate characteristics/perceptions, facilities/equipment, instructor characteristics, evaluation, agency cooperation, in-take and release procedures, policy, and support services. Several findings concerning program success were (1) that exemplary programs utilized systems of course and program development which were coordinated with other agencies and empoloyed quantitative data for determining program modification; (2) that instructional methods found to contribute to successful programs included individualized instruction, "live" work and "hands-on" experience, and multi-media classroom instruction, and (3) that the majority of programs utilized support services to supplement their regular instructional programs, e.g., psychological and vocational counseling, tutoring, job placement services. (The key variables checklist is appended.) (CSS)

Identifiers-United States (Southeast)

A project was initiated to describe vocational education in correctional institutions in Health, Education, and Welfare Region IV, the Southeastern United States. Project objectives were to (1) produce a data and knowledge base concerning correctional institutions' vocational education; (2) describe and quantify Region IV correctional vocational education characteristics; (3) delineate and evaluate issues essential to serving the target population; (4) describe Region IV vocational education programs' organization; (5) illustrate innovative vocational education practices potentially transportable to other institutions; and (6) generate recommendations to improve program effectiveness. Data was collected through a literature review, site visit interviews, a survey of seventy-three institution's officials, and a review of twenty-one exemplary programs. Issues identified were populations served, barriers and needs, funding, policy, coordination and cooperation, planning, delivery system's organizational structure, existing programs' characteristics, and the nature of successful/exemplary programs. Findings included the following. Over 40% adults and 42% juveniles were involved in vocational education programs. The most critical barriers were related to lack of policy, comprehensive programs, and appropriate funding and program isolation. The adult level personnel need was greatest for vocational teachers. Improved interagency coordination and cooperation was one of the three recommendations. (CSS)

Descriptors-*Alcoholism, *Drug Abuse, *Females, *Health Needs, *Information Needs, Program Evaluation

The needs of women and the content of existing information programs concerned with drug and alcohol abuse and general health were investigated through a nationwide Alliance of Regional Coalitions on Drugs, Alcohol, and Women's Health sponsored by the National Institute on Drug Abuse. Results indicated that: (1) multi-substance abuse is common, but few programs deal with it; (2) substance abuse problems among women have not been documented adequately; (3) a federal interdepartmental task force is needed to focus on these problems; and (4) delivery systems for comprehensive and cost-effective health care services are necessary. Exposure to Theories of Conscience as a Determinant of Cheating.

Pub Date- 75

Note-9p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978)

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Attribution Theory, *Behavior Patterns, *Cheating, College Students, *Emotional Response, Females, Locus of Control, *Reactive Behavior, Research Projects, Self Control, *Student Behavior

Cheating behavior has been found to relate to emotion-attribution explanations. Prior research with second-grade children has indicated that increased self-control occurs in a watching task when the child's emotional response is attributed to internal rather than external actions. In the present study, freshman women (N 221) took a reading comprehension test about conscience development which was either similar to the children's internal or external orientation; control subjects read about memory. Results indicate that the predicted low cheating rate (15%) on a vocabulary test by the internal-condition subjects was significantly different from the external (30%) or the control (31%) subjects. Unilateral Marital Intervention: Training Spouses to Train Their Partners in Communication Skills.

Pub Date-78

Note-6p.; Paper presented at the Annual Meeting of the National Council on Family Relations (Philadelphia, Pennsylvania, October 19-22, 1978); Not available in hard copy due to marginal print quality of original document

Pub Type- Speeches/Meeting Papers (150) - Reports - Evaluative (142)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors-Adults, *Communication Skills, Disclosure, Empathy, *Interpersonal Relationship, *Intervention, *Marriage Counseling, *Skill Development, *Training Techniques

A marital intervention method similar to conjoint counseling and requiring professional involvement with only one spouse in a marital dyad was investigated. Prior to the treatment, one spouse from each of 44 couples was trained in open, genuine self-disclosure and empathic understanding skills. After this training, 19 spouses trained their partners in the same skills over a five-week treatment period. The remaining 25 spouses held weekly discussions with their partners on five important marital issues. A third group of eight couples served as a no-treatment control. Results indicated that: (1) spouses were able to train their partners in the communication skills; (2) due to the short treatment period, no change was found in the couples' marital satisfaction; (3) it is possible to train spouses as relationship change agents; and (4) intervention methods other than individual counseling are potentially helpful to couples in which one spouse is not willing to participate in marriage counseling. Descriptors-*Adult Leaders, *Age, Comparative Analysis, *Gerontology, *Information Sources, Older Adults, Research Projects, *Retirement, *Social Attitudes

Views of decision-makers regarding pre- and post-retirement activities, the sources of information used to learn about older persons, and the impact these sources had on their views about these activities were investigated. Data was gathered from 211 decision-makers that included two subgroups of private sector leaders and two subgroups of public sector leaders. One public sector group included 71 elective officials who held policy-making positions at the city, county, state and federal levels. The second group included 70 administrative heads of social service agencies. The two groups of private sector leaders included 35 corporate heads of personnel from California corporations and 35 presidents of union locals in Los Angeles. Findings indicated that: (1) there were no major differences in how public and private sector decision-makers view pre- and post-retirement activities or in their reliance on information sources about older persons; (2) less scientifically-based information sources had more influence on views regarding pre-retirement activities; and (3) decision-makers favor pre- and post-retirement activities. Descriptors-*Adjustment (to Environment), Adjustment Problems, Behavioral Counseling, *Behavior Change, Gerontology, *Institutionalized Persons, *Intervention, *Older Adults, *Psychotherapy, Self Congruence

Behavior modification and behavior therapy techniques with institutionalized and community elderly are powerful approaches which effect changes in behavior quickly and dramatically, and are particularly useful because they involve total staff or family members in their implementation. Unlike psychotropic medications, behavioral approaches do not leave clients unresponsive or disoriented, but instead, focus on target symptoms and deal with these symptoms by manipulation of the social and physical environment of the client. Training in the use of these techniques is straight forward; minimum jargon is required and procedures can be laid out in easily understood steps. Positive results effect heightened morale for all concerned as situations which were previously viewed as hopeless readily resolve as a consequence of the behavioral interventions. In the work that has been done, the power and potential of these approaches for the reversal of nihilistic and ageistic attitudes, treatment of disruptive behaviors, interpersonal conflicts, and decreased motivation for self-care and self-improvement are well documented. Several such approaches are illustrated. (Author)

Identifiers-*Battered Women

Violence in the family, particularly assault by husbands upon wives (often referred to as wife beating), is a social crisis to which much attention has been drawn by the women's movement. Results of numerous studies indicate that spouse assault rarely occurs as an isolated violent episode, but more often follows a pattern in which attacks by the male spouse increase in both severity and frequency if unchecked. The role of the prosecutor in spouse assault cases is limited. It is, however, within the purview of that office to make recommendations and changes in administrative and legal procedures to permit the victims a choice of remedies in addition to, or as alternatives to, prosecution. Descriptors-*Attitudes, Behavioral Science Research, *Behavior Patterns, Behavior Rating Scales, *Individual Psychology, *Religious Factors, *Self Evaluation
Identifiers-*Self Monitoring Scale (Snyder)

The use of self-monitoring and self-reported variability in cross-situational behavior to identify persons most likely to manifest covariation between their attitudes and behaviors was investigated. In the first session, subjects (N 102) completed Snyder's Self-Monitoring Scale, assessed their religious attitudes and indicated the extent to which they varied from one situation to another in how religious they were. In the second session, approximately one month later, several measures of subjects' religious behaviors since the first session were obtained. Attitude-behavior correlations were computed within each of the four groups of subjects produced by a low-high self-monitoring x low-high variability classification scheme. Results indicated that only those subjects who were classified as low'' on both dimensions manifested consistently high attitude-behavior correlations. (Author)

Descriptors-Coping, *Divorce, *Family Relationship, *Fathers, *Financial Support, Justice, *Legal Problems, Marital Instability, *Parent Responsibility, Parent Role

Deserting fathers are often the victims of a society which is frustrated, ignorant and failing in its provision of sound family policy. A study of the impact of the criminal justice system on deserting nonsupporting fathers in relation to the fulfillment of their roles as providers indicates that these individuals need assistance in coping with their dilemma. Possible strategies for coping with this problem include: (1) organization of neighborhood family crisis centers; (2) provision of job opportunities for each family head and supplementary salaries during the working years; (3) reorganization of health services; and (4) improvement of public welfare services. Identifiers-*Cohabitation

Based on previous research on cohabitation and Levinger's model of marital cohesiveness and dissolution, the hypothesis that a higher level of violence exists in ongoing marriages than in ongoing cohabitating relationships was investigated. Data from a national sample of 2,143 adults did not support this hypothesis. Instead the reverse was found, i.e., cohabitors are appreciably more violent than marrieds. However, cohabitors who are over 30, divorced women, those with high incomes, and those who had been together for over 10 years, had very low rates of violence. (Author)

Developments in Family Stress Theory: Implication for Family Impact Analysis.
Pub Date-78
Note-15p.; Best copy available
Pub Type- Speeches/Meeting Papers (150) - Information Analyses (070)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Adaptation Level Theory, Behavior Patterns, Family (Sociological Unit), *Family Relationship, *Family Structure, Financial Support, Group Unity, Models, *Reactive Behavior, *Social Environment, *Stress Variables

Family stress theory as a framework for family policy and family impact analysis is compatible with, and a logical development within, a broader ecological context of immediate and wider social environments. The central assumption of the family stress framework is that families have the capacity to organize a variety of supports economic, social, and psychological and are capable of responding to stress in creative and adaptive ways. This framework encourages an important shift in emphasis toward prevention rather than treatment and the development of support programs and related policies. (Author)

Descriptors-*Administrative Policy, *Administrator Attitudes, *Age, *Community Health Services, Counselor Role, Delivery Systems, Gerontology, *Health Personnel, *Health Programs, Models, Older Adults, Research Projects, Rural Urban Differences, Social Attitudes

Low rates of service to older persons in community mental health programs were investigated in 20 California county government sponsored programs. County administrative officers, mental health advisory board members, directors, clinic supervisors, and clinical staff were surveyed through a mailed questionniare. Levels of awareness of problems of the older population, familiarity with relevant government policy, perception of the community's priority for elders, and personal priority for elderly and attitude toward them were explored. The study controlled for urban/rural locale and for the availability of alternate services. Results indicated that perception of communities' priorities for providing service was significant. Awareness of problems of elders and of relevant governmental policies, especially federal, was generally low. Attitude toward aged was highly positive among all respondents but, in contrast, personal priority for service to elders was lowest. Among policy formers, directors and advisory board members tended to be more important in developing services to elders. (Author)

Descriptors-*Family Relationship, Gerontology, *Group Relations, *Individual Power, Interaction Process Analysis, Males, Morale, *Older Adults, *Power Structure, *Sex Differences, Social Exchange Theory

Using a sample of 757 middle-aged and older residents of the Atlanta metropolitan region, the relationship between primary group contact and morale was investigated. With a control for sex and dependency, results indicated that: (1) interaction with children has a negative impact on the morale of dependent, older males; (2) visits with children and grandchildren are perceived by the dependent older male as a drama in which the ascending generations legitimize their claims to leadership through a gradual process of situation redefinition, and (3) one manifest result of having to cede control to middle-aged offspring is lower morale on the part of the older male. Providing Alternatives to Nursing Home Care: An Interorganizational Analysis.

Pub Date-16 Nov 78

Note-21p.; Paper presented at the Conference of the Gerontological Society (31st, San Francisco, California, November, 1978)

Pub Type- Speeches/Meeting Papers (150) - Reports - General (140)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Agency Role, *Community Agencies (Public), Community Health Services, *Delivery Systems, Gerontology, *Interagency Coordination, Interagency Planning, Older Adults, *Organizational Development, Residential Care

The development of alternatives to institutionally based long-term care requires the creation of greater interdependence among community based agencies and the provision of appropriate interdependence as the foundation for coordinated service delivery. Theoretical models of interorganizational interdependence are examined and assessed for their utility in understanding issues of community based long-term care services. Assumptions underlying available models (power, symmetry, technological, functional and goal consensus) are critically analyzed for their applicability to long-term care. Case study data from a demonstration project which sought to develop alternatives to nursing home care are presented. Interorganizational power relationships are identified as major explanatory variables with distinctions drawn between symbolic and instrumental interdependence among community agencies. A developmental model of the process involved in creating interdependent delivery systems is presented, including the central conceptual notion of cultural lag, or the distance that must be traversed between recognition of the need for greater interdependence among agencies and their capacity to actually create those circumstances. Performance Attributions as a Function of Task and Performer's Sex.

Pub Date-78

Note-14p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978); Best copy available

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Attribution Theory, Behavioral Science Research, *Behavior Patterns, Factor Analysis, *Performance Factors, Research Projects, *Sex Differences, *Success Factors, *Task Performance

Attributions of causes of successful task performances as a function of task and sex of the performer were investigated. Introductory psychology students (N 157) were presented with closed-circuit, videotaped episodes in which a male or female stimulus person performed a card-guessing task for 10 trials. Subjects heard the task described to the subject'' by a male experimenter as a luck- or skill-based task and than predicted the likely performance of the subject.'' Actual trials followed with the success rate programmed by the experimenter; the subjects also evaluated the performance of the subject.'' The four independent variables in the 2 x 2 x 2 x 2 factorial design were task, outcome, stimulus person, and sex of subject. Results indicated that: (1) successful females are seen as lucky when compared to male counterparts achieving the same level of performance; (2) observers expected females to be superior on luck-tasks and males to be superior on skill-tasks; and (3) ability, effort, and task difficulty were more relevant for performance on the skill task. Descriptors-*Family Relationship, Gerontology, Institutionalized Persons, Interaction Process Analysis, *Life Style, *Older Adults, *Participant Satisfaction, *Perception, *Quality of Life, Research Projects

Perceptions of 160 institutionalized and 207 noninstitutionalized old people (mean age 76.6 yrs.) were examined with respect to the quality of their family relations. Responses to six survey items measuring satisfaction with various aspects of family relations were cross-tabulated with gender, marital status, health status, age, and living arrangements to discern significant variations in satisfaction with family relations. Chi-square and gamma were employed as measures of significance and strength of association. In addition to measuring respondents' overall evaluations of their families, survey items assessed such factors as: (1) satisfaction with general treatment received from families; (2) the attention which families paid to the older person; and (3) the amount of love and affection received from their families. The majority (80%) of the respondents were generally satisfied with their family relations, with some significant differences existing between the married and the widowed as well as between institutionalized and noninstitutionalized respondents. The Effects of Forced Coordination on Organizational Interrelationships and Services to Clients.

Pub Date- 78
Note-11p.
Pub Type- Reports - Evaluative (142)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Community Agencies (Public), Delivery Systems, *Interagency Cooperation, *Interagency Coordination, Older Adults, Organizational Development, *Power Structure, *Program Effectiveness, Program Evaluation, *Rural Clinics
Identifiers-*Community Based Care Agency Evaluation Project

The mechanisms and sub-processes of forced coordination and their effects on interorganizational relationships and on services delivered to elderly and disabled clients in a rural community were examined. Participant observations gathered over 18 months and buttressed with information available from historical and case records from the Community-Based Care Agency (CBCA) Evaluation Project and the results of a formal survey of agency administrators provided the data. Results indicated that forced coordination had limited ability to bring organizations together and to increase work cooperation. Where agency interaction did increase, the gains were offset by fights over domain and greater agency inflexibility. Forced coordination succeeded in bringing little significant improvement in the accessibility, comprehensiveness, efficiency, responsiveness, accountability and quality of services for rural aged clients. Descriptors-*Adaptation Level Theory, *Adjustment (to Environment), *Behavior Rating Scales, *Cognitive Measurement, Elementary Education, Elementary School Students, Intelligence Tests, *Interpersonal Competence, Item Analysis, Measurement Instruments, Program Evaluation, Test Reliability, *Test Validity

Identifiers-*Adaptive Behavior Scales

The Adaptive Behavior Scale, as developed, contains 10 domains of behavior reflecting independent functioning and social-emotional responsibility in Part One, and 14 domains of behavior appraising social-emotional adaptation in Part Two. The establishment of construct validity and standardization of the Scale for use with normal and handicapped students attending public school is described in terms of several studies, using class placement as the adaptive behavior criterion, to which multiple regression and multivariate analysis of variance procedures have been applied. The following areas of concern are addressed by the validity studies: (1) use of the Scale to measure a wide range of levels of adaptive behavior of normal and handicapped children; (2) identification of mildly retarded students by the Scale's measurement of different types of social functioning; (3) the ability of the Scale to provide an individual profile which can be used to plan and develop an appropriate educational program for the pupil; and (4) the general applicability of the Scale as a tool for educational diagnosis. Age Norms and Age Constraints in Adulthood.

Pub Date-1 Sep 78
Note-14p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Adult Development, Adults, *Age, *Age Differences, Behavior Patterns, *Developmental Tasks, *Group Norms, Individual Characteristics, Research Projects, *Social Status

The age-status system in adulthood was investigated, using a 58-item instrument which divided adulthood subjectively into three periods: normative expectations for various adulthood developmental tasks (marriage, parenthood, employment, retirement, etc.); the lower age constraints ("too young") for these behaviors. In addition, 22 items regarding personal and life history information about each subject were included. Two mailed response surveys of 1560 men and women between the ages of 25 and 55 years yielded 670 useable surveys. A factor analysis revealed nine meaningful factors including: (1) youth and young adulthood tasks; (2) maturity and career responsibilities; (3) norms for family events; (4) maturity and family responsibilities; (5) youth and career responsibilities; (6) subjective assessment of age; (7) prolonged adolescence; (8) retirement; and (9) length of education and career decisions. Age differences were of greatest importance; older subjects held more restrictive views on age norms and constraints than younger subjects. Attitudes corresponded with personal experience and decisions. (Author)

Evaluation of Florida's START Center Programs.

Florida State Dept. of Health and Rehabilitative Services, Tallahassee.

Identifiers-*Florida Youth Services Program, Short Term Adolescent Rehabilitation Treatment, *START Programs

The suburban or rural Short Term Adolescent Rehabilitation Treatment (START) Centers house 20 or 25 youths unable to cope with daily community involvement, yet not requiring institutional isolation or security. This program evaluation monitors the effectiveness of the START program. The report examines in detail the types of delinquent youth committed. Sex, offense, and number of commitments appear to be key factors relative to the type of youth best served by the program. A considerable increase in expenditures occurs when transfers are made. The evaluation advises increased attention in placement, more effective handling within the program, and credit for time spent and goal achievement. Aftercare and recidivism data provide little additional grounds for criticism of the program. (Author/LS)

Identifiers-*Florida Youth Services Program

This evaluation of Florida's extensive system (from 140 to 395 youths) of self-contained juvenile training schools (TS) profiles the delinquent client population and examines the recidivism rate. After discussing the dangers of using recidivism as the sole indicator of rehabilitation, the study's methodology is explained. A random sample follows the subjects from furlough (parole) through a year of followup study. Case files provide data on the child and family; only the background variables of sex, number of prior commitments, and type of offense show a significant relation to success, while in-program experience shows non-significant relation to success. A comparison is made with earlier data, and goals for future studies are suggested. (LS)

Descriptors-*Community Programs, Correctional Rehabilitation, *Delinquent Rehabilitation, Delinquents, *Group Counseling, Institutional Research, Program Effectiveness, Program Evaluation, *Recidivism, *Rehabilitation Programs, *Residential Programs, Youth
Identifiers-*Florida Youth Services Program

This evaluation profiles the population and studies the recidivism rate for Florida's three community-based, residential group treatment (GT) programs for juvenile delinquents not requiring the more intensive security and isolation of the state's training schools. Other ERIC documents describe the smaller (serving 7-25 youths) positive peer culture programs of Halfway Houses, START (Short Term Adolescent Residential Treatment) centers, and Group Treatment Homes (GTH) that are the collective focus of this report. Here, recidivism is shown as an incomplete but still primary measure of rehabilitation success. The random sample of 1973 GR furlough (parole) lists compares recidivism, in-program experience, demographic and juvenile justice backgrounds with the 1972 sample. Recidivism rates for both years are similar, as is the elapsed time between serious offenses. Neither in-program nor background experience show a significant relationship to recidivism. The goals for future studies conclude the report. (LS)

Identifiers-*Florida Youth Services Program, *STEP Program

Project STEP (Short Term Elective Program) is an outdoor-educational program that, through teaching wilderness survival skills and affording a necessity for their use, provides juvenile delinquents with a feeling of self-reliance and self-worth. The program is designed for committed youths, primarily males, at least 13 to 14 years of age, but preferably older. Participants must be within the normal range of intelligence, have not committed a violent offense and have expressed a desire to participate in the program. For the juvenile delinquent, this often means basic changes in his perceptions of himself and others, his self-concept and attitudes. Wilderness survival includes a long canoe trip and a three- to six-mile run each day. The youths learn to cook, keep clean in primitive circumstances, stay dry and build fires in the rain, paddle in the dark, read the compass, and sleep in tents. They learn elementary astronomy, a bit about the weather, and a lot about their own interactions with each other. The program has built-in stress, but includes group treatment, which takes the form of peer-group Reality Therapy, that emphasizes responsibility for personal behavior and its consequences. When the youths return home, they are actively assisted through a follow-up period to retain their new self-concept and attitude toward cooperation back in the community, and to find jobs or enroll in school. Descriptors-Community Programs, *Counseling Effectiveness, *Delinquent Rehabilitation, Followup Studies, *Parent Counseling, *Performance Contracts, Program Evaluation, *Recidivism, Rehabilitation Programs, *Youth
Identifiers-*Florida Youth Services Program

This report evaluates the pilot Intensive Counseling Program which serves juvenile delinquents with community-based group (eight to ten youths) counseling sessions that meet at least four times a week, and are less expensive and more personalized than traditional residential treatment. Youths and parents contract for the program and must be able to travel to the sessions. Besides conducting group sessions, counselors verify group discussions with related community persons, conduct required parent sessions, and provide community referral services. Program objectives of replacing other treatments and reducing recidivism more than other programs are met or exceeded. Data comparing Intensive Counseling graduates with a control group of youths furloughed from training school to "Aftercare'' reveal differences only in offense type and prior commitments. These results point to consideration of these factors in candidate assignment. Care in drawing conclusions from the favorable low recidivism rate is cautioned. (LS)

Descriptors-*Camping, *Delinquent Rehabilitation, Delinquents, *Experiential Learning, Institutional Research, *Outdoor Education, Parent Counseling, Program Effectiveness, Recidivism, *Rehabilitation Programs, Therapeutic Environment
Identifiers-*Eckerd Wilderness Camp Program, *Florida Youth Services Program

This report evaluates year-long wilderness camping rehabilitation program for juvenile delinquents believed ``emotionally problemed.'' The remote camps teach through an experience curriculum encompassing daily camping style tasks, with integration of experience via three-day home visits every six weeks followed by written reports by parents. Data profiling the population, aftercare and recidivsim reveal that the younger offender is more likely to recidivate, that placements are only half of capacity (partly due to overlong stays averaging 16 months and partly due to legal considerations), almost all youngsters are first commitments and younger than in other commitment programs, white youth placement exceeds their commitment proportion, aftercare diminishes sharply after three months, school attendance parallels this drop, and the recidivism success rate is 53% after a year, dropping to 40% half a year later. (LS)

Descriptors-*Age, *Gerontology, *Policy Formation, Research Utilization, Retirement, *Social Planning, *Time Perspective

Identifiers-*Aging, *Time Paradigm

National policy makers have put forth different life cycle planning proposals for the more satisfying integration of education, work and leisure over the life course. This speech describes a decision making scheme, the Time Paradigm, for researched-based choice among various proposals. The scheme is defined in terms of a typology of time-related concepts of sequence, duration, rate, rhythm, recurrence, routine, synchronization, age, period, and cohort in an integrated method. The model's comparative analysis of: the Sugarman Sabbatical Plan, the Gosta Rehn Public Insurance System, the Santa Clara Cafeteria Plan'' and the Marziale Flexible Retirement Plan test its practical applicability. The Time Paradigm selects the Santa Clara Plan because of its potential for dealing with the life course problems of all age groups, as well as those of the elderly, as the preferred plan for national implementation. EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Age, *Gerontology, *Policy Formation, Research Utilization, Retirement, *Social Planning, *Time Perspective, Typology

Identifiers-*Aging

A typology of time-related concepts is put forth as a step toward the building of comprehensive theory in aging. The concepts derive from statistics (age, cohort, period effects), the theoretical writings of Sorokin (life course role sequences, durations and rates), the writings of Riley (on the synchronization of life course socialization and role allocation processes) and the life cycle planning literature (the use of time over the life course in the areas of education, work and leisure). The utility of the typology for resolving the cohort analysis problem'' (the confounding of age, cohort and period effects) in life planning research is outlined. (Author)

Descriptors-Behavior Patterns, Family Influence, *Family Relationship, Gerontology, *Interaction Process Analysis, *Interpersonal Relationship, *Locus of Control, *Older Adults, Reinforcement, *Siblings

Identifiers-*Rotter Internal External Locus of Control Scale

The relationship of family variables to locus of control, under the hypothesis that a larger and more cohesive family provides greater reinforcement for the elderly person's actions was investigated. Elderly persons (N 200) aged 60-90 were interviewed at home and given Rotter's I-E scale. In a regression analysis, after removing effects of age and socioeconomic status, number of living brothers, sibling cohesiveness, and child cohesiveness (where cohesiveness as a factor score made up of amount of contact, closeness of feeling, and values agreement) accounted for eight percent of variance in locus of control, with cohesiveness associated with greater internality. Cohesiveness, acting through locus of control, was identified as part of an adaptive mechanism in old age. (Author)

Pub Date-Aug 78

Note-14p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978)

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Aggression, Anti Social Behavior, *Behavior Patterns, College Students, *Individual Characteristics, *Males, Personality Assessment, Research Projects, *Sex (Characteristics), *Sexuality

To investigate sexual aggressiveness in college-age males, a sexual experiences questionnaire was used for preselection of university males high, moderate and low in sexual aggressiveness. High and moderate males were individually interviewed by a trained male graduate psychology student, and all three groups were administered a variety of attitudinal, communication and adjustment inventories. Between-group comparisons suggested a sociopathic-like conceptualization of the high sexually agressive male. Results were discussed in terms of two theoretical formulations of rape (individual psychopathology vs. social control models), and applications to clinical psychology were drawn. (Author)

College Premarital Sex Versus Self-Esteem, Religion, and Politics.

Pub Date-22 Oct 78
Note-17p.; Paper presented at the Annual Meeting of the National Council on Family Relations (Philadelphia, Pennsylvania, October 9-22, 1978)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Behavior Patterns, College Students, Comparative Analysis, *Females, Marriage, *Political Attitudes, *Religious Factors, Research Projects, *Self Esteem, *Sexuality, *Student Attitudes

Premarital sexual attitudes of a convenience sample of 95 young unmarried college women were examined to ascertain the association between liberality of premarital sexual attitudes, religiosity, conservatism, self-reported premarital sexual behavior, and self-esteem. SPSS Pearson Correlation analysis showed different patterns for the group as a whole and for the sexually experienced sub-group of 51 women. For the group as a whole, liberality of sexual attitudes was negatively associated with religiosity and conservatism, positively associated with self-reported sexual behavior, and not significantly associated with self-esteem. For the sexually experienced sub-group, liberality of sexual attitudes was negatively associated with religiosity and conservatism, and showed some positive associations with self-esteem. These results suggest a straightforward association between religiosity, conservatism, and sexual behavior, but suggest that the linkage between these factors and self-esteem is more complex than expected. Descriptors-*Anti Social Behavior, *Behavior Patterns, Child Development, Crime, *Criminals, Environmental Influences, *Family Environment, *Family Life, Longitudinal Studies, *Males, Research Projects

Identifiers-*Broken Homes

Possible explanatory theories of the relationship between broken homes and crime include the following: (1) broken homes lead to crimes if there are ''catalytic agents''; (2) broken homes lead to crime if these homes fail to provide certain conditions which promote socialization; and (3) broken homes and crime have a common source, but not a causal relationship. Each of these possibilities was tested by using data from a longitudinal study of 230 males, including the descriptions of childhood homes collected 30 years prior to collection of information about criminality. Because crimes were generally committed after termination of the project from which data about childhood had been gathered, unidirectionality of relationships between home variables and crimes was assumed. Derivations from propositional calculus permitted identification of the third explanatory theory as the only one consistent with the evidence. (Author)

Descriptors-*College Students, *Correlation, *Course Evaluation, Credit Courses, *Grades (Scholastic), Higher Education, Individual Characteristics, *Personality Assessment, Rating Scales, Research Projects, Sex Differences, Student Attitudes, *Testing Problems

Identifiers-*Minnesota Multiphasic Personality Inventory

The relationship between the ratings students assigned to an evening undergraduate abnormal psychology class and their scores on objective personality tests and course examinations was investigated. Students (N 70) completed the MMPI and made global ratings of the course; these scores were correlated separately by sex with the T scores of 13 MMPI scales, with the combined scores of the two class examinations taken earlier in the course and with the score obtained by summing the scores of these two examinations and the final examination score. There was only one statistically significant correlation among the 30 calculated. Results suggest that neither personality characteristics nor examination grades appear to have affected course ratings. (Author)

Descriptors-Achievement Rating, Behavior Patterns, *Behavior Rating Scales, College Students, *Contingency Management, Factor Analysis, *Interpersonal Relationship, *Leadership Qualities, Models, Research Projects, *Sociometric Techniques, *Test Construction
Identifiers-*Least Preferred Coworker Scale

Many criticisms of Fiedler's contingency model focus upon the LPC (Least Preferred Coworker) scale. The characteristics of the LPC scale were investigated in two studies. Experiment 1 focused upon determining the factor structure of LPC and relevance ratings, while Experiment 2 dealt with relationships among LPC, relevance, and self-ratings. Results indicate the following: (1) the growing body of research supports the finding that LPC can be more productively viewed as a multidimensional measure rather than the bipolar task versus relationship oriented scale proposed by Fiedler (1967); (2) LPC should be viewed as an indirect measure of the rater's attitudes and priorities vis-a-vis a description of an undesirable person; (3) the results draw into question the LPC typology proposed by Fiedler and suggest that the low-LPC person be considered highly oriented to the dimension being rated, and a high LPC score as indicating the absence of this orientation; and (4) many of the problems associated with research on the Fiedler model are the result of the measurement problems associated with LPC, and point directly to the need to develop an alternative means of measuring this critical individual characteristic. Descriptors-*Role Models, *Role Perception, *Selection, *Sex Differences, *Sex Role, *Sex Stereotypes, Social Factors, Student Attitudes, Television Viewing

The likelihood that females designate persons of the opposite sex as models more often than do males was investigated. Subjects, 61 boys and 64 girls from the sixth grade, plus 52 males and 83 female college students, indicated which other person, past or present, they would most like to be. Approximately 25% of females designated male models while cross-sex choices by males were negligible, the sex difference being statistically reliable at both age levels. Among children, public school girls made significantly more cross-sex choices than parochial school peers. Results indicated that lack of available female models was not the sole reason for obtained sex differences and that television played an inordinate role in children's choices. (Author)

Descriptors-*Behavior Patterns, Children, Elementary School Students, *Environmental Influences, *Peer Influence, Reactive Behavior, Research Projects, *Rewards, *Sex Differences, *Student Behavior

Identifiers-*Allocation Behavior

The effects of situational influences and sex differences in the reward allocation behavior of children was investigated in four studies. Experiment 1 focused on the distribution of rewards to workers presented as being in either a unit or non-unit relationship with each other. The second experiment determined whether a similar pattern of sex differences in allocation behavior would occur under conditions in which the child was led to believe that he or she was more or less successful than an actual competitor. Experiment 3 and 4, in addition to assessing sex differences, explored the role of peer models on children's reward allocation behavior. Results indicated that: (1) boys are more self-serving than girls in their division of rewards under competitive instructional set conditions wherein the child-allocator serves as a co-recipient; (2) allocation behavior is influenced by the pattern of distribution modeled by a same-sex peer; and (3) allocation behavior is affected by informing the children that the competition outcome is due to differences in worker ability or a function of chance, but only for the winning'' children. Descriptors-Career Choice, *College Majors, Comparative Analysis, *Females, Graduate Students, *Graduate Study, Higher Education, Interpersonal Relationship, *Nontraditional Occupations, Research Projects, Self Evaluation, *Sex Differences, *Sex Discrimination, *Socialization, Work Experience

The socialization process (defined as the transition from ``naive newcomer'' to ``established incumbent'') of women into both traditional and non-traditional academic disciplines was investigated. Graduate students (N 98 males and 46 females) completed questionnaires assessing work congruence, problem areas, personal feelings, physical health, life stresses, work involvement, perceptions of accomplishment, and expected units of credit and grades. Results indicated that: (1) few differences exist between male and female graduate students in terms of work and life experience; (2) interpersonal relations with other graduate students tended to decline in the early part of the academic year; and (3) although females initially ``fit in'' less well than males, this difference was reduced to non-significance by the end of the first semester. Descriptors-*Adults, *Age Differences, *Behavior Patterns, Comparative Analysis, Individual Needs, Interaction Process Analysis, *Interpersonal Relationship, Life Style, *Marriage, *Participant Satisfaction, Research Projects

Identification of age differences as a major characteristic of satisfying heterosexual love relationships was investigated. Married couples (N 102), divided equally into three groups, i.e., young, middle-aged, and older adults, completed a 108-item instrument, rating each statement in terms of how well it described their current love relationship. Results indicated that: (1) older adults have higher ratings for emotional security and loyalty and lower ratings for sexual intimacy than young or middle-aged adults; (2) young adults have higher ratings for communication than middle-aged or older adults; and (3) over time, love relationships are more likely to be based on loyalty, commitment, and tradition. Descriptors-*Certification, *Credentials, *Educational Programs, Higher Education, *Professional Education, *Professional Training, Psychological Services, *Psychologists, Training Objectives

The issue of certification is a crucial one for psychologists. The advantages of such certification might seem to be a sanctioned status in the community, a specific set of courses for students leading to a specific title, and possibly an edge in a highly competitive job market. But the sort of training implied by certification implies learning a very specific set of skills, for very specific problems, which are transferable and will lead to precise performance and predictable outcomes. It suggests a technology, and with it the related tendency to obsolescence. Education, on the other hand, involves being informed about the current state of knowledge, whatever it is, and knowing how to stay informed. It implies that what is transferable are not specific skills but non-specific competencies. Training suggests professionals, specialization and licensing. Education suggests inquiry, adaptability, flexibility, and cross-disciplinary fertilization, which are hard to license. In the long run, education, not training, is what community psychologists need, and it is in this direction not that of training and certification that future programs should move. (Author/BP)

A survey of 480 Navy women revealed that nearly 90% of the total sample believed that women should be allowed to serve on ships exactly as men do. Also, over 50% of the sample declared themselves ready to go to sea when called, despite the fact that this was not expected of them when they entered the Navy. It can be concluded that Navy enlisted women, and particularly women officers, realize that sea duty is essential if they are to be fully equal and responsible members of the Navy organization. One crucial issue emerging from the survey data is the probable sizeable resistance of the male officer community to the advent of women on ships. Although 80% of incoming Navy enlisted men expressed willingness to work with women on ships, officers' amibivalence could create serious obstructions to the integration of women into crews. Navy management should be aware of this and other potential problems in order to minimize their impact during the initial transition to integrated ships. (Author/BP)

Descriptors-*Alcohol Education, *Alcoholic Beverages, Alcoholism, *College Programs, College Students, Counselor Role, *Drinking, Higher Education, *Prevention, *Student Personnel Services

Some of the issues involved in understanding and dealing with drinking on campus are examined in this paper. After a brief consideration of the role of alcohol use in American society, adolescent and college student drinking attitudes and behavior are discussed. Finally, an exploration of the importance and use of alcohol education programs on campus highlights ways colleges and universities can get actively involved in preventing alcohol-related problems. It is argued that higher education must address alcohol-related concerns, and that alcohol education fits directly into the goals of higher education in America. Student development personnel are urged to take a proactive approach to the problem, involving residence halls, health services, counseling centers, and offices of student deans. (Author/BP)

Long Range Planning: An Institutional Priority.

Pub Date- 78

Note-9p.

Journal Cit-Journal of the Indiana University Student Personnel Association; Spr 1979

Pub Type- Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Budgeting, *Colleges, Declining Enrollment, Facility Planning, Higher Education, *Institutional Administration, *Planning, *Student Personnel Services, *Universities

Long-range planning is a tool by which a college or university can determine directions for the future. In light of anticipated budgetary and enrollment declines, it becomes increasingly important for the entire institutional community to determine where it is, where it wants to be in the future, and what steps it will take to reach its goals. Long-range planning can facilitate this process by organizing and communicating these future directions. The framework components of long-range planning mission statement, objectives, programs, organization, personnel resources, facilities resources, and financial resources must be constantly evaluated and updated as indicated by feedback. The student personnel function is a key to the survival of a college or university since the recruitment, admission, and retention of students will determine to a large extent the future of the institution. Consequently it is necessary for the student affairs division of an institution to continue to examine itself to determine if it is effective in supporting the institutional mission. Consensus directions must become part of the long-range planning process. (Author)

Identifiers-*Maryland

The effectiveness of the state of Maryland's Community Home Care Services (CHCS) program was evaluated in this study. The CHCS's major goal is to enable persons 65 and over and their spouses (regardless of age) to remain in their own homes or in other independent living arrangements, consistent with their desires, ability and safety; or to assist them to attain appropriate alternate living arrangements as needed. Since available resources did not permit a rigorous experimental design, data was gathered primarily from a survey of case records conducted by CHCS workers. Thus the perceptions of the workers constituted a major input to the evaluation process. Data were gathered regarding socio-demographic factors, client risk factors, and patterns of service provision. In general, the program was found to be offering clients appropriate services which respond to their needs and ameliorate their problems to some degree. Recommendations are offered for each major finding. (Author/BP)

This workbook is designed to build or improve the basic planning skills needed by persons responsible for program planning in alcohol service agencies. An understanding of the generic planning process in the development or expansion of community alcoholism-realted services can be acquired through the use of this guide. The workbook attempts to lead participants to define and identify examples of all four components in the planning process; i.e., assessment, program design, implementation, and evaluation. The workbook also leads participants to use the planning process on a given community problem within a simulatd community. This skill is then applied to an action plan for a problem area identified in advance by the participant. (Author/PJC)

Identifiers-*Georgia Life Skills Program

In an effort to evaluate the effectiveness of the Georgia Life Skills for Mental Health Leader's Guides, a panel of 13 teachers who had used the materials was assembled. The panel members filled out extensive questionnaires assessing the educational value, communicability, motivational value, utility and format of the Guides, whose purpose is to help children from 5 to 18 cope with stress, handle major life decisions, and form more satisfying interpersonal relationships. In general, teacher's responses indicated that the Guides were very valuable as teaching instruments. Some of their suggestions for improvement were incorporating the Guides into a teacher training workshop; giving them a key topic index; and expanding the activities to include more appropriate ones for kindergarten and first grade. The complete set of evaluative materials used, including tabulated results, comprises the bulk of the document. (Author/BP)

A developmental history of the Georgia Life Skills for Mental Health program is presented. The program's purpose is to help students aged 5-18 learn ways to handle stress, make major life decisions, and form more satisfying interpersonal relationships. In addition to a narrative description of how the program was conceived and developed, the report contains, in various appendices, the major documents generated during the developmental phase of the program. The purpose of the report is threefold: (1) to document, through the use of files and selected interviews, the development of the Life Skills Program from its inception in the Winter of 1976 to June 30, 1978; (2) to offer sets of objectives and desired outcomes which will be useful in establishing evaluative criteria and developing instrumentation; and (3) to provide a context for later interpretation of process and outcome evaluative findings. This bulletin, a project of the Division of Educational Planning and Support, is designed to assist the high school counselor and other members of the pupil personnel team in offering a diversified program of services to meet the needs of students in the New York City public high schools. In view of the current educational, sociological and economic trends, the emphasis of this manual is on the counselor's pivotal role in developing student decision-making abilities concerning career/college choice, personal growth and ultimate lifestyle. Omnibus counseling is a suggested model for achieving these goals. The manual also is concerned with humanistic education, drug prevention counseling, education of the handicapped, vocational-technical high school programs, and the rights and responsibilities of high school students. Identifiers-*Diagnostic and Stat Manual of Mental Disorders III

In terms of a dialectical model, the person-situation context is viewed as inseparable and necessarily interdependent. The very diagnostic categories used in the profession are as subject to the zeit geist as are the character structure and behavior of the individual. The evolving diagnostic categories as codified in the Diagnostic and Statistical Manual of Mental Disorders III'' (1980 unpublished) reflect the changing nature of character structure as compared to the 1952 or 1968 editions. Character structure, defense operations, and diagnostic categories need to be viewed systematically. Diagnostic categories need to take and everchanging contributions of psychological and social (role and and overchanging contributions of psychological and social (role and system) determinants of inter-personal behavior. Theories of personality and explanation of behavior formulated in other societies and under conditions unlike those of today, give a point of departure for applying the knowledge of the current societal norms, inter-personal contexts, and intra-psychic processes before giving a diagnosis. A detailed case study of the Curricular-Career Information Service (CCIS) at Florida State University is presented. The information collected is expected to promote improvements in services offered by CCIS; provide guidelines for other professionals contemplating the development of similar career centers; and provide basic "hard" data necessary for program planning by state and federal career development and career education administrators. The report is divided into six major sections: (1) project description, detailing goals, activities and outcomes; (2) evaluation methodology, outlining some of the less traditional methods used; (3) description of CCIS services, including in-house, outreach, indirect and training services; (4) staffing, facilities and funding; (5) process evaluation, containing seven short reports of specific projects; (6) impact evaluation, containing faculty awareness surveys and single case studies; and (7) conclusions and recommendations. Appendices list and present a variety of additional resources. (Author/BP)

Descriptors-Aspiration, *Career Choice, Family Relationship, Females, *Marriage, *Role Conflict, Sex Differences, *Spouses, *Working Parents, *Working Women

The newly-emerging phenomenon of dual-career marriages was investigated using four major life roles Professional, Spouse, Parent, and Self as Self-Actualized Person. Six scales were constructed to measure potential conflict in areas represented by specific pairs of these roles (e.g., the area of Professional versus Parent). One major purpose of the study was to compare the degree of reported stress in these areas of potential interrole conflict. In addition to the prediction of gender differences, greater role conflict was anticipated for professional couples who are parents, in comparison to those who are not. Given the demanding nature of the Parent and Professional roles, higher stress was also expected in role-conflict areas involving these roles. Other purposes were to investigate the correlates of role conflict, particularly in women who are members of dual-career marriages, and to investigate the influence of parenthood. The prediction of gender differences in regard to areas and correlates of interrole conflict was not supported, except for level of career aspiration, where high aspirations were negatively related to role conflict for men but positively related to role conflict for women. Strikingly different patterns of conflict, however, were found as a function of the presence or absence of children. (Author)

The Effects of Teacher-Counselor Consultation on Sociometric Status and Achievement of Elementary School Children.
Pub Date- 76
Note-12p.
Pub Type- Reports - Evaluative (142)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Academic Achievement, Behavior Change, *Consultation Programs, *Counselor Role, Elementary Education, Elementary School Counselors, *Interpersonal Competence, Intervention, Sociometric Techniques, *Teacher Role, *Withdrawal Tendencies (Psychology)

The following premises formed the basis for this research: (1) a child's social and intellectual development are closely related; (2) the classroom teacher has a tremendous influence on the social as well as the academic growth of children; and (3) the school counselor may facilitate children's academic and social growth through consultations with teachers. Research questions were formulated asking whether sociometric statuses, grade point averages, FIRO-BC scale scores of students identified as isolates would improve after teacher-facilitated interactions resulting from teacher-counselor consultations were implemented. Subjects were 17 children in Grades 4 through 6 who were identified as isolates on a sociometric instrument administered by their classroom teachers. The counselor consulted with the teachers of these students once a month, or six times during the academic year. Consultation focused on involving the child in the educational experiences. Results showed an increase during the school year in the sociometric status of all 17 children. There was also a significant increase in grade point averages, and significant differences on five of the six scales of the FIRO-BC for these children. These findings lend support to the notion that a child's social and academic development are closely related, and that the classroom teacher does have an influence on both. (Author)

Descriptors-*Ability, Achievement, *Androgyny, Attribution Theory, Cognitive Ability, *Fear of Success, *Females, *Performance Factors, Research Projects, *Success Factors, Task Performance, Womens Studies
Identifiers-*Learned Helplessness

Using Seligman's learned helplessness'' paradigm, androgynous and feminine women (as defined by the Bem Sex Role Inventory) either succeeded (contingent feedback) or failed (non-contingent feedback) at a concept formation task and were provided with internal (ability, effort), external (task difficulty, luck), or no causal attributions for their performance. Then a second (criterion) concept formation task was administered. The attribution manipulation was found to have no effect on any of the dependent measures and failed to interact with the other factors. For feminine subjects, failure increased the trials necessary to reach criterion on the second task (learned helplessness''), whereas success had no effect. The performance of androgynous subjects, on the other hand, was unaffected by failure but facilitated by success (learned competence''). Androgynous subjects responded to success by attributing it to their ability, whereas failure was attributed to task difficulty. Feminine subjects, on the other hand, attributed success and failure about equally to these two factors. Finally, whereas androgynous subjects attributed their successes in life to their ability and their failures to task difficulty, feminine subjects made the opposite attributions. The results suggest that the androgynous woman is likely to be more resistant to learned helplessness'' than is the feminine women. (Author)

Reconstruction of the Personal Past: Differences in Older Women.

Pub Date-20 Nov 78
Note-15p.; Paper presented at the Conference of the Gerontological Society (30th, San Francisco, California, November, 1978)
Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Biographical Inventories, Emotional Response, *Females, *Older Adults, *Perspective Taking, *Psychological Patterns, Self Concept

It was hypothesized that women in different current life circumstances would emphasize different life content areas in verbal reports of their life histories. A basically homogeneous sample of 30 women (average age 58.5) was divided into women who had never had children, women whose children had left home, and women who had at least one child living at home. Life history interviews focused on events self-selected by the subjects. The results were coded into 11 content areas derived from the data. ANOVA tests indicated differences for four of the areas. Multiple Range tests showed the empty-nest women as the most likely to mention Family or Procreation, and the non-empty-nest women were the most likely to report Self memories. A t-test showed no difference in interest in children with the empty-nest women, but there was an increase in the importance of the husband which appeared to be at the expense of Self concerns. The subjects were similar in their overall life situations and, in accordance with the hypothesis, showed the same basic pattern in the content of their remembered pasts. However, differences in current life circumstances did create meaningful alterations in memory of the past. (Author/PJC)

Sex Roles on TV: More Than Counting Buttons and Bows.

Pub Date-Oct 78
Note-7p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978)
Pub Type- Speeches/Meeting Papers (150) - Reports - Evaluative (142)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Cartoons, Children, *Childrens Television, Fantasy, Programing (Broadcast), *Role Models, *Sex Role, *Sex Stereotypes, *Television Research

The problem of sex-role stereotyping on television has been studied by trying to develop television materials that are explicitly counter-stereotypic in terms of sex-roles. The development of a new television series "Freestyle," aimed at 9-12 year old children and their families, has led to some important observations about children's perceptions of sex-role portrayals. Children look past gender to the qualities of the individual; they hold stereotypes but not unalterable ones. Children view cartoon characters enthusiastically but skeptically. Sex-role attributes seem to be the last things in the childrens minds when discussing these characters. On the other hand, children seem to view extreme sex-role stereotypes as so unreal as to be taken no more seriously than Bugs Bunny. Characterizations of real life individuals, whether male or female, who mix those qualities of personality and behavior which make them "good people," are most attractive to children. (PJC)

Sex and Race Effects in the Attribution of Achievement and Expectancy for Success.

Pub Date-Aug 78
Note-26p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978); Best copy available
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-Academic Aspiration, Achievement, Attribution Theory, Blacks, *College Students, *Expectation, *Middle Class College Students, *Racial Differences, Research Projects, *Sex Differences, Success Factors, *Work Attitudes

A questionnaire study among 19 black males, 23 black females, 176 white males, and 114 white females investigated the joint effects of race and sex on the attribution of past performance in college and expectancy for future academic success. The results show sex effects to be more pronounced than race effects in both attribution and expectancy. It is suggested that middle-class, college-educated blacks share the same sex-role stereotype characteristic of the white middle-class. Black women were found to have more pessimistic views of their academic achievement than the other groups. Black women's attributions are discussed in relation to the high standards of excellence they seem to set for themselves. (Author)

Descriptors-*Administrative Personnel, Communication Skills, *Females, *Group Dynamics, *Management Development, Organizational Communication, Psychological Studies, Self Evaluation, Social Development, *Supervisory Training, Task Performance

Promoting women into higher level organizational positions is vital as a social issue and a subject for organizational theory and research. Recently, Henning and Jardin have identified an internal factor that poses a problem to women and their job-related aspirations. The absence of long-term career commitment has been found to inhibit the sucessful transition from supervisory to managerial positions for women. Also, in contrast to men who see problems of upward job mobility as centering on people around them, women perceive them as centered on themselves. Women's inward preoccupation dulls their ability to assess other people objectively. As a result, they find it difficult to move from the role of supervisor-specialist to that of manager-generalist. Identifiers-*Health System Agencies

The Health Systems Agencies created to plan and coordinate the development of health care systems in 205 health service areas across the states have a need to be legitimized and operationalized in community contexts in order to achieve their purpose. Community psychologists have both research and consultation roles to play in contributing to understanding of these agencies and to their effective performance. Specific tasks exist for participating psychologists, particularly the guidance of agency self-assessments. Involvement in regional health planning may also stretch the perspectives of community psychologists. (Author)

The process of assertive behavior change of college women who received assertion training (AT) and cognitive restructuring was examined to assess the relative effects of different durations of exposure to cognitive restructuring. Undergraduate and graduate women students (N 27) at a state university volunteered and were screened for AT groups. Single-subject methodology was utilized to plot the process of change in subjects' assertive behavior and situational discomfort when asserting themselves. Idiosyncratic individual patterns of situational discomfort and behavior changes suggest the need for research designs which focus on individual progress records rather than global group improvement. Expectancy and the Menstrual Cycle: Effects on Performance and Self-Perception.

Pub Date- 73
Note-13p.; Not available in paper copy due to marginal legibility of original document
Pub Type- Reports - Research (143)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-College Students, *Expectation, *Females, *Perception, *Performance Factors, *Physiology, *Self Concept, Task Performance
Identifiers-*Menstrual Cycle

The impact of false information concerning the effect of the menstrual cycle on test performance and subjects' perception of the adequacy of that performance were investigated. Women (N 65) were studied either during the premenstrual or midcycle phase. Subjects were given one of three interpretations: (1) they should do well because of their present menstrual phase; (2) they should do poorly; or (3) some women do well, and some do poorly in their present phase. Results of the test performance indicated that bogus information about the menstrual phase influenced perception of performance, but not performance itself. (Author)

Descriptors-*Academic Achievement, Critical Path Method, *Grade Point Average, *Locus of Control, Predictor Variables, Research Projects, Secondary Education, Secondary School Students, *Sex Differences, *Socioeconomic Status, *Student Behavior
Identifiers-*Nowicki Strickland Locus of Control Scale

The relationship between locus of control (LC), grade point average (GPA), standardized achievement test scores (SAT), sex, and socioeconomic status (SES) was investigated among a sample of 174 eighth graders who responded to the Nowicki-Strickland locus on control instrument. Certain partial correlations between momentary achievement (standardized test results), continuing achievement (grade point average), sex and socioeconomic status were explicated. Utilizing sex, socioeconomic status and locus of control as independent variables, a significant interaction between sex and type of achievement was noted. When considering sex differences with LC scores, GPA was more predictable than standardized test results. However, when sex was not considered, standardized test results were as predictable as GPA. Mezoff, Robert M.

Sensitivity Training...Is It Really Therapy In Disguise?

Pub Date- 75
Note-16p.; Document prepared by ODT Associates, Amherst, MA
Pub Type- Information Analyses (070)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Behavioral Science Research, Behavior Patterns, *Counselor Attitudes, *Group Counseling, Models, *Professional Personnel, *Psychological Characteristics, *Psychotherapy, *Sensitivity Training, T Groups, Therapists

Classification of current group therapies by three main criteria provides a useful conceptualization of why therapy is sometimes difficult to distinguish from the NTL-model T-group. The appropriateness of sensitivity training based on the criteria of client normality'' identifies several perspectives, including the futility and inadvisability of attempting to distinguish between sick'' and normal persons. It is suggested that the distinctions made between therapy and sensitivity training are, in part, a function of the personal motives of the professionals in both these areas. (Author)

Irrational Beliefs of the Obese.

Pub Date- 78

Note-13p.; Not available in hard copy due to marginal legibility

Pub Type- Reports - Research (143)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors-*Behavior Change, *Beliefs, *Body Weight, College Students, Comparative Analysis, *Females, Research Projects, Self Concept, *Self Help Programs, Student Attitudes, Student Behavior

Identifiers-*Irrational Beliefs Test, *Obesity

The incidence and extent of irrational beliefs in the obese were investigated as well as subsequent changes in such beliefs as a result of participation in a self-monitored weight control program. Subjects were 53 females who were a minimum of 10 pounds and an average of 32 pounds overweight. The obese sample was administered the Irrational Beliefs Tests and also participated in individual counseling sessions over a nine-week period. The control group consisted of 32 female counselor trainees. Results indicate that: (1) a decline in overall irrationality corresponded with a successful treatment program; (2) obese and non-obese participants did not differ in psychological make-up; (3) obese persons entering the program believed it is easier to avoid than face problems; and (4) after completion of the program, the obese sample declined in anxious overconcern, Scale Six of the Irrational Beliefs Test. Descriptors-*Androgyny, Biology, *Ethnology, *Females, Males, Methods, *Physical Characteristics, *Psychological Characteristics, *Sex (Characteristics)

Karen Horney's critique of Freud's theory of female development suggests that much theory and research in psychology is androcentric, and calls for the elimination of biases. This point is questioned, and the posit that scientific knowledge does not answer the question of what makes a person either female or male is explored. Biological, psychological, and sociological differences overlap genders, and the inconsistencies are discussed. The biological attempts at differentiation of sex are unsuccessful, whether through hormones, chromosomes, sexual organs, or whatever. The constancy of gender identity is evident in the discussion of transexualism. The example of biological attribution of gender is considered, while the ultimate'' criteria remains elusive. Gender, in all of its manifestations, including the physical, must be seen as a social construction. (LS)

Descriptors-*Coping, *Emotional Adjustment, Females, Males, *Marital Status, *Older Adults, *Personal Adjustment, Psychological Needs, Research Projects, *Sex Differences

A common assumption, reflective of data obtained from older males, often in institutional or outpatient settings, is that being old and alone is a severely negative condition. A sample of 300 older men and women in community settings provides an alternative perspective. For a number of daily living activities as well as personal and interpersonal attitudes and orientations, comparisons between older adults currently living with spouse and those alone make it apparent that sex of the subject importantly affects outcome. For older women in the lone status, life is far from unpleasant in fact, they fare better not only than their single male counterparts but also than still-coupled women of comparable age. For men, on the other hand, the stereotypic views seem to have more substance. Results are interpreted in the light of previous history of traditional role enactment and its differential impact during aging for men and women. (Author)

Descriptors-*Adjustment Problems, *Coping, Court Litigation, *Divorce, *Laws, *Lawyers, *Legal Problems, Personal Adjustment, Research Projects

The rise in the American divorce rate since the early 1960's emphasizes the need to examine the factors associated with adjustment to marital separation. The impact of the legal system upon post-separation adjustment in Pennsylvania, which has adversary divorce statutes, is explored with 205 individuals, separated 26 months or less. Satisfaction with the legal system is significantly greater when either the reported relationship between the lawyer and the separated individual or the reported feelings toward the decisions in the settlement problems index, the economic issues, are more positive. Those respondents most highly satisfied with the legal system were more likely to report better adjustment to the separation if they had not been encouraged by the lawyer to create an adversary relationship with their former spouse than if they had been encouraged to create an adversary relationship. Also, the fewer the number of instrumental functions, such as child issues, with which the respondent is involved, the better the reported adjustment to the separation. Divorce statutes based on an adversary model encourage collusion and do not enhance adjustment to a new life situation. Therefore, the present adversary divorce statutes may not reflect the current custody, economic, or property issues of marriage and divorce. (Author)

Descriptors-*Age Differences, Behavioral Science Research, Comparative Analysis, *Consumer Economics, *Decision Making, Evaluative Thinking, Food Standards, Merchandise Information, Nutrition, *Older Adults

Decision making processes among older adults were investigated within the context of grocery selection, using a stimulus array involving two product classes (bread and cheese) with 10 items per class. The sample (N 580) was stratified by sex, household status (living alone or with spouse), and age, employing three age groupings: 25-34 (young), 65-74 (younger-old), and 75 and up (older-old). Paired similarity comparisons, attribute ratings, and preference rankings of products were obtained, as well as reactions to the decision task. Product decision processes do not appear to differ by age. Rather, result patterns show that the two product classes evoke very different responses, with bread choices more predictable and cheese choices both more variable and more important to subjects. Descriptors-*Attendant Training, *Changing Attitudes, Gerontology, *Homebound, Home Health Aides, Inservice Programs, Job Training, Maids, *Older Adults, *Paraprofessional Personnel, Research Projects, *Skill Development, Stereotypes, Training

With the increased use of paraprofessionals as service providers to the elderly, and indication in current literature that negative attitudes toward the aged are reflected in treatment received, the need for specialized training in geriatrics is apparent. A true-false 54-item questionnaire concerning older people's social, economic, physical and mental conditions was administered to a control group of 28 Ss and as a pre- and post-test to two groups of 20 Ss who participated in two training programs designed to prepare older people age range 55-75 (mean educational level nine years) to work as health assistants with homebound elderly patients. The training was a 100-hour, four-week program geared to increase understanding of normal and pathological aging and development of interpersonal and clinical skills. Material relating to each questionnaire item was presented and reinforced during training, using lecture, discussion, audio-visual and experiential techniques. Specialized training positively affects factual learning and attitude change of older individuals. (Author)

Descriptors-*Careers, *Fear of Success, *Job Satisfaction, Life Style, *Nontraditional Occupations, *Occupational Aspiration, Research Projects, Sex Role, Success Factors, *Work Attitudes, *Working Women

Since the reemergence of the women's movement in the early 1970's, it has been necessary to reexamine women's definitions of success and attitudes toward work across a spectrum of traditional and non-traditional jobs. Three basic hypotheses were tested: women in female-dominated jobs (1) have higher fear of success imagery and (2) attach more importance to socioexpressive factors of success, but (3) place less emphasis on instrumental task factors of success than do women in male-dominated jobs. Data were gathered through a Profile Questionnaire and a projective test. Significant differences were found only in emphasis on instrumental task factors of success. Women in male-dominated jobs indicated a higher need to define success as ``recognition from others on the job,'' ``becoming an authority,'' ``achieveing a high salary,'' and ``obtaining a title of responsibility.'' Descriptors-Discriminatory Attitudes (Social), *Employment Problems, Job Satisfaction, Labeling (of Persons), *Leadership, *Management, Personnel Evaluation, *Sex Stereotypes, *Supervisors, *Working Women

Until recently there has been little research interest in the possible impact of sex on leadership. Both general leadership research and the more recent materials on women who are leaders concentrated upon three areas of leadership personality, style, and power with the subordinate reactions they elicit. Traditionally, women have been viewed by both sexes as the antithesis of the desirable leader personality, but research on men and women actually occupying leadership positions denies the stereotypic view held by their own supervisors. The validity of leadership as personality has begun to be questioned. Using the sex-linked styles of Consideration (female) and Initiating Structure (male), including criticism of its validity, subordinates reacted negatively to female supervisors reflecting perceived lack of female power, while being supportive of most sex-role congruency. Power differences for both anatomy and mastery were common and may account for the negative reactions to female leaders because they are not allowed to function effectively. Presently, subordinates hold strong beliefs about sex-linked differences, despite contrary research data. (LS)

Descriptors-*Community Services, *Decision Making, *Police, *Police Community Relationship, Policy Formation, *Referral, Rehabilitation, Social Work

This report reviews the manner in which police handle citizen requests for social services. The focus is on how officers make their decisions whether they handle such requests themselves, direct them elsewhere in the department, or refer citizens to other agencies. In their assessment of the literature on referral practices, the authors point out the major hypotheses that recur, and the data that supports or contradicts those theories. Their evaluation of the literature highlights several key issues: the clarity and consistency of definitions of police referral, the lack of theoretical constructs and empirical data, and the inadequacy of evaluative criteria. In addition to tracing the history of the police role in providing social services or referring citizens to appropriate agencies, the report also offers suggestions for future research in this area. Also included are abstracts of 80 articles on the subject of referral practices and a 32-page bibliography. (Author)

Colleges and universities can expect a decrease in the number of incoming freshmen. However, increased retention can compensate somewhat for the predictable decrease in enrollment. As a result, it becomes important to measure student satisfaction with the student's chosen college. This article, therefore, presents a Pupil Pleasure Poll'' to be used by the college administrator in assessing current student needs and perceptions of its student body. The development of relevant programs can be one outgrowth of this survey. (Author)

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Altruism, *Cooperation, Environmental Influences, Females, *Interpersonal Relationship, *Psychological Patterns, *Social Behavior, Social Responsibility, Social Science Research
Identifiers-*Anonymity, *Helping

A series of three field experiments, using 233 subjects in all, tested the effect of anonymity on helping. All three experiments demonstrated that identifiable subjects were significantly more likely to offer non-emergency help than were anonymous subjects. The third experiment also showed that only anonymous subjects were more likely to help a victim similar to themselves than one who was dissimilar. The results were interpreted as indicating that anonymity encourages norm violation, and therefore tends to reduce helping behavior when helping is the appropriate response. (Author)

A Written Simulation Measure to Evaluate Police Crisis Intervention Training.

Pub Date-31 Aug 78

Note-33p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978)

Pub Type- Speeches/Meeting Papers (150) - Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-*Emotional Response, *Intervention, *Knowledge Level, On the Job Training, *Police, Police Action, Program Evaluation, Role Playing, *Simulators, *Situational Tests, Training Techniques

This paper presents the background and development of the Crisis Intervention Simulation Survey, (CISS), a written simulation instrument designed to assess police officers' knowledge of effective crisis intervention skills and the awareness of their emotional responses to selected crisis intervention situations. It summarizes the recent history of crisis intervention training programs for police and critiques efforts to evaluate these programs. The background section also reviews the use of simulation methodologies like role playing to assess intervention skills in a variety of human service fields. The design and construction of the CISS are then described in detail. The CISS presents four types of crisis situations, accompanied by a response sheet with open-ended questions and bipolar, Likert-type emotion scales. The CISS was administered as part of a pilot study evaluating a four-day police crisis intervention training workshop. Results from this study are presented, including preliminary data pertaining to the reliability of the CISS and a discussion of its strengths and limitations together with some suggestions for simplifying the methodology used to construct such an instrument. Descriptors-*Adjustment Problems, *Children, Coping, *Divorce, *Family (Sociological Unit), Group Therapy, Marital Instability, *One Parent Family, Parent Child Relationship, Psychological Patterns, *Time Perspective

The national divorce rate has risen since the Civil War from less than two per 1,000 to one of every two married in 1976, with a continuing increase likely. Implications for divorced people suggest an increase in mental and physical illness concurrent with increase in stress. The impact appears to diminish with time. Divorce is a legal, emotional and financial process calling for many adjustments, particularly for a mother of young children who must go to work. It is imperative that both parents continue a positive relationship with their children. Most earlier investigations occurred after the divorce; this study follows the legal "event" as it transpires. It finds, among other things, that each spouse considers himself more giving than the other. Regarding children, the literature concentrates mainly on the long-term effects, but several exceptions are examined. During the project's final phase, a nine-session children's group therapy program was conducted. (LS)

Descriptors-Attention, Early Reading, Elementary Education, *Error Analysis (Language), *Individual Instruction, Interaction, Miscue Analysis, *Oral Reading, *Reading Instruction, Reading Research, Remedial Reading, *Teacher Role, *Teaching Techniques, Time Factors (Learning)

This paper considers the place of one-to-one teacher/student oral reading interactions in reading instruction. Maintaining that there is an important function for such interactions in learning to read, the paper analyzes one learning process in these interactions attention to errors and argues that in oral reading instruction, attention to errors will function along with attention to appropriate reading responses. An analysis of error attention in terms of direct and indirect influences is then presented, with specific emphasis on the timing of attention, a strong determinant of self-behavior and accuracy. The paper concludes with the comment that it not only matters that early and remedial readers have one-to-one interactions, but it also matters how these interactions are conducted. (FL)

Descriptors-Cognitive Development, Comparative Analysis, Compensatory Education, Educational Disadvantagement, Elementary Secondary Education, High Achievers, *Language Development, *Language Research, Low Achievers, *Reading Achievement, *Reading Difficulty, *Reading Research, *Socioeconomic Background, Syntax

Identifiers-*Chomsky (Carol)

To find an area of weakness in disabled readers that might profitably be strengthened, the level of language development of disabled secondary readers was compared with that of competent secondary readers. The group of disabled readers used in the study consisted of 20 high school students in a corrective reading class; the comparison group consisted of 22 members of a class for "highly motivated" students. Reading levels, parental educational levels, and parental occupational levels were all higher for the able than for the disabled group. Students were tested on their comprehension of five linguistic structures identified by Carol Chomsky as representing five developmental stages in acquisition of syntax. Analysis of the results revealed that 10% of the disabled readers and 55% of the able readers comprehended all five constructions, as compared with 11% of Chomsky's subjects (children aged five through ten years old). The fact that no significant difference in performance was observed between the disabled readers and the children in Chomsky's sample suggests that disabled secondary readers may suffer from a low level of language development, while the differences in socioeconomic level between the two adolescent groups indicates a correlation between socioeconomic status and language development. It can be hypothesized that strengthening students' level of language development will also strengthen their reading ability. (GT)

Descriptors-Cognitive Development, *Comprehension Development, Concept Formation, Educational Theories, Elementary Education, *Questioning Techniques, *Reading Comprehension, *Reading Instruction, Reading Processes, *Reading Research, *Reading Skills, Teaching Methods

The literature of reading theory and research suggests a number of key factors involved in the comprehension process. In simplest terms, comprehension is the process by which an individual actively generates meaning from some linguistic input. Five factors of reading comprehension have been identified through research: vocabulary knowledge, the ability to derive meaning from context, inferencing ability, the ability to deal with the structure of the passage, and the understanding of literary devices. A review of recent research supports the importance of all five factors to the reading comprehension process and also suggests the importance of using preexisting knowledge schemata and involvement in comprehending and retaining prose interpretations.

The five comprehension factors can be enhanced in the classroom through the appropriate use of questioning strategies. Questions should be carefully designed to create sufficient internal disequilibrium to result in high internal motivation for the child. If this can be accomplished, the net effect will be increased concept development and the formulation of new inferencing strategies. (GT)

Reading Comprehension: The Role of Experience, Language Knowledge and Processing Strategies.

Pub Date-May 77

Note-13p.; Paper presented at the Annual Meeting of Remedial Teachers of Queensland (Brisbane, Australia, May 1977); Best Available Copy

Pub Type- Opinion Papers (120) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Content Reading, Early Reading, *Educational Practice, Foreign Countries, Language Processing, *Reading Comprehension, *Reading Instruction, Reading Materials, Reading Processes, Reading Skills, Teaching Techniques

Identifiers-Australia

This paper suggests that by emphasizing word identification skills and oral reading and by using limited reading materials, teachers have neglected reading for meaning. Following a review of current instructional practices, the paper explains how understanding writing depends on the world experience, language knowledge, and processing strategies that readers bring to the text. A final section summarizes implications for teaching. (Author)

Changes in the Reading and Media Interests of High School Students Today.

Pub Date-78
Note-33p.; Research prepared at Temple University
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-Comparative Analysis, *Mass Media, Media Research, Newspapers, Personal Interests, Radio, *Reading Habits, *Reading Interests, *Reading Material Selection, Reading Research, Secondary Education, Sex Differences, *Student Interests, *Teenagers, Television Viewing

A study of student interest was carried out focusing on current reading and media interests of high school boys as compared with those of high school girls and identifying changes in those interests since Paul Witty conducted similar research 20 years earlier. The sample randomly selected 300 ninth, tenth, eleventh, and twelfth grade students from a public school district comparable to the districts used in the earlier study. It was found that compared to the earlier study, high school students now report they spend less time reading, fewer use the public library, there is more interest in fiction, a greater preference for contemporary novels and lesser preference for classics, a stronger interest among boys for sports magazines, and more time is spent televiewing and listening to the radio. It was also found that boys prefer stories involving action and adventure while girls prefer romance, humor, and mystery; girls prefer Seventeen'' magazine while boys enjoy sports magazines as well as adult and mechanics magazines; more boys than girls read the newspapers and they prefer sports, comics, and feature stories, in that order, while girls choose comics, feature stories, and the entertainment section, in that order; and boys and girls both prefer comedy television shows. Identifiers-*Synonyms

Developed to document the specifications for supplementary instruction in a skills-based vocabulary program, this report focuses on the study of synonyms as relating to the learning of specific words. One hundred twenty-nine general headwords and more than 1,500 synonyms for these headwords, specified for use in instruction in grades four through nine, are listed in the report. Based on grade level and frequency information about the synonyms, the headwords are tentatively organized into six levels for instruction. The procedures used to obtain the synonyms are outlined, and lists of critical attributes and definitions for selected synonyms are included. (Author/DF)

Descriptors-*Child Language, *Classification, Elementary Education, *Language Usage, Semantics, *Structural Analysis, *Syntax, *Vocabulary
Identifiers-*Orthographic Compounds

The orthographic compounds (two or more words written as one word) in M. Rhode and B. Cronnell's lexicon of words used by elementary school children are categorized in this paper, primarily in terms of related semantic/syntactic structures. Following a discussion of orthographic compounds, the paper mentions procedures used by Rhode and Cronnell in specifying compound words used by children; it then outlines the procedures used in categorizing the more than 1,300 compounds in the Rhode and Cronnell lexicon. The first of two appendixes presents compounds divided into 15 categories on the basis of the relationship between the two parts of the compounds (subject/predicate, subject/verb, verb/object, verb/object of preposition, and so on). Within categories, the words are arranged by grade level. The second appendix lists words that do not fit into any of the categories used in the first appendix. (GT)

Descriptors-*Concept Teaching, *Educational Research, Elementary Secondary Education, *Language Research, Learning Processes, *Teaching Techniques, *Vocabulary, *Vocabulary Development

A research and development effort undertaken to test the hypothesis that concept-learning techniques should be used to teach sophisticated vocabulary concepts is described in this report. The first section provides background information. Specifically, it reviews the need for and the current state of vocabulary development instruction; delineates the constituents of the vocabulary development process, focusing on the interrelationship of vocabulary acquisition and concept acquisition; relates general guidelines for and precautions about concept-learning strategies provided by the literature; and discusses subject-area terminology as the vocabulary development content selected for experimental application of such strategies. The second section describes the procedures followed in developing prototype materials, delineates the guidelines synthesized for developing these materials, and provides selections from the materials produced. The third section discusses the field testing of the materials and relates observations made about the assessments and the lessons. The final section summarizes the research and development efforts, states conclusions about the study, and explores implications for the future development of other such concept-learning materials designed to facilitate vocabulary development. The procedures undertaken in developing and organizing skills indexes for use in coding elementary school language arts textbooks to determine what is actually taught are presented in this paper. The outlined procedures included performing a preliminary analysis on four language arts textbooks to compile an extensive list of skills and performance modes for each text; coordinating the lists of skills across textbooks into major categories; organizing the resulting categories into the 12 skills areas of discourse type, textual characteristics, processes, word study, history, mechanics, parts of speech, grammar, discourse study, reference skills, language theory, and miscellaneous; and analyzing the lists to determine which performance modes could be combined by rewriting their task descriptions. Appendixes contain a list of the textbook series used in the preliminary analysis, a sample coding sheet, the final content index, and the final consolidated performance modes index. (FL)

Tryout of Vocabulary Development Exercises. Technical Note.

Southwest Regional Laboratory for Educational Research and Development, Los Alamitos, Calif.

Report No.-SWRL-TN-3-77-05

Pub Date-31 Jul 77

Note-56p.

Pub Type- Reports - Research (143)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors-Content Reading, Context Clues, Elementary Secondary Education, *Language Research, Reading Skills, *Teaching Techniques, *Vocabulary, *Vocabulary Development, *Vocabulary Skills

A small set of vocabulary development exercises was tried out in four classes in each of grades four, six, and eight. The instruction was derived from three general content areas: subject-area vocabulary, alternative language, and vocabulary from context. The tryout consisted of extensive pretesting, instruction, and posttesting. It was generally found that students in grades four through eight had considerable deficits in vocabulary skills and knowledge and that these deficits could be remedied through instruction of the sort used in the tryout. However, it was shown that additional work is needed to provide instruction that best teaches vocabulary skills and knowledge in a sound but interesting fashion and is appropriate for the grade level for which it is intended. Descriptors-Cognitive Processes, *Cognitive Style, *Decoding (Reading), Reading, *Reading Processes, *Reading Research

The increase in studies of the interaction of readers' prior knowledge systems with language cues in print has been a significant trend in reading research. Current research questions reflect the belief that the prior knowledge systems of readers are a principal determinant of what a reader can learn and remember from text. Cognitive style research and reading research unite in examining individual differences in language processing; the question is "how" readers bring prior knowledge to bear on text, rather than "what" knowledge in particular is used. Research has found that field-dependent and field-independent individuals differ not only in information processing, but in such activities as dreaming, using defense mechanisms, social interaction, and decision making. Recent research has also investigated the failure to comprehend multiple-meaning words, the conceptual tempo dimension, the preferability of the reflective or impulsive style as depending on the sort of task at hand, and bias in the extent to which one utilizes knowledge schemata as a source of style difference in processing. Identifiers-*Australia

A previously published discussion of the ACER Australian Studies in School Performance'' suggests that the performance of students constitutes a concern; however, it is possible to be encouraged by evidence from the study that 97% of 10 year olds and 99% of 14 year olds have mastered the abilities to understand simple written sentences. The assertion that comprehension of longer pieces of writing is much poorer deserves attention. Analysis of the newspaper comprehension test, for instance, indicates that it may be less a test of reading comprehension than a test of experience in reading newspapers, including deciphering the peculiarly elliptical language of headlines and knowing how to locate information in newspapers. An examination of results of the paragraph-reading portion of the test indicates that perhaps what appears to be a failure to understand may be instead a failure to carry out a number of mental operations over and above making some sort of sense of a passage. Analysis of the ACER survey indicates little evidence that there is a need to change the approach to and the emphasis on the teaching of the skills of literacy, although the survey does provide some interesting questions and data that lead to valuable insights about how children handle specific reading tasks. Descriptors-*Beginning Reading, *Cloze Procedure, Educational Needs, Elementary Education, *Language Development, *Miscue Analysis, Positive Reinforcement, Reading Comprehension, Reading Difficulty, *Reading Instruction, Reading Processes, *Teacher Attitudes, Teacher Behavior, Teaching Methods, Teaching Techniques

The failure of many beginning reading students to become efficient or enthusiastic readers is due to mistaken views of the reading process that cause teachers to stress isolated reading skills and error-free oral reading, rather than focusing on children's ability to read with understanding. Teachers who want to teach differently must take an objective look at reading practices, create settings in which children are willing to take risks, view errors as clues to children's logic, and examine the process of language acquisition for clues that might be applied in reading instruction. Language acquiring children are language receivers long before they are language expressers; they are immersed in the whole of language; and they receive reinforcement for partial success in language production. Similarly, teachers of beginning reading can permit reception to precede expression and can immerse students in the whole of written language through such approaches as the oral cloze procedure and having students follow written material read aloud by the teacher. They can then begin to encourage student help with the reading and to use selective cloze procedures that develop students' predictive abilities. As students begin to read, teachers should respond to miscues by rewarding word approximations, placing first emphasis on what makes sense. Using this approach, teachers can prevent the proliferation of problem readers. (GT)

A Videocassette Mastery Learning Tutor Training Course.

Pub Date-Apr 79

Note-11p.; Paper presented at the Annual Meeting of the Western College Reading Association (12th, Honolulu, Hawaii, April 7-11, 1979)

Pub Type- Speeches/Meeting Papers (150) - Guides - Classroom - Teacher (052) - Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Educational Programs, Higher Education, Learning Laboratories, Mastery Learning, *Peer Teaching, Reading Instruction, *Remedial Reading, *Training Techniques, *Tutors, *Video Cassette Systems

A college that uses students as tutors in a reading/study skills lab originally did its training through individual assistance. Tutors were encouraged to complete at least one lesson from each of the textbooks, kits, and programs. A few workshops were held to give an overview of equipment, materials, and strategies. Increased enrollment in the lab meant that a more extensive tutor training program was needed. After criteria for tutor selection were established, a course was developed that included lectures, reading, discussion, and projects. Eventually, an alternative course was developed on videocassettes. This allowed flexibility in permitting tutors to begin any time during the semester and to learn at their own pace. A major drawback is that the course does not afford opportunities for questions and discussion. (A syllabus of the course and a description of the training modules is included.) (TJ)

Descriptors-Childrens Literature, Elementary Education, Identification (Psychological), Imitation, *Language Arts, Language Development, Language Patterns, *Language Skills, Listening Skills, *Literature Appreciation, *Models, *Reading, *Story Reading, Student Motivation, Vocabulary Development

Identifiers-*Reading to Others

The tradition of reading aloud to children has great intrinsic value and should be continued as part of the language arts program. Five major reasons for reading aloud to children can be gleaned from recent linguistic and psychological research and from folklore and intuition: (1) It allows the modeling of syntactic and phonemic language patterns, which is particularly helpful in working with children who speak nonstandard dialects. While speech is an important model in the imitation of syntax, written language is a ``purer'' form and thus more valuable for modeling. Hearing words in context increases listeners' receptive vocabularies and introduces them to alternative ways of expressing themselves. (2) It allows an identification with models, exposing children to literary characters with whom they can identify, as well as to worlds of experience. (3) It provides a commonality of experience to listeners from diverse backgrounds. (4) It develops listening skills and increases the listening attention span. (5) It motivates listeners to want to read, frequently stimulating them to seek out books that have been read to them. Other reasons for reading aloud to children include its contributions to parent/child sharing and to children who cannot or will not read on their own. (GT)

Descriptors-*Content Reading, *Language Skills, Postsecondary Education, *Reading Comprehension, *Reading Skills, *Vocational Education

Vocational education students are characterized by the fact that they tend to lack role models and subsequently lack coping strategies. In addition, they lack educational planning. Many are casualties of a prior hope in that they have already dropped out of or have been pushed out of academic programs. At the same time, occupational training programs contain a complex and unique set of skills and language. This juxtaposition requires special help for students trying to learn the new technical language for their areas. First, the material must be approached with an attitude that recognizes the demands of the text and the needs of the students. Second, the sequence of learning must be maintained and thoroughly considered so that concepts are built and presuppositions are kept to a minimum. Third, the language of vocation is unique and must be respected with precise interpretation in order to maintain the philosophy of process and product. (TJ)

The Effect of Cognitive Style and Learning Passage Organization on Study Technique Effectiveness.

Pub Date-Apr 79
Note-8p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Cognitive Style, Higher Education, *Individual Characteristics, *Learning Modalities, *Reading Research, *Study Skills, *Thought Processes
Identifiers-*Note Taking

In a study designed to relate research on cognitive style to study technique effectiveness, a group of 129 college freshmen was given a test to assess the cognitive style of each. The 93 students who scored in the upper 1/3 and in the lower 1/3 of the distribution were classified as field independent and field dependent. These 93 students were then assigned either to read only or to read and take notes on a passage. Half of the students received the original organized version of the passage while the other half received a scrambled passage in which the order of the sentences within each paragraph of the passage was randomly reordered. One week later, the students were given an examination consisting of a free recall test and a set of 32 completion questions. A significant main effect for the variable of study technique was found, but none of the interactions was reliable. The field independent students were better able than the field dependent students to complete sentences of high structural importance regardless of whether the task required analyzing organized material or structuring unorganized material. Descriptors-Elementary Education, *Error Analysis (Language), Grade 8, Phonetic Analysis, *Phonics, *Reading Ability, *Reading Achievement, Reading Research, *Spelling

The Reading Comprehension and Spelling subtests of the Stanford Achievement Test were administered to 170 eighth grade students to test four null hypotheses about the differences between reading ability, spelling ability, and phonic generalization spelling errors. In addition, a specially constructed Phonics Generalization Spelling Test was administered. The results indicate significant differences in the reading achievement of good and poor spellers, and in the spelling achievement of good and poor readers. A qualitative analysis of phonic generalization spelling errors also finds that qualitative differences occur in the errors made by good and poor readers and by good and poor spellers. (RL)

Descriptors-*Diagnostic Teaching, Elementary Education, Reading Achievement, *Reading Comprehension, *Reading Instruction, Reading Programs, *Reading Research, Teaching Techniques

A study was conducted to determine whether primary school children who were taught reading with an experimental modality prescriptive-diagnostic reading program achieved higher reading comprehension scores in the intermediate grades than did children who were taught reading with a traditional reading approach. The experimental group was composed of 369 children, while the traditional group consisted of 385 children. T-tests were used to locate significant differences between the children's third and fifth grade mean equivalent scores and their third through fifth grade mean gain scores on the reading comprehension section of a standardized reading test. The Cognitive Abilities Tests nonverbal aptitude scores were also compared by T-tests. Both the traditional and the experimental reading approaches were found to produce similar results in reading comprehension. (Author/FL)

Raising Reading Scores: The Right Way and the Wrong Way for Continued Success.

Pub Date-Nov 78
Note-9p.; Paper presented at the Annual Meeting of the California Reading Association (12th, San Francisco, California, November 9-11, 1978)
Pub Type- Speeches/Meeting Papers (150) - Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Elementary Secondary Education, *Evaluation Criteria, *Evaluation Methods, *Reading Instruction, *Reading Skills, *Reading Tests

Testing reading by testing the bits and pieces of reading leads to teaching the bits and pieces instead of teaching reading. Reading is a total skill rather than a subject, and a skill can best be tested by performance. Some of the purposes for reading tests include showing test score improvement, diagnosis, satisfying parents, grouping or sorting students for instructional purposes, and comparing students across time or areas for purposes of funding. Some tests include ones by the National Assessment for Educational Progress (NAEP) and the California Assessment Program (CAP). The CAP cannot obtain results for an individual student but gives estimates of the total school program. It heavily emphasizes comprehension. Other appropriate measures of reading are: how many books are checked out of the school library; how many books are written, published, purchased, and read; and how many hours students spend reading at home. Descriptors-*Clinical Diagnosis, *Educational Diagnosis, Educational History, Elementary Secondary Education, Learning Difficulties, *Learning Disabilities, *Remedial Instruction, Student Evaluation

Introduced by S.A. Kirk in the early 1950s, the term learning disability'' was intended to eliminate controversial psychological and neurological labels which had come to be applied to students with reading disabilities, but has itself generated much controversy. The four historical phases in remedial treatment of learning disabilities have included the ideology approach, the analysis of individual learning style (with corresponding rehabilitative treatment), the analysis of the task itself, and a correlation of the latter two phases. Present issues concerning the definition of learning disability include whether the definition ought to be psychometric (underachievement'') or clinical (perceptual processing deficits''), and whether the diagnosis of learning disability ought to be restricted to students of average measured intelligence or better. Diagnosis should be a progressively analytic process in which assessments are time-efficient, procedures are based on the judgment of a competent diagnostician, and there is a built in provision for review. Teachers are needed with appropriate competencies to detect, diagnose, prescribe, and implement individual corrective and remedial programs, with adequate support available. (DF)

Identifiers-*Texas

Intended for use by visitors to the Demonstration Schools in Individualized Instruction (DSII) network, this guide provides the following information: lists of members of the DSII steering committee and service center contact persons, explanations of the DSII and of Project CITE (Coordinated Information for Texas Educators), a visitor's checklist of program elements, and an index to the program descriptions, broken down by subjects and grade levels. The main section of the guide provides 20 program descriptions, each containing information about the school where the program is in use, the subject and grade level involved, the name of the contact person at the school, and the development of the program. A list of regional educational service center resources and a bibliography of documents pertinent to individualized instruction are appended. (FL)

Descriptors-*Functional Illiteracy, *Global Approach, International Programs, *Literacy, *Literacy Education, Reading, Writing, Written Language

The task of providing the tools of basic literacy for all citizens is still unfinished in the United States as well as on an international scale. No longer can the developed and underdeveloped worlds relate as mentor and learner; the United States has much to learn from the great work in literacy and basic education performed in lesser developed areas. Mass literacy is necessary for modern technology and modern nations; the quest for universal literacy is inextricably linked to such values as equality of social and economic opportunity, self-determination in the political sphere, and the development of a critical intellectual spirit. In addition to functional or basic literacy, there exists the concept of social literacy,'' which recognizes that certain skills and capacities are necessary for one to become a part of society and to transcend one's own heritage and gain some sense of oneself as a citizen of the world. Beyond the transmission of technical information and insight, literacy has a purpose in expressing the interpretations of human experience. (DF)

A Comparison of Two Methods of In-Service Programming for Helping Content Area Teachers Select and Use Student Reading Materials.

Pub Date-Mar 78

Note-24p.; Report based on Ed.D. Dissertation, University of Pennsylvania

Pub Type- Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Content Reading, *Inservice Teacher Education, Instructional Staff, Reading Instruction, *Reading Material Selection, Secondary Education, *Staff Improvement, *Teacher Attitudes

A study was undertaken to solve, through staff development, the problem of the selection and use of appropriate reading materials by content area teachers and to determine the amount and type of cooperation that could be expected between content area teachers and reading personnel. The field-based, action-research study compared two approaches to inservice programing: an inservice workshop and independent materials, and the same workshop and materials plus individualized follow-up assistance. Both attitude and behavior change were measured. Results showed that, while the attitudes of all teachers involved in the study improved, there was little behavior change in either group. Those who received individualized assistance, however, did perceive themselves as more competent and were more eager for continued cooperation with reading personnel than did the control group. Aptitude-Treatment Interactions in a Study of Teaching Basic Reading Skills in Secondary School.

Pub Date-Apr 79
Note-14p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Inservice Teacher Education, *Low Ability Students, *Reading Instruction, *Reading Research, Reading Skills, Research Methodology, Secondary Education, Teacher Attitudes, *Teacher Behavior, *Teacher Guidance

Aptitude-treatment interaction (ATI) methodology was used to assess the effectiveness of secondary teacher inservice training in reading instruction and to test the hypothesis that low-ability secondary students benefit most from directive teaching. For the first part of the study, 39 teachers were placed into two groups. One group received training in classroom behavior previously found to be predictive of reading gains; the other group was only observed. The results suggested that effective training methods are reflected in an altered relationship between teacher traits and classroom processes. In the second part of the study, the presence of an ATI between student ability and the directiveness of instruction was explored by creating an index of the directiveness of instruction, classifying classrooms as being either high or low on directiveness, and assessing the ability/achievement relationship within each group. Only tentative confirmation was established for the hypothesis. (FL)

Descriptors-Beginning Reading, Developmental Stages, Elementary Secondary Education, Listening Comprehension, Paragraphs, Perception, Phonics, Reading Comprehension, *Reading Diagnosis, *Reading Improvement, *Reading Instruction, Reading Interests, Reading Rate, *Reading Skills, *Reading Tests, Syntax, Vocabulary

This publication is designed to give classroom teachers and reading specialists at all levels 42 ready-to-use informal diagnostic devices for the early and accurate identification of individual and group reading needs. It is organized into eight sections. The first contains suggestions to aid teachers in using various testing devices. The remaining sections provide tests in the areas of prereading, letters and words, phrases, syntax, paragraphs, and attitudes and interests. The skill areas covered include visual and auditory perception, reversals, receptive vocabulary, applied phonics, comprehension, and rate of reading. Each testing device provides the following information: a description of the device, instructions for its appropriate use, the age level for which it is intended, the time needed to administer it, how to score it, and remediation steps. Appendixes contain reproducible English/Spanish language dominance cards; San Diego quick assessment cards, forms I and II; and San Diego quick oral paragraphs, forms I and II. (FL)

Identifiers-*Piaget (Jean)

This is the second volume in a series that records the official Symposium Proceedings of the Jean Piaget Society and examines the theoretical, empirical, and applied aspects of Jean Piaget's seminal epistemology. The 12 papers are divided into four areas: language development, formal reasoning, social cognition, and applied research. The topics of the papers include: thought and language, the relevance of Piaget's early work for a semantic approach to language acquisition, new prospects for neuropsychological research on disorders of perception and language, formal reasoning, symbol manipulation, interface between the behavioral and cognitive-developmental approach to research in morality, and the function of reading in the transition to concrete and formal operations. Descriptors-*Behavior Patterns, *Childhood Interests, Demography, Elementary Education, Interest Research, *Mass Media, Racial Factors, *Reading Habits, *Reading Interests, Sex Differences, *Television Viewing

To update the findings of a 1971 study, a study seeking to identify the interest patterns and media preferences of fourth and fifth grade children was undertaken in 1978. The responses of 731 children to an interest inventory were subjected to separate factor analytic and analysis of variance procedures. The former were used to cluster degree-of-interest responses, and the latter were used to compare cluster scores of the subgroups to determine whether they varied according to geographic location or race. Sex as a factor was determined by an examination of the children's rank-order patterns. The results revealed the following: boys' responses clustered into six groupings (presented in rank order) sports, media, historical/adventure, informational, fun and fantasy, and social empathy/arts; girls' responses clustered into eight groupings media, animals, fun and fantasy, social empathy, sports, arts, historical, and informational; geographical location accounted for some differences while race accounted for very few differences; and separate, across-clusters analyses of variance of the "read" and "watch" scores revealed that the girls had significantly higher read scores and, to a lesser degree, higher watch scores than did the boys. The urban sample had a significantly higher watch score than did the suburban sample, and race did not account for any significant differences; an overall preference for viewing over reading for all categories was evident. Will the Real Homonym Please Stand Up? A Question of Classification.

Pub Date-Mar 79
Note-7p.; Paper presented at the Annual Meeting of the State of Maryland International Reading Association Council (7th, Baltimore, Maryland, March 8-10, 1979)
Pub Type- Opinion Papers (120) - Speeches/Meeting Papers (150) - Reference Materials - Vocabularies/Classifications (134)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Classification, *Linguistics, Semantics, *Structural Analysis, *Word Study Skills
Identifiers-*Homonyms

Stating that teachers are often confused by the terms homonym'' and homophone,'' this paper maintains that the difficulty can be eased by determining how words can be classified in terms of structure, meaning, or sound. It then presents a word nomenclature model that draws upon the differentiation between these groups of words and treats not only homonyms and homophones but also other classes of words such as acronyms, paronyms, and heteronyms. The paper concludes that the model could aid the teacher in dealing with apparent contradictions in basals and in some dictionaries. (Author)

Effects of Mathematical Vocabulary Training on Problem Solving Ability of Third- and Fourth-Graders.

Pub Date-Apr 79

Note-92p.; D.Ed. Thesis, Rutgers University The State University of New Jersey

Pub Type- Dissertations/Theses (040) - Reports - Research (143)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors-*Content Reading, Elementary Education, *Mathematical Vocabulary, Mathematics Instruction, *Problem Solving, Productive Thinking, Reading Difficulty, Reading Research, *Reading Skills

To determine the effectiveness of mathematical vocabulary training on the problem solving ability of third and fourth grade students, 66 students were placed into either an experimental or a control group. All were pretested and posttested with an experimental mathematics vocabulary test and with a standardized mathematics test. Mathematical vocabulary was then taught to the experimental group for eight weeks. The results favored the experimental group. There were significant differences between the gain scores of the two groups on both the vocabulary test and on the standardized test. The findings suggest that systematic mathematical vocabulary training increased the problem solving ability of third and fourth grade students. (Author/FL)

The Role of the Reader: Explorations in the Semiotics of Texts.

Pub Date-2 Jul 79
Note-273p.
Available from-Indiana University Press, Bloomington, Indiana 47401 ($17.50 cloth)
Pub Type-Opinion Papers (120) - Books (010)
Document Not Available from EDRS.
Descriptors-Aesthetic Education, Comics (Publications), *Discourse Analysis, Linguistic Theory, *Literary Analysis, Musical Composition, Nonverbal Communication, Novels, Popular Culture, Semantics, *Semiotics, *Verbal Communication
Identifiers-*Reader Response

The essays in this book focus on the role of the reader in textual interpretation. Specifically, they examine ``open'' and ``closed'' texts. The three essays in Part I deal with both verbal and nonverbal texts. The first considers musical compositions that leave considerable autonomy to the individual performer and also discusses the phenomenon of the ``unfinished work'' in contemporary art and aesthetic theory. The second and third essays examine how the procedures of aesthetic manipulation of language produce the interpretive cooperation of the addressee. Closed texts are represented by examples from popular culture in the three essays in Part II. These examine the sociopolitical assumptions implicit in Superman comic books, the relationship between rhetoric and ideology in the fiction of Eugene Sue, and the narrative structure in Ian Fleming's James Bond novels. The two essays in Part III provide a theoretical framework for understanding the semiotic strategies of open and closed texts. The first investigates the contributions of contemporary semantics to the study of narrative; the second connects the modalities of textual interpretation with the problem of possible worlds and discusses a story by Alphonse Allais. Appendixes contain an empirical test of the Model Reader as a textual construct and excerpts from ``A Most Parisian Episode'' by Alphonse Allais. (FL)

Use of Masked Materials to Develop Insights in Word Attack and Reading Comprehension.
Pub Date- 77
Note-31p.; Research prepared at California State University, Northridge
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Cloze Procedure, Elementary Education, *Reading Comprehension, *Reading Rate, *Reading Research, Socioeconomic Influences

A study involving 238 fourth grade pupils was conducted to determine whether a relationship exists between the use of instruction with masked materials and pupils' word recognition and comprehension. The pupils were placed into either an experimental or a control group. Each group was administered a pretest to measure reading rate, to insure that all subjects could read and comprehend at or above the second grade level, and to make comparisons with posttest performance. The control group took the posttest, consisting of a 100-word passage in which every fifth word had been masked and a comprehension test, immediately. The experimental group first participated in the treatment, which consisted of the entire group working together to figure out what the masked words were in a passage and discussing how they made their decisions, then took the posttest. It was found that subjects in the experimental group showed significantly higher mean scores on both the masked and comprehension posttests, that subjects with greater reading speed showed significantly higher means on the masked posttest than those who read more slowly, that the pretest had significant predictive value on both posttests, and that socioeconomic status had a significant effect on comprehension posttest scores but not on masked posttest scores. Descriptors-Parent Child Relationship, *Parent Participation, Primary Education, *Reading Improvement, *Reading Instruction, *Reading Research, Research Problems, *Tutoring

A study was undertaken to examine the effect of parent tutoring on the reading scores of their children and on their own reading scores. The experimental group was composed of ten children who had just completed first grade and their parents. The control group was composed of ten nontutored children and their parents. All of the children were chosen from those with the lowest reading scores in their classes. Tutoring parents attended three one-hour training sessions where they were taught techniques for tutoring their children. Nontutoring parents also attended training sessions, but were taught math games to play with their children. At the end of the nine-week program, both children and parents were tested for reading improvement. The results showed no significant differences between the reading scores of the tutored and the nontutored children, nor was there a significant difference between the reading scores of tutoring and nontutoring parents. Descriptors-*Autoinstructional Programs, Basic Skills, *Developmental Reading, Higher Education, *Learning Modules, *Mastery Learning, *Reading Improvement, *Reading Instruction, Remedial Reading Programs

This handbook describes a college level self-pacing mastery learning corrective and developmental reading program in the areas of study skills, vocabulary, comprehension, reading in the content areas, critical reading, and rate flexibility. Each learning module contains a program of learning experiences, performance competencies, a topic, a rationale, and an objective. Six additional elements contained in each module are: preassessment, a list of the competencies, suggested learning experiences, criterion behaviors, postassessment, and a bibliography of sources used in the module. Appendixes include an individual student form, a class record, and a student feedback form for assessing the modular delivery system; group reading inventories, for English and social studies; and a sample class profile/summary chart for the group reading inventories. The Effects of Active Student-Initiated Responses on Literal and Non-Literal Reading Comprehension and Attitudes toward Reading of Third-Grade Students.

Pub Date- 77
Note-32p.; Research prepared at the University of Washington
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-Educational Strategies, Grade 3, Primary Education, Questioning Techniques, *Reading Comprehension, Reading Improvement, *Reading Instruction, *Reading Research, Response Mode, Student Motivation, *Student Participation, *Teaching Methods

To determine the effects of active student-initiated response lessons as an alternative to teacher-directed strategies for increasing reading comprehension, third grade children were placed into either an experimental or a control group. The experimental group received a series of lessons based on active student-initiated responses. These included instruction on questioning strategies, storytelling, story theater, role playing, and culminating activities. The control group received lessons based on teacher-initiated oral/written questions. The findings indicated a trend favoring the experimental strategy as compared with the control. Significant differences favoring the experimental treatment were found in regard to nonliteral responses and in attitude toward reading. (Author/FL)

Specification and Validation of Reading Skill and Hierarchies.

Pub Date-Apr 79
Note-67p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type- Information Analyses (070) - Reports - Research (143) - Speeches/Meeting Papers (150)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-Classification, Criterion Referenced Tests, Elementary Education, *Organization, Phonics, *Reading Research, *Reading Skills, *Reading Tests, *Research Methodology, Structural Analysis

A study was conducted to compare two methodologies for establishing hierarchical relationships the Dayton and Macready model and the White and Clark procedure using criterion referenced test data. Several phonics and structural analysis skills were selected from a reading skills battery. The opinions of reading experts'' were solicited in order to establish the hypothesized hierarchy. Both methodologies were then applied to validate the connections. The hypothesized hierarchies were then compared to those produced using empirical data based on the administration of four criterion referenced test levels to approximately 14,000 elementary school children. Specification of the hierarchies based on empirical data via either probabilistic model produced more stable results than those hypothesized by the content specialists. (Author)

Descriptors-*Black Dialects, *Black Students, *Classroom Communication, Communication Problems, *Disadvantaged Youth, Inner City, Literacy, *Reading Failure, *Reading Instruction, Reading Skills, Student Teacher Relationship, Teacher Role, Urban Education

Perhaps the most controversial and provocative issue in the discussion of reading failure in inner-city schools has been the relationship between Black English Vernacular (BEV), reading failure, and reading instruction. The debate has focused on the degree to which BEV does or does not interfere with the acquisition of reading/language arts skills. Despite the insistence by some researchers that dialect interference plays a major role in black children's reading failure, it can also be argued that the ways teachers communicate in the classroom may well be a more critical factor in black children's success in learning to read than the preoccupation with the relationship between dialect differences and reading failure. The ethnographic description of the communicative pattern of the inner-city classroom is a new and relatively unchartered area of inquiry. The results of this inquiry can help to provide knowledge necessary to achieve the goal of literacy among inner-city children. (Author)

Identifiers-*Reading Attitudes

There are many ``truths'' concerning reading psychology and pedagogy that teachers accept without questioning and that play an important role in current reading instruction. However, both science and education are deeply affected by the tenor of their times, and present day answers should be regarded only as tentative propositions that may be eventually proved wrong. In considering the nature of the learner and the learning process, educators need to examine concepts of school and reading readiness, motivation techniques for children to whom reading has little appeal, and the appeal of basal readers and other classroom reading materials. They should also consider using social situations and social reinforcement in teaching reading. In the area of reading pedagogy, educators need to consider the following: ways to assure that reading becomes an important activity for children and adults, the possible use of audiovisual aids to increase interest in reading, ways to develop content reading abilities, and the impact on pupils of new reading materials rewritten to alter social and sexual depictions. Finally, with regard to the psychology of reading, researchers should develop ways to measure reading and should study such practical classroom problems as the impact of teacher behavior on learning. Descriptors-*Beginning Reading, Decoding (Reading), *Learning Modalities, Learning Processes, Phonics, Primary Education, *Reading Instruction, *Reading Research, Sight Method, *Word Recognition

A study was conducted to test the thesis that teaching word recognition skills in a manner compatible with the learner's auditory or visual modality preference would facilitate beginning reading instruction. A group of 62 students in two first grade classrooms was studied; one class stressed the presentation of words as whole units, the other stressed phonics. At the end of the academic year, correlation coefficients were computed between the difference scores that indicated modality preferences and scores in reading achievement. Results indicated the following: (1) no significant relationships were demonstrated between either the components or total modality preference scores and word recognition scores, regardless of teaching method; (2) those students in the phonics classroom with visual modality preference scored significantly higher on the word recognition test than did those with auditory preference; and (3) there was no significant difference in word recognition skills between classes when instruction stressed the whole word approach. Descriptors-Elementary Secondary Education, *Language Skills, Program Evaluation, *Program Planning, Questionnaires, *Reading Instruction, *Reading Programs, *Teaching Techniques

Intended to help provide breadth to a reading program, this handbook emphasizes that reading is learned and reinforced through the use of the other language skills: listening, speaking, and writing. The first section relates to key instructional components of effective reading programs and includes divisions dealing with skill development (comprehension, language processing, and fluency and flexibility); motivation; and application (reading and responding to literature, reading in the content areas, recreational reading, study skills, and practical uses of reading). The second section relates to key issues for implementing a high-quality reading program and includes divisions dealing with classroom-level issues (classroom climate and organization, personalized instruction, teaching methodology, systems for monitoring progress, and management systems) and with school-level issues (policies and philosophy, availability of programs and courses, student placement, student disabilities, assessment, and reports to parents). Also included is a checklist for use in evaluating the components of an effective reading program. (TJ)

To determine reasons for the difficulties reading disabled boys commonly have with memory tasks, an investigation of the use of category organization in free recall of such children was undertaken. The performance of 45 nine- to eleven-year-old normal and 45 reading disabled boys was compared on a free recall task in which stimulus items were arranged in a fixed order for presentation prior to recall. Subsequently, subjects experienced one of three manipulations, all involving the active sorting of the materials. Two of these manipulations attempted through instructions to affect the child's level of processing of items, while the third allowed the child to sort freely in preparation for recall. Poor readers recalled fewer items and tended to show less organization of recall than normal children during the baseline trial. On the experimental trial, recall and category clustering were highest for both groups following a manipulation designed to produce semantic encoding and grouping of items, and lowest when the children were required to focus on the color of the items. In the absence of instructions to guide the nature of their sorting of items for study, the reading disabled children failed to organize or study as effectively as normal readers did. Rather than lacking the ability to use semantic relations as a strategy for grouping items, the reading disabled children had difficulty in spontaneously generating an effective grouping strategy to aid recall. Descriptors-Attitudes, *Early Reading, Educational Games, [illegible]lementary Education, *Learning Activities, Listening Skills, *Parent Child Relationship, *Parent Role, Parent School Relationship, Preschool Education, *Reading Programs, Reading Skills, Television Viewing

Identifiers-*Parents in Reading

Developed for Idaho's original Parents in Reading program, this booklet is designed for use by parents of preschool and elementary school students. Topics are discussed in both English and Spanish and include: reading, listening, and talking to children; controlling television viewing; using numbers with children; children's muscles and movements; encouraging children to imitate animals; creative development; five developmental games; fostering positive attitudes about school; child independence; and affordable trips. The booklet also contains a checklist for parents to use in determining how well they are doing and a selected booklist. (FL)

Identifiers-*Center for the Study of Reading (Illinois)

A group of 144 kindergarten and third grade students heard stories in which the information necessary to infer the protagonist's motives was varied as to its form and location in a story sequence. In all story variations, the semantic content of the information was held constant. All children completed three tasks: a moral judgment concerning the goodness or badness of the protagonist's behavior, recall of the entire story, and a series of probe questions about the story events. The results indicated that information related to motives was recalled equally well independently of where it occurred in the story or in what category it was placed. Similar results were found when moral judgment scores were analyzed. The form or location of information did not alter moral evaluations. The data suggest that prior findings on differential recall of story categories depend on uncontrolled content and the relation among statements to the main goal rather than the form or location of the category. Identifiers-*Center for the Study of Reading (Illinois)

This paper reviews recent research to determine why children encounter problems understanding what they read. Four points are discussed as especially relevant to children's problems in reading comprehension: (1) reading differs from early language experiences, and an analysis of these differences can indicate likely sources of reading difficulty; (2) reading is a process that involves constructing hypotheses based on prior knowledge, while a lack of such knowledge can lead to incorrect hypotheses; (3) the emphases on decoding skills in early grades often engages children in essentially meaningless reading activities, giving the impression that reading has no purpose; and (4) an entirely new set of strategic skills is needed for functional reading tasks such as reading textbooks or following instructions, tasks for which no foundation has been laid. Implications for testing are discussed, including the use of an individualized approach that embeds testing in the ongoing reading and writing activities in which the student is engaged. (DF)

Identifiers-*Center for the Study of Reading (Illinois)

To determine why some children find textbooks to be much more difficult to understand than teachers' presentations, four reading selections for middle grade readers were analyzed, as were tape recorded lessons prepared by ten teachers on the basis of the same selections. Excerpts from one of the written passages and excerpts and analysis of one teacher's presentation suggest four general advantages that teachers have over textbooks in getting children to understand and remember the material presented: they can tailor their messages to the background and level of understanding of the children in their classes; they can remind students of relevant information they already know and help them to see how new information is related to prior knowledge; they can focus students' attention on a passage as a whole or on selected parts of a passage; and they can monitor comprehension. The results of the study point to ways that textbook authors may modify written passages so as to minimize their limitations, as well as to ways that teachers can optimize their classroom presentations and their reading comprehension instruction. A Comparison of Selected Reading Expectancy Formulas with Reading Achievement for Ninth and Tenth Graders.

Pub Date-May 79

Note-46p.; M.Ed. Thesis, Rutgers The State University of New Jersey

Pub Type- Reports - Research (143) - Dissertations/Theses (040)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-*Expectation, *Predictive Ability (Testing), *Predictive Validity, *Reading Achievement, Reading Instruction, *Reading Research, *Reading Tests, Secondary Education

A total of 94 ninth and tenth grade students participated in a study to determine which of the following six reading expectancy formulas predict actual reading achievement of secondary school students of average intelligence: the Dechant formula, the Harris I formula, the Science Research Associates' ``Tests of General Ability,'' the Harris II formula, the Los Angeles formula, and the Bond and Tinker formula. Reading achievement scores and intelligence scores were obtained for all students. Each of the six reading expectancy scores was then correlated with the observed reading scores of each student, using the Pearson product-moment correlation coefficient. Each score was then correlated with every other expectancy score to determine the intercorrelation of the formulas. The results revealed that, at a particular grade level, no one formula predicted reading achievement better than any other. In addition, it was found that the correlation between the formulas was extremely high, indicating that they were essentially assessing the same phenomena. (Author/FL)

Descriptors-Ethnography, *Ethnology, *Interpersonal Relationship, *Research Methodology, *Social Behavior, Social Relations, *Social Science Research
Identifiers-Ethnomethodology, *Symbolic Interactionism

Methods employed in social science research must be true to the phenomena under investigation. Both symbolic interactionism and ethnomethodology take everyday life as their fundamental premise. Symbolic interactionism, based primarily on the work of George Herbert Mead, is the peculiar and distinctive character of interaction as it takes place between human beings interpreting and defining each other's actions instead of merely reacting to them; their response is based on the meanings which they attach to such actions and is mediated by the use of symbols and interpretation. According to Mead, meaning is ascribed to the actions of others by taking the role of others, either of a specific person (significant other) or of a group (generalized other). Ethnomethodology is the examination of how people in their everyday lives make sense of the situations in which they find themselves. Both methodologies require that phenomena must determine the method, although the selection of phenomena as relevant reflects the researcher's choice. A methodological implication of these approaches is that problems must be examined within the situations in which they manifest themselves by getting close to the people being studied. (DF)

Descriptors-*Course Content, *Course Organization, Discussion (Teaching Technique), Higher Education, *Journalism Education, *Management, *Newspapers, Student Research, *Systems Analysis, Systems Approach, Test Items

The prototypal course in newspaper management described in this paper is based on systems analysis and the systems flow approach. The introductory section of the paper discusses the need for instruction in newspaper management, the concepts of the systems approach and systems flow and the way they relate to enterprise management, and specific objectives for a newspaper management course. Other sections suggest a schedule for group discussions about many aspects of newspaper management (which provide the basic framework of the course), and comment on other course components, including course readings, seminars in which resource persons participate, student inspection of newspaper publishing facilities, student in-depth research on selected problems, and quizzes and examinations. The appendixes provide a bibliography of publications dealing with newspaper management; lists of relevant periodicals and organizations; suggested topics for resource persons' presentations; instructions for student research projects; representative questions for discussion sessions, quizzes, and examinations; and representative responses to an essay question in a newspaper management course examination. Descriptors-*Assignments, *Composition (Literary), English Instruction, Higher Education, *Student Motivation, *Teaching Techniques, *Writing Exercises

To aid in the understanding of ``cases'' for writing (defined as highly focused situations in which students assume a role that demands writing to specific audiences and for utilitarian purposes), this paper begins by outlining the problem case faced by the author: to present a convincing argument for the use of the case approach to composition. It then notes that the purpose of cases in a composition course should be to engender writing, suggests how composition teachers can use a case approach, and describes three sample cases. For one of the cases which requires students to write about baseball rules in answer to questions from the 11-year-old Indonesian pen pal of an American boy the paper includes the ``letters'' from the Indonesian boy, outlines the writing assignments for the case, and describes the values of using the case in a composition class. Finally, the paper outlines the three key assumptions on which the case approach to composition is based: writing can be taught most effectively when students accept its purpose; the reading in a writing course must lead closely and directly to the writing; and the principles of good writing are better learned from carefully designed writing assignments than from prescribed rules of composition. Identifiers-Australia

The free writing responses of 120 gifted/average Australian high school students (grades 8, 10, and 12) to a short story and a poem were coded according to Alan Purves' categories engagement, perception, interpretation, evaluation, or miscellaneous to detect any patterns of differences. The students also provided data about their preferences for the school-based study of literature and for literature in an informal setting. For the story and poem either combined or taken separately, there were significant decreases in engagement responses and increases in interpretation responses from grade 8 to grade 12. The poem prompted less retelling and greater problems with narrative language than the story. No sex differences in responses were observed, but superior students provided significantly less engagement and more evaluation responses than average students. The eighth and tenth grade students expected to focus on matters of content and structure in short stories, while tenth and twelfth graders ranked literary devices and language as the most important aspects of poetry study. All students considered personal involvement of greatest importance in the informal study of literature. These response patterns place the Australian students closer to the American students than either the English or New Zealand students of prior studies. (RL)

Individuals or Types: A Character Analysis of Hans Christian Andersen's Fairy Tales.
Pub Date-Jun 78
Note-38p.; Research prepared at Brigham Young University
Pub Type- Opinion Papers (120) - Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Characterization, *Childrens Literature
Identifiers-*Andersen (Hans Christian), *Fairy Tales

In a literary analysis of selected Hans Christian Andersen fairy tales, the characters were divided into three main types: human beings; plants, animals, and inanimate objects; and imaginary creations. A comparison was then made between Andersen's characters and those in traditional fairy tales. The findings revealed that Andersen succeeded in his attempt to use the fairy tale as a literary art form by portraying characters with individual and unique personalities. (Author/FL)

Descriptors-Elementary Secondary Education, English Instruction, Film Criticism, Film Production, *Films, *Film Study, *Language Arts, Literary Conventions, Literary Influences, Resource Guides, Teaching Techniques, *Visual Literacy

Following a discussion of the similarities and differences among the various communications media, the two main sections of this monograph describe ways to teach the skills of viewing and to study the moving image. The assumption is that television and film have unique characteristics that differentiate them from speech and books, requiring criteria for judgment and evaluation which often are distinct from criteria for spoken language and printed literature. The section on teaching the skills of viewing includes discussions of broadening awareness, understanding structures, understanding film techniques, active participation in viewing, appreciating historical perspectives, developing a critical sense, and developing good viewer attitudes. The section on studying the moving image addresses such ideas as film as language, film as literature, genre, thematic approaches, writing about film and television, and film as creative act and experience. Appendixes offer a selection of books for teaching film, a sample program for integrating film into the language arts program (with suggested film titles), and a list of film rental sources. (RL)

Descriptors-Community Colleges, Composition (Literary), Higher Education, *School Industry Relationship, *Teaching Methods, *Technical Writing

The papers in this collection were presented at the second annual conference on the Teaching of Technical Writing at Southern Illinois University at Carbondale. Those from the general session, which are of a philosophical nature, discuss a flexible approach to teaching technical writing, the essentials of a technical writing course, how technical writing teachers can help students with learning disabilities, and technical writing as technical communication. Those from the workshop sessions consider either ways to teach technical writing or the interaction between industry, education, and technical writing. Papers concerned with teaching techniques discuss a studio'' method of instruction, the teaching of technical writing at community colleges, free writing for engineers, and engineering communication. Those on relations with industry discuss the variable meaning of technical writer'' and what qualities industry desires in a technical writer. A list of conference participants is appended. (RL)

Identifiers-*Composition Process

The classroom-tested ideas for teaching writing described in this booklet are based on the beliefs that writing is a teachable skill, that it is a process with constituent steps, and that students need evaluation at each stage of writing. Following an introduction that identifies eight steps in the writing process and discusses class organization, the booklet is divided into sections on prewriting, writing, and evaluation. Each section begins with an explanation of the writing principles involved and then describes specific exercises that provide practice based on those principles. The exercises in the prewriting section are designed to guide students through the first five steps of the writing process: gathering data, listing details, formulating a thesis statement, selecting details that support the thesis, and ordering the details coherently. The writing section offers ideas for helping students in the final three steps: writing the rough draft, writing the final draft, and revising. The last section, on evaluation, offers ideas for training students to evaluate their own and each other's essays. The appendix provides an illustrative syllabus, an excerpt from an illustrative class calendar, forms useful in three data gathering exercises, and an illustrative essay accompanied by completed peer critic checklists. Descriptors-*Composition (Literary), Elementary Education, Elementary School Students, *Evaluation Methods, Measurement Instruments, *Program Evaluation, Student Development, *Student Evaluation, *Writing Skills

An instrument was developed for use in the evaluation of a pilot program to improve the writing skills of elementary school students in the Austin (Texas) Independent School District. Called the Assessment of Writing Skills'' (AWS), the instrument assesses writing maturity, productivity, and writing mechanics by collecting a holistic evaluation and such frequency counts as total words, percentage of words spelled correctly, total sentences, sentence length, total correct punctuations, percentage of correct punctuations, total correct capitalizations, paragraph usage, number of modifying words, and sentence usage. The AWS was used by three raters to evaluate 268 second through fifth grade students' descriptive writing samples during the fall (pretest) and spring (posttest) of the same academic year. A measure of interscorer/intrascorer reliability ensured that the essays were rated consistently. The data reveal that fourth graders had lower pretest scores than third graders on eight of 13 variables, a fact that might be explained by the corresponding shift from printing to cursive writing during that period. The results also suggest that the AWS meets criteria for the evaluation of instructional programs; the holistic scores of AWS can assess overall growth over time, while frequency counts can provide feedback regarding specific skill development and needs for instruction. Descriptors-*Composition (Literary), *Decision Making, *Models, *Problem Solving, Research Criteria, *Research Methodology, Research Needs, *Thought Processes
Identifiers-*Composition Process

Two major factors have shaped writing research from the cognitive processing viewpoint. The first factor contains the strategic decisions about the course of such research, suggesting what is interesting and how best to proceed. The decisions made in regard to writing as a cognitive process have been to focus on the act of writing, to seek a process model of writing, to model individual writers, to work holistically (a top down'' approach), and to divide the writing task into parts for easier analysis. The second research-shaping factor is the necessity to attend to certain salient facts about the writing processes. These facts that nature has imposed on the writing researcher, and that result in part from the strategic decisions the researcher makes, include the following: Writing is goal directed. Writing processes are hierarchically organized. Some writing processes interrupt other processes. Writing processes can be organized recursively. Writing goals can be modified as writing proceeds. As yet, the model developed from the strategic decisions attends to all the salient facts, with the exception that no mechanism accounts for the modification of goals; so far, insufficient data have been collected to specify how such a mechanism works. A Basic Writing Program in a Four-Year College.
Pub Date- 78
Note-29p.; Program prepared at Rutgers, The State University of New Jersey
Pub Type- Reports - Descriptive (141)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-College Students, *Composition (Literary), Course Content, *Curriculum Design, *Curriculum Development, Curriculum Planning, *Developmental Programs, Expository Writing, Higher Education, Individualized Instruction, *Remedial Programs, Writing Skills

The basic components of the basic writing program at Rutgers University, designed to prepare disadvantaged students for the core course in English, are a combination of reading and writing activities with as much individualized instruction as possible. The components include three courses, a learning center, and an annual workshop in the teaching of reading and writing in college. Two of the three courses comprise a year-long, two-credit sequence of modules on ``self'' that integrate reading and writing instruction to promote college level study skills. If students do not pass a placement exam for the regular English course after completing this sequence, they are referred to the third course, one semester of noncredit work in developmental reading and expository writing designed to help them pass the placement exam. The learning center provides individualized instruction for participants in these developmental courses and for other students who recognize the need to improve their reading, writing, and study skills. The annual workshop is a forum for the interchange of teaching ideas, the preparation of new teachers, and continuous staff development. Expectations are high for the continued success of this program and its services to the students. (The paper includes excerpts from one of the course syllabi and lists suggested teaching methods.) Kluwin, Thomas N.

Cyclic Patterns of Interaction in the Discourse of English Teachers.

Pub Date-Apr 79

Note-31p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)

Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors-Behavior Patterns, *Classroom Communication, *Communication (Thought Transfer), *Discourse Analysis, English Instruction, Higher Education, *Interaction Process Analysis, *Teacher Behavior, *Teacher Education

The use of discourse analysis in examining the classroom language interactions between English teachers and their students builds on the basic concepts of language function and language sequence. The four language functions are eliciting, informing, directing, and boundary marking (marking the divisions of discourse units). The three language sequences are moves (the basic units of classroom language, including opening, answer, and followup), exchanges (related moves taken in turns), and transactions (strings of exchanges). Data that examine these functions and sequences were collected for 11 beginning English teachers by coding the audiotapes of three classes per teacher. The patterns observed in these tapes suggest that the training of English teachers should contain a middle ground between the behavioralist approach that argues for microscopic modifications of teaching behaviors (because they correlate with affective or cognitive outcomes) and a gestalt approach that advocates a generalized student attitude as the goal of a holistic approach to teaching. Identifiers-*Ecuador

This report examines a joint project of the University of Massachusetts and the Ecuador Ministry of Education which used puppet and campesino'' (folk) theater as a creative form for the presentation of numeracy and literacy programs and for introducing social consciousness concepts. It focuses on the use of the puppet theater in particular and includes specific guidelines for its presentation, including planning, community relations, and technical construction information. It discusses the 25 presentations that were given in 1974-1975 in different communities by the theater group using five types of theatrical expression: puppet theater, cabezones'' or huge heads, traditional campesino theater, social drama, and empirical theater in which the audience participates. It reports on the content of the plays, which was coordinated with the specific actual conditions of the sites where they were presented, representing situations in the life of the community. The report notes that the social-dramatic use of puppet theater was effective as a means of eliminating inhibitions and allowing the expression of artistic capacities in concrete form. It concludes with a description of a Bibliobus (library on wheels) program in Ecuador. (DF)

Descriptors Adult Characteristics, Adults, Behavioral Science Research, Behavior Patterns, Discriminant Analysis, Individual Characteristics, *Life Style, *Television Research, *Television Viewing

Since statistics on television viewing and television ownership suggest that this medium is a pervasive and powerful influence on most people's lives, it is potentially informative to identify and study that relative handful of people who are not regularly exposed to television, identifying their defining characteristics. In contrast to previous studies, the present study attempts to characterize television nonveiwers by using multivariate analysis instead of two-way cross tabulations, and by including more predictor variables related to life style. A list of more than 200 variables was pared first to 43 and then to 11 by using discriminant analysis. The 11 variables succeeded in classifying television viewers and nonviewers correctly for 74.6% of the cases in one sample (from a national survey) and 66.4% of the cases in an entirely different sample two years later. The variables associate nonviewing with less satisfaction from family life, greater happiness in general, fewer children under age six in the household, greater participation in groups and organizations, more time spent in active military service, lower family income, stronger view of self as religious, greater numbers of teenagers in household, higher level of family income when person was 16, less frequent attendance at religious services, and more frequent socializing with friends outside the neighborhood. Descriptors-*Composition (Literary), *Expository Writing, *Grading, Higher Education, Inservice Teacher Education, *Interdisciplinary Approach, Minimum Competency Testing, *Student Evaluation

A group evaluation program of student papers was established within a cross-disciplinary undergraduate writing program. The program was designed to train students to write for a general audience rather than for one teacher, and was initiated within the context of an institution that required students to display objective writing competency in any one of several disciplines as a graduation requirement. The program sought to achieve these specific goals: agreement on competency standards among writing evaluators, separation of the evaluation of content from the evaluation of writing competency, and the extension of the audience for student papers. Institution-wide valid and reliable standards for competency were set, and faculty members were trained how and how not to teach writing. The following evaluation priorities emerged: strong emphasis should be placed on logic, coherence, development of ideas, and use of quotations; grammatical considerations should weigh less heavily than logic and coherence; structural, logical, and grammatical considerations are more significant than semantic or syntactical concerns; and no solution was found to the priority to be placed on poor writing. Discourse Analysis and Literary Study.
Pub Date-Mar 79
Note-9p.; Paper presented at the Annual Spring Meeting of the North-East Modern Language Association (Hartford, Connecticut, March 29-31, 1979)
Pub Type- Speeches/Meeting Papers (150) - Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Discourse Analysis, English Curriculum, Language Research, *Learning Processes, *Literary Analysis, *Literature

Although both literary study and discourse analysis examine texts and oral discourses, literary study tends to emphasize the totality of the text while discourse analysis seeks to isolate manageable elements and structures to validate hypotheses about mental processes. Interaction has recently occurred between the two disciplines in ``poetics,'' ``structuralism,'' and the study of ``story grammars.'' Discourse analysis can be useful in literary study, particularly in the analysis of literature's mostly unconscious ``codes,'' the aspect of literature studied by the new ``poetics.'' Discourse analysis delineates the structural elements and the relationships between them in various types of discourse. To judge the validity of a given discourse analysis theory, a discourse must be seen as a reaction to human experience, and analysis of discourse should be an attempt to explain the relationship between the discourse and the experience. The relationship is part of the continuum between actual world, experience, discourse, and analysis. As an application to the teaching of literature, a useful method might be one in which the teacher begins with showing the structure of ``simple stories'' and builds to more sophisticated texts, isolating elements to be taught. Descriptors-*Business Education, Composition (Literary), *Engineering Education, *Faculty Development, Higher Education, *Inservice Teacher Education, *Teacher Workshops, *Technical Writing, Writing Skills

A workshop for college engineering and business faculty in how to teach writing in their classrooms is one route to improving student writing skills. Any faculty development program needs strong administrative support. To overcome the problems both in condensing a knowledge of writing into a short session and in the objections of faculty to the added workload that assigning writing creates, the workshop leader should do the following: concentrate on defining conceptual difficulties in writing; convey the message in terms (especially visual terms) that match the audience's modes of perceptions; set a task to be accomplished in the workshop, such as the creation of a grading checklist; and convince participants that if their students write well, they will actually spend less time reading classwork. Descriptors-*Composition (Literary), *English Instruction, Graduate Students, Higher Education, *Teacher Education, *Teacher Improvement, *Teaching Assistants, *Writing Skills
Identifiers-*Composition Process

An informal survey of graduate student teaching assistants who were about to teach their first undergraduate composition course was undertaken by asking them what they planned to do with regard to teaching a number of concepts. Those questions were followed one week later by similar questions rephrased to ask what the novice teachers do themselves in the writing process. A relatively high correspondence existed between what they planned to do in the classroom and what they do on their own when they write. The results of the survey suggest a need to emphasize the importance of prewriting techniques and for better methods for dealing with vocabulary and sentence problems. The survey procedure seems to be a practical first step to integrating writing into the teacher training curriculum and to focusing the new teachers' attention on the nature of their work in the classroom. Such systematic self-analysis can reveal strengths to encourage confidence and can indicate gaps to be filled. (TJ)

Descriptors-*Composition (Literary), Elementary Secondary Education, *English Instruction, *Research Problems, *Writing Skills

Identifiers-*Composition Process, *Revision (Written Composition)

Research that purports to judge communicative sophistication on the basis of the revising behaviors of students must control for at least three variables: the subjective difficulty of the task; the student's ability to generate alternate wordings, spellings, and the like; and the student's preferred strategies of composing. Revising is not a substrategy of writing in the same way as are planning, transcribing, and reviewing, but is a retranscribing after the already-existing text is reviewed and found wanting. The review takes place in terms of understood conventions of written language, intended effect, intended meaning, intended audience, and intended persona of the writer. Three false premises of some of the research on revision are as follows: revision is a one-time process that occurs at the end of the writing session, difficulty of task makes no difference in the appearance of revising behaviors, and evidence from the text comprises the only data needed in analyzing behaviors. The study of revising is complex because in revising the writer uses the products of all the subprocesses of writing in a complex pattern-matching operation. (TJ)

Identifiers-Back to Basics

The system of education in the United States mirrors, creates, and legitimates inequalities of the larger society that supports it. Legally required schooling ranks, sorts, and prepares children for the ``real world,'' and contributes to social maintenance rather than to social change by stressing the ``correctness'' of some features of English and by rigidly stigmatizing other features prominent in the language of lower-class children. The ``back to basics'' movement fosters the illusion of merit and sustains competition as an avenue to upward mobility by concentrating public attention on the basics most easily measured by standardized tests. English teachers concerned about social justice, education, and their own integrity might use the following suggestions in dealing with the situation: learn how standard languages have arisen, been exploited, and how they relate to other dialects; learn how much of standard English is truly useful and how much is merely stylistic or even dysfunctional; oppose standardized testing; examine the ideologies of merit, competition, and upward mobility; and seek to raise the social and political consciousness of students and to heighten their rhetorical awareness of the ways language is used either to liberate or to oppress. A proficiency test became the exit requirement for the noncredit, basic English course at the University of New Orleans because the program was not working well. There were inconsistencies in grading, and students who managed to pass the course later foundered in the credit courses. Obviously, the teachers needed to cooperate to raise the goals of the course, to establish common grading standards, and to test each student's ability to write Edited American English, concentrating on student mastery of the basic sentence. The proficiency test that was constructed is a hybrid of an empirically based error count and a broad analytic scale. The error count is based on the number and type of errors that teachers will tolerate, and the analytic scale is a measure of coherency and organization. Perhaps as important as the actual test construction is the fact that the staff reached a consensus on standards, then worked to help students meet those standards. Although the standards were higher than before, more students were now passing them. The system of checks and balances to insure that the test is a true measure of student ability has had the added effect of getting both students and teachers involved in a common goal to master the test. The result of both discussions and individual papers by members of the Intersegmental Committee on Writing Skills of the California Postsecondary Education Commission, this position paper proposes a possible, intersegmental solution to the problem of the inadequacy of student writing skills. After presenting background information on the problem, the paper states its position that it is both desirable and possible to establish a statewide minimum standard for college level writing, which should be used as a prerequisite to freshman composition courses and presents its rationale for this position. It then proposes possible solutions to three problems involved in establishing such a standard: setting an agreed-upon standard of writing proficiency, designing or selecting an examination for measuring student performance against the standard, and securing agreement about how and when to administer the examination. It concludes by discussing state responsibility for financing remedial programs for students who fail to meet the standard. Three statements outlining writing proficiency skills desirable for college entrants are attached. (GT)

Descriptors-*Current Events, Daily Living Skills, *Educational Research, Elementary Secondary Education, Knowledge Level, Mass Media, News Media, *Newspapers, *Reading Improvement, *Reading Research, *Teaching Methods

The effects of using newspapers as adjunct materials in education have been documented in recent research. Research results indicate that students are seriously deficient in civic knowledge, and that the newspaper can serve as a bridge between home, school, and community by educating youth about the real world and by influencing their knowledge of current affairs and governmental functions and their daily reading habits and attitudes. Newspapers are useful in involving parents in the education of their children, in improving communication within the family, and in minimizing summer educational losses. Newspaper use in elementary and secondary classes encourages educational gains in such areas as current events knowledge, reading ability and comprehension, communication skills, and daily living skills. The hypothesis that professional writers would be judged superior to college students on both holistic and analytic evaluations was only partially confirmed when four teacher-evaluators rated the anonymously submitted compositions of 64 college students and 5 professional writers. On the holistic scale the professionals did not distinguish themselves, although they were rated more highly than the average student (2.65 versus 2.25 on a four-point scale). The professionals did score significantly higher on the analytic scale than the students. Whereas the students received the three highest scores on the holistic scale, the professionals received the three highest scores on the analytic scale. Similarly, the college students usually received the same score regardless of the scale used, while the professionals received consistently higher analytic ratings. The main difference between the two groups' writing styles seemed to be "register," in that students did school writing for a grade by the teacher, and the professionals were not concerned about grades and wrote in a world writing register, aiming at a diverse audience. For this reason, the results suggest that the register of school writing needs to be examined critically and modified by the teaching profession to make it less distinct from world writing, which is the true goal of communication. Descriptors-*Communication (Thought Transfer), *Educational Research, Educational Theories, Evaluation Methods, Higher Education, *Interpersonal Competence, *Self Concept, Self Concept Tests, *Student Attitudes, Teaching Methods

Identifiers-*Student Journals

College students in three interpersonal communication classes, all taught by the same instructor, participated in a study designed to develop a grounded theory of the effects of journal keeping on communication effectiveness perceptions. Two classes, comprised of a total of 58 students, were required to maintain semistructured student journals for the entire semester, while one class, comprised of 28 students, did not keep journals but completed term papers instead. The activities of all three classes were essentially the same except for the student journal/term paper variable. During the first and last weeks of class all students completed "Self-Discovery through Self-Analysis" exercises. Analysis of their responses indicated that the journal keeping group increased significantly over the nonjournal keeping group in positive self-assessment of communication behavior, feasibility of solutions to communication problems, and objective and realistic assessment of communication patterns. An analysis of three journals representing a cross-section of the journal keeping classes suggested that as self-disclosure increased self-assessment became more negative, and that as subjects became more realistic about their own communication behaviors they also became more realistic about the behaviors of others. (Tables of data and forms used in evaluating the self-analysis exercises and student journals are included.) (GT)

Descriptors-*Censorship, Civil Rights, *European History, *Freedom of Speech, Intellectual History, *Journalism, News Media

Identifiers-*Milton (John)

Historians of journalism cite John Milton's speech ``Areopagitica'' as the first major English-language document to articulate the ideas of free speech and freedom of the press. Milton's reputation as spokesman for freedom to publish is sullied, however, by his having served as Cromwell's press licenser. Historians of journalism have attacked Milton's ``censorship'' as evidence of contradiction and compromise of his ideals. An examination of the nature of his responsibility as licenser within his social, political, and personal situation leads to a different conclusion, however: that his commitment to the ideal of just and virtuous government gave him warrant for direct involvement in the political life of the Commonwealth, and that in his role as licenser, he merely played the role of senior editor rather than authoritarian censor, and contributed little aside from his bureaucratic imprimatur. (DF)

Adult Portrayal in Novels for Teen-Age Girls.

Pub Date-Aug 77
Note-55p.; Research prepared at Brigham Young University
Pub Type-Reports - Research (143) - Opinion Papers (120)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors-*Adolescent Literature, *Adults, *Changing Attitudes, *Characterization, Literary Criticism, *Novels, Parents, Secondary Education, Trend Analysis

The adult characterizations in seven novels written for teen-age girls four published in 1950 and three published in the late 1960s were evaluated on the basis of four criteria: consistency, evident motivation, plausibility, and scope of activity. The evaluations were then compared to determine if a change could be detected from the earlier to the later period. It was determined that all seven novels depicted consistency in adult characters, and that all but one portrayed the motivation of the adult characters. However, the characters in four of the seven books (three from 1950 and one from 1967) were represented as implausibly tolerant, generous, and good-natured; and in one of the later books the adults were portrayed as implausibly bad. The adults in the earlier books also had a strong stereotypic tendency. The scope of the adult activities was generally very narrow: the professions of the men often were barely mentioned, none of the mothers worked outside the home, and only one mother belonged to a women's organization. A comparison of the books suggests that the later characterizations were generally no more realistic than the earlier ones, although there had been a shift toward acknowledging (and, in one case, overemphasizing) the faults of adult characters. Descriptors-*Females, Language Attitudes, Language Styles, *Language Usage, Males, Nonverbal Communication, *Semantics, Sex Differences, *Sex Discrimination, Sex Fairness, *Sex Stereotypes, *Socialization, Speech Communication, Syntax

The depth and pervasiveness of linguistic symbols of sexual identity, difference, and hierarchy are discussed in this paper. After noting that the language of sexism begins at birth and is recognized and used by preschool children, the paper points to patterns of linguistic sexism in the semantics and syntax of the English language, in written and spoken language about women and men, and in women's and men's use of verbal and nonverbal aspects of language. Among the topics dealt with are the following: the way female-associated language is defined not only by men but in terms of women's sexual relationship with men; frequent descriptions of nature and the land in images and metaphors of female sexuality and submission; the linguistic invisibility and pejoration of the female as reflected in the use [illegible] ``so-called generics'' and the adding of female markers (poet``ess'') to distinguish women's achievement as deviant from the male norm; the way the English language teaches a prescriptive sociopolitical grammar that perpetuates the symbol systems of patriarchy; and differences in women's and men's language that reflect expectations of male dominance and female submission. The paper concludes by noting the penalties and risks encountered by those who attempt to change the restricted codes of thinking, speaking, and behaving. (GT)

Descriptors-*Composition (Literary), Higher Education, *Individual Instruction, *Teaching Methods, *Teaching Procedures, *Tutoring, *Tutors

While tutoring on a one-to-one basis is not in and of itself a magic way to teach, it can realize many potential benefits. The tutor must learn to operate effectively in at least three roles: as coach, as commentator, and as counselor. As a coach, a tutor is a trainer, an encouraging helper who tells learners what they need to know in order to become more skilled. Also, the tutor as coach remains on the sidelines diagnosing what is not working effectively, what is going wrong, and how to improve, while not doing the work for the learner. The tutor/coach needs two sets of strategies: strategies for helping students learn what they could not learn from the textbooks and strategies for remaining silent at times. As a commentator, the tutor evaluates the whole situation and gives a larger perspective to the student. As a counselor, the tutor must consider the student as a whole person, offer advice, be aware of outside interference that may be hindering the learning process, search for ways to establish a successful working relationship, start at the learners' stage of development, and look for clues as to sources of error beyond the surface manifestation of what is on the page. Descriptors-*Ambiguity, Communication Skills, *Editing, *Grammar, Higher Education, *Sentence Structure, Syntax, *Technical Writing, *Writing Skills

Maintaining that two kinds of ambiguity ambiguous prepositional phrases and ambiguous modification of conjoined elements account for a large number of ambiguous sentences in technical writing, this paper presents an algebraic analysis of each kind of ambiguity. It then suggests a number of ways in which each ambiguity may be unclear. By using this kind of analysis, the paper offers ways for a writer to clarify ambiguities and offers rules for the use of the technical writer who discovers such ambiguities while proofreading. (TJ)

Descriptors-Children, Composition (Literary), *Creative Writing, Elementary Education, *English Instruction, Literary Conventions, *Poetry, Student Writing Models, Teaching Techniques

This book contains a collection of "model" poems by adults and by children and ways to use the poems in children's poetry writing workshops and activities. After an introduction to the text and its subject matter, several chapters discuss ways to write poems, focusing on acrostics, the sound or shape of a poem, poems from memories or dreams, persona poems, longer poems for older students, and other approaches. As part of each chapter, a list of poems from the anthology section suggests specific works that children can examine in preparation for their own writing. The anthology section of the book is divided into poems by adults and poems by children. Three indexes list the adult poems by author and title, the children's poems by grades, and all the poems by subject. (RL)

The English Teacher's Handbook: Ideas and Resources for Teaching English.

Pub Date-79

Note-376p.

Available from-Prentice-Hall, Inc., Publishers, Englewood Cliffs, New Jersey 07632 ($8.95 paper)

Pub Type- Books (010) - Guides - Classroom - Teacher (052)

Document Not Available from EDRS.

Descriptors-*Composition (Literary), *Course Organization, Curriculum Planning, *Educational Resources, *English Instruction, Group Discussion, Language Instruction, *Literature Appreciation, Multimedia Instruction, Secondary Education, *Teaching Techniques

This handbook for high school English teachers includes sections on curriculum planning and course design, ideas for teaching English, and resources for teaching English. The topics in curriculum planning include course planning and design, individualizing, teacher-constructed materials, grading alternatives, aims and priorities, and accountability. Ideas for teaching include practical suggestions divided under the following subheadings: literature and reading, teaching composition, language study, and multimedia English. Among the many suggestions are the following: invite outside speakers, create a facsimile newspaper, compare the handling of a novel by other media, individualize reading assignments, read a novel aloud over a period of a few weeks, use music and movement while reading, use puppets, and encourage students to write to pen pals. The final section of the book provides names and addresses of magazines and journals, professional organizations, publishers of professional and instructional materials, government resources, contests, and free resources that might be of interest to English teachers. Scholl, Peter A.

Generic ``Man'': Sexist Language or Acceptable Usage?

Pub Date-Apr 79

Note-12p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (30th, Minneapolis, Minnesota, April 5-7, 1979)

Pub Type- Speeches/Meeting Papers (150) - Opinion Papers (120) - Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Communication (Thought Transfer), *Language Attitudes, Language Research, *Language Usage, *Sex Discrimination, *Sex Fairness, *Sex Stereotypes, Speech Communication, Standard Spoken Usage

Although alleged sexist implications surrounding the generic use of the term ``man'' have led many to advocate the elimination of the term from usage, it cannot be concluded that the use of the term as generic is always sexist. A review of the studies dealing with the use of the term shows that it has not been empirically established that the word ``man'' is responsible for causing people to think ``male.'' Problems associated with this word stem primarily from its misuse in context rather than from any inherent sexism in the word itself. Lingering sexist associations which have accumulated around the proper generic use of the term can best be eliminated by a policy that insists on careful, discreet, and precise use of the term. Its usage should be permitted in contexts in which speakers use the word or its compounds in passages that make explicit the fact that the term refers to males and females generically. If the word can be said to function generically in some contexts when used properly, there is no need for neologisms to replace the word nor for seeking alternatives. (DF)

Dittmer, Allan E.
Assault with a Deadly Mandate: The Minimum Competency Movement.
Pub Date-Mar 78
Note-18p.; Paper presented at the combined Annual Meeting of the Conference on English Education and the Secondary School English Conference (Pittsburgh, Pennsylvania, March 15-18, 1979)
Pub Type- Speeches/Meeting Papers (150) - Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Academic Standards, Basic Skills, *Educational Accountability, Educational Assessment, *Educational Problems, Evaluation Methods, *Minimum Competency Testing, Performance Based Education, Secondary Education, State Standards, *Student Certification, Teaching Methods, Testing Programs
Identifiers-Back to Basics

The minimum competency movement's rationale can be reduced to four problem-laden propositions: the state through its schools owes every child an education; a high school graduate should be at least minimally competent; schools should be held accountable for seeing to it that every child meets this standard; and to assure this, every child must be tested. The movement has paid insufficient attention to such problems as the possibility that all students from one racial, ethnic, or social class might fail; the possibility that too many students will fail; the difficulty of the schools in specifying what they will guarantee that each student will learn; the possibility that tests will have to be made so elementary that nearly all will pass; and the possibility that some students will drop out to avoid testing while some will pass and still be judged incompetent by employers. In addition, the problem of dealing with resistance by teachers, students, and parents has been ignored. Minimal competency testing is regressive and deadeningly dull, distracting students from confronting important issues. Special problems surrounding the underlying testing include the following: the grammar" of tests as a medium, regardless of content or purpose, determines the quality of the test and its effects on people; tests rely heavily on math and statistics, putatively exact and immune from criticism; and tests are inadequate and inaccurate as means of predicting success. (DF)

Dinan, John S.
The Classroom as Playground.
Pub Date-Apr 79
Note-18p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (30th, Minneapolis, Minnesota, April 5-7, 1979)
Pub Type- Opinion Papers (120) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Composition (Literary), *English Instruction, Higher Education, *Teaching Techniques, *Writing Skills

Students tend to think of writing as reporting the topography of their minds and souls guided by the assumptions that reality is "out there," that reality is relatively unproblematical, that the concepts they use are common to everyone and are therefore self-evident, and that they should and can abstract themselves from the processes of the worlds they write about. The teacher wants the students to conceive of a writer as a process within a process engaging in a process. A metaphor that helps define the role a teacher can play to achieve that is Teacher-as-Artist who deliberately creates disorder by disorienting the audience. However, teaching within that metaphor is likely to create considerable anxiety among students. This anxiety can be reduced by making the classroom into a playground where students can rehearse failure in a protected situation. Some techniques to help create this atmosphere include using group work as much as possible, stopping the use of syllabi, digressing a great deal, avoiding the assignment of one-shot papers, reading student journals and asking questions that lead to another entry, and assigning papers that grow out of each other. Scott, Kathryn P.

Language and Gender: Stereotypes Revisited.

Pub Date Apr 79
Note-23p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Communicative Competence (Languages), *Females, *Language Attitudes, *Language Research, *Language Styles, *Males, *Sex Stereotypes, Speech Habits
Identifiers-*Communication Research

Two studies were undertaken to determine first whether language characteristics attributed to females are more socially desirable than those attributed to males and second whether a double standard exists such that language traits seen as socially desirable for adults in general are viewed as negative when assigned to either females or males. For the first study, 94 college students were asked to rate qualities of speech that are stereotypic of male or female speech as being more or less socially desirable. It was found that traits more often assigned to women's language are rated more socially desirable than those associated with men's language. In the second study, 96 different college students were assigned to one of three treatment groups. The first group was asked to evaluate 36 stereotypic characteristics as if they were the behavior of a mature, competent adult woman. For the second group, ``man'' was substituted for ``woman'' in the directions; for the third group, ``person'' was used. The results showed that characteristics of competent females were more like those of competent adults than were those for competent males. (TJ)

Schultze, Quentin J.

The Emergence of Ethics and Professionalism in the Early Advertising Business.

Pub Date-Aug 79

Note-30p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (62nd, Houston, Texas, August 5-9, 1979)

Pub Type Speeches/Meeting Papers (150) - Historical Materials (060)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-*Ethics, *Professional Associations, *Professional Recognition, *Standards

Identifiers-*Advertising, Professionalism

In the pre-World War I era advertising practitioners attempted to make their craft a profession. Generally agreeing that the creation of ethical codes was the most important step toward professionalism, practitioners organized the Associated Advertising Clubs of America (AACA). Early journal articles and AACA proceedings indicate that practitioners were motivated by social status and economic self-interest in their quest for professionalism. The development of advertising ethics was tied to interconnected political, economic, and cultural motivations. Practitioners formed political groups to influence other political groups and various government bodies, and created economic groups to protect and solidify their financial relationships with clients and publishers. Practitioners thus hoped that professional ethics would enhance their collective power and improve their potential for gain and social respectability. (Author/DF)

Spelling Achievement: Weighing the Research. Set 78, Number Two, Item 15.

New Zealand Council for Educational Research, Wellington.
Pub Date-78
Note-7p.
Pub Type- Information Analyses (070) - Reports - Evaluative (142)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Academic Achievement, *Achievement Rating, Educational Research, Elementary Secondary Education, *Research Methodology, Research Problems, *Research Utilization, *Spelling, *Spelling Instruction
Identifiers-New Zealand

Five research studies dealing with spelling achievement in New Zealand schools have been conducted; these include dictated-word spelling tests, written language studies, and achievement data collections of 20,000 students. Several conclusions emerge from an examination of this research: spelling achievement studies should be based on samples of written language, should concentrate on in-depth analysis of written language samples, should test extensively, and should employ appropriate statistical techniques rather than simply using mean scores and percentages; tests should sample broadly among pupils and words; and tests should refrain from using studies not originally designed to investigate changing levels of performance to support a thesis of changing levels. It appears that factors outside the school have much to do with spelling achievement, although little has been done to validate current teaching approaches. The apparent test score declines could be explained by changed teaching emphases as well as by problems with research methodology. Data is lacking to make reliable generalizations about changing levels of achievement over time. (DF)

Alberta Language Arts (Reading and Writing) Achievement Study. Executive Summary.

Canadian Inst. for Research, Calgary (Alberta).
Spons Agency-Alberta Dept. of Education, Edmonton. Planning and Research Branch.
Pub Date-Mar 79
Note-29p.; Study conducted for The Minister's Advisory Committee on Student Achievement (MACOSA)
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Academic Achievement, *Curriculum Development, Educational Objectives, Elementary Secondary Education, Language Arts, *Reading Achievement, Reading Comprehension, *Reading Programs, *Reading Research, *Writing Skills
Identifiers-Alberta

To determine specific objectives for language arts programs in Alberta schools, a study was conducted in which a comprehensive list of specific objectives was compiled for use in developing tests of reading and writing in grades three, six, nine, and twelve. Measurable objectives were ranked in terms of their importance to the total program, and tests were developed and administered to 5,394 (reading) and 5,377 (writing) students in a random sample of 284 schools. Results indicated that student performance on the reading items was generally satisfactory, particularly phonics in grade three. Students improved or maintained reading skills in the following areas: progressing through suffixes to obtain word meanings in grade six; identifying directly stated details on maps and charts in grade nine; and identifying implied elements of a passage in grades three, six, and nine. Student writing performance was as follows: poor in all four grades in short answer tests, but better in longer assignments; good in limiting content to the topic and writing legibly; and better in using their own langauge in writing than in finding errors in or manipulating a structured assignment. Writing performance was generally satisfactory, although only 74% of grade twelve students wrote at or above functional level. (DF)

Responding to a Literary Work of Art.

Pub Date- 78

Note-29p.; Research prepared at the University of Calgary ; Photographs may reproduce poorly

Pub Type- Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-Cognitive Processes, Ethnography, *Literature, Reading Materials, *Reading Processes, Reading Research, *Response Mode, Secondary Education, *Student Reaction, *Thought Processes

Identifiers-*Reader Response

A study was conducted to examine three fundamental aspects of the process of responding to a literary work of art: the nature of the reader's response to literature, the processes of response to literature, and the relationship of a reader's personal construct system to the way in which the reader responds to a literary work of art. The subjects were four grade 12 readers, two male and two female, who were selected on the basis of above-average reading skills, grades, and ability. After a test was administered to determine their personal construct systems, each reader was shown a videotaped display demonstrating introspective, verbalized responses during reading. Each student then read four short stories while commenting on their reactions and while having physiological reactions videotaped. Reactions were also recorded of each student responding to previous tapes. Results indicated the following: students construed literary works in terms of their own past personal interactions with the world; the style of a literary work inhibited readers if it was unfamiliar; images were consciously seen and reported when the style of the literary work was not inhibiting; and in the process of responding to literature, cognitive and affective elements were operating. (DF)

Controlled Composition: Sentence Manipulations for Basic Writing Students.

Pub Date-Apr 79

Note-11p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (30th, Minneapolis, Minnesota, April 5-7, 1979)

Pub Type- Speeches/Meeting Papers (150) - Reports - Descriptive (141) - Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Assignments, *Composition (Literary), Higher Education, *Remedial Instruction, *Sentence Combining, Student Improvement, Syntax, Teaching Techniques, *Writing Exercises, Writing Skills

Identifiers-*Controlled Composition

Controlled composition a method closely related to sentence combining can be beneficial for college students whose writing is characterized by frequent errors and lack of fluency. Controlled composition consists of copying short, competently written compositions exactly except for certain stipulated changes. The assignments, which progress in complexity, require students first to make exact copies of the compositions, then to make such changes as rewriting plural constructions in the singular, present tense constructions in the past tense, and active voice passages in the passive; and finally to combine sentences through coordination or subordination. Instead of terminology and rules, models for the new sentences are provided as guides; errors are corrected by students, with teacher help as necessary, until the compositions are error-free. Similarities between controlled composition and sentence combining include their use of prewritten compositions or sentences, their assumption of students' underlying knowledge of grammar, their use of a minimum of technical terminology, and their tendency to lead to error reduction, improved writing, and improved student attitudes toward writing. Controlled composition can serve as an introduction to sentence combining for basic writing students, who are frequently confused by sentence combining and create error-prone free sentence combinations. Beasley, Maurine

Mary Abigail Dodge: Journalist & Anti-Feminist.

Pub Date-Aug 79
Note-28p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (62nd, Houston, Texas, August 5-9, 1979)
Pub Type- Historical Materials (060) - Speeches/Meeting Papers (150)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors-Females, *Feminism, *Journalism, News Reporting, *United States History
Identifiers-*Dodge (Mary Abigail)

Mary Abigail Dodge, a Washington, D.C., correspondent before and after the United States Civil War, was one of the most acclaimed women journalists of the nineteenth century. Unknown today, Dodge wrote on politics, religion, and contemporary issues for newspapers and magazines and commented prolifically on the role of women in society. After feminist leanings as a young woman, she became increasingly conservative as she grew older. Her most celebrated articles appeared in the New York Tribune'' in 1877 and 1878 and attacked the efforts at civil service reform attempted under the administration of President Rutherford B. Hayes. Throughout her 40-year career, Dodge insisted on writing under the pseudonym, Gail Hamilton.'' Dividing her life into two totally different spheres, she remained Abby'' to her family and refused to acknowledge in public that she was also Gail,'' the famous literary figure. Well-known as a brilliant and witty conversationalist, she had wide-ranging contacts in literary and political circles. Her career illustrates that an able woman could carve a place for herself in Victorian journalism, but it also illuminates the self-doubts and insecurities of a woman trying to function in a man's occupation. Evaluating Writing Programs: What an Outside Evaluator Looks For.

Pub Date-Apr 79
Note-13p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (30th, Minneapolis, Minnesota, April 5-7, 1979)
Pub Type- Reports - Evaluative (142) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Composition (Literary), *English Instruction, *Evaluators, Higher Education, *Program Evaluation, *Program Improvement

Outside evaluators of a writing program can assess the program's effectiveness, can support the work in a program that has become visible and subject to criticism, are easier to listen to than local faculty members, and can help clarify and resolve conflicting notions members of the department may have about the program's reason for being. First, evaluators are likely to look at curriculum, teacher training, program administration, and support services administered outside the department. Second, evaluators may suggest improvements in the program, addressing problems that were mentioned before the visit or that came up consistently during the evaluation. Third, evaluators may comment on controversies not taking sides but helping the discussion to go on constructively. (A guide for planning an evaluation visit is included.) (TJ)

Listen to Television.

Pub Date- 78

Note-7p.; Study prepared at the University of South Carolina

Pub Type- Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Educational Research, Elementary Education, *Listening Skills, *Teaching Techniques, *Television, *Vocabulary Skills

Three randomly selected third grade classes participated in a study to discover the value of guided television watching on listening skills. The first class was a control group and received no special instruction or treatment, the second class received daily listening lessons, and the third group watched television guided by the use of teacher questions asked ahead of time to arouse the children's interest. A pretest and posttest on listening were given each of the groups. The pretest scores showed little difference among the groups. On the posttests, the group exposed to guided television watching scored higher than did the other two groups on both the vocabulary test and the posttest paragraph. The group that had been taught listening skills had the second highest scores. (TJ)

The Bridges of Adolescent Literature.
Pub Date-Mar 79
Note-8p.; Paper presented at the 17th Annual Meeting of the Conference on English Education and the 7th Annual Secondary School English Conference (Pittsburgh, Pennsylvania, March 15-18, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reference Materials - Bibliographies (131) - Guides - Classroom - Teacher (052)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-*Adolescent Literature, *English Instruction, *Literature Appreciation, Reading Habits, *Reading Interests, Secondary Education

Adolescent literature should deal with the problems of adolescents, should provide them with pleasure, and should say something to them. The adolescent novel is a bridge through a difficult age, a bridge from literature for children to literature for adults, and a bridge to major literary works. Adolescent novels can also be used to approach a study of literary techniques. (A number of adolescent novels are recommended, as are more mature novels of special interest to adolescents.) (TJ)

Freire, Dialog, and Composition.

Pub Date-Apr 79
Note-11p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (30th, Minneapolis, Minnesota, April 5-7, 1979)
Pub Type- Opinion Papers (120) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Composition (Literary), *Educational Philosophy, *Learning Processes, Literacy Education, Reading Instruction, *Student Attitudes, *Student Participation, *Student Teacher Relationship
Identifiers-*Freire (Paulo)

Brazilian educator Paulo Freire was largely responsible for the education of the masses of illiterates in his country. Freire operated on the assumption that people have a problem-solving orientation to the world. Rejecting the predominant mode of education in which the educator imparts reality to passive students, Freire held that education "must begin with the solution of the teacher-student contradiction," a view that would place both parties in a mutual learning relationship. Vital to this is "dialog," an interpersonal encounter in which people jointly categorize the world. Recommendations for literacy education and the teaching of composition based on Freire's philosophy include the following: change teacher attitudes; design the course after consulting with students as to their backgrounds and interests; use thematics that are generated by the group; establish the importance of the process of students' categorizations; view writing as problem solving; encourage student involvement rather than lecturing; encourage students' critiques at every level; and enable students to find regional, national, and world implications in their immediate personal experience. Valid Philosophies of Composition.

Pub Date-Oct 78
Note-16p.; Paper presented at the Annual Meeting of the Southwest Regional Conference on English in the Two-Year College (Denver, Colorado, October 5-7, 1978)
Pub Type- Opinion Papers (120) - Guides - Classroom - Teacher (052) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Community Colleges, *Composition (Literary), *Educationally Disadvantaged, Educational Philosophy, English Education, Higher Education, Junior Colleges, *Language Usage, *Nontraditional Students, Open Enrollment, Standard Spoken Usage, Student Evaluation

Nontraditional students in the community college can profit from their composition courses if these courses give them the chance to discover what words can do and to use that discovery to best serve their own interests and ambitions. To serve these aims, composition courses should be based on the following assumptions: students are to be accepted as they are, not as teachers might wish that they were, the cultural heritage of students is to be appreciated while at the same time they are to be equipped with the standard English that will admit many of them to the jobs they want; students and their work are to be approached in a positive, identity-affirming manner; and students are to be given guided practice in writing prose, supplemented by a therapeutic review of grammar and mechanics. Teachers should also recognize that changes in language can bring about changes in life by clarifying students' knowledge and by increasing their confidence in their ability to systematize information and experiences. (DF)

Relationship between Oral English Language Proficiency and Social Acceptance, and Scholastic Achievement among Mexican-American and Anglo-American Fifth Grade Children.

Pub Date-Aug 75

Note-18p.; Paper presented at the Annual Meeting of the Texas Joint Council of Teachers of English (13th, San Antonio, Texas, February 2-4, 1978)

Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Academic Achievement, Cultural Factors, Elementary Education, English Instruction, *Ethnicity, Grade 5, *Language Proficiency, *Language Research, *Mexican Americans, *Peer Acceptance, Verbal Ability

Identifiers-*Oral Language

A total of 78 Mexican-American and 14 Anglo-American children participated in a study to determine the relationship of oral English proficiency, social acceptance, and academic achievement among fifth grade students. The students were administered measures of phonology and verbal expression. Scores from a standardized achievement test were used to determine academic achievement. To discover social approval scores, the students were given a sheet listing all class members and were asked to rank them in terms of whom they would choose to spend time with. The findings suggested that social approval and level of English proficiency were not related, nor were they affected by ethnicity. However, a significant relationship was found between phonology/verbal expression and scholastic achievement. (FL)

Television Viewers, Nonviewers, and Heavy Viewers.
Pub Date-Aug 79
Note-18p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (62nd, Houston, Texas, August 5-8, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Audiences, Commercial Television, *Social Characteristics, Surveys, *Television Research, *Television Viewing

Data from three representative national surveys were studied to determine to what extent profiles of television viewers of different levels of viewing frequency fit with expectations based on theory and earlier research. A group of 4,552 respondents were surveyed in 1975, 1976, and 1978 by personal interviews and were classified as to status as nonviewers (less than one-half hour per day), heavy viewers (more than six hours per day), and viewers (one-half to six hours per day). Nonviewers and heavy viewers each comprised about 5% of the total pooled sample. Results indicated that the greatest difference between viewers and nonviewers lay in family structures, with nonviewers more likely to be never-married and childless, as well as being employed on the professional level. Heavy viewers were rated low in education, income, and employment status; most were female. As a whole, heavy viewers seemed to be removed from ongoing society, while nonviewers were better educated and about as well integrated and active as average viewers. (DF)

The Rhetorical Theories of George Campbell and Kenneth Burke.

Pub Date-Apr 79

Note-12p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (30th, Minneapolis, Minnesota, April 5-7, 1979)

Pub Type- Speeches/Meeting Papers (150) - Historical Materials (060) - Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Comparative Analysis, *Intellectual History, Persuasive Discourse, Philosophy, *Rhetoric, *Social Change, Theories

Identifiers-Burke (Kenneth), Campbell (George)

Points of similarity exist between rhetorical theorists George Campbell and Kenneth Burke, based on their acceptance of the universality of human nature. These similarities include the following: both use strategic'' definitions of rhetoric that are widely encompassing; Burke's central doctrine of identification'' resembles Campbells's idea of sympathy''; Burke's cluster analysis'' parallels the association-of-ideas psychology pervading Campbell's eighteenth-century empiricist background; and Campbell appears to anticipate some of Burke's dramatistic'' concepts, in particular those of scene (context), dialogue (dialectic), and motive. Burke's work is motivated by a broadly ethical anxiety complicated by ambivalence toward the presumed source of anxiety the scientific age; this is also true of Campbell. Both also saw the fostering of intellectual cooperation as a role of religious civilization. (DF)

Descriptors-*Adolescent Literature, Critical Reading, Critical Thinking, English Curriculum, *English Instruction, Film Production, *Films, Film Study, *Literary Analysis, Literature Appreciation, *Novels, Production Techniques, Secondary Education, Television Viewing, *Visual Literacy
Identifiers-*Zindel (Paul)

Visual literacy an increasingly important skill that has lately been added to the wide range of skills that reading/English teachers are expected to teach can be coupled with lessons in literary appreciation through the medium of the adolescent novel. Since students participate in a great deal of television viewing, it is as important for them to learn critical viewing skills as it is for them to learn critical reading skills. Teachers can mesh lessons in literary appreciation and visual literacy through examining how authors create characters, actions, and descriptions. As has been illustrated by author Richard Peck, students can examine adolescent novels in the light of considerations that might be made in filming them. In novels such as those of Paul Zindel, chapters can be analyzed in terms of camera shots, images, and scenes. Filmed versions of novels can be compared with students' prior envisioning of filmed versions of those books. Teachers can also help students to explore the film technique of montage and to consider such topics as the cinematic qualities of the dialogue and opening scenes of Zindel's novels. (GT)

Identifiers-Back to Basics

The ruling model of the college teacher of composition has been the composition instructor,'' who like the military drill instructor is unflinching, authoritarian, and dedicated to turning students into disciplined writers of standard English by means of drills and criticism. The military pose is inherent in the call for a return to basics, because the basics are perceived as best fostered by a hard-nosed prescriptivism. This approach is grounded in erroneous ideas of how students learn and of the effectiveness of this manner of instruction. Under the assumption that the student's mind is a blank tablet, the method ignores research showing that the ability to learn develops over a period of time and that it is important not to seek certain goals until the student is prepared to achieve them. A more appropriate model for the composition teacher is that of the master craftsman,'' who is wise, authoritative, and who shares skills with the student-apprentices who teach themselves by doing. The preparation of spelling skills indices, which may be used to describe the spelling content commonly taught in textbooks and the performance modes used to practice this content, is outlined in this paper. Separate sections discuss the preliminary analysis that was performed; the establishment of a Content Index that specifies major categories and subcategories of spelling content; the derivation of a Performance Mode Index to describe performance modes appearing in textbook exercises; the coding of the instructional exercises in eight commercial spelling series; and the computer-assisted development of a list of all spelling words taught. Appendixes present the Content and Performance Mode Indexes, a list of the spelling series used for coding, and a sample page of the computer printout of spelling vocabulary. (GT)

Descriptors-*Community Colleges, *English Departments, *English Programs, Higher Education, *Interinstitutional Cooperation, *Interschool Communication, *Universities

If there is to be communication and mutual assistance between community colleges and universities, three myths about community colleges need to be dispelled: that they teach almost nothing but basic or remedial English, that no research is possible for those university people who study community college English programs or for community college instructors themselves, and that community college English programs are primarily oriented toward vocational/technical interests when they are not remedial. Behind the myths are varied, complex, and flexible community colleges. The university English department can be responsible to the community college English department by keeping the lines of communication open, by having training and internship programs for future community college English teachers, by initiating an exchange program for the faculties, and by offering course work and inservice workshops for community college instructors. The community college can assist the university by sharing its expertise on how to help the "new student" who is almost solely career oriented and how to cope with the problem of motivation for such new students. In an ``Esquire'' magazine column, John Simon attempts to trivialize, through visual satire, the articulation by Wayne O'Neil of the linguistic position that teaching standard English perpetuates oppression and is itself oppressive; but his attempt provides, instead, a vivid representation of the political relationship between the teaching of standard English and the maintenance of the patriarchal social order. Simon misrepresents standard English as ``simply the language that evolved from diverse sources into a norm''; however, no language ``simply evolves'' into a ``norm'' social forces are always involved in promoting those language forms and changes that reflect the interests of its most powerful users. An analysis of changes in the use and semantic range of such words as ``she,'' ``he,'' ``husband,'' ``wife,'' and ``man'' in Old and Middle English show how specific changes can be traced to male control of the social structure. Sample passages from the work of seventeenth, eighteenth, and nineteenth century male grammarians demonstrate that the tradition of prescriptive grammars in English incorporates patriarchal assumptions regarding the superiority of the male sex and the inferiority of the female sex. The consequences of an 1850 Act of Parliament, which designated the masculine pronoun ``he'' as a ``generic,'' constitute sufficient argument against those who deny the validity of current feminist attempts to emasculate the English language. Descriptors-College Faculty, College Freshmen, *College Programs, *Composition (Literary), *Curriculum Development, *Expository Writing, Higher Education, *Interdisciplinary Approach, Peer Evaluation

In transforming any college writing program into a cross-disciplinary writing program, similar to the one instituted at Beaver College in Philadelphia, the following steps are suggested: enlist the support of respected English faculty members, request colleagues in other departments to submit sample freshman writing assignments, encourage other faculty members to look beyond issues of evaluation to the teaching of writing processes, and introduce students in composition courses to a variety of strategies for different writing tasks. The English department should provide models of effective techniques for conducting a composition program for other departments to emulate in modified form; these techniques include the following: have every student write several pages each week, either a new project or a revision of an earlier draft; have all students complete designated exercises in prewriting, drafting, shaping, and revising; direct students to duplicate preliminary drafts to share in small peer groups and sometimes with the instructor; and have students submit two essays at midterm for evaluation as finished products. The use of peer review procedures of early drafts of writing assignments is recommended to appeal to busy colleagues in other disciplines. (DF)

Descriptors-*Anxiety, Behavior Patterns, *Composition (Literary), Emotional Problems, Higher Education, *Pathology, Problem Solving, *Psychological Patterns, Psychopathology, *Student Problems, Teaching Techniques, *Workshops

Identifiers-*Writing Apprehension

An exploration of writing anxiety suggests that it is a normal form of behavior rather than a pathology, but that it varies in degrees of its dysfunctionality. Excerpts from the log books of college students in a writing anxiety workshop illustrate four broad categories of writing anxiety: procrastination, feeling emotionally distressed, thinking about one's inadequacies, and feeling physically uncomfortable or distressed. In the writing anxiety workshop, students verbalize their writing problems; receive individual analyses of their problems, along with suggestions for change; and share the results of their attempts to follow the suggestions. The log book excerpts may be interpreted within

the rational-emotive theory of Albert Ellis, as well as within a variety of other theories of psychopathology. However, writing anxiety is distinctive from other forms of pathological anxiety in that it is highly situation-specific, seems to be self-limiting, is relatively visible, and most importantly appears to be relatively easily overcome by rational instruction, with some mild-to-moderate confrontation in two or three brief group sessions. Thus, writing anxiety appears to be at best a very weak form of pathology; and in fact some anxiety is a necessary ingredient in the writing process, operating as an energizer. (GT)

Descriptors-*Composition (Literary), *Curriculum Development, *English Instruction, Freshmen, High School Students, Secondary Education, Student Writing Models, Teaching Techniques, Writing Skills

This report of the writing project at P.K. Yonge Laboratory School, University of Florida, examines the effectiveness of a systematic approach to teaching high school composition. The approach, which focuses on the skills that enable students to write clearly, correctly, and purposefully, includes sequential instructional units, considerable student writing, and an objective, concrete method for teacher evaluation of student writing. Sections of the report discuss the preparation of the project, its description, its evaluation, and the improvements that have been made as a result of the evaluation. Eleven appendixes provide samples of course materials, student work during the course, and references for teachers. (RL)

Descriptors-English Education, Higher Education, *Language Attitudes, *Language Usage, Sex Discrimination, *Sex Fairness, *Sex Stereotypes, *Textbook Bias, *Textbook Content, Textbook Evaluation, Textbook Research, Textbook Standards

An examination of eight widely used college English handbooks published since 1974 reveals a range of sexist usage, indicating that authors and editors have not reached a general consensus on which practices they and student writers are to avoid as sexist. Sexism is still manifest in handbooks in such practices as the following: using sexually stereotyped examples, such as depicting professional people with male names or masculine pronouns and assigning female names and feminine pronouns to housewives; employing derogatory remarks about ``feminine nature''; using terms such as ``girls'' for women; advocating masculine generic pronouns; and the authors' uses of masculine generics in discussing or addressing students, teachers, or authors. Of the books studied, only one revision, the seventh edition of Hodges' ``Harbrace College Handbook,'' has been purged of sexism in form and content. Many of its examples have been recast to include women in nonstereotyped roles. (DF)

Descriptors-Elementary Education, *Figurative Language, Grade 6, Instructional Media, *Language Processing, *Language Skills, *Metaphors, *Poetry, Poets, Symbols (Literary), *Teaching Techniques

A total of 272 children participated in a study of the effectiveness of three support systems for cuing sixth grade students in interpreting the metaphoric language of poetry. The first system involved regular classroom teachers who applied their own verbal cuing, the second included external instructional support through media and the teachers' own cuing, and the third provided internal support through the use of teacher/poets. A control group received no special instruction. All three poetry-instruction groups were given the same instructional approach model and the same set of 24 poems from which the teacher selected 16 for use over an eight-day period. A specially prepared version of Form A of ``A Look at Literature'' was used as a pretest and of Form B as a posttest. An analysis of pretest scores indicated no significant differences among the groups, while posttest scores revealed significant differences among the groups' responses that dealt with the interpretation of metaphoric language in poetry. The findings suggest that children learned more in classes with internal or external support than in classes with no unique support system. Appendixes include data used for matching classes within schools, scripts for slides, copies of transparency masters, charts of students' and teachers' ratings of the transparencies, resumes of the three poet/teachers, copies of the poems used, a sample logging page, test instruments, and data dealing with sex as a variable. King, Barbara

Measuring Attitudes toward Writing: The King Construct Scale.

Pub Date-Apr 79
Note-42p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (30th, Minneapolis, Minnesota, April 5-7, 1979)
Pub Type- Reports - Research (143) -- Speeches/Meeting Papers (150)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Attitude Tests, *Composition (Literary), High School Students, *Measurement, Measurement Instruments, Secondary Education, *Student Attitudes
Identifiers-Composition Process

The King Construct Scale, which measures student attitudes about writing, contains 25 bipolar constructs which reflect four major areas of the writing process: purpose of the writing, source of the writing, audience the writing is for, and mode the writing takes. The scale was developed by collecting the data with Pianko and Rogers' ``P & R Elicitation Form'' and refining those data in a preliminary study of 25 randomly selected high school students. When the scale was first used in 1978, it surveyed 296 students from eight New Jersey secondary high schools. The results of that survey indicate that high school students prefer original writing to assigned writing, personal choice of topic to assigned topics, and self as audience for what they write. The students also show a preference for graded papers instead of ungraded papers. These results suggest that the King Construct Scale is a successful instrument for obtaining student attitudes toward writing. (RL)

An Investigation of the Effect of Instruction in Five Components of the Writing Process on the Quality and Syntactic Complexity of Student Writing.

Pub Date- 78

Note- 37p.; Research prepared at Framingham State University

Pub Type- Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-Componential Analysis, *Composition (Literary), *English Instruction, Secondary Education, Structural Analysis, *Teaching Techniques, *Writing Skills

In an investigation of the effect of instruction in five components of the writing process on the syntactic complexity and the writing quality of high school students, 48 students received instruction in the following areas: discovering a subject, creating a design, developing a sense of audience, learning to use specifics, and learning to rewrite. Instruction covered a one-semester period. One week was devoted to pretesting, which drew three completed samples of writing on an assigned topic from each student one sample a rewrite. Another week of posttesting produced three more completed writing samples on an assigned topic from each student one of which was a rewrite. In addition, a standardized writing test was administered. Two weeks were devoted to instruction in each of the components, and writing samples were obtained from each student at the end of each instruction unit. All of the samples were analyzed for syntactic complexity by calculating the total number of words for each, while teacher/raters evaluated the samples for writing quality. The results showed that instruction in all five components of the writing process succeeded in developing the writing skills of the students in the study as judged by quality analysis and by syntactic complexity scores. Descriptors-Curriculum Development, Elementary Education, Intermediate Grades, Primary Education, *Spelling, *Spelling Instruction, Word Lists

The spelling program described in this guide, piloted and evaluated by 40 teachers of the Rochester, Minnesota elementary school district, is based upon current research, sound linguistic principles, and studies that determine which words are most frequently used by children and adults in their written communication. The guide provides an overview of the spelling program, procedures for organizing the weekly spelling activities, and other components of the program. Guidelines for evaluating and reporting student progress, a scope and sequence chart for the spelling curriculum, and spelling lists for grades one through six are also included. Appendixes contain spelling progress charts for grades two to six, the Dolch Basic Sight Vocabulary, 100 spelling demons, homonyms, the Pollock Word List, prefixes, Greek roots, Latin roots, suffixes, and some successfully implemented spelling activities and games. Poetry Preferences of Primary Graders. Studies in Language Education, Report No. 35.

Georgia Univ., Athens. Dept. of Language Education.
Pub Date-May 79
Note-16p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Educational Research, English Instruction, Listening Comprehension, Listening Habits, *Literature Appreciation, *Poetry, Primary Education, Reading Interests, Student Attitudes, Student Development, Student Interests, *Student Reaction

Fifteen classes of first, second, and third grade students in five Clarke County, Georgia, schools listened to poems and rated them on a three-point scale. Five of these 15 classes also participated in the study's second phase, which measured responses to the same poems after some poetry and related extension activities. Analysis revealed that the most popular poems were narrative, contained humor, did not depend on word play, and were either about children, involved children in the subject situation, or were about animals. The children also showed an overwhelming preference for rhymed, metered poetry. Surprisingly few poems were more or less well liked after student participation in the poetry-related activities of phase two. In an attitude survey, children from poetry study classes showed greater interest in writing and in acting out poems, while children who had not participated in poetry study expressed interest in learning to recite poetry. These results add to data from a similar study of intermediate-grade students, and suggest that teachers should carefully select a variety of poems that extend children's taste while maintaining their positive attitudes toward poetry. The Connotative Dimensions of Selected Display Typefaces.

Pub Date-Aug 79
Note-25p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (62nd, Houston, Texas, August 5-8, 1979)
Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Factor Analysis, Graphic Arts, Journalism, *Layout (Publications), Media Research, Media Selection, *Printing, Publishing Industry, *Semantic Differential, *Visual Discrimination, Visual Perception
Identifiers-*Typeface, *Typography

The semantic differential ratings of ten typefaces given by a group of 24 subjects were factor analyzed to discover what connotative meanings laypeople applied to typefaces and how these meanings compared with those of professional typographers. The typefaces, five from general categories and five from novelty categories of display typefaces, were Helvetica, Garamond, Bodoni, Palatino, Times Roman, Cloister Black, Excelsior Script, Broadway, Libra, and Legend. The factor structure of the semantic scales revealed five dimensions of connotative meaning: potency, elegance, novelty, antiquity, and evaluation. Helvetica, the only sans serif typeface, was not perceived as differing significantly from serifed typefaces on most dimensions. Garamond, Bodoni, Palatino, and Times Roman were also perceived as having similar connotative meanings even though they were from different typeface classifications. Libra and Legend, two very distinctive novelty typefaces, were fairly neutral on all factor dimensions. At least four of the ten typefaces tested can be used interchangeably for display purposes. Connotations of the other typefaces generally reinforce the current practices of media professionals. (References, the ten display typeface samples, and a listing of connotative dimensions for each typeface tested are included.) (RL)

A Motive of Rhetorics: Invention and Speech Acts.

Pub Date- 78

Note-23p.; Study prepared at the University of Nebraska

Pub Type- Information Analyses (070) - Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Communication Skills, Daily Living Skills, *Information Theory, *Interaction, *Interpersonal Relationship, Philosophy, *Rhetoric, *Speech Communication, Speech Skills

Identifiers-*Speech Acts

While rhetorical theory has long been concerned with the epistemological foundations of rhetorical abilities, the full potential of the structuralist perspective is far from realized. The study of speech acts and inventive processes discloses the underlying logic of linguistic performance. A speech act is conceptualized in terms of the communicative force of discourse; examples include questions, commands, statements, promises, and compliments, as well as the more complex multiple-force and subtle forms. Speech act analysis provides insight into the ways communicators create and comprehend pragmatic strategies. The logic of conversational structure mirrors a speaker's rhetorical or communicative competence. The focus on epistemological questions concerning rhetorical invention should help to explain why communication usually works effectively, and should suggest profitable programs for preventing misunderstanding based on the effectiveness of these normal processes. Rhetorical theory should align itself more closely with structural forms of the analysis of creativity as represented in the works of Piaget, Chomsky, and Levi-Strauss. (DF)

Rhetoric: Systems and Beyond.

Pub Date-Nov 78
Note-12p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)
Pub Type- Speeches/Meeting Papers (150) - Historical Materials (060) - Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Communication (Thought Transfer), *Discourse Analysis, *Information Theory, *Intellectual History, *Rhetoric, Rhetorical Criticism, Speech, *Speech Communication, *Systems Approach, Verbal Communication

The practical value of the systems approach to rhetoric may be enhanced by attending to distinctions between the various types of symbolic activities. One such distinction exists between popular discourse, understood as intentional communication, and theoretical or descriptive statements about such discourse. A second distinction is between pragmatic or technical treatises designed to instruct in speaking or writing, and speculative or descriptive treatises on the role of discourse in society. Also of concern are the relations which successive rhetorical systems bear to one another, and whether the development of rhetorical theory is additive or sweeping and radical. While the pragmatic/technical tradition has remained quite stable, the speculative/descriptive tradition has undergone frequent, substantial revision. Rhetoric is active and vital only when the subordinate traditions are interwoven in mutually supportive ways. Promising phenomena in the systems perspective include attention to the functions of discourse such as interpersonal adjustment and organizational communications, interest in the knowledge-building functions of discourse, and the growing understanding of the perceptual process, which offers support to the audience-centered theory of rhetoric. Descriptors-Censorship, Civil Liberties, Communication (Thought Transfer), *Developing Nations, Foreign Countries, *Freedom of Speech, *Information Dissemination, *Journalism, Legislation, *Mass Media, Needs Assessment, News Media, Newspapers, Radio
Identifiers-*Pacific Region

In many developing nations, governments have invested in media technologies to propel their nations into the twentieth century. These measures have taken an increasing social, financial, and cultural toll. Questions surround the right of developed nations to impose their commercially oriented values on those who lack the means to achieve such standards of living, as well as the loss of traditional values and culture, the widely expressed faith that communication will produce change, and the Western concept of press freedom as absolute, based on Western social and theological ideas. Freedom and democracy in developing nations should be evaluated on the basis of the nation's own development rather than on Western expectations. Interfering with information dissemination in such nations are such factors as inadequate technology, the high cost of materials, and language differences. Outside media have added pressures to nascent systems by creating false hopes and incomplete impressions and by exploiting the inadequate evaluative background of developing nations' people to deal with various ideas, interfering with the gradual, self-defined development of a nation. Debate also centers on whether commercial or political interests should dictate what should be presented on television in these areas. (DF)

Unreflected Ideology and the Subversion of Conventional Critique.

Pub Date-Apr 79
Note-21p.; Paper presented at the Annual Meeting of the Southern Speech Communication Association (Biloxi, Mississippi, April 11-14, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Descriptive (141)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Communication (Thought Transfer), *Group Behavior, *Meetings, *Organizational Communication, *Professional Associations, *Professional Recognition, Speech Communication

The examination of the conventionality of discourse at speech communication conventions reveals the ideological commitments of these conventions. The symposium, conference, and congress differ from the convention in that at such meetings the participants are interested in generating concrete experience, while at conventions, participants are interested in consuming such experience. A convention is a meeting place of people rather than of ideas, and it is the interaction of personalities rather than of ideas that emerges as interesting to participants. Conventions are held for practical, social, cultural and historical reasons, and are important in meeting the needs of the organization and of the individual members in a situation where adherence to rules of conduct and typicality of ideology is displayed. Conventionalism at a professional convention serves as a social form, as a disciplinary description, and as a recurrent structure in the annual convention. (DF)

The results of research conducted by the 1977 Task Force on Minorities in Public Broadcasting are reported in this document. The task force, consisting of a group of 28 individuals of various ethnic backgrounds, was assembled by the Corporation for Public Broadcasting to determine the success of public broadcasting in meeting the informational and educational needs and interests of Blacks, Asians, Latinos, and Native Americans. The report contains a statement of key findings and key recommendations, as well as research findings on the effects on minorities of the following factors: public broadcast policies, employment patterns, career development programs, minority programing, and minority access. Audience research is also discussed. Research results indicate the following: national minority public broadcast programing is seriously deficient, minority programing being disproportionately scarce; and the scarcity of minority programs is directly attributable to the insufficient number of minority persons employed in public broadcasting, controlling stations with public broadcast licenses, or having access to traditional sources of funding support. Descriptors-Attitudes, *Changing Attitudes, *Communication (Thought Transfer), Distance, *Interpersonal Relationship, Models, *Persuasive Discourse, Proximity, *Research Needs
Identifiers-*Communication Research, Distraction, *Proxemics

Violations of interpersonal spacing expectations have been demonstrated to influence a receiver's perception of the credibility, attraction, and influence of an initiator of such violations. Recent research on distraction and on personal space points to several potential strategies a persuader may adopt when trying to influence another individual. Research must first establish normative distances between interactants; once such norms have been established, deviations from those norms should produce predictable communication outcomes. Distraction offers a potential theoretical base from which the effects of violations of interpersonal distancing expectations can be predicted. A proposed model suggests that distance and reward serve as distractors with predictable results. Future research is needed to test the robustness of the model. Research is needed to establish that interpersonal distancing violations are distracting, to establish reliable and valid measures of distraction and counterarguing, to further test the model of interpersonal distancing expectations, and to answer the question of whether a threat threshold exists. Descriptors-*Debate, *Evaluation Criteria, Higher Education, *Persuasive Discourse, Public Speaking, Secondary Education, *Speech Communication

In debate, it has been argued that a judge's decision is between two competing policy systems. This paradigm does not admit of direct refutation by the negative team considering the predicate facts and value assumptions of the affirmative policy. A second position is that straight refutation is an appropriate means of analysis in resolving propositions of public policy and that a requirement that a negative team provide an alternative policy to an affirmative policy that has not been validated is unwarranted. Two assumptions on which policy theorists base their rejection of refutation, that a process reality characterizes any system and that a policy decision can be rendered only after a comparison of policies, each makes an arbitrary assessment that any change is better than no change. However, the nature of debate implicitly requires advancing good reasons in support of claims. When a system's description has been refuted, then no valid conclusion can be assured. The negative team may argue for rejection of the predicate as well as offer an alternative description, but this decision is a strategic one rather than a necessary one. (TJ)

Friedley, Sheryl A.

Paralinguistic Cues at Three Levels of Emotional Intensity in Actual Crisis Communication.

Pub Date-May 79
Note-33p.; Paper presented at the Annual Meeting of the Eastern Communication Association (Philadelphia, Pennsylvania, May 5-7, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Communication (Thought Transfer), *Counseling, Counseling Programs, *Counseling Services, Expressive Language, Interpersonal Problems, *Intervention, Mass Media, *Paralinguistics, Speech Habits
Identifiers-Communication Research, *Crisis Intervention, *Telephone Counseling

The paralinguistic dimension of telephone counseling in such crisis situations as drug and other personal problems was investigated, based on the importance of paralinguistic cues surrounding the linguistic content of the message for the accurate interpretation of the caller's state of mind. Thirty samples, each a three minute sample of crisis communication, were taken from actual telephone conversations and examined to identify the paralinguistic cues that might allow a crisis center volunteer to determine the level of emotional intensity of the caller. Seven dependent variables were assessed: level of pitch, rate of speaking, articulation errors, editorial errors, filled pauses, within-response pauses, and sobbing. Results indicate that only two significantly positive correlations were observed: the frequency of editorial errors with the use of filled pauses, and the increase in pitch level with sobbing. (DF)

Communication Rules and Coorientational States: A Synthesis and Extension of Two Theories.

Pub Date-May 79

Note-25p.; Paper presented at the Annual Meeting of the International Communication Association (Philadelphia, Pennsylvania, May 1-5, 1979)

Pub Type- Speeches/Meeting Papers (150) - Opinion Papers (120) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Behavior Patterns, *Communication (Thought Transfer), Interaction, *Interaction Process Analysis, *Interpersonal Relationship, *Models, Research Methodology, Research Needs, *Theories

Identifiers-*Communication Research

Studies based on models of interpersonal coorientation have discovered regularities in communication behavior that coorientation theory cannot explain. On the other hand, rules-based theories of communication contain explanatory concepts seemingly applicable to these phenomena, but have not been articulated sufficiently to be applied to the complex patterns of self-other-object relations differentiated by models of coorientation. A synthesis of coorientation and rules theories is appropriate. The concept of a logical force'' in communication a central concept in one rules theory permits reconceptualization of the four states'' in K.R. Stamm and W.B. Pearce's process model of coorientation, and thus subsumes coorientation in a more comprehensive model of interpersonal interaction in conversation. Further, the inclusion of coorientation in the rules theory provides an increased sophistication in the conceptualization of logical force.'' The synthesis of these theories suggests the hypothesis that persons develop rules for meaning and acting in particular coorientational states. A pilot study involving 21 college students illustrates a way of defining these theoretical concepts operationally and suggests a protocol for research. (Author/GT)

Richard Weaver on Rhetoric and Culture.

Pub Date-Apr 79

Note-21p.; Paper presented at the Annual Meeting of the Southern Speech Communication Association (Biloxi, Mississippi, April 11-14, 1979)

Pub Type- Opinion Papers (120) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Culture, *Persuasive Discourse, Public Opinion, *Rhetoric, Rhetorical Criticism, *Social Factors, *Sociocultural Patterns

Identifiers-*Weaver (Richard M)

The rhetorician Richard M. Weaver analyzed culture as profoundly ill and he viewed rhetoric as closely tied to culture. Rhetoric relies on the cultural focal point for its effectiveness; orators must operate on a basis of common, accepted, uncontested terms and premises to move their audiences, and mutual assent to a tyrannizing image'' is necessary for an orator to get premises accepted. Rhetoric serves as a cultural glue, supplying the informed sentiment necessary for the bond of community. For Weaver, culture is an expression of values, is symbolic, is exclusive and integrating, meets psychic needs, is form which equals style, is religious, is a matter of feeling or emotion, and is hierarchical and aristocratic. In Weaver's view, culture, history, and rhetoric are interrelated in a complex fashion. (DF)

Prediction of Solvency in Affirmative Plans: The Burden of Policy Advocates.

Pub Date-Apr 79

Note-18p.; Paper presented at the Annual Meeting of the Central States Speech Association (St. Louis, Missouri, April 5-7, 1979); Not available in hard copy due to marginal legibility of original document

Pub Type- Speeches/Meeting Papers (150) - Opinion Papers (120)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors-*Debate, Higher Education, Language Arts, *Persuasive Discourse, *Policy Formation, Public Policy, Secondary Education, *Speech Communication, *Verbal Communication

The development of a sound theory of the arguing of policy questions in debate requires that the Affirmative be obligated to demonstrate the solvency of its plan, regardless of the paradigmatic origins of the case theory. While the specific degree of demonstration which is necessary to establish solvency remains a substantive issue within the context of a given round, the basis of such an obligation remains constant. The advocate of change in a proposition of policy has the responsibility to demonstrate that the effects claimed from the proposition are correlated to specific mechanisms within the plan. The prediction of alleged effects is a burden of affirmation, and need not follow from the failure of negation. Ultimately, the adequacy of a proposition is not measured in terms of the effects claimed, but rather through the probability of the effects' occurrence; an explicit obligation exists on the part of the Affirmative to prove that the plan does in fact remedy the problem. The theoretical requirement for an advocate to predict the consequences of a proposition is best measured in practice by the correspondence between inherency dysfunctions which preclude status quo action with plan mechanisms which address these dysfunctions. (DF)

Significant Form and Rhetorical Criticism: The Jeremiad and the Rhetoric of the American Revolution.

Pub Date-Apr 79
Note-16p.; Paper presented at the Annual Meeting of the Central States Speech Association (St. Louis, Missouri, April 5-7, 1979)
Pub Type- Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Christianity, Persuasive Discourse, Political Attitudes, *Political Influences, *Puritans, Religious Factors, *Revolutionary War (United States), *Rhetoric, Rhetorical Criticism, *United States History

The jeremiad, a sermonic rhetorical form, played a significant role in the American Revolution. As a successful social movement, the Revolution generated a language that portrayed its interpretation of reality. This was achieved in part through the use of significant forms that served to provide a link between the past and future and to foster a sense of community. The Puritan jeremiad was a four-part discourse that, after a reading from an Old Testament prophet, included the following: recognition of the people's failure to keep the divine covenant; interpretation of present evils as divine punishment; a call to recognize errors, repent, and restore the covenant; and a prediction of

divine restoration of the people. The jeremiad became a vehicle of cultural expression and an agent of socialization, serving as rhetoric, ideology, and ritual. The rhetorical form of the jeremiad has subsequently taken on a secular cast, recognizing a covenant with the United States' past, rather than with God; civil religion has replaced Puritanism as the underpinning of the jeremiad. By analysis of this structure, speakers can be identified who were at the advancing edge of the movement, stressing action while their contemporaries were lamenting. (DF)

The Political Communication of Strategic Nuclear Policy.

Pub Date-May 79
Note-25p.; Paper presented at the Annual Meeting of the Eastern Communication Association (Philadelphia, Pennsylvania, May 5-7, 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Communication (Thought Transfer), Communication Problems, *Disarmament, *Federal Government, *Foreign Policy, Information Dissemination, Legislators, Organizational Communication, *Political Attitudes, *Public Opinion, Public Policy

A study of the different perceptual frameworks of the major parties involved in strategic nuclear policy was conducted by examining the interaction between the Executive Branch, Congress, and the informed public. Public political communication data were gathered from public documents generated by Congress and the Executive branch, and by examining selected letters to newspapers. Strategic themes cited in relationship to strategic subjects in the communications were identified. Subjects and themes were coded as nearly as possible in the original words used, and these were then collapsed into four subject areas and six themes, providing a category system for statistical analysis. Results indicate that the three major groups have widely different priorities and perspectives on strategic policy. The Executive branch takes a world-wide view and is most concerned with the effects of an issue on negotiations and international relationships. Congress's concern is with such practical matters as cost-effectiveness, and the public's perspective is vague and general. Such divergence, it is hypothesized, contributes to the often conflict-prone nature of strategic debate, although unity was found in a universal desire for stability. (DF)

Martin Heidegger: Interpretation, Language, and the Intrapersonal Process.

Pub Date-Apr 79
Note-14p.; Paper presented at the Annual Meeting of the Southern Speech Communication Association (Biloxi, Mississippi, April 11-14, 1979)
Pub Type- Opinion Papers (120) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Communication (Thought Transfer), *Existentialism, *Information Theory, *Interaction, Interpersonal Relationship, Language, *Perception, *Philosophy, *Speech Communication
Identifiers-*Heidegger (Martin), Phenomenology

The ``logos'' concept of Martin Heidegger's phenomenological philosophy refers to a perceptual attunement to ``Being,'' or reality as a whole, which is prior to language. Logos includes every way in which people interpret, constitute, and interact with their world. Language is seen as prior to our awareness of Being, as well as constitutive of it. Logos, language, and speech have a teleological meaning aside from their function in communication; they are the means by which we create a personal world in which we dwell. An implication of Heidegger's philosophy for a theory of intrapersonal communication emerges in the view of truth as ``aletheia,'' or the uncovering or disclosing of the world to the individual, rather than as a correspondence to reality. ``My truth'' is the result of the way the world has disclosed itself to me; no one is ``wrong.'' A second implication arises from Heidegger's stress on language as constitutive of individual perception. Language is not merely a tool, it is a major influence on the way we perceive our world; perhaps by altering or expanding the equipment which the individual uses to shape his or her perception, the very nature of that perception might be changed. Descriptors-*Communication Skills, *Employer Attitudes, *Employment Qualifications, Higher Education, *Job Skills, *Job Training, *Speech Communication

To determine which communication skills employers in business and industry perceive as important for employees, a questionnaire was mailed to a random sample of personnel directors in business and industry in the Greater Cincinnati metropolitan area. Of the questionnaires mailed, 89 were returned (29.3% response rate). Analysis of the responses indicated that communication skills judged as important for employees to possess included accurate listening, credibility, ability to organize ideas in an orderly way, a clear and distinct voice, personal confidence when speaking to others, sensitivity to others, correct grammar and pronunciation, ability to interpret a message to another person, persuasiveness, establishment of face-to-face contact with others, and ability to use the formal organizational channels of communication and to make decisions cooperatively with others. Communication skills rated as unimportant for employees included ability to use a special technical vocabulary, disclosure of personally relevant material, variety in vocal intonation, speech free from dialect, loud vocal volume, ability to interpret printed material by reading aloud, and ability to use parliamentary procedure. Descriptors-Communication (Thought Transfer), *Ethnography, Information Dissemination, *Information Theory, Interpersonal Competence, *Research Methodology, Social Science Research, *Speech Communication

Identifiers-*Communication Research, Hymes (Dell H), *Speech Acts

A study that examined two speech events, giving testimony'' and being interviewed,'' was conducted to test the relevance of the ethnography of speaking'' approach to communication research proposed by Dell H. Hymes. These speech events occur when someone seeks information from another for a formal purpose. The study analyzed one speech act within each speech event for each of two participants in a job-related legal controversy. Following Hymes' methodology, the following components of the speech acts were identified: situation, or setting and scene; participants; ends in view; act sequence, or message form and content; key, or tone; instrumentalities, or channels and forms of speech; norms of interaction and interpretation; and genres. Results indicated that once a speech act has been identified as belonging to the giving testimony'' genre, all other speech act components can be predicted. Similarly, once a speech act has been identified as a member of the being interviewed'' genre, all components, with the exception of setting, can be predicted. The findings suggest that Hymes' methodology neglects the relationship of the speaker to the content of the speech act a component that influences speech act form. (DF)

Descriptors-Case Studies, Cultural Environment, *Ethnography, *Ethnology, *Family (Sociological Unit), Family Characteristics, Family Life, Media Research, *Research Methodology, Sociocultural Patterns, Television, *Television Research, *Television Viewing
Identifiers-*Communication Research

Television's role within the familial setting is the subject of a research program being conducted at the Universities of Hartford, Texas, and Utah, proceeding on the premise that television functions within a variety of environmental influences, all of which act in varying combinations to produce a wide range of effects within viewers. The approach combines the inductive models of ethnology and the deductive models of hypothetical studies, and is directed toward two goals: the development of a library of case studies relating the process of television use within the family setting, and the interrogation of these for communalities and covering statements which can be predictive of certain classes of outcomes of viewing by individuals. Major classes of variables to be studied include normative and baseline data on television within the family structure, television as an agent of consumer socialization, and television's role in affecting family members' values. The following outcome descriptions have been established: the circumstances of television use by individual family members; the functions of television within the family structure; the motives, purposes and consequences of television viewing; and television as an agent of consumer socialization. Grammar: An Exploratory Study of Students' Attitudes toward the Shibboleth.

Pub Date-May 79
Note-23p.; Paper presented at the Annual Meeting of the International Communication Association (Philadelphia, Pennsylvania, May 1-5, 1979)
Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150) - Tests/Questionnaires (160)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Grammar, Higher Education, *Language Attitudes, Language Research, Language Role, *Language Usage, Public Speaking, *Speech Communication, Speech Evaluation, *Student Attitudes

Forty undergraduate students were subjects in a study to discover students' attitudes toward language and grammar and to determine how the demand for grammatical correctness affected them in preparing and delivering public speeches. The subjects each completed an 11-item interview schedule that elicited demographic information as well as feelings and opinions about grammar and public speaking. The results showed the following: students believed in the existence of a correct grammar''; most students had been exposed to grammar drill in secondary school; most believed that good grammar was a mark of an educated person; most felt that constant monitoring of one's language leads to self-consciousness; many felt that good grammar would not necessarily increase someone's opinion of them but that bad grammar would definitely detract from someone's opinion of them, especially in job interviews; and a number of the students felt that teachers were purposely looking for mistakes in student work. (A copy of the interview schedule is appended.) (FL)

Descriptors-*Audiences, *Behavior Patterns, *Ethnography, *Mass Media, *Research Methodology, Research Problems, Television
Identifiers-*Audience Response, *Media Effects

Noting that there is growing interest in systematic, ethnographic studies of mass media and their primary audiences (families), this paper seeks to encourage additional ethnographic study of audience behavior by discussing some theoretical concerns that bear on the qualitative research enterprise. To do this, the paper first introduces a variety of perspectives that can be used to guide ethnographic research. It then discusses three of these perspectives communication rules, the interpretive paradigm, and ethnomethodology as theoretical points of departure for ethnographic research in mass communication. In addition, it discusses the ways in which communication rules are accounted for in normative, interpretive, and ethnomethodological perspectives. It presents the issues of generality and necessity in qualitative audience behavior and offers illustrations from qualitative research to demonstrate three modes of interpretation of audience behavior. Identifiers-Information Analysis Products

Designed to present communications problems faced by the elderly and to assist classroom teachers to develop activities for dealing with them, this booklet begins by examining stereotypes of older persons which minimize and distort communication with them. It outlines common misconceptions about the elderly, centering on their state of mind, health, capacity for work, interest in life and sexual activity, and financial condition, and it notes that despite television's capacity to serve a number of functions for the elderly, it reinforces such stereotypes in advertising and programing. The second part of the booklet provides exercises for use in a unit on communication and the elderly, designed to restructure patterns of communication that manifest or reinforce negative stereotypes about older persons and the aging process. Exercises are grouped in the following four sections: diagnosing attitudes toward the elderly; examining the various media (television, magazines, and children's books) for positive and negative stereotypes toward the aging; encouraging empathy with the elderly regarding their communication difficulties; and encouraging intergenerational communication. A list of classroom film, musical, and literary resources is included. (DF)

Identifiers-*Entertainment

This collection of 26 articles, written by mass communication experts from 12 countries, investigates various aspects of entertainment as communication, focusing on entertainment as provided by its currently most important source, mass media. The premise behind the essays is that there is no such thing as "pure entertainment," but that all entertainment contains political, social, and economic messages and values, intended or not. Contributors explore the content a communicator produces and the content an audience uses, and discuss entertainment from such perspectives as the following: how the mass media have affected entertainment and vice versa; how entertainment can be approached theoretically; the social and political functions of entertainment; and the relationship between entertainment production and market mechanisms or mass audience demand. Descriptors-*Broadcast Industry, Communication (Thought Transfer), Journalism, *Mass Media, *Media Research, *Publishing Industry, Radio, Television

Intended to provide a single reference source for the most significant statistics describing communication industry trends in the United States since 1900, this book is a collection and assessment of the currently available quantitative descriptive information on mass media industries. The core of the book is its more than 300 tables of data on the publishing, motion picture, recording, and broadcast industries. These data are supplemented by a brief interpretative text, an analysis of source reliability and validity, and a listing of several sources of further information in each subject area. Sections focus on the following topics in the media industries: growth, ownership and control, economics, employment and training, content trends, audience size and characteristics, and United States media industries abroad. Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Bias, Communication (Thought Transfer), Credibility, *Females, Higher Education, *Public Speaking, *Sex Discrimination, *Sex Stereotypes, Speech Communication

The purpose of this study was to investigate whether, when both listener and speaker are unknown to one another, listeners of each sex do or do not tend to differentially evaluate presentations by speakers according to sex; results were then compared to those of earlier studies in which the women being judged were hypothetical authors. A group of 502 male and female students in undergraduate public speaking classes were asked to evaluate presentations by male and female communicators as a regular aspect of the course. Results indicated that students demonstrate no prejudice toward communicators of either sex, even when the communicators are personally unknown, suggesting that stereotypes relied on for judgments of source play a lesser role when a real woman is the message source because other information is available to use in judging the individual. Comparison to earlier studies shows that judgments about the performance of females differ considerably depending on whether the women being judged are real or hypothetical; earlier generalizations that women are in general prejudiced against other women appear to be unfounded. American Indian Women: Problems of Communicating a Cultural/Sexual Identity.

Pub Date- 76

Note-10p.; Study prepared at the University of California, Berkeley

Pub Type- Opinion Papers (120) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*American Indians, *Communication (Thought Transfer), *Cultural Background, Cultural Interrelationships, Ethnic Stereotypes, *Females, *Sex Role, *Sex Stereotypes

In traditional American Indian cultures, sex roles were clearly defined and women were the keepers of the home, child bearers, and food gathers. Sometimes, however, stereotypes and preconceptions become barriers to cross-cultural communication. For instance, feminists who see themselves as victims of a male-dominated society cannot assume that Indian societies are male-dominated in the same way as their own nor that the system of rewards for being a wife and mother is the same in Indian society as in the dominant society. In one survey, 61 Indian women college students indicated a wide latitude in their knowledge of or definition of women's roles in their tribal cultures. The factors involved in a sense of cultural/sexual identity for Indian women may include language differences, participation in tribal ceremonies, residence on a reservation, or attendance at week-end pow-wows. Within their own communities these strategies are generally associated with the respect for the role of wife and mother that persists in Indian communities. For college and professional Indian women, communication strategies may be those of trying to inform people about Indian values or traditions and of helping break stereotypes. (TJ)

Descriptors-*Debate, Higher Education, *Persuasive Discourse, *Public Speaking, Secondary Education, *Speech Communication

Legislative intent as a debate tactic is drawn from the judicial system as a fundamental concept in the interpretation of statutes. Two paradigms for the application of legislative intent have emerged: (1) the courts will examine the affirmative proposal after enactment to bring it into line with the intent of the affirmative team, and (2) the debate judge is cast into the role of the adjudicator of the conflict concerning plan interpretation. The difficulties with the first paradigm include: courts may not become involved, courts may not accept intent as expressed by the affirmative in the debate, courts have generally chosen not to expand legislation beyond the language of the statute itself, and there is no record of the debate for courts to depend on. The major difficulty with the second paradigm is that a debate judge is not deciding upon the application of legislation but upon whether the proposal ought to be enacted at all. Educational reasons also argue against the use of legislative intent as a tactic: it introduces new arguments in the rebuttal stage, it may force the negative to abandon good arguments because the affirmative clarified too late in the debate, and it encourages the use of ambiguous language in formulating a proposal. Identifiers-*Canada

Content analyses of the depiction of aggression and images of reality on Canadian television were performed on 109 program tapes of top-rated Toronto programs. Content was coded in terms of global messages communicated, character portrayals, context and setting of the program, amount and nature of conflict portrayed, and detailed information on incidents of aggression. Aggression was defined as any behavior that could inflict either physical or psychological harm, and included explicit and implicit threats, nonverbal behaviors, and verbal abuse. Results were as follows: there were 18.5 acts of aggression per program hour; situation comedies led in nonphysical aggression, which, portrayed as funny, excessively distorted patterns of human interaction; aggression was incidental to plot; physical consequences of aggression were seldom shown; aggression, violence, and certain methods of conflict resolution were portrayed almost exclusively and milder forms of conflict and more constructive methods of resolution were rarely seen; characters were most often male, white collar, socially isolated, white, English-speaking North Americans; and police officers were commonly depicted engaging in violent behavior. In comparison to United States findings, Canadian programing was less aggressive in general but slightly higher in verbal/psychological aggression. (DF)

Identifiers-*Communication Research

Contemporary research findings in the fields of perceptual psychology and neurology of the human brain that are directly related to the study of visual communication are reviewed and briefly discussed in this paper. Specifically, the paper identifies those major research findings in visual perception that are relevant to the study of visual communication in regard to the key variables in picture perception, examines those key neurological and neurophysiological findings that relate to the study of images insofar as the hemisphere specializations of the brain are concerned, and provides some examples and suggestions for empirical research in visual communication drawn from the review of the few key studies that now exist in the field. Descriptors-*Aggression, Behavior Change, Changing Attitudes, Childhood Attitudes, *Children, *Cognitive Development, Community Involvement, Cross Sectional Studies, Elementary Education, Foreign Countries, Longitudinal Studies, *Reading Skills, Sex Role, *Television Research, *Television Viewing

Identifiers-Canada, *Media Effects

The five research papers that comprise this document report on research into the impact of the inception of television reception on residents of a Canadian town, "Notel." The introductory section tells how Notel and two other similar Canadian towns that already had television reception were studied just before Notel received television reception in 1973, and again two years later; the section also explains the cross-sectional and longitudinal comparisons that were made in the research. The research papers separately outline findings on the impact of television on children's aggressive behavior, reading skills, cognitive development, and sex role perceptions, as well as on residents' participation in community activities. The findings presented suggest that television viewing may result in the following: increases in children's physical and verbal aggression; decreases in reading skills, varying by sex and grade level; decreases in some cognitive skills; formation of more traditional sex role attitudes; and decreases in participation in community activities. Descriptors-*Body Height, *Communication (Thought Transfer), Higher Education, *Interpersonal Relationship, *Perception, *Psychological Studies, Speech Communication

Identifiers-*Communication Research

This study examined the effects of message valence, familiarity, and communicator sex on the perceptual distortion of height. Additionally, the relationships of self-esteem and independence of judgment to perceptual distortion were studied. A group of 139 volunteers from a basic communication course were randomly assigned to one of the eight conditions of the study. Results indicated that familiarity with the message source and the sex of the communicator were predictors of the perceptual distortion of height. (Author)

Descriptors-*Communication (Thought Transfer), Humanities, *Humanization, *Philosophy, *Research Methodology, Social Science Research, *Social Studies, *Speech Communication
Identifiers-Husserl (Edmund), *Phenomenology

Phenomenology, a constantly renewed effort to see the world in a nonreductive and originative way, is useful in bringing about radical reflection on the phenomenon of communication as a human science. A human science is both a scientific and a humanistic endeavor; it is necessary to return to the phenomena under investigation and to permit them to guide methodological designs to guard against the primacy and absolutization of method. The human sciences must be kept from being severed from their prescientific origins in the concrete life-world of experience. Among human sciences, communication enjoys a favored position to maintain its grasp on the human point of view. The common ground of philosophy and communication science is communicative behavior as this finds its point of origin in the concrete dialogic encounter. Through the dialectical interchange between partners in a communication, shared meanings are produced. Meaning comes to presence in the world in the event of an undivided concreteness of one self with another. Winning arguments and collecting information are secondary to the function of language on the originative level as an object to which conversational partners are directed, considering the weight of one another's opinion. Descriptors-Communication Problems, Communication Skills, *Group Dynamics, Group Relations, *Interaction, *Interaction Process Analysis, *Organizational Communication, Research, *Task Performance

Identifiers-*Communication Research

Three studies were conducted to ascertain the relationship between predisposition for group work climate and the types of procedural messages that group members employ. In the studies, expectations about group work procedures fell into two categories: high procedural order (HPO) and low procedural order (LPO). Each category consisted of four properties. For HPO the properties were use of planned, sequential patterns for organizing tasks; concern for time management; an emphasis on regular procedures; and an emphasis on clarifying procedures. The four LPO properties were use of chain-association patterns for developing ideas, flexibility in establishing and changing plans, oblivion to time constraints, and vacillation between task and socioemotional issues. Individual expectations for group work climate were derived from scores on the Group Procedural Order Questionnaire (GPOQ). In the first study, analysis of interaction across six small-group meetings demonstrated that HPO subjects initiated HPO statements, while LPO subjects generated socioemotional ones. In the second study, HPO subjects surpassed LPO ones in their use of procedural clarification acts, their application of goal-related statements, and their reliance on general headings to introduce new topics. In the third study, LPO subjects employed a high frequency of interruptions, multiple-conversations, and topic changes, whereas HPO members produced messages that pertained to agendas, lists of alternatives, and task deadlines. Descriptors-*Anxiety, *Behavior Change, Communication (Thought Transfer), Desensitization, Evaluation Methods, *Speech Communication, *Speech Evaluation, Speech Habits, Speech Pathology, Speech Skills, *Speech Therapy
Identifiers-*Communication Apprehension, *Reticence

Two theoretical schools have emerged within the field of communication focusing on the alleviation of dysfunctional communications such as speech anxiety, communication apprehension, and speech reticence. The communication anxiety-behavior therapy school regards excessive anxiety to be a primary factor in dysfunctional communication. This school asserts that anxiety is a learned response susceptible to unlearning, that excessive anxiety during or in anticipation of communication leads to ineffectiveness, that behavior therapy is effective in reducing anxiety, and that communication teachers are qualified to implement such therapy. The speech reticence rhetoritherapy school holds that reticent persons perceive themselves to gain more by remaining silent than by participation. The position of this school is that communication teachers should implement rhetoritherapy programs to treat dysfunctional communication rather than programs to alleviate anxiety since anxiety is not the basis of dysfunctional communication, treating anxiety is the province of psychiatry, eliminating anxiety would also reduce motivation, and rhetoritherapy is a more effective treatment. A practical directive emerging from the perspectives of these two schools is that mass treatment programs without careful individual screening would unduly risk additional failures for troubled persons. Identifiers-Zurcher v the Stanford Daily

The 1971 police search of a newspaper office led to the United States Supreme Court's "Zurcher v The Stanford Daily" decision that newspaper offices can permissibly be searched if it is believed that they contain

materials that relate to an ongoing criminal investigation. This decision has been viewed by the press as an attack on First Amendment protections, as a threat to the confidentiality of sources, as an invitation to police to use newsrooms as sources of information for investigations, and as a threat to the newspaper's role as watchdog on government and law enforcement. Since that decision, 12 to 15 searches have been conducted, lasting as long as 20 hours. Specific guidelines for newspaper offices to mitigate the effects of police searches include the following: insist that the warrant be presented to the editor in charge; summon an attorney and stall for time; understand the specific terms of the warrant; insist that police officers restrict themselves to precisely what is sought in the warrant; keep confidential materials in a safe or at home; use code names for sources; refrain from discarding notes; destroy unprinted photos immediately after running stories; cover the newsroom incident as a news story with photos; and insist on receipts for all items taken. Descriptors-*Cognitive Processes, Information Processing, Media Research, Neurological Organization, *Psychological Studies, *Psychophysiology, *Television
Identifiers-*Dreams

Research into brain physiology and dream psychology have helped to illuminate the biological purposes and processes of dreaming. Physical and functional characteristics shared by dreaming and television include the perception of visual and auditory images, operation in a binary mode, and the encoding of visual information. Research is needed in the following areas: the effects of heavy television viewing on the brain's internal scanning mechanism or firing pattern; the effect of exposure to television's heavily saturated, luminous colors on the colors experienced in dreams; the relationship between experiences in dreaming and viewing by comparing electroencephalographic recordings during rapid eye movement (REM) sleep and during television viewing; the capability of television viewing to stimulate a mental state between waking and dreaming; the relationship between perceptions in dreams and on television and its implications for visual literacy; comparison of dream content to television content; the formulaic, cyclical nature of dreaming and of television programing; and the possibility that television is capable of bypassing conscious processing and implanting images directly into the unconscious. Identifiers-*Intercultural Communication

An estimated 100,000 to 200,000 hours of television programing per year are exported by the United States and the effects of this programing on other cultures, particularly those in developing nations, have generated concern. The appeal of this programing can be explained by its intended universality: it is produced within a multiethnic culture, is escapist in nature, and is designed for the lowest common denominator.'' It is also being exported to nations for whom the cost of producing original programing is prohibitive. A frequently expressed conviction is that invasive United States programing causes Americanization'' of other cultures; however, this concept is undefined and research has not presented any conclusive evidence about it. While television is clearly active in the modernization of developing cultures, it is not clear whether the values and artistic traditions of a society will necessarily make way for Western popular culture. Interaction Analysis in Collective Bargaining: An Alternative Approach to the Prediction of Negotiated Outcomes.

Pub Date-May 79
Note-46p.; Paper presented at the Annual Meeting of the International Communication Association (Philadelphia, Pennsylvania, May 1-5, 1979)
Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Collective Bargaining, *Communication (Thought Transfer), Communication Skills, Group Behavior, Interaction, *Interaction Process Analysis, *Research Methodology, *Systems Approach
Identifiers-*Communication Research

In a study to seek an alternative methodological approach to collective bargaining research, an interaction model based upon a systems approach to small group communication was used to observe, record, and quantify the communication behavior of teacher/school board negotiators. Specifically, the study sought to determine whether the interaction among groups that reached consensus was characterized by more positive responses than was the interaction among groups that did not reach agreement, and to determine whether predictable phases of interaction emerged among groups that reached consensus but not among those groups that did not. The results indicated that interaction among bargaining groups that reached consensus was characteristically positive; interaction among groups that failed to do so was characteristically negative. No conclusions were reached about phase movements in bargaining. The findings suggest that a bargaining research model that views negotiation as a form of small group problem solving and focuses on communication interaction can provide insight into bargaining behavior. Communication with Children: Toward a Healthy Construction of Communicative Roles.

Pub Date-Apr 78

Note-18p.; Paper presented at the Annual Meeting of the Central States Speech Association (Chicago, Illinois, April 13-16, 1978)

Pub Type- Opinion Papers (120) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Androgyny, *Child Development, *Communication (Thought Transfer), *Concept Formation, Early Childhood Education, Elementary Education, *Family Influence, Family Relationship, Interaction, Language Development, Perspective Taking, *Role Perception, Self Concept, Sex Role, *Sex Stereotypes

The family system a primary locus in the formation of meaning for children should encourage the healthy construction of communicative roles. What children learn about interaction is contingent on two processes, both central to the symbolic interaction perspective: role-taking and role-making. Role-taking is the ability to transcend an egocentric perspective, while role-making involves the translation of role-taking into concrete means for realizing the behavioral choices that constitute interaction. Within the perspective of role-taking and role-making, a child learns both primary forms and primary contents of communication. Two primary forms of communication, identified by Basil Bernstein, are position-oriented, in which families are closely tied to restrictive codes, and person-oriented, in which families encourage open communication systems. The primary contents of communication relate to the genderizing of self and others. The concept of gender appropriateness, taught to children through communication with them, affects the development of children's self-concept and imposes constraints on their communicative roles. The clearest avenue open for the deemphasis of gender as a primary content of communication lies in a move toward androgyny. Families should aim at a person-orientation that gives reason to communicative behavior in terms of humanity rather than gender. (GT)

A pragmatic approach may be used in teaching undergraduate courses in political communication. The design of such a course takes account of departmental, university, and community contexts, and focuses on the following six approaches: single figure or single issue; genre; media exploitation; print media; electronic media; and candidate image. The 1980 presidential campaign can be used as a situation for studying such media as television, radio, newspapers, magazines, billboards, posters, bumper stickers, leaflets, personal appearances, speeches, rallies, and local groups. Activities for such a course might include studying network special news reports and inviting candidates to present personally their views on various issues. (DF)

Descriptors-*Persuasive Discourse, *Political Attitudes, Political Influences, Politics, *Public Opinion, *Rhetoric, Rhetorical Criticism, *Social Problems, *United States History

Identifiers-McCarthy (Joseph), Weaver (Richard M)

An analysis of political rhetoric from a perspective suggested by the theories of Richard M. Weaver indicates that during the post-World War I and post-World War II eras, the United States experienced interplays of sociohistorical variables that prevented the nation from rapidly returning to a tension-free experience of peacetime living. Unemployment, inflation, labor unrest, passions for ideological conformity, and fears of Bolshevism as an international menace served as external stimuli representing danger and preventing the nation from returning to ``normalcy.'' The rhetoric of A. Mitchell Palmer and Joseph R. McCarthy established superficial links between the external stimuli. The ``spacious'' stylistic qualities of each of these men's discourse welded these components into cohesive relationships that, in an oversimplified way, enabled blame to be laid on single causes; for Palmer, the cause was the radical alien, and for McCarthy, it was Communist activity in the Federal government. The rhetoric of both men lost effectiveness as a political tool when there ceased to be external stimuli that represented danger to the United States. (DF)

Descriptors-Bias, *Broadcast Industry, Communication (Thought Transfer), *Court Cases, Federal Legislation, *Females, Information Dissemination, Media Research, *Programing (Broadcast), *Sex Discrimination, Sex Fairness, Sex Role, Sex Stereotypes, *Television
Identifiers-*Fairness Doctrine, Federal Communications Commission, National Organization for Women

The fairness doctrine was established by the Federal Communications Commission (FCC) to promote public debate over the media and to ensure that opposing viewpoints be heard on issues of public importance. To change the image of women as portrayed in the mass media, the National Organization for Women (NOW) focused on television because of the pervasive influence and effect it was assumed to have on the public. In 1971, NOW launched a campaign to monitor both network and local television broadcasting across the country. On the basis of these data, NOW filed petitions in 1972 against the license renewals of two television stations for, among other objections, their alleged failure to comply with the requirements of the fairness doctrine. NOW argued that the role of women in society is a controversial issue of public importance, but that these stations presented only one side of the issue in their programing, which portrayed women as primarily valuable for their supportive services and physical attractiveness. The FCC rejected NOW's petitions without benefit of an evidentiary hearing. While agreeing that entertainment programing could raise controversial issues, the FCC concluded that the fairness doctrine applied only if the programing amounted to "advocating a position" on the issue. Mass Media and Acculturation: Toward Development of an Interactive Theory.

Pub Date-May 79
Note-18p.; Paper presented at the Annual Meeting of the Eastern Communication Association (Philadelphia, Pennsylvania, May 5-7, 1979)
Pub Type- Speeches/Meeting Papers (150) - Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Acculturation, *Adjustment (to Environment), *American Culture, Communication (Thought Transfer), Cultural Exchange, Cultural Pluralism, Culture Contact, *Immigrants, Information Dissemination, *Mass Media

An integrated, interactive theory of mass media communication and the acculturation process of immigrants challenges the traditional linear assumption that media communication is a stimulus to which immigrants' acculturation is a response. The acculturation process is a natural process of adaptation, occurring in and through communication; it is the process of acquiring the communication mode of the host society. The acculturation process is interactive and continuous, evolving in and through the communication of an immigrant with the new environment. The subsystems of the host society that are of direct and significant functional relevance to an immigrant's daily life are the most influential in the acculturation process. The role of mass media in this process is to provide cultural information beyond the immigrant's immediate environment. The media role is dependent on the receptivity of the immigrant, and is more limited than are the roles of personal and interpersonal communication in regulating immigrant behavior. Mass media works with interpersonal communication to reinforce acculturation and its influence is particularly strong during the initial phase of that process. (DF)

Identifiers-Open Meetings

The purpose of this booklet is to provide, in chart form, a comparative overview of state laws for public employee bargaining that affect one or more levels of public education personnel at one or more levels of education. A short introductory section explains provisions listed in the chart as well as other important provisions of bargaining laws. The chart contains information about each state law's provisions for coverage, employee groupings for bargaining purposes, provisions regarding middle-management personnel, agency charged with responsibility for the major administration of collective bargaining laws, scope of bargaining, impasse procedures, grievance procedures, procedures for dealing with unfair practices, open meeting provisions, specifications for form and deadlines of agreements, and other comments. Appendices contain examples of provisions in state public employee collective bargaining laws, and a glossary. (Author/JM)

Descriptors-Consultants, *Directories, Educational Administration, *Educational Researchers, Elementary Secondary Education, Management, Organizations (Groups), Professional Associations, *Research and Development Centers, Research Coordinating Units

As in past editions, ``educational management'' is defined to include all aspects of the leadership, administration, and structure of public and private educational organizations and the provision of facilities for their operation. This is the first edition, however, in which the directory's scope has been limited to elementary and secondary education. Also eliminated from this edition is research on administration of career education and health education. Despite a narrowing of the directory's scope, the number of organizations and researchers listed marks a slight increase over the previous edition. Organizations increased to 162, researchers to 520. The organization listing is designed to guide users to sources of information. For this reason, each organization's policy for supplying information or publications is indicated. The directory includes both organizations engaged in research and development and those providing services such as disseminating information, providing consultation, promoting exchange of ideas, and conducting workshops. The personnel section is meant to facilitate communication among researchers who can use the listing to locate others doing similar or related research. Only individuals conducting pure or applied research on topics in educational management or engaged in documentation efforts are included. (Author/IRT)

Identifiers-Ferguson Florissant Reorganized School District MO

Adequate grievance procedures for use by students are still relatively uncommon in public schools. A survey of a limited number of specialists in student grievance processes, designed to indicate the range of thinking in the field rather than to find a consensus, showed general agreement that due process and legitimate grievance channels are needed, but revealed a variety of opinions concerning grievability, outside review, student and parent participation, and implementation strategy. Robert McKay claims that adequate grievance procedures could alleviate the adversary relationship growing between students and schools. Paul Alphen discusses the concerns and roles of boards of education in grievance policies, including implementation and the effects of such policies on teacher contracts, program costs, and costs of court litigation. William Clifton argues that it is the state's duty to develop effective statewide grievance policies and oversee their application. Staff members from the Center for Community Justice analyzed six grievance processes used in junior and senior high schools and found all lacking. They recommend seven specific elements for inclusion in grievance procedures. Daniel Monti and James Laue discuss the failure of a court-approved grievance process in a Missouri district undergoing desegregation. Donald Murphy enumerates implementation strategies and tactics. Descriptors-Attitudes, *Collective Bargaining, *Government Employees, Motivation, Negotiation Agreements, Negotiation Impasses

Identifiers-McKersie (R B), Trust, Walton (R F)

Recent research and theory on collective bargaining focuses on bargaining attitudes and behaviors. Walton and McKersie divided all bargaining into distributive and integrative. Distributive bargaining is competitive and based on an assumption of conflict of interest. Integrative bargaining is cooperative and based on the theory that power can be created rather than merely divided. They also defined intraorganizational bargaining as bargaining done within one bargaining group rather than across the table. This intergroup bargaining is usually done before actual collective negotiations begin. Walton and McKersie in their attitudinal structuring model identified four attitudinal dimensions to bargaining: motivational tendencies, beliefs about legitimacy of the other party, level of trust, and degree of friendliness. Herring found that those bargaining teams who come to closure most rapidly and with the least amount of negative feelings were those that consciously kept themselves on the task. Later researchers concentrated on the relationship between attitudes of the bargaining parties and bargaining impasse and agreement. From this research, it appears that there is a positive relationship between attitudinal structuring and the evolving behavior patterns in negotiations. The more positive the attitude, the greater the chance that the negotiations will evolve in an integrative fashion, even on those items that are by definition distributive. (Author/JM)

Identifiers-Mount Healthy Community School District v Doyle

While the nature of disputes between school employees and employers remained constant in 1977, the number of cases increased to 300. This chapter discusses some of those cases including Mt. Healthy Community School District v. Doyle, a key decision on employee substantive constitutional rights. General topics covered include discrimination in employment, dismissal and discipline of employees, tenure and seniority, substantive and procedural due process, academic freedom, deprivation of rights, remedies for improper board action, salary disputes, leaves of absence, and retirement. This chapter deals with the legal process by which employers and employee organizations discuss matters related to employment. The chapter is organized to reflect the initial sequence of events in the collective bargaining process. Cases are reported and analyzed in 10 sections: constitutional issues, authority to bargain in the absence of statute, recognition of unions and representation problems, rights and obligations of exclusive bargaining representatives, the scope of bargaining, grievances, the effect of the legislative process, impasse and dispute resolution, picketing and strikes, and practices of public employment relations boards. Identifiers-Ingraham v Wright

Although few cases involving pupils were decided by the U.S. Supreme Court in 1977, the justices did wrestle with the question of public aid to private and parochial schools, resulting in split decisions and one plurality upholding the rights of students to receive public financial and material assistance. The Court also handed down its long-awaited decision in Ingraham v. Wright, sanctioning the decisions of schools to administer corporal punishment as a valid disciplinary measure. Litigation involving the rights of handicapped and exceptional children decreased from 1976, and the Court's responses to First Amendment claims by pupils showed mixed results. Other cases discussed in this chapter come under the headings of state athletic and activity associations, school assignment and tuition, search and seizure, suspensions and expulsions, discrimination, and conscientious beliefs of parents. A tort is defined as a civil wrong, independent of breach of contract, that results in injury to another person who is entitled to collect damages. The array of cases handed down in 1977 indicates that the tort domain of education law remains heavily litigated. This chapter shows that student injury cases continue to dominate, although constitutional tort cases are rapidly increasing in number. The discussion of negligence in this chapter is organized by the location of incident gym, shop, art, and science classes; school cafeterias, grounds, buildings, and buses; and while a student is enroute to and from school. Also discussed in this chapter are nonstudent injuries, educational malpractice, negligence, defenses, liability insurance, nuisance, defamation, assault and battery, and constitutional torts. Two constitutional issues continued to dominate litigation related to school finance during 1977. Questions concerning the spending of public funds for the benefit of students attending private schools (for example, Wolman v. Walter) continued to arise in both state and federal courts. Also, cases involving the constitutionality of state school finance programs were decided in the state courts. For example, Connecticut joined the growing list of states in which an existing state support program was found unconstitutional. Other cases covered in this chapter include issues involving school taxation and spending. (Author/LD)

Numerous cases in this year's chapter dealt with the same topics of previous years contracts and bids for building construction, and detachment and annexation of a portion of a school district. The courts continued to attribute board discretionary authority to school boards in school property matters. Intergovernmental disputes over ownership or control of certain property showed a rise. A number of cases this year involved taxpayer challenges to the outcome of school bond referenda. For the first time this year, two cases involving local zoning were reported. Also appearing for the first time were cases dealing with the legality of board affirmative action policies involving contractors or subcontractors bidding on school construction. Two other issues covered in this chapter include school closures and disposition. (Author/LD)

This study, undertaken at the request of the Joint International Labour Office/UNESCO Committee of Experts on the Application of the Recommendation concerning the Status of Teachers, examines the earnings of teachers in a worldwide context. Drawing on material relating to the public sector of education in over 70 countries, it considers successively the methods used and the procedures followed to determine teachers' pay; the criteria that affect levels of pay between different categories of teachers and the general level of teachers' pay in relation to that of other occupational groups; the different elements that make up teachers' pay (the basic salary scale and the adjustments made in recognition of special responsibility, overtime, teaching in special types of schools, extracurricular work, teaching in isolated areas, and so forth); and the methods by which teachers' pay is adjusted to changes in the cost of living. Finally, the study attempts to make an international comparison of the relative levels of teachers' earnings in a number of countries in different parts of the world and to examine changes over the past few years in those relative levels and in the purchasing power of teachers' earnings. Identifiers-New York

The first in a series of reports consolidates data about energy sources and extrapolates that information to the problems and expenses that New York has and will experience in heating public schools. A presentation of national energy consumption is followed by an examination of the availability of potential alternatives to petroleum and natural gas. An examination of regional energy resources and usage shows that the state of New York is well above the national average in its dependence on oil and, because of the extreme temperature ranges, the nation's pessimistic outlook on energy availability and cost is even more severe for the state. An analysis of forces and factors leading to the current situation follows. The effect of cost on energy sources is discussed and times required to complete facilities for standard sources of energy and alternative energy sources are projected. The last section of the report presents data concerning energy consumption in the school building and the effect of calendar options on total energy consumption. An extensive bibliography concludes the report. (Author/MLF)

Identifiers-New York

This study, the third in a series of reports, is limited to an analysis of the energy use and cost implications of nine school calendars proposed by the New York State Department of Education. These calendars are characterized as (1) traditional; (2) ten-month school year; (3) mid-August start, two semesters; (4) four-day week; (5) four-day, 7.5 hours; (6) four- and five-day weeks; (7) twelve-month, multiple variations; (8) five eight-week learning periods; and (9) 45-15 rotation. The factors of daily weather, schedule of operation, and building characteristics were combined to simulate the actual operation of the typical school in each climate for each calendar. The magnitude of the variations was small with only the four-day, 7.5 hour calendar producing more than a 10 percent change in all four climates. Given the slight differences between the various calendars observed, the study concludes that it would be difficult to make a strong case for one calendar over the others on the basis of its energy saving potential. The fourth in a series of reports in a review of materials pertaining to what schools within and outside New York state are doing to save energy. In addition to inhouse memoranda, resource material included letters, studies, and publications received from other local, state, and federal agencies; from private firms and associations; and from the educational news media. As a result of this review, a compilation was made of the types of assistance that are provided in the schools from outside organizations. The first section of this report highlights some of the types of assistance along with selected cross-references to persons who have provided such assistance to local schools. The second section summarizes conservation methods that are in actual use in schools throughout the nation. (Author/MLF)

Identifiers-New York

This fifth in a series of reports concerning school calendars examines the literature about learning, retention, and forgetting. The emphasis is necessarily on "time," as that is the major variable among calendars. Theories of memory are described: (1) storage and retrieval, and (2) imprint and trace decay. Relative to forgetting, a secondary concomitant is interference. The functioning of interference with retention and forgetting is explained. The report points up differences in the learning rates of advantaged and disadvantaged children. It also shows the summer losses that disadvantaged children have when the schools are closed for the summer. The appendix summarizes representative forgetting and retention studies. (Author/MLF)

Teacher Attendance Patterns. Technical Report No. 7 of a Study of School Calendars.

New York State Education Dept., Albany. Div. of Research.
Pub Date-Nov 78
Note-11p.; For related documents, see EA 011 645-651
Pub Type- Reports - Research (143) - Collected Works - Serials (022)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Elementary Secondary Education, *School Calendars, *School Schedules, *Teacher Attendance
Identifiers-New York

This report, the seventh in a series concerning school calendars, examines teacher attendance patterns. Pupil attendance falls off from the September high point to reach a low point in February, whereupon the trend is reversed through June. Outside temperature and student patterns are similar. A sample of New York State public school districts was chosen to represent the four major heating degree zones, and rural, suburban, and city community types. From an original sample of 38 districts, 14 supplied the necessary data. About 7,000 teachers are included in the survey. Generally speaking, the teacher attendance pattern does not resemble that of the students. Though both show a decrease for the first three months, the similarity is lost from then to year-end. Too, there is little similarity among the patterns of the degree zone and community type groups. Since teacher attendance seems to be so little related to time of year and to yearly temperature patterns, it would appear that school calendar changes would have little effect on teacher attendance. Descriptors-Educational Finance, Elementary Secondary Education, *Finance Reform, Language Usage, *Political Attitudes, Political Influences, Politics, State Legislation, *Symbolic Language

Identifiers-*Illinois, Politics of Education

This study focuses on the political processes involved in the preparation and passage in 1973 of a school finance reform package in Illinois. The author places particular emphasis on how language was used to promote support for the legislation, how partisan politics affected voting patterns in the legislature on this issue, and how legislators depended on the advice of experts among their colleagues in making their decisions. The study reviews the literature relevant to the use of language in policy-setting and to the nature of political structures and processes in Illinois. A historical account of the development of the legislation is presented and the types of pressures placed on the legislators are discussed. The results of the study imply that educational finance reform is a political issue and can be treated pragmatically as such, and that different types of language (including hortatory, legal, administrative, and bargaining, each with different degrees of specificity) are appropriate at different points in the political process. Principals still are not differentiated from teachers under the law of many states, even though their duties and responsibilities differ. This situation has begun to change as a result of court action by principals at the state level, which is discussed in this paper. Although administrative tenure is rare, it presents special problems when reassignment of an administrator or morality standards violations are at issue. Discussed in detail is job protection afforded principals through their individual contracts and constitutional right to due process. Also discussed are tenure rights in the face of elimination of principalships. Employee status has been a major benefit to principals, the paper concludes, but it can also work to their disadvantage. The authority of a school principal over teachers, student teachers, teacher aides, and other employees is the subject of this chapter. In order to discharge duties properly, a principal must have the power to enforce prompt obedience to commands. He or she has the inherent authority to curtail any disruptions in the functioning of the school, the paper states. It discusses specific court cases dealing with this inherent authority, especially as regards teachers. Detailed discussion is offered of the assignment of extracurricular activities to teachers and a principal's managerial prerogative to assign them. A short discussion is offered of the hiring and use of student teachers and teacher aides. The paper concludes that as more and varied categories of personnel are assigned to principals, an increasing amount of a principal's time will be spent on personnel matters. (Author/LD)

Because teacher evaluation is an ongoing process, school principals must have knowledge of the employment contract, the legal implications regarding tenure, and the applicability of due process. This chapter discusses each of these topics in detail. Since the contract is one of the most important documents acted on by the school board each year, the principal should examine it carefully as it relates to his or her school district and state. An evaluation program is a necessity in order to substantiate a teacher termination effectively, and this paper discusses it in detail. Important court cases related to teacher dismissal in individual states are also discussed, including due process requirements in the case of tenured teachers. The paper concludes that a principal's responsibility for personnel management includes balancing the right of students to competent instructors with the right of public employees to fair treatment. Descriptors-*Administrator Role, Board Administrator Relationship, *Collective Bargaining, *Court Litigation, Elementary Secondary Education, *Principals, State Legislation, Teacher Administrator Relationship, Teachers

The principal's right to independent bargaining may become increasingly important as more teachers' groups negotiate school district policy directly with boards of education. This chapter discusses the principal's role in collective negotiations and attempts to answer the question of whether a principal is part of management or of the labor-teacher faction. Following a brief discussion of the development of collective negotiations and the variety of items negotiable, the paper considers arguments against the participation of principals in teacher negotiating units. A review of the various state statutes that define the status of a school principal completes the chapter. Suggestions at the end are for an administrative team approach to solving problems and for the use of comprehensive agreements to bring principals into the management process. (Author/LD)

Descriptors-*Administrator Role, Elementary Secondary Education, Planning, *Principals, Teacher Administrator Relationship, Teachers, *Teacher Strikes

The purpose of this chapter is to encourage principals to develop a plan of action in anticipation of a teacher strike at their school. The paper briefly details case histories of strikes between 1962-73. Then it defines the critical role of the principal during and especially after a strike. Finally, specific suggestions for principals are offered such as exerting strong yet benignant leadership, developing a communications network, and protecting the students. The paper concludes that the most challenging period in a principal's professional career could be the aftermath of a strike. Thus a plan of action should be developed so that the students again become the prime consideration in the educational program. (Author/LD)

Identifiers-First Amendment, *Tinker v Des Moines Independent School District

Court cases involving student discipline, especially in regard to student publications and dress and appearance, is the subject of this chapter. The introduction discusses the doctrine of in locus parentis, the celebrated Supreme Court case of Tinker, and the minimum essentials for enforcing rules of student conduct. The first half of the chapter on publications considers the procession of student discipline cases that have arisen since 1968. It surveys the restraints put on the content of publications, especially publications containing criticism of school authorities, controversial issues, and obscenity and vulgarity. An array of cases is also discussed concerning the prior restraint school authorities can exercise on the content of publications. The second half of the chapter issues of dress and appearance discusses the question of whether a student can be punished for refusing to conform to a dress code. The mixed opinions evolving from both federal and state courts, primarily concerning male hairstyles and beards, are the basis for discussion. (Author/LD)

Identifiers-Baker v Owen, *Goss v Lopez, Ingraham v Wright

This chapter's discussion of student discipline stresses a student's right to due process when he or she is faced with suspension or expulsion from school. To determine procedural requirements, the paper states, a school must examine both the statutes of the state and the requirements imposed by state and federal constitutions. The major topic of this chapter involves expulsions and long-term suspensions, including notice, hearing, counsel, evidence, witnesses, appeal, and the like. Also discussed are short-term suspensions, including student property and liberty interests that evolved out of Goss v. Lopez. Two other court cases surveyed Baker v. Owen and Ingraham v. Wright deal with the issue of corporal punishment. The chapter concludes that, in the requirements of procedural due process, schools are only being asked to act fairly. Such requirements are not meant to deny them full authority to regulate student conduct. (Author/LD)

Descriptors-*Administrator Role, *Court Litigation, Crime, Elementary Secondary Education, Emergency Programs, *Legal Responsibility, Police School Relationship, *Principals, *School Safety, Search and Seizure, Student Behavior, *Student Rights, Students

This chapter discusses legal ramifications of administrative decisions in schools involving bombs and bomb threats, false fire alarms, searches and seizure, and police investigations in the schools. In the case of bomb threats, the principal and not the police must take the legal responsibility for making the decision of whether or not to evacuate a building and for how long. In the case of false fire alarms, the paper suggests some steps a principal can take to minimize the problem and discourage the abuse. Recent court decisions involving searches of a student's person and locker are also reviewed in depth. Finally, a discussion of the principal's role when police are involved in investigating a student crime points up the importance of protecting students' rights. The paper concludes that a principal should anticipate any legal, physical, and social problems in advance of an emergency by preparing school policy procedures. Thus the principal and his or her staff will be protected against charges of negligence and the rights of each student will be safeguarded. (Author/LDT)

Identifiers-*Family Educational Rights and Privacy Act 1974

This chapter provides a synopsis of the regulations of the Family Educational Rights and Privacy Act of 1974 and its effect on school recordkeeping policies and procedures. Two basic principles underlie the federal law regarding access to and control over the release of education records, the paper states. They are people's right to know and their right to privacy. Thus, the chapter is divided into two main sections. The first half deals with federal rules of access, including access by parents and students, access limited to education records only, procedures for access, and challenges to the access rules. The second half of the chapter discusses federal rules governing the release of records, including exceptions to the consent requirement and parental consent for third-party use. Notifying parents and students of their rights and enforcing procedures of the law are topics that complete the paper. It concludes that the application of the law relies on school officials' ability to demonstrate good faith and the rule of reason. (Author/LD)

Descriptors-*Court Litigation, Elementary Secondary Education, Injuries, *Legal Responsibility, *Principals, Student Rights, Students, *Torts

The emphasis of this chapter is on the tort liability of principals, especially their commission of unintentional torts or torts resulting from negligent conduct. A tort is defined as a wrongful act, not including a breach of contract or trust, which results in injury to another's person, property, or reputation and for which the injured party is entitled to compensation. The paper states that recent trends are redefining and often abolishing the historical concept of a school district's sovereign immunity. Several court cases are reviewed, which raise the question of whether a principal acted in negligence or in good faith in performance of duties. Brief discussions follow concerning the liability connected with school safety patrols and liability involving defamation of character, whether in the form of libel or slander. Completing the chapter is a discussion of liability for deprivation of a student's constitutional rights. The paper concludes that the Anglo-American legal system functions fairly, and the principal who does his or her job conscientiously usually fares very well. (Author/LD)

Descriptors-Court Litigation, Elementary Secondary Education, Income, *Legal Responsibility, *Money Management, *Principals, State Legislation

This chapter surveys a principal's risks and responsibilities in relation to managing school income from the following: co-curricular activities, expenditures for various equipment needs, property inventories, contracts issued for commemorative school items, custodianship of school textbooks, proceeds from merchandising certain items in school buildings, safeguarding office and audiovisual equipment, funds generated by sale of workbooks and other school supplies, and proceeds from admissions to various athletic and social activities. Each of the foregoing, involving the legal responsibility of the principal, are examined in light of the statutory and case law guidelines that are necessary to good building and program management. The paper concludes that many principals report that a majority of their time is spent managing school operations. How efficiently they handle operational problems will be reported on their annual evaluation. (Author/LD)

Identifiers-*Title IX Education Amendments 1972

This chapter discusses the issue of discrimination as a principal may be charged with it in the performance of his or her day-to-day duties. A principal's recommendations for teacher employment, dismissal, or disciplinary action are fraught with possible claims of discrimination, the paper notes. In dealing with students, too, a principal's decisions with respect to discipline and students' participation in regular or extracurricular activities are potential sources of claims based on discrimination. This chapter surveys court cases that have challenged school districts' employment practices and reviews pupil discrimination cases concerned with issues other than race. A discussion of enforcement procedures for Title IX completes the chapter. (Author/LD)

Descriptors-Court Litigation, *Educational Finance, Educational History, Finance Reform, *School Districts, State Aid, State Federal Aid, Tax Support

Identifiers-New York

This paper is an indepth survey of American educational finance from its origins to the present and with projections for the future. It discusses the influence of and impact on school finance of some of the following: demographic patterns, changes in the American economy, Sputnik and civil rights events, federal intervention, the courts, local government, and local taxpayers. The paper delves into different approaches to reform, both conservative and revolutionary, and then discusses the status of educational finance in the state of New York. It concludes that the productive capacity of education, like that of the rest of the economy, may be suffering. No amount of funding, the paper says, can compensate for deficiencies in human productivity. An extensive bibliography follows. (Author/LD)

Descriptors-Elementary Secondary Education, *Equalization Aid, Expenditure Per Student, *Finance Reform, Multiple Regression Analysis, Program Evaluation, State Aid, State Legislation
Identifiers-*Gini Index, Illinois, Wealth Neutrality

This paper uses the year 1972-73 as a base line in evaluating the progress of Illinois toward certain "equity goals." In determining the equity goals, two dimensions are studied disparity and wealth neutrality. One measure of disparity is the permissible variance in school district expenditures expressed in the coefficient of variation, another is the McLoone index. Two different calculations were also made using the concept of fiscal neutrality or wealth neutrality. One calculation uses the Gini index, the other the simple regression of expenditures on a specification of wealth. The results of the calculations are presented in charts and in appendices. Subject to the limitations identified, the general finding seems clear. For four years the basic legislation passed in 1973 and the substantial increase in state aid necessary to fund that reform were successful in moving Illinois toward less expenditure disparity between school districts and greater wealth neutrality. However, in the last two years a reversal has taken place. The reversal has caused all the gains to be lost with regard to expenditure disparity in unit districts and elementary districts, and some of the gains to be lost with regard to wealth neutrality. Grant-NIE-G-78-0210
Note-51p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors-Crime, *Critical Path Method, High Schools, Research Methodology, Secondary Education

Recent research in the human ecological tradition has made increasing use of causal modeling in the search for understanding of aggregate-level social processes. This approach has great appeal because it helps make hypotheses explicit, provides a convenient way to structure the application of statistical controls, allows the representation of complexity in the relations among variables, and if some strong assumptions are plausible, it makes possible weak probes of causal hypotheses using only correlational evidence. The present report critically examines the utility of the path analytic approach in human ecology by using the rate of high school crimes reported to the police as an example and providing some tests of the plausibility of the underlying assumptions of this research strategy. It is concluded that in studies like the one exemplified here it is difficult to have confidence in the interpretation of results, and that alternative approaches may be more fruitful. These alternative approaches should be given attention by research policy-makers. (Author)

Note-69p.

Pub Type- Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors-*Buildings, *Handicapped, *Housing, Information Sources, *Older Adults, *Physically Handicapped, Reference Materials, Retirement, *Senior Citizens

This completely revised and updated edition of the bibliography of the same title, published by the Department of Housing and Urban Development (HUD) Library in 1971, is a selective, partially annotated list of publications and periodical articles issued since 1970. In cooperation with HUD's Office of Policy Development and Research, the most useful and readily available studies and articles on the elderly and the handicapped have been chosen. Supplementing these entries, bibliographies grouped at the end of each section supply additional references. Addenda include those items received by the HUD Library too late to be included in the main body. Of particular importance is the series of hearings published in late 1978 by the House of Representatives' Select Committee on Aging. Taken together, they compose an up-to-date overview of the current situation of the elderly. (Author/MLF)

Descriptors-*Declining Enrollment, Demography, Elementary Secondary Education, Enrollment Projections, Foreign Countries, *Reduction in Force, Retrenchment, School Buildings, School Closing, *Space Utilization, Staff Improvement

Identifiers-*Canada

This annotated bibliography reflects an attempt to indicate the range and quality of published responses to the complex phenomenon of declining enrollments in elementary and secondary schools. It is intended to suggest sources of practical information and advice and to provide a larger context for administrators coping with the effects of decline in their own school systems. Works that confront the issues and problems comprehensively are cited in the first two parts of the bibliography. The subsequent seven parts contain works that stress a single facet of the problem, such as enrollment forecasting, school closing criteria, site redevelopment, or financial reform. Most of these will not be rigidly confined to the topic under which they are listed, but their placement reflects their principal strength or emphasis. Probably the strongest and most sophisticated segment of this literature is in the field of demographic analysis. Not far behind in quantity and quality is the literature on school closure and reduction in force, and on the positive alternatives to these measures, such as innovative uses for surplus space, program expansion and diversification, and employment benefits for teachers that maximize the number of available teaching positions. Descriptors-Career Development, *Educational Administration, *Equal Opportunities (Jobs), Federal Legislation, Federal Programs, *Females, *Sex Discrimination

Identifiers-*Womens Educational Equity Act

This paper assesses the positive and negative impacts of the Women's Educational Equity Act of 1974 and discusses the potential of the act for promoting access and entry for prospective women administrators. It briefly reviews the purpose and intent of the women's equity legislation and offers a summary of projects funded to promote the advancement of women into educational leadership. Also discussed are some of the constraints that continue to confront prospective women administrators including sexism, the lack of turnover in administrative positions, and inherent deficiencies in the women's equity approach. The paper concludes that the federal government can take steps to remedy decreased opportunities for women if it so desires and directs. Also, commitment and action to resolve the constraints must be the shared responsibility of a variety of groups, individuals, and governmental agencies. (Author/LD)

Descriptors-Change Strategies, Decision Making Skills, *Educational Change, Elementary Secondary Education, *Futures (of Society), Prediction, Problem Solving

This guide is intended to introduce educators to the kinds of instructional changes necessary to provide students with adequate preparation for the changing world of the future. The guide is made up of three units divided into eight independent modules that can be used in individual study, workshops, university courses, and so on. These modules treat such themes as futures concepts, forecasting techniques, alternatives for future-oriented education, problem-solving skills for the future, and introduction of futures study into the educational program. These themes are related to the available literature, to which the user is directed. The guide concludes with a bibliography of futures-oriented materials, the most important of which are annotated. Descriptors-Case Studies (Education), Consultants, *Curriculum, Educational Objectives, Elementary Secondary Education, *Evaluation Methods, Planning, *Program Evaluation

This guidebook is designed to help school districts plan evaluations of their curriculum program. It is divided into four major sections. The first section presents a case study based on the experiences of a school district that used this handbook in planning an evaluation. The second section reproduces the set of forms that the school district planning group completed. The third section gives brief instructions for completing the seven forms. The last section offers advice on how to select a technical consultant who can assist in conducting the planned evaluation. Finally, Appendix A contains master copies of the forms to be completed in planning the evaluation; Appendix B offers a set of checklists to be used in completing certain forms. (Author/LD)

Identifiers-Comprehensive Adaptive and Responsive Educ System, Design Implementation Monitoring Evalu System

In a three-year study, Research for Better Schools (RBS) was asked by the National Institute of Education to identify, analyze, and verify definitive social changes forecast for the decades ahead, and to project their implications for schools of the future. RBS reviewed the literature to extract future planning needs relevant to educational practitioners. These needs were assessed in a survey of 162 innovative educators and served as the basis for four independently created educational designs for the future. The only constraints on these designs were a requirement for implementation by 1985 and a consideration of cost effectiveness. This document discusses the planning needs found in the study and presents the four designs based on them: John A. Connolly's plan focusing on mastery of basic cognitive, life, and career skills; Glen Heathers's design for training students to be adaptable to change in schools redefined as centers for guiding and coordinating instruction; Patricia Henning's design for a comprehensive integration of school and community; and David Helms's Comprehensive, Adaptive, and Responsive Educational System, an instructional management system with an inschool research and development component. Schools or districts that have articulated their educational goals but whose students are not satisfactorily achieving those goals may need assistance in improving their curriculum or their instructional techniques. This document consists of three units designed to help a group of educators develop plans for such improvements. The first unit covers the identification of performance goals, measurement techniques and criteria, and student populations. The purpose of making these identifications is to permit comparisons of ideal and current performances. Unit two builds on the first unit's definition of needs to compare the required elements of curriculum and instruction with those currently in use. These elements include curriculum content, content sequencing, instructional strategies, and support systems. The third unit provides information on planning for a search for means of improvement, and presents guidelines for conducting the search. A planning coordinator's manual is also included in the document to assist the leader of the planning group. The document provides numerous forms and charts to be used in the planning process. Descriptors-Elementary Secondary Education, Expenditure Per Student, *Finance Reform, Mathematical Models, *State Aid, *Student Transportation
Identifiers-Illinois

The average cost pupil transportation reimbursement formula developed on the basis of 1976-1977 Illinois pupil transportation data and presented in this paper has several advantages over the current law. This formula would consider the factors that cause variations in the cost of providing the services to Illinois school districts: number and special services required for pupils transported, density of transported pupils, ownership of equipment, and type of school district. The method would be responsive to changes in the economy. It would not be susceptible to district manipulation except in the number of pupils served, since the district's variables would be related to those of other similar districts. The approach accepts current patterns of operation as reasonably efficient, on the average. Finally, the formula encourages efficiency. The only criterion that this type of formula does not meet is that of simplicity. The development of the statistical procedure is initially very complex. However, once the formula is developed, the computer program should not require replication, and state administration would be simple. (Author)

Identifiers-Florida

This chapter evaluates Florida legislation establishing school advisory committees and is intended to improve understanding of both the potential and the problems of school advisory committees. It begins by examining advisory committees across the nation. It then turns to an analysis of school advisory committees in Florida. The report on local-level implementation of legislation for school advisory committees and annual reports of school progress draws on several different data sources: (1) a brief survey of each of the 67 districts; (2) an indepth survey of 287 local committee chairpersons and principals; (3) field interviews with 88 local participants; (4) content analyses of annual reports of school progress and policy statements and guidelines for school advisory committees from 36 districts. Field data are organized according to types and composition of school advisory committees, their functions, and annual reports of school progress and public communication. Findings and recommendations are summarized at the conclusion of the report. (Author/MLF)

Descriptors-Administrator Role, Community Control, Community Involvement, *Decentralization, *Decision Making, Elementary Secondary Education, Evaluation, Foreign Countries, Parent Role, *School Community Relationship, Student Role, Teacher Role

Identifiers-Australia (New South Wales)

If schools are to be professionally responsive to and accountable to their clients, each school must have some control over decisions affecting its particular student body. These include decisions in the areas of policy, curriculum, staffing, facilities, resources (and related finances), evaluation processes, and participation in system-level planning. Involvement of students, parents, teachers, and the school administrative staff in these decisions can have several advantages, including broader-based and better informed decisions, a reduction in alienation of the local school community, improved communications and relations between school and community, the development of better methods for conflict resolution, and the creation of a school program more reflective of the sociocultural makeup of the community. This document presents the concept of decision sharing as handled in New South Wales as a topic for further discussion, concentrating specifically on the roles of parents, teachers, students, and administrative personnel in the process. Descriptors-Educational Planning, Leadership, Leadership Styles, *Management Systems, Organization, Organizational Climate, *Organizational Theories, Research Needs, *School Administration
Identifiers-Contingency Models of Leadership Effectiveness, *Contingency Theories

An understanding of the ``situational'' characteristics of the organizational forces that influence the relationships between environmental, management, and performance variables is now coming to be seen as a key to understanding the management process itself. This paper is a synthesis of the contingency theory literature drawn from the public, business, and educational sectors. Focus is given to an identification and analysis of the basic assumptions underpinning contingency theory; the contingent nature of organizational design, leadership, and planning variables; and the implications for practicing administrators. The objective is to shape the conclusions of the synthesis into a useful conceptual tool, providing greater facility for description, analysis, and prediction. (Author/JM)

Identifiers-Australia

Open area designs for school buildings were adopted frequently in Australia in the 1970s, often without adequate preparation of the educators who would be using them. A study of the effects of open area designs led to the recognition that school building design warrants more serious attention as a variable in formal education than it has yet received. The study involved testing 18 students at the fifth year level in each of 120 different schools. These schools were of four types: one conventionally designed and three of the open plan type (mixed, double-space, and multispace designs). The study results indicated that conventional schools promoted better cognitive outcomes, while open plan schools supported better affective outcomes (at least in schools of high and middle social status). These results are not conclusive, however, in that the open plan schools may not have been operating under ideal circumstances (including optimum [illegible]ancy and full use of their flexibility and resultant instru[illegible] options) for an adequate test of their potential. The document conc[illegible]s with the author's comments on some conceptual problems associated with research into educational environments, such as the meaning of the terms ``environment'' and ``openness'' themselves. Descriptors-Administrator Characteristics, Administrator Role, Comparative Analysis, Curriculum, Decision Making, Grading, Principals, *Private Schools, Public Schools, School Organization, *Senior High Schools
Identifiers-School Rules

Characteristics of private and public schools were compared in this study utilizing data collected in surveys by the National Institute of Education, the Council for American Private Education, and the National Association of Secondary School Principals. The aims of the study were to provide a national picture of secondary education and increase understanding of private secondary education in particular. For the private school study, 600 private schools were randomly selected from four regions of the country and three metropolitan areas. These schools were surveyed concerning curriculum, schedules, facilities, school structure, coordination mechanisms, and principals' goals, satisfactions, experience, and problems. The data from private and public schools were then utilized to compare the two on the above characteristics as well as on grading systems, student goals and activities, and sex of principal. The study concluded that public and private schools differ in mission. Public schools provide a wide range of courses to a wide range of students, have more management problems, and are not dependent on maintaining a constituency. Private schools, on the other hand, have a narrower curriculum focused on academic subjects, have fewer management problems, and are more responsive to their clientele and staff. (Author/JM)

Identifiers-System Linkage

Several aspects of unplanned system change in schools are investigated in this paper. Researchers relied heavily on current theoretical perspectives on the nature of educational systems, particularly those that emphasize the "loosely coupled" nature of educational organizations. Two hypotheses were tested. The first is that natural system change over a short period of time will exhibit characteristics of loose linkage and that change in one system characteristic will not be significantly associated with changes in other system characteristics. The second was that there will be negative relationships between the level of system change and the level of implementation of planned program change. The research was based on a secondary analysis of data previously collected to examine a planned change program. Teachers in 45 schools located in 10 rural school districts completed questionnaires, and onsite ethnographers collected structured data about program implementation. Analysis revealed no evidence to suggest that changes in one part of the system reverberate throughout the system, but patterns of association among some parts were apparent. The data also indicated that it is reasonable to expect either changes in the characteristics of the organization or in the technology of the organization but to attempt both types simultaneously is unrealistic. Practical ways principals can modify and monitor their school's reading programs are suggested in this report that also presents reading theory and research results. The bulk of the report focuses on the elementary school and is divided into a short section on theory and a longer section on practice. Suggestions are given about establishing reading as a priority, selecting and managing a program, placement and grouping, selecting a management system, and supervision and support of teachers. The portion of the report that focuses on middle, junior high, and secondary schools emphasizes remedial techniques for older students with reading problems. (Author/JM)

Descriptors-Administrator Education, Administrator Responsibility, Elementary Secondary Education, *Principals, *Skills

A survey of 54 administrators attempted to determine their attitudes about a number of administrator competencies. Subjects were superintendents and principals in southeastern Pennsylvania and southern New Jersey. They were asked to rate the importance of each competency, state whether it is acquired primarily before entry or on the job, and report the degree of assistance his or her own academic program had been in acquiring the competency. The principals rated all competencies listed as either important or very important. All but five (in the area of curriculum and instruction) were acquired primarily on the job. Principals reported that their academic program had been of some assistance in acquiring 91 percent of the competencies. Superintendents rated all competencies except one as either important or very important. Of the 62 superintendent competencies, 24 percent were acquired primarily before entry into the job. Superintendents reported that their academic programs had been of some assistance in acquiring most competencies. The academic program was reported to have been of no assistance for 20 percent of the competencies, most of which were in the area of political and intergovernmental relationshi[illegible]uthor/JM)

Descriptors-*Board Candidates, *Boards of Education, Elections, Elementary Secondary Education, Group Norms, Individual Characteristics
Identifiers-*School Board Members

The period just before and just after a school board member is chosen is the basis for this report. Data were collected by polling 1,000 board members and conducting indepth interviews at the 1978 National School Boards Association Convention. The year preceding and the year following a board member's selection can be divided into the eligibility stage (when candidates decide to run), the campaign stage, and the socialization stage. Results of the poll indicated that previous experiences did not prepare board members for serving on boards. Respondents indicated that campaign issues in school board elections are often financial in nature with other issues like basic skills or superintendent performance also prevalent. The report is apparently the first study to use a national sample to explore specific campaign strategies used by school board candidates. The technique most often mentioned was that of talking to influential people. The survey also reveals that compaigners who are young, female, and from large districts in the South and East tend to be more active campaigners. The survey also revealed that for training and orientation, school board members rely most on individuals within their own districts. Other findings revealed common school board norms. (Author/JM)

Descriptors-Administrative Personnel, Administrator Role, Boards of Education, *Collective Bargaining, Elementary Secondary Education, *Professional Associations, Teacher Associations, Teachers

The exploration and writing in collective bargaining in education are sufficient to provide ample material for identification of issues and alternative strategies for resolving problems. Through a comprehensive examination of the literature the authors focus on the goals of organization and negotiations and the several functions served by collective bargaining. The research and literature are divided into several sections: (1) major studies; (2) historical development; (3) professional organizations at the state and national levels; (4) management: school boards and administrators; (5) labor: teachers; (6) public interest; and (7) educational implications. Included is a comprehensive bibliography. (Author)

Descriptors-*Community Attitudes, Community Support, Educational Quality, *Financial Support, *School Budget Elections, *School Community Relationship, School Taxes, Tables (Data)

Identifiers-*Fiscal Management, *New York

This research addressed the contemporary problem of declining support for school funding requests. The study examined current factors and factors over time (1969-77) that underlie school tax balloting. Data were collected from four previously studied districts and statistically analyzed. Voters' attitudes toward school community relations, educational program means, and fiscal credibility along with individuals' parental status, age, income, and education were shown to relate to school tax voting over time. Fiscal credibility was the salient predictor. The paper concludes that school officials who identify and selectively recruit supportive voters, who manage community confidence, and who reflect fiscal credibility will optimize referendum success. Future longitudinal research is relevant and feasible. (Author)

Identifiers-*Beginning Teacher Evaluation Study, Information Analysis Products

Research into teacher evaluation techniques has not provided conclusive answers due to a number of research problems, including the subjectivity of traditional teacher observation techniques and the lack of sensitivity of newer, more objective techniques. A five-year research project in California, the Beginning Teacher Evaluation Study (BTES), tried to avoid these problems through the use of nonstandardized testing, teacher questionnaires and interviews, and multiple objective behavioral observations of interaction between students and teachers. A wide range of classrooms and schools were sampled to allow for socioeconomic differences. The researchers found that students learned best when spending sufficient time deeply engaged in a task with a high success rate. Teachers were most effective at creating such learning situations when they did a good job of diagnosing student needs, prescribing appropriate tasks, structuring presentation of the tasks, monitoring student progress, and providing adequate feedback. While BTES, despite its name, never directly addresses itself to teacher evaluation, its findings imply answers to the questions of what to measure when evaluating teachers and how to measure it. The study also points the way to future definitive research of a more immediately practical nature. (Author/PGD)

Some Needed Developments in Research for Building a Theory of Administrative Practice.''

Pub Date-Apr 79

Note-13p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)

Pub Type- Speeches/Meeting Papers (150) - Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Academic Achievement, Administrative Problems, Administrator Role, *Educational Administration, *Educational Research, Effective Teaching, *Research Needs

This paper describes and explains three needed developments for building a foundation from which knowledge unique to a profession of educational administration can emerge and thus improve school effectiveness. Each needed development is associated with a general need for a shift in the focus of scholarly attention. Researchers need to focus first on practical rather than academic matters, second, on the effect of administrators' actions on student learning, and third, on administrative problems and instances of instructional ineffectiveness. Educational administration can become equivalent to advanced professions, the paper says, by discovering subclasses of the major problem and what changes to make to resolve each subcategory of problems. The document identifies the contributions of practitioners and researchers in generating the requisite knowledge base and explores ways in which such knowledge would promote the professionalization of educational administration. Descriptors-*Administrator Education, Content Analysis, Departments, *Educational Administration, *Educational Change, Educational Objectives, *Graduate Study, Higher Education, *National Surveys, Performance Based Education, *Program Descriptions, Self Evaluation

Part of a broad survey of administrator preparation programs in the United States, the study reported here was an analysis of professors' open-ended responses to questions about recent and projected changes in their educational administration programs. Content analysis was used to examine past changes, expected changes, patterns of change, and trends in program development. The most frequently cited past changes in programs (1974-76) were clarification of program goals and objectives, broadening of program scope, implementation of competency-based objectives, and increasing of field-based learning. Frequently mentioned future changes (1976-78) included continued self-assessment, shifts in program emphases and instructional content, and increased field orientation. No particular patterns of change or divergent directions of change were discerned from the data analysis. However, trends in program development could be identified as continuing exploration of program purposes, increasing competency-based preparation, improving facilities, increasing admission standards, and conforming with revised state requirements. Descriptors-*Administrator Education, Analytical Criticism, *Creative Activities, Design, Educational Administration, *Females, Feminism, Higher Education, Information Dissemination, *Instructional Materials, Leadership Training, *Material Development, Pilot Projects, *Sex Fairness

The central thesis of the paper is that there are beneficial outcomes derived from engagement in the process of creating instructional materials, quite apart from the benefits to those who use the materials later. Of the three stages in materials production design, development, and dissemination this paper highlights the development stage by exploring the benefits accrued to individuals, development teams, and pilot audiences during this stage. The development stage is viewed as encompassing three subprocesses: (1) critical review of materials drafts, leading to increased intellectual independence and scholarly rigor of developers; (2) pilot testing of the somewhat refined drafts, a process that enhances developers' leadership skills, the development team's cohesiveness, and pilot audience professionalism; (3) technical production of the final products, that increases developers' administrative skills. The subjective data base for this analysis was a funded project to create instructional materials for the advancement of sex equity in education. The author was a project evaluator and a development team leader. The benefits of involvement in the creative processes are discussed in terms of their importance to female educators. (Author)

Identifiers-*Australia

In this analysis of the source of Australian government decisions on school science programs and libraries, specific issues are reviewed and the developments placed in political focus. The emergence of federal aid is set in the context of long-term developments in Australian federalism. The forces are examined that obliged the government of Prime Minister R. G. Menzies to become increasingly involved in education; at the university level during the 1950s, and at the college and secondary school level during the 1960s with science laboratories and school libraries. During the years 1972-75 the labor government created a Schools Commission and injected massive funds into the system. The book concludes with some observations on recent developments and likely future trends under the Fraser coalition government. (Author/MLF)

One area of home-school-community relations research lies in the study of unique patterns of educational participation by community residents. This study was designed to investigate patterns of citizen participation in education. A questionnaire was developed and a random sample of 250 registered voters was selected from a county school district in an east central state. Ultimately, 130 completed interviews were secured. Descriptive statistics were produced to examine questionnaire responses; R-mode factor analysis identified the clustering of educational activities; Q-mode factor analysis identified the groups of participators; and discriminant analysis identified variables that differentiated significantly between and among groups of participators. Four clusters of educational activities, five groups of educational participators, and selected variables describing these groups of participators were identified. (Author/MLF)

Descriptors-Academic Achievement, *Communication (Thought Transfer), Community Involvement, Elementary Education, Interviews, Parent Participation, *School Community Relationship, Teachers

This research examined the relationship between effective school-community relations and student achievement. The purpose of the study was to determine how the five variables of access, communication, involvement, participation, and resolution interact with a measure of effective school-community relations, how the five variables related to measures of student achievement, and how the variable of access relates to the other four variables. Sixty-four parents of students in grades four through six were interviewed for their perceptions of the effectiveness of one of the five variables. Statistical techniques used included the Pearson product moment correlations, forward step-wise regression, and path analysis. The findings suggest that communication is the most important variable of an effective school-community relations program. The study suggests that teachers be trained to use parent conferences and other interaction opportunities as two-way communication vehicles. Also, information sent to parents should contain a tear-off section for them to fill out and return with their comments. (Author/LD)

Descriptors-*Administrative Organization, *Administrative Personnel, Bureaucracy, *Complexity Level, Educational Finance, Elementary Secondary Education, Organizational Effectiveness, *Organizational Theories, *Organization Size (Groups), School Districts, *School Organization, Statistical Studies

Growth of administrative components in 43 K-12 public school districts in the Saint Louis metropolitan area is reported for 1968-76. Increases in absolute numbers and ratios of administrators to teachers occurred in school districts with increasing as well as declining enrollments. Statistical analysis of public records and interviews with superintendents did not support two prominent organizational explanations for this growth: that the percentage of administrative employees declines as organization membership increases, and that the percentage of administrative employees increases as the complexity of the organization's environment increases. An alternative approach, emphasizing expansion-tendencies within administrative staffs, is suggested. (Author)

Descriptors-Alarm Systems, *Costs, Elementary Secondary Education, *Questionnaires, *School Security, School Surveys, *School Vandalism, Windows
Identifiers-*Canada

The information in this report on school vandalism was gathered via questionnaires from 47 school boards across Canada. It provides suggestions to help school boards reduce the damage costs from vandalism. Topics covered include window breakage costs versus other vandalism costs; the trend, upward or downward; the time of year vandalism occurs, size and type of school and socioeconomic area involved; the people who vandalize; and preventive measures and their cost. The report concludes that school boards are accepting the inevitability of a certain amount of destruction of school property and are instituting means to minimize it and catch and prosecute those responsible. The appendices provide such things as one school's logbook of vandalism, a copy of a form letter to parents, damages/loss reports, and methods to combat vandalism. (Author/LD)

Descriptors-Compensatory Education, Developing Nations, Economics, Educational Benefits, Educational Policy, Elementary Secondary Education, Foreign Countries, *Human Capital, Income, Postsecondary Education, Social Change, Socioeconomic Status
Identifiers-El Salvador, Redistribution of Wealth

The human capital concept of neoclassical economics holds that increased education will lead to increased productivity and to higher wages. Job queue and labor market segmentation theories argue that improved education merely drives up employment criteria and that the socioeconomic background of the employee is a more significant indicator of earning potential. Marxist theory claims that education is a training process for the capitalistic system, which uses disparate wages simply as a means to structure and control the work force. With these concepts as a background, the author of this document conducted a research project intended to produce a methodology for predicting the potential effects of various educational strategies on the equalization of earned income among males. The method, described in this document, depends on obtaining accurate responses to survey questions concerning educational attainments, backgrounds, occupations, and earnings. A test of the method in El Salvador is described. The author concludes that the impact of education on wealth equalization is far less than has been traditionally supposed and that attempts to equalize wealth through educational strategies are doomed to failure unless those strategies and goals are appropriate to the political and economic structure of the country. Descriptors-*Boards of Education, *Court Litigation, Elementary Secondary Education, *Governance

Identifiers-California

The research project reported in this paper sought to discover what, if any, factors present among school boards and court decisions appeared to be associated with the degree to which school boards responded to court decisions. The study, in an effort to assess the impact of the courts on local school boards, also asked whether school boards not directly involved in specific litigation generally ignore the legal directives of the courts. Using two random samples of school boards in California and six carefully selected court decisions, the researcher found that there did not appear to be any personnel or decision-related variables that were associated with the level or rate of response to the courts. Moreover, it was found that there was less than a 4 percent response rate by the sampled local boards to a variety of court decisions, which may indicate that local boards do, in fact, tend to ignore the legal directives of the courts. The research suggests that the impact of the courts on local school boards may be far more limited than one might assume, given the general tone and content of earlier research and the current rhetoric of schoolmen. Identifiers-*Proposition 13 (California 1978)

Written during the summer and fall immediately following the passage of Proposition 13 (the California tax limitation amendment), this paper examines circumstances leading to its overwhelming support at the polls and the immediate efforts of state and local units of government to cope with the changes. The following are discussed: the political and economic climate that engendered the movement; the politics of the campaign; the vote itself; the immediate implications for various units of government, particularly elementary and secondary educational institutions; the state's bail-out legislation; the immediate and unsuccessful legal challenges; similar activities in other states; and the prospects for further tax and expenditure limitations movements in other states. Appendices at the end reproduce the text of Proposition 13 and show how a district can calculate its revenue for the school year. (Author/LD)

Descriptors-Community Characteristics, Differences, Economics, Elementary Secondary Education, *Equal Education, Government School Relationship, Local Government, Multiple Regression Analysis, Research Methodology, Resource Allocations, School Districts, Suburban Schools, Urban Schools, Verbal Ability

Identifiers-Coleman Report, Redistribution of Wealth

America's public education is often cited as an example of America's commitment to equality, yet it is supported primarily at the local government level, the level least able to further the redistribution of wealth. Data in the Coleman Report, misrepresented in the report itself as indicating that schools have little effect on the development of verbal ability, actually indicate that the redistributive effects of education in the northern United States are not strong. These effects were tested in a study of 121 urban school districts and 166 suburban school districts in the Chicago standard metropolitan statistical area. The results indicated that central city districts tend to be redistributive while suburban districts tend to be developmental in their handling of community wealth. This is apparently due to the homogeneous nature of suburban school district populations. Suburban districts can tailor their taxation levels, zoning requirements, and public services to appeal to a specific population with reasonable efficiency. Urban districts with more heterogeneous populations must provide standard, uniform services (including education) to all residents, regardless of socioeconomic station, with inefficient use of tax revenues (based on the ratio of taxes paid to services received by each individual taxpayer) the usual result. Identifiers-*Connecticut

If taxes are higher in one town than in another it does not necessarily mean that residents of the low-tax town are better off; they may have had to pay high property prices to live in the more desirable low-tax town. It is incorrect to believe that property wealth differences are the only reason for spending disparities across towns. A more important cause appears to be income differences. Even if tax-prices were equalized across towns, wide differences in incomes would perpetuate differences in school spending. The Connecticut state tax reform program is tailored to lower the tax-price (or property tax rate) of education in income-poor towns. Under the present formula, state aid is in effect a lump-sum grant. Low-income towns may merely use this grant to support education and use the funds previously supporting the schools for other purposes, thus not increasing per pupil spending at all. What is really at issue with school finance reform is not differences in the price of education across towns but differences in incomes and the resulting abilities to pay. The total evidence here suggests that school finance reform now under way in Connecticut will not have the desired effect on per pupil spending. (Author/JM)

Educators have broad powers when maintaining student discipline. As long as there is no blatant violation of students' constitutional rights, courts are reluctant to interfere. Still, there are limits to an educator's prerogatives. This document discusses students' rights in the areas of corporal punishment, suspension and expulsion, searches and seizures, married and pregnant students, the First Amendment, dress codes, grading and graduation policies, and confidential records. Relevant precedent-setting court cases are identified and discussed. The document concludes with the observation that the most important actions educators can take in creating an adequate discipline policy are the establishment of reasonable rules and the communication of those rules to students through a well-distributed handbook. The first words of the first of the rights guaranteed to Americans in the Bill of Rights are, "Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof." Despite the obvious general intent of these words, doubts remain about specific applications of the law. The permissible relationship between religion and education is particularly difficult to define. This document refers to several landmark court cases in providing a general overview of judicial thinking regarding this relationship. The cited decisions cover such topics as the extent to which and the ways in which public funds can support parochial education, the acceptable levels of religious observance in public schools, the rights of parents and students not to participate in public instruction or public school practices on religious grounds, and the degree to which religious beliefs can legally influence the public school curriculum. Descriptors-*Attendance, Attendance Patterns, Elementary Secondary Education, School Holding Power, Teacher Attendance, Truancy

Student absenteeism has been declining in the United States since records were first kept in the late nineteenth century. Even so, some districts, usually urban, have found absentee rates doubling or even tripling over the last ten years. The tendency of teacher absenteeism to rise in districts where student absenteeism has increased sharply merely adds to the problem. The absence of students affects not only the funding available to most schools (often dependent on average daily attendance figures) but the education of the truant students and the ability of the educational system to teach effectively those students who do attend. To date no major studies have focused successfully on the correlations between student and teacher absence rates or the specific root causes of absenteeism. This document discusses the factors involved in this dilemma, including the rationales for attendance expectations; the intentions behind and alternatives to compulsory schooling; the characteristics of absentees; and the relationships of school size, school programs, and the educational environment to absence rates. The document concludes with brief descriptions of nine programs designed to reduce absenteeism in schools around the country. (Author/PGD)

Descriptors-Change Strategies, Computer Programs, Conflict, Educational Administration, Educational Change, *Educational Innovation, Financial Support, Interagency Coordination, Leadership, Models, Norms, Organization, *Organizational Theories, *Tables (Data)

Based on a review of literature on educational change, this study explored the fundamental dynamics of stability and change in public school systems. Five major factors were identified that affect and interact with innovation. These factors include leadership effectiveness, external funds, external linkage, conflict, and support for innovation. Support for innovation is a function of the relationship between the level of innovation and leader, professional, and community norms. A computer model was constructed that expressed mathematically the relationships among these factors that account for the change behavior of school systems over time. Computer runs demonstrated the ability of the model to reproduce the ebb and flow of innovation in school districts over time, both where stability of community norms is assumed and where the community is seen in a state of transition. Findings indicated that a small number of fundamental structurally interconnected elements account for the basic stability of schools in the face of efforts to innovate. Also, incremental approaches to innovation seem to produce long-term effects superior to effects of dramatic attempts to bring about quick change. Finally, policies promoting networking among school people produce more positive impact on innovation than policies based on funding alone. (Author/JM)

This report presents the findings of a 1978 survey of 1,688 elementary school principals. The report summarizes elementary principals' characteristics, experience, professional activities, salaries, and benefits. The characteristics of principals' schools and staffs and principals' relationships with both are discussed. The survey also looked at the principal's role within the school system and responsibilities for collective bargaining. Finally, the study uncovered the principal's problems and opinions and made predictions about the future of the principalsnip. (Author/JM)

Descriptors-*Achievement Need, Administrator Background, *Administrator Characteristics, Motivation, *Occupational Aspiration, *Promotion (Occupational), *Psychological Needs, Teacher Background, Teacher Promotion, Teachers

This study examines motivational, personalistic, and experiential variables considered to be important in explaining the promotional aspirations of educators. It assesses the extent to which aspirations are affected by such factors as motivation (or need fulfillment deficiency), personal attributes (sex or race), and experience (professional role or years of experience). The direction and magnitude of relations that exist among criterion and predictor variables were analyzed. Maslow's hierarchy of needs and Atkinson's need achievement concept were the theoretical constructs of the study. Subjects for the study were teachers, potential administrators, and practicing administrators from selected New York City Community School Districts. Instruments used were the Mehrabian Achieving Tendency Scales, Porter's Need Satisfaction Questionnaire, and the Personal Data Form. (Author/JM)

Identifiers-Dallas Adopt a School Program, Metro Atlanta Skills Center, Program of Education and Career Exploration

Educators sometimes fail to adequately bring about school community collaboration. To do so, cooperative policy adjustments must be made, such as the supportive network created in the Dallas "Adopt-a-School" Program. Too, implementation adjustments must be made in the development of an action-learning program such as the flexible scheduling systems in the Metro-Atlanta Skills Center and the Program of Education and Career Exploration in Atlanta, Georgia. Programs such as these are created through policy adjustments that reflect the urban school district's commitment to the restoration of relevance in the education of American youth. Characteristics of 11 other programs are briefly listed in the paper. (Author/JM)

Descriptors-*Change Strategies, Citizen Participation, *Educational Improvement, *Educational Planning, *Educational Strategies, Integration Methods, Needs Assessment, *Problem Solving, School Integration, *School Organization

Identifiers-Richmond Public Schools VA

This paper deals with the events that led to a need for problem-solving measures in the Richmond, Virginia, Public Schools, and describes the planning strategies that have evolved since 1973. Events of the late 1960s and early 70s that had a major impact on the school system included three changes of superintendents (that brought three reorganizations), court-ordered desegregation plans, court-ordered annexation, and a court suit seeking consolidation of the metropolitan school systems. The fall of 1973 marked the beginning of the massive planning project. The development of the school system's educational planning capability can be viewed in two stages, each described in this report. Stage 1 was known as the Educational Services Priority Planning Program or ESP-3 and was based almost entirely on a participatory planning strategy. Stage 2 of the development of planning capability was a more formalized approach and is considered in this paper as having begun with the formation of a department of planning and development (Author/MLF)

Identifiers-*Chisholm v Georgia, *Governmental Immunity

The concept of sovereign immunity in English law originated in both early canon law and the feudal system, became formalized in case law under King Henry II, and as the royal prerogative, became established into statutory law under King Henry VIII. This concept of governmental immunity was adopted by the states when the union was founded. The case Chisholm v. Georgia supported the concept of governmental immunity as applied to the citizens of a state. Since the 1950s, however, state legislatures have been gradually abrogating the state's governmental immunity. Educational institutions and school districts were among the first to have their immunity abrogated. In some states, the courts have indicated that for a school district to purchase liability insurance is tantamount to a consent to be sued, yet even if districts do not purchase insurance, the courts sometimes allow liability suits. Putting funds into a savings account to pay for damages has been ruled illegal in some states. It is recommended that school systems should not count on any type of immunity protection against liability suits, that educational agencies should purchase as much liability insurance as possible, and that schools should undertake an intensive campaign aimed at informing educational officials and employees of their legal liabilities. Appendices present the status of governmental immunity in all states. (Author/JM)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-Educational Administration, *Educational Sociology, Elementary Secondary Education, *Organizational Effectiveness, *Organizational Theories, *Schools, Social Structure

Rather than concentrating on similarities, it would seem far more profitable to search for ways in which schools are unlike other organizations or the models we have of these. It was suggested that we need to begin building images of schools that are congruent with their reality. This paper attempts the first stage in the task by identifying major generic characteristics of schools in general and public schools in particular. The generic characteristics of schools in general are pupils, classes, instruction, teachers, curriculum, and authorities external to the school itself, which is located on specialized premises. Ideal-type public schools are distinguished by external authorities that form part of a hierarchically organized administrative structure in a sovereign state and compulsorily enrolled pupils that are permanently resident within the territorial jurisdiction of the state. Comments are restricted to two implications for administrative theory and two possible uses in organizational analysis. (Author/MLF)

Descriptors-*Administrator Role, Building Operation, *Curriculum Development, Elementary Secondary Education, *Energy Conservation, *Environmental Education, Experiential Learning, Federal Aid, Fuel Consumption, Futures (of Society), Life Style, *Principals

The principal's role in energy conservation includes being certain that steps have been taken within the school building to effect energy savings, and using his influence to make certain that his school system applies for an Energy Retrofitting Grant under the National Energy Act if appropriate. However, the principal's greater role is to take the lead in assuring that energy conservation is taught within the school. Maple Hill High School in Castleton-on-Hudson, New York, has a course in environmental studies that has changed people's values by involving them in experiential situations. To make such a program successful requires money, supportive administration, and dedicated teachers. The widest ranging benefits will come from infusion units throughout the school system. Promoting education for energy conservation becomes more important than other responsibilities because of its obvious importance in the very survival of mankind. (Author/MLF)

Pub Type- Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Church Role, Conflict, Elementary Secondary Education, Family Influence, *Family School Relationship, *Moral Values, *School Responsibility, *Sex Education, Social Problems

Supporters of sex education curriculum see it as a way of keeping in step with the times and of coping with the undesirable side effects of the new morality. Opponents argue that such classes infringe both the right of individual privacy, and the American tradition of dealing with sex in religious and family settings. The implementation of sex education must involve the consideration of such mechanical aspects of education as definition, curriculum, staffing, finance, and evaluation. Sex has traditionally been an individual matter in this nation. There is no reason why the worldwide pattern of massive government intervention in private life should institutionalize this concern. Government, even at the school district level, is simply not equipped to deal with every subject or to solve every problem. The reassertion of the family and private organizations in this connection is not merely an option, it is a necessity. (Author/MLF)

Descriptors-Birth Rate, Collective Bargaining, Cost Effectiveness, *Declining Enrollment, *Demography, Educational Finance, *Educational Planning, Elementary Secondary Education, *Enrollment Trends, Expenditure Per Student, Migration Patterns, Prediction, Reduction in Force, *School Closing, School Community Relationship, *School Organization, Space Utilization, State Aid

American schools, after two decades of expansion, are now in the midst of an enrollment decline and inflation. The impact of the shift from growth to retrenchment and streamlining has been severe. An effective approach to this situation requires an understanding of the new conditions and of available alternatives for action. An overview of the changes in the educational system demands a thoroughgoing investigation of the situations that exist at the national, state, and community levels. The present study treats both national and local aspects of the situation. Data concerning the demographic dimensions of enrollment decline are examined. This is followed by a treatment of the impact of decreased enrollment on various aspects of public education including students, community members, school personnel and the physical and economic dimensions. Since the pattern of declining enrollment in many cases points to reallocation of space and closing of structures, the response to decline must come to grips with the human aspects of this process. One system in which reorganization has met with notable success is the East Syracuse-Minoa district of upstate New York. The planning that preceded the reorganization and the process itself are explained in detail. (Author/MLF)

Identifiers-*District Reorganization, East Syracuse Central Schools NY

In response to declining enrollment, the school board and administration of the East Syracuse-Minoa Central School District (New York) undertook a comprehensive effort to examine conditions and plan for the future. Following an initial data-gathering phase, a citizens task force was appointed in 1977 to study the problem and make recommendations. In January 1978, a public meeting was held to present task force recommendations and consider public opinion. The citizens group suggested a phased program of reorganization that involved the closing of two elementary and two middle schools. District officials then examined this plan and alternative plans and gathered cost data on each approach. The board of education held a series of work sessions and scheduled a workshop to involve district personnel. By October 1978, the board had narrowed options to three plans. By November 1978, discussions in the school system focused on a program combining elementary grade levels, creating partnerships, and reducing the number of middle schools. A public board meeting was held where the plan presented received strong support. This district response to declining enrollment demonstrated the success possible with a direct and open approach to planning. (Author/JM)

Descriptors-Academic Achievement, Academic Standards, Activism, *Discipline, *Discipline Policy, Discipline Problems, Law Enforcement, Parent Attitudes, Student Alienation, Suspension, Vandalism, *Violence

Both educators and the public are becoming increasingly alarmed by the magnitude of school discipline problems. Surveys of secondary schools reveal increasing incidences of rioting, arson, violence, and property damage. The increase of discipline problems has been linked to the influence of college disruptions, violence on television, the civil rights movement, the increase of violence in the larger society, and the rise of participatory democracy. Educators, by decreasing the amount of time devoted to learning, are partially responsible for discipline problems. Some researchers have blamed the abdication of authority by parents. Reduced school discipline will have adverse effects on students' academic achievement, emotional development, and social attitudes. A continuum of solutions has been suggested, stretching from liberal to conservative. The liberal emphasis on the use of psychology is appropriate for psychotic and neurotic problem students, and the conservative law enforcement approach is probably best for removing criminally disruptive students. Yet for most discipline problems other approaches must be used. The need for behavioral and intellectual standards and structures must be realized. The position of the educator must again be preeminent. Discipline in best approached through a thorough affirmation that learning is the central purpose of the schools. (Author/JM)

Education and the National Productivity Problem: An Analysis.
East Syracuse - Minoa Central Schools, East Syracuse, N.Y.
Pub Date-Mar 79
Note-27p.
Pub Type- Information Analyses (070)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-Elementary Secondary Education, *Productivity
Identifiers-Educational Outputs

Productivity in the private sector increased at a healthy rate in the United States from the time of the Depression until about 1966 and has remained uncertain throughout the 1970s. Educational productivity seems to show a similar pattern. Methods for measuring the value of educational outputs have changed since the cost-quality movement of the 1930s and 40s, when degrees of innovation served as the standard. In more recent years research has focused on students' test scores, which have been dropping since 1966. Although it is not clear that test scores are definitive measures of the value of education, the scores must be taken seriously. Solutions to the problem of lower educational productivity cannot readily be found by referring to practices in the private sector, due to the nonprofit nature of the educational enterprise. Instead, a solution may be found through careful handling of four ingredients: staff motivation, response to social change, curricular improvement, and increased commitment. (Author/PGD)

Class Size Revisited: Glass and Smith in Perspective.
East Syracuse - Minoa Central Schools, East Syracuse, N.Y.
Pub Date-Feb 79
Note-11p.; For a related document, see ED 168 129
Pub Type- Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Academic Achievement, *Class Size, Elementary Secondary Education, *Research Methodology, *Statistical Analysis

Gene V. Glass and Mary Lee Smith claim in their report, Meta-Analysis of Research on the Relationship of Class-Size and Achievement'' (ED 168 129), that their integration of data from 80 previous studies through complex regression analysis techniques revealed a clear and strong relationship'' between decreases in class size and increases in academic achievement. Due to numerous errors in methodology, these findings are highly suspect. These errors include the incorrect assumption that the size of their sample assured randomization, the compounding of statistical errors already existing in the original studies, a lack of adequate concern for statistical significance, and a failure to investigate or account for all the important variables involved in the problem. An additional difficulty is that Glass and Smith failed to take into account the realistic constraints of educational finance, thereby reducing the possible value of their findings. (Author/PGD)

Selection of Staff The Kids Come First!
Pub Date-Mar 79
Note-10p.; Paper presented at the Annual Meeting of the National Association of Elementary School Principals (Washington, D.C., March 24-28, 1979)
Pub Type- Speeches/Meeting Papers (150) - Guides - Non-Classroom (055)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Elementary Education, Employment Interviews, Teacher Participation, *Teacher Selection

The teacher selection process successfully used in a small district in Wyoming essentially involves advertising the vacancy, accepting applications, appointing a selection committee (including two teachers from the building where the vacancy exists), screening the applicants, inviting the top six candidates to come for interviews, and selecting the best applicant by vote. The selection process is concentrated on assessing the applicant's ability to deal with children. For this reason the interview sequence includes use of the Teacher Perceiver Interview and use of a separate group interview by the selection committee. The involvement of teachers on the selection committee assures teachers a role in the staffing process, focuses the selection process on the applicants' suitability to the classroom situation, and enables the applicant to feel understood and therefore more secure before the committee. Sound Slide Projectors (with Audio Cassettes). EPIE Report: Number 88e.
Educational Products Information Exchange Inst., New York, N.Y.
Pub Date-79
Note-48p.
Available from-EPIE Institute, 637 West 125th Street, New York, New York 10027 ($20.00; quantity discounts)
Pub Type- Reports - Evaluative (142) - Reports - Research (143)
Document Not Available from EDRS.
Descriptors-Audiovisual Aids, Elementary Secondary Education, *Equipment Evaluation, Equipment Standards, *Magnetic Tape Cassettes, *Merchandise Information, *Performance Specifications, *Projection Equipment, *Slides

Over the last few years, a variety of fully integrated sound-slide projectors has been introduced to the market, and most of these are suited to educational and training use. Models included in EPIE's testing program met the basic criteria of (1) using standard 35mm slides and compact cassette tape; (2) having automatic synchronization between slides and tape; (3) being capable of having the program changed easily and rapidly; and (4) being a fully integrated design not incorporating any complete proprietary equipment. EPIE considers the 5 models tested to be representative of a total of 16 models. The first section of the report explains the detailed aspects in testing sound-slide projectors for optical performance, electrical and heating characteristics, sound reproduction, and cue tones and synchronization. The second part explains the testing methods use, and the final section presents individual reports of the laboratory test findings including a paragraph on equipment safety. (Author/MLF)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-Acculturation, Catholics, *Culture Conflict, *Ethnicity, Ethnic Relations, Minority Groups, Religious Conflict, School Role, *Social Discrimination, *Social Integration
Identifiers-Chinese People, Muslims, *Phillipines

The population of the Republic of the Philippines is largely composed of common racial stock except for a small minority of ethnic Chinese. Ethnic differences are largely on the basis of language and religion. Over 90 percent of the people are Christians, mostly Roman Catholics, approximately 5 percent are Muslims, and the remainder adhere to the indigenous beliefs of the islands. The Chinese resist integration, maintain their own schools, and have been only marginally assimilated. Communists in the Phillipines, largely scholars or domestic Chinese, are constantly working toward an overthrow of the government. The Muslims are waging a guerrilla war with the objective of seceding from the Republic of the Phillipines. Under these circumstances, the chances for education to successfully serve as an instrument of integration are rather slim. (Author/JM)

Descriptors-*Administrator Role, *Declining Enrollment, Elementary Secondary Education, Enrollment Projections, Principals, *Reduction in Force, Seniority

Identifiers-Keough Indicator Survey Scale

As enrollments continue to decline, principals face new staffing problems, especially problems connected with reduction in force. One forecasting method useful for determining if enrollment will decline is the Keough Indicator Survey Scale, which contains questions about key community characterisitics. Administrators experiencing declining enrollments who use a reduction in force policy based on seniority will face problems such as increasing teacher salaries and age. As an alternative to a seniority-based policy, administrators might employ such criteria as quality of service, experience in a specific area, district need, preparation, and certification. A point system might be used that awards teachers points for such things as seniority, advanced degrees, superior evaluations, and coaching or activity sponsoring experience. Other alternatives that can help solve reduction in force problems include staffing to fit midyear projections instead of fall enrollments, an early retirement system, terminating unsatisfactory teachers, cooperating with neighboring school districts, and retraining faculty for available vacancies. Negative results of reduction in force may include public outcry, large class sizes, and a decline of morale. Perhaps the most important aspect of the principal's responsibilities in dealing with declining enrollment is sensitivity to human needs. (Author/JM)

Identifiers-*Zero Based Budgeting

All indicators appear to point to a continuing and increased public interest in zero-based budgeting (ZBB). Despite its present popularity, ZBB is not new. The theory has been around for more than a decade and it draws heavily on existing systems, particularly on planning, programming, and budgeting systems. ZBB has two phases. The first is the planning phase, which includes four elements information systems, program structure, evaluations systems, and costing systems. The second phase is the analysis of decision packages. The decision packages are presented to successively higher management levels. These documents usually contain a statement of need and related performance objectives, and the identification of current costs for activities to be carried out. The inclusion of a number of different decision alternatives gives top management choices between different levels of benefits and costs. Because of its complexity, ZBB seems most suitable for use every three to five years, rather than every year. Further, it seems most useful for discretionary programs rather than in areas with fixed costs. Business and government organizations that have used ZBB are not in agreement as to its advantages compared to traditional systems. (Author/IRT)

Descriptors-Elementary Secondary Education, *Federal State Relationship, Government School Relationship

Regardless of one's philosophical views of the role of the national government, the new federal willingness to reexamine its past effectiveness and role provides an opportunity for grassroots involvement by both state educational agencies and local school districts. An evaluation of current federal enactments needs to consider several important areas, among them: appropriate federal, state, and local roles and responsibilities are needed to carry out federal programs; the effectiveness of formulas that flow funds into the state on state equalization programs must accommodate tests inherent in the Serrano v. Priest constitutional concerns for state fiscal systems; a resolution is needed for the different treatments and definitions in the several laws in respect to areas such as handicapped, maintenance of effort, nonsupplementation, and so forth; funds need to flow to the states on multiyear, long-range state plans rather than on annual time frames that place a premium on repetitive processes requiring planning, programming, evaluating, and reporting; the merits of national uniformity in treatment for categorical groups versus desirability of state flexibility in treatment need to be examined; and the relationship of state programs that are similar to federal programs must be more clearly delineated. Descriptors-Elementary Secondary Education, *Minimum Competency Testing, *Performance Based Education, Program Development

This overview of competency based education (CBE) explores some of the important policies and dimensions of CBE that go beyond the popularized notion that simple tests can be devised to make student promotion and graduation decisions or to demonstrate possession of required or desired competencies. Examined are such areas as the reasons CBE has become so popular, the nature of CBE, the focus of CBE, competency standards and minimums, the measurement of competencies, students who fail, school system change and reform, an approach to implementing CBE, and the pitfalls of implementation. The author concludes that CBE and assessment programs are complex processes that are best described as instructional management systems. Further, a CBE program must be viewed as something more than a testing program to make promotion and graduation decisions and must be accompanied by a strong commitment to correct pupil deficiencies when they are discovered. Identifiers-Great Britain, *Open Plan Schools Inquiry

The data discussed in this speech are taken from a large, three-year study that investigated the whole process of open-plan schooling. The study included a national survey of schools in Britain and a series of onsite observations. The analyses reported here derived from the observation of 552 pupils in grades 2 and 4 using the Pupil Behavior Schedule. The main areas of concern were curriculum allocation, which is the opportunity teachers provide for pupils to study a given curriculum content, and pupil involvement, which represents what pupils make of that opportunity. Large variations were found in the curriculum allocation between units. It is pointed out, however, that such variations are not limited to open-plan schools. The findings on pupil involvement can be interpreted in a number of ways. One might argue that pupils are involved for nearly two-thirds of the week, whereas another might complain that, on the basis of these figures, 9 of the 25 hours a week spent at school are devoted to noncurricular activities. It is of interest that some teachers manage to keep their pupils involved for 19 hours a week and others for only 13. (Author/IRT)

Identifiers-*Education for All Handicapped Children Act

The purpose of this handbook is to examine the statutory and regulatory requirements of Public Law 94-142, the Education for All Handicapped Children Act, and to outline various administrative responsibilities of local educational agencies relative to the successful implementation of the act. Four specific goals are listed: (1) to inform public school administrators of the statutory and regulatory requirements of the act, (2) to identify critical issues and describe possible problem areas, (3) to describe the effect that the act could have on organizational structure and operations, and (4) to examine the effect that the act could have on administrative decision-making and evaluation of criteria for program effectiveness. Divided into seven chapters, the book discusses some of the following: the history of P.L. 94-142, local educational agency applications for federal funds, the least restrictive environment in which to educate the handicapped, procedural due process requirements, the requirement for individualized education programs, and personnel development requirements. The book concludes that all segments of society, not just the public schools, must change to accommodate the handicapped. (Author/LD)

Identifiers-Education for All Handicapped Children Act, *Rehabilitation Act 1973 (Section 504)

Section 504 of the Rehabilitation Act of 1973 is the first major statutory civil rights enactment that protects handicapped individuals from discriminatory practices in employment and educational opportunities and in accessibility to federally supported programs and activities. The purpose of this handbook is to examine the statutory and regulatory requirements of Title V, Section 504, and to outline the administrative responsibilities of local educational agencies relative to its successful implementation. The goals of this handbook are similar to those of Public Law 94-142: Special Education in Transition,'' a companion document. To achieve these goals, the handbook is divided into five chapters covering substantive and procedural issues, employment practices, and program accessibility. Two final chapters offer a comparison of Section 504 and P.L. 94-142 and identify future trends. The book concludes that the Section 504 regulation, in concert with P.L. 94-142, can provide much needed relief to handicapped individuals. A checklist provided at the end helps determine the accessibility of buildings to the physically handicapped. (Author/LD)

Descriptors-Decision Making, Educational Administration, Elementary Secondary Education, Flow Charts, *Management Systems, *Program Administration
Identifiers-Gantt Charts, Milestone Charts, Planning Evaluation and Review Technique, Zero Base Budgeting

The purpose of this handbook is to describe selected management tools useful to elementary and secondary school administrators. It attempts to provide the administrator with knowledge that will stimulate the use of these tools in an educational environment. It is intended to enable the administrator to direct educational programs to a productive and successful conclusion. Chapter 1 of the handbook describes the background and history of management tools. Chapters 2, 3, and 4 present three basic types of management tools: the Planning, Evaluation, and Review Technique (PERT); zero-base budgeting; and Gantt, milestone, and flow charts. Chapter 5 discusses application considerations. (Author/JM)

Descriptors-Administrator Responsibility, *Curriculum Development, Curriculum Evaluation, Curriculum Planning, Educational Quality, *Program Effectiveness, *Quality Control, Supervisors
Identifiers-Curriculum Specialists

Curriculum development is an activity that goes on in all school districts, although in some districts it is haphazard and in others it is carefully planned. School district leaders must recognize this situation and take charge of the program to assure that it adheres to high standards. The efforts of each teacher must be "mapped," which means the real curriculum being taught in each classroom must be examined and recorded. This curriculum mapping can be done by having teachers map their own classroom curricula by using such tools as a classroom curriculum mapping worksheet. It can also be done by having observers use tools like an observer form for curricular mapping to record what is being taught in the classroom. The results of this mapping must be the beginning point for making the real curriculum fit the desired curriculum. Curriculum directors, coordinators, supervisors, and other administrative personnel are a vital ingredient in any program of quality control in curriculum development. They are the only ones who can assure the district that the curriculum being taught is the desired curriculum. These administrators must be valued, nurtured, and protected by the superintendent of schools. (Author/JM)

Descriptors-*Declining Enrollment, Elementary Secondary Education, Income, *Reduction in Force, Teachers

Identifiers-*Bridgeton Public Schools NJ

This paper describes the reduction in force (RIF) that took place in the Bridgeton Public Schools, New Jersey, as a result of its exclusion from the formation of a new regional school district. During the school year 1976-77, enrollment declined by 1,600 pupils, tuition diminished by $2,000,000, and staff had to be reduced by 89 employees. The RIF procedure involved reevaluating and reducing program and class sizes and then beginning the task of deleting positions. Some of the steps taken, which are offered as suggestions to school districts, included meeting with the teachers' organization to enlist their support, formulating a seniority list, and keeping staff, students, and community informed of developments. The paper concludes that understanding and managing the results of declining enrollments can make the difference between survival and death of a school system and ultimately a community. Also, the process of dismissing individuals should be conducted in a humanitarian way. Included at the end are steps to follow in an RIF; a sample policy; observations on personnel, programs, facilities, and budgets; and a bibliography of references used. (Author/LD)

Identifiers-Title IX Education Amendments 1972

This paper is the result of a symposium called to discuss a two-year, multiuniversity development project which attempted to assist in advancing the role of women in education. The purpose of the project, commissioned by the University Council for Educational Administration (UCEA), was to design, develop, validate, and disseminate instructional materials for use in meeting the training needs of five groups, including women preparing for educational leadership, present professors of educational administration, and other decision-makers. A three-dimensional model of change was used that consisted of the three process stages of design, development, and dissemination. Within each of these stages, changes were recorded in individuals, small groups, and the environment as a result of the increasing social interactions, the acquisition of new skills and knowledge, and the critical feedback that project personnel provided to each other. According to the report, a noticeable difference was found in the degree of acceptance of, commitment to, and support for women's educational equity in UCEA. The paper concludes that UCEA and its members have become more cognizant of the role they can play in bringing about compliance with Title IX legislation. Also, the concept of women's equity in education is now an integral part of UCEA's mission to improve preparation programs for school administrators. (Author/LD)

Currently, demands are being made on schools from pressure groups involved in the so-called ``back to basics'' movement. This handbook was written in response to those demands with the stated purpose that curriculum workers need a system to distinguish valid educational options from current fads and trends. A model of these options is offered, which divides their philosophies into three contrasting designs that can be used in day-to-day practice in the school. The three designs represent educational approaches ranging from behaviorism to pragmatism to existentialism. The basic beliefs underlying such concepts as motivation and learning conditions are listed for the reader. A discussion then follows concerning instructional behavior, curriculum, organizational design, resources, general physical descriptions, and evaluation procedures congruent with the beliefs of each design. The document concludes by recommending a focus on the philosophy of education and an understanding of relationships between educational points of view and actual school procedures. (Author/LD)

Identifiers-*School Planning Evaluation Communiction System

In 1975 a survey was conducted of teachers' and administrators' perceptions of the School Planning, Evaluation, and Communication System (SPECS) in two school districts. The purpose of this study was to provide information about the effects of SPECS in action. The first district, called Pine School District in the study report, was located in a western state and had used SPECS in two pilot schools. The other district, designated Maple School District, was located in an eastern state and had recently introduced SPECS in one school. Almost all teachers and administrators who had been involved in the SPECS Program were interviewed. Many specific findings and a few general comparisons emerged. Administrators in Pine reported that the main reasons for introducing SPECS were improved curriculum development, teacher planning, and data collection, communication, and management. Teacher perceptions of actual outcomes of the program indicated that progress had been made in the areas of curriculum development and teacher planning and data collection. In Maple, teacher perception data offered suggestive but not conclusive data that administrator goals were being met. All the administrators in Pine expressed satisfaction with the SPECS Program and Pine teachers strongly agreed. In Maple two of the three administrators felt a program like SPECS was needed but most teachers evaluated SPECS negatively. The survey suggested that the lack of support from Maple teachers may have been caused by not having a choice about participating, enough control over the program or their own materials, a tangible end product, or a full-time curriculum director. Descriptors-*Case Studies, Community Colleges, Educational Planning, Elementary Secondary Education, Junior Colleges, *Program Development, School Districts
Identifiers-*School Planning Evaluation Communication System

This set of chronologies tells the stories of fourteen sites thirteen public school districts and one community college that participated in the 1974 field test of the School Planning, Evaluation, and Communication System (SPECS). The collection is intended to provide a resource for teachers, administrators, board members, and university professors who might be considering the implementation of SPECS or a similar system. The chronologies have been verified to be accurate by key administrators, SPECS consultants, and development team members, but all site names are fictitious. Some of the stories chronicle successes, and others tell the stories of districts that encountered many problems in their implementation attempts. (Author/JM)

Descriptors-*Administrator Attitudes, Educational Objectives, Elementary Secondary Education, Program Development, Program Effectiveness, *Program Evaluation, Questionnaires, *Teacher Attitudes

In 1976 a survey was done to ascertain teacher and administrator responses to the School Planning, Evaluation, and Communication System in six districts in which it was implemented. Research was conducted through written questionnaires. Three districts provided enough data for detailed analysis, and two provided enough data for brief discussion. Data collected for each district focused on such issues as introduction, use, actual consequences, and evaluations of SPECS. A general overview of data revealed that at least 75 percent of responding teachers felt that after SPECS, (1) their instruction was more individualized, (2) evaluation of students was improved, (3) goals and objectives were better coordinated with those of others, (4) course planning had improved, (5) progress reports to parents were facilitated, and (6) ability to choose course materials was improved. On the whole, the data suggest that most teachers in the sample had a favorable attitude toward SPECS although a sizeable minority were unenthusiastic. Among the fourteen administrators represented in this study, there was almost total unanimity in endorsing SPECS. (Author/JM)

Descriptors-Analysis of Variance, Data Analysis, Elementary Education, Field Studies, *Longitudinal Studies, Multiple Regression Analysis, Multiunit Schools, Raw Scores, *Research Methodology, True Scores
Identifiers-Management Implications of Team Teaching Project

The federally funded longitudinal field study called Management Implications of Team Teaching (MITT) required a search for an appropriate strategy for analyzing through-time relationships among selected variables. The MITT project used questionnaires and interviews to collect data concerning the work, governance, attitudes, and orientation of teachers in fourteen multiunit elementary schools and thirteen conventionally organized elementary schools. In a study like MITT, one typically wishes to investigate gains or decrements in scores on variables as a consequence of either treatment differences (multiunit as opposed to conventional organization) or variation in quantitative variables. Two problems confront investigators who embark on longitudinal data analyses: one concerns whether to use original scores or ``true score'' estimates, and the other concerns what statistical procedures to apply to these scores. This document explains why and how the investigators in this case chose to use original scores and multiple linear regression analysis. While data from the MITT project are used to illustrate the process by which these methods were chosen, the findings of the original study are not presented here. (Author/PGD)

Descriptors-*Administrator Education, *Change Strategies, Curriculum Development, Discipline, *Educational Change, Educational Innovation, Elementary Secondary Education, *Inservice Education, Needs Assessment, *Principals, Rural Schools, *Small Schools, Workshops

Research into the needs of small school administrators and effective ways to help meet those needs through inservice education projects was conducted over a period of two years by means of a needs assessment and two small-scale workshops. The purpose of the workshops was to try out a basic format and some techniques perceived to be potentially more beneficial to the participants than the typical convention or meeting. A basic position taken in developing the format and materials for the workshops was that efforts to change educational practices, either in larger or smaller schools, have tended in the past to emphasize what should be changed, rather than how change might best occur. A review of literature revealed that recent experience in bringing about change in organizations has tended to indicate that the process, or change strategy, is more important than the identification of product or change desired. The format for the inservice workshops was designed to provide simulated experience in a change process that could be used with teachers and other school personnel. (Author)

Descriptors-*Board of Education Policy, Citizen Participation, Decision Making, *Declining Enrollment, Expenditure Per Student, *Personnel Policy, *Reduction in Force, *School Closing, Secondary Education, Seniority, Student Teacher Ratio, Teacher Retirement

School districts that survive declining enrollments will be the ones who recognize that the problem exists and build their programs and plans to meet the problem. It is necessary to know community demography and develop farsighted, actuarily sound projections of the effects. As money is basic to the problem, it is necessary to know the fiscal characteristics of a particular decline and the possible resources that are available. In regard to staffing, administrators will have to become experts in labor management. Tenure and reduction in force policies will have to be negotiated. District incentives and early retirement may have to be re-evaluated and changed to meet changed circumstances. However, declining enrollments can be a new motivating force that will provide opportunities in education. With foresight, planning, and imagination, schools will benefit by new thinking and creative leadership to meet the demands of the times. (Author/MLF)

Identifiers-Landrum Griffin Act

Enacted in 1959, the Landrum-Griffin Act or Labor-Management Reporting and Disclosure Act was intended to attain maximum protection for the rights of individual workers within the union without undermining the union as an institution necessary for the existence of collective bargaining. Title I is the union members' bill of rights; titles II-VI regulate the internal practices of unions and require that union officals disclose and report certain information; and title VII contains amendments to the National Labor Relations Act. Over the past 20 years, courts have grappled with the problem of resolving the conflicting objectives of the members and the union while implementing the statutory purpose. In this study, the courts' stance on various issues that have arisen under the Landrum-Griffin Act is analyzed to determine how the courts have balanced the needs of members against the needs of the union. In addition, the role that the Department of Labor has played in the enforcement of the statute is considered, particularly with regard to elections and union funds. (Author/JM)

Identifiers-Linking Agents, Pennsylvania School Improvement Program

The Pennsylvania School Improvement Program (PSIP) was initiated to develop and demonstrate curriculum improvement strategies in basic skills areas at the local school level in cooperation with the Pennsylvania Department of Education and several research and development agencies. The PSIP process is a problem-solving method with five major steps: school visitation by the PSIP curriculum specialists, needs assessment, knowledge consolidation, product selection, and product implementation and evaluation. The process depends on the mediation of a linker, a curriculum specialist trained to help teams at the district level perform PSIP activities and obtain access to information and resources at the state, regional, and national levels. The activities coordinated by the linker are divided into 23 distinct modules, described in this document which is intended for use by those trained in the PSIP process. Information provided on each module includes purpose, objectives, expected outcomes, time and material requirements, activities, follow-up work, alternative strategies, and agendas. Master copies of handouts and transparencies used in the workshops and activities of each module are included. (Author/PGD)

Identifiers-*California

The purpose of this manual is to provide information regarding school finance reform in the state of California to the legislature, governor, education department, teachers, and other interest groups. Chapter 1 briefly describes disparities in expenditures for education among California school districts, first using a sample of school districts and then describing the state as a whole. Chapter 2 gives a basic explanation of California's education finance plan, which is designed to reduce these disparities. Also discussed are the major features of California's plan enacted in Senate Bill 90 and Senate Bill 1641. This chapter also shows how California's finance plan works, including how to determine the amount of state aid a district will receive for general purposes, how a district's expenditures are regulated, and how areawide aid provisions operate. Five appendices discuss the following: definitions of school attendance, increases in the foundation amount per pupil, state aid for teachers' retirement, adjustments to the revenue limit, and the adult foundation program. Identifiers-*Florida

This manual provides an introduction to the system of financing elementary and secondary education in Florida. School finance reform in Florida, the paper notes, has been considered a success primarily due to a grouping of conditions that created an atmosphere conducive to reform. Chapter 1 explains how the state's education finance plan operates and includes a discussion of categorical aid, another form of state aid. Chapter 2 shows ways in which the user can study the impact of the education finance plan on the raising and distributing of resources for education. The manual concludes that any disparities existing among Florida school districts seem to be related to the state's value judgment that some pupils and some districts have higher needs. Tables, formulas, and step-by-step exercises are provided throughout the document for users. (Author/LD)

Identifiers-Budget Caps, *New Jersey, *New Jersey Public Education Act 1975

This document is the second in a series of reports that measures progress to-date in making New Jersey's school finance system fairer to students and taxpayers alike. It examines change in the distribution of revenues and expenditures between 1975-76 and 1978-79, the equity of these distributions, how budget caps influenced these shifts, and the relationship between expenditures and the distribution of educational resources. These issues are examined in light of the negligible effect of the Public School Education Act of 1975. This act, the report states, was designed to meet the New Jersey Supreme Court's objections in Robinson v. Cahill that heavy reliance on local property taxes to pay for education was not producing the constitutionally mandated, thorough and efficient education for students. Several tables are included throughout the report. The appendices offer an explanation of methodology used and how the state aid formula operates. (Author/LD)

Identifiers-*School Planning Evaluation Communication System

The purpose of this study was to estimate the costs in both money and teachers' and administrators' time required to implement the School Planning Evaluation and Communication System (SPECS). The primary source of data was the SPECS field test site activities records maintained by the SPECS development team. Costs were calculated for each district. Overall, costs of installing the SPECS system were difficult to assess, and conclusions were tentative. Results revealed that the cost of conducting a systems analysis of a district may range from five person-days to several months, depending on the level of detail desired and the size of and complexity of the district. The cost of changing to a program budget will be high unless the district is very small or shares a system with other districts. The third component, made up of program planning, implementation, documentation, evaluation, and replanning, is the most intricate of the components and the one for which costs are the most difficult to assess. Implementation is the most costly phase of this component. Data on components four (community goal definition) and five (policy-making) are sketchy but the costs of implementing these components are not sizeable. A lengthy appendix contains details of cost analysis data and data analysis. (Author/JM)

Descriptors-*Adjustment (to Environment), Bibliographies, Definitions, Elementary Secondary Education, Group Behavior, Individual Differences, *Interdisciplinary Approach, Models, *Organization, Organizational Change, *Organizational Theories, Psychological Studies, Research Needs, *Schools, Social Science Research, Sociology, *Stress Variables

The purpose of this report was to consider factors that might be important for understanding how schools as organizations respond to environmental stress. Literature from psychology, sociology, education, and political science is reviewed and an attempt is made to integrate a diverse body of findings, using concepts from general systems theory and from stress research. A framework is presented that identifies variables of interest, suggests possible dynamic processes, and considers situational factors that facilitate and inhibit behavior. Some suggestions for the conduct of research are offered in the hope that future efforts to study schools as organizations would include concepts from psychology and sociology. (Author/MLF)

Identifiers-*South Carolina

This publication is an update and expansion of earlier studies on the legal organization and administration of school districts in South Carolina. The treatment of this topic progresses from the general to the specific and includes detailed data about the geographical, organizational, financial, and legal aspects of the topic. The report attempts to provide each district with some perspective of its organization as compared to other districts, and also to identify the legal base underlying the organization and administration of school districts in the state. Section 1 contains background information about school district organization and responsibilities, and state legislation affecting school finance. Section 2 consists of a 27-page table showing organization and administration by county, district, and area; number of persons on boards of trustees, and whether appointed or elected; authority for school taxes; limit of bonded indebtedness; and mills levied 1978-79. Section 3 has summary charts comparing districts that show geographical identification; fiscal status; and data about intermediate, local, and area boards. (Author/MLF)

Descriptors-*Administrative Personnel, Coping, *Educational Administration, Elementary Secondary Education, *Equal Opportunities (Jobs), *Females, *Leadership Qualities, *Role Conflict, Self Concept, Sex Discrimination

The lack of women in top administrative positions in education has often been dismissed as attributable to role conflict. The available research literature is examined to determine if there is evidence of role conflict, and, if present, if role conflict prevents women from functioning adequately as educational administrators. Three possible types of role conflict that may result when individual needs clash with normative standards and/or institutional expectations are personality conflict, role-personality conflict, and role-role conflict. Personality conflict is defined as occurring when aspects of an individual's personality are in conflict with other aspects of that same individual's personality. Role-personality conflict is the belief that women simply do not possess the personality traits necessary to perform the role expected of any administrator including that of any educational administrator. Role-role conflict for women is based on the assumption that women simply cannot handle two or more roles simultaneously. Styles of coping with role conflict are identified as role redefinition, personal reorientation to roles, and reactive role behavior. Role conflicts for women administrators do indeed exist; however, we can hardly conclude that this renders women less efficient or effective if they choose to make educational administration their major role in life. Identifiers-*New York City Board of Education

The aim of this research was to examine the response of large public organizations to financial resource reduction not accompanied by decline in the demand for services. The focus was 94 New York City public high schools that received substantial budget cuts in 1975-76 and 1976-77. Effects on mix of services and class structures were studied. All the data used in the study came from two reports published by the New York City Board of Education. Although there was wide variation among the schools, the net effect of the two cuts was proportionately greater cuts in administration and support than in instruction. Also in response to each budget cut, average class size was increased and the number of subjects taken by the pupils decreased. Regression analysis was used to examine the causes of variation in response among schools. The major conclusions were that responses to budget cuts will vary, depending on such factors as the characteristics of the organization and its clients. Results also suggest that methods of resource allocation designed for periods of stable or increasing resources may be inadequate during decline. (Author/JM)

Identifiers-*Womens Centers

The materials on program development presented here were originally developed as a component of a five-day training program of the Women's Educational Equity Project of the women's center at the University of Massachusetts, Amherst. The booklet's purpose is to provide users with explicit information on program planning and decision-making in a women's center or other organization. It begins by defining needs, including the process, importance, and ways of identifying needs. Whose needs to consider, when to identify needs, and criteria for writing a funding proposal are discussed in detail. Also discussed are program objectives and activities, including criteria for developing them and selecting methods. The document closes with a discussion of program evaluation. Rewards exist for incorporating at least some of these processes into a center's program planning, the booklet states. Benefits include preparation for defending a budget request and opportunities for liaison with groups sharing similar goals. (Author/LD)

Descriptors-Females, Feminism, Income, Operating Expenses, *Program Budgeting, Resource Allocations

Identifiers-*Womens Centers

The materials on budgeting presented here are based on training programs conducted for women's centers through the Women's Educational Equity Project of the women's center at the University of Massachusetts, Amherst. The booklet's purpose is to provide users with explicit information on developing and negotiating budgets for women's programs. Topics covered include kinds of budgeting (for example, incremental and zero-base), types of funds available, sources of funds to tap, and budgetary cycles. The final chapter offers suggestions on preparing the actual budget, including such topics as dealing with the political implications and promoting credibility. The appendix offers more specific guidelines to follow for budgeting effectively. (Author/LD)

This annual statistical report describes conditions in education and conditions in the larger society that affect education. Statistical data are presented on issues concerning educational institutions, participants, and personnel. The report is organized to reflect the characteristics of the educational system and its relationship to the larger society. The first section of this report describes trends and developments affecting education at all levels. Chapter 1 discusses such issues as the family, work, and the community in an effort to describe the societal context of education. Chapter 2 covers such facets of elementary and secondary education as enrollment, progress through school, school environment, and teachers. Chapter 3 examines postsecondary education, including occupational and adult education, and students, instructional faculty, and finance in higher education. In the second section of the report special topics have been selected for closer analysis. Chapter 4 looks at the financing of elementary and secondary education, chapter 5 examines outcomes of education, and chapter 6 explores the status of minorities and women in higher education. Identifiers-*National Center for Education Statistics

This report discusses the program and plans of the National Center for Education Statistics (NCES) for 1979-80. The publication provides an overview of the major program activities for fiscal year 1979 and plans for 1980. The center provides data to monitor trends in education and address key policy issues. These data are supplemented by special studies mandated by Congress or developed in response to a specific need. The NCES program is divided into two major activities. The education statistics program develops and maintains a core of education statistics on both institutions and individuals for monitoring trends in elementary secondary and postsecondary education and for providing information to address policy issues. The statistical services program develops and maintains a comprehensive program of services to maximize accessibility and usefulness of NCES education statistics. (Author/JM)

Descriptors-Biblical Literature, Court Litigation, *Curriculum, Elementary Secondary Education, Public Schools, *Religion
Identifiers-*Religious Studies

There is a great deal of confusion over the proper relationship of religion to education, and many people believe that Supreme Court decisions have forbidden any mention of God or religion in schools. However, court opinions and other legal statements make it clear that it is legal and desirable to teach about religion in the schools and that the proper role of religion in public schools is as education although not as religious observance. Over the last 15 years, there has been a steady growth of interest in teaching about religions at all levels. Local districts and state departments of education have developed religious curriculum guidelines and teachers have pioneered new units on religion. Several states now certify teachers for religious studies, and clearinghouses and dissemination centers on religious studies have arisen. Many new commercial materials suitable for public school teaching of religious studies have been developed. Many school programs described in this report focus on topics such as the Bible as literature or comparative religion. Descriptions and addresses of centers involved with the creation of religious studies instructional materials are also given. (Author/JM)

Descriptors-Advisory Committees, *Board of Education Role, Citizens Councils, Educational Improvement, Elementary Secondary Education, *Master Plans, *Program Planning, *School Role
Identifiers-*California, California Assembly Bill 65, School Site Councils

This document provides step-by-step instructions for completing a school district master plan. It can be used by administrative personnel to pull together those policies, procedures, and criteria that can enhance an effective working partnership between school and district. The document uses boldface, italic type to identify instructions set forth in California state laws (Assembly Bill 65), followed by a clarification of the intent of the requirements and suggestions of what to do and to avoid. Examples of topics covered in developing a master plan include providing the public with information on school improvement, considering school site councils, and serving students with special needs. One section of the handbook is devoted to developing strategies to assist schools receiving grants and all schools implementing consolidated application programs. The appendices offer suggestions to small districts and districts in cooperatives. Also, a composite guide is offered at the end for continuing development and review of a school district master plan. (Author/LD)

The Theory/Practice Public Administration Pilot Project at Medgar Evers College at the City University of New York attempted to develop a curriculum that would integrate theory and practice in public administration education. This publication contains the final evaluation report of the project along with the learning packages used in the program. The evaluation report explains the program and each of its competence-based areas: values underlying public policy; implementing statutory programs and policies; communicating public agency policies, plans, and practices; and analyzing and contributing to personnel relationships, systems, and practices. The report presents demographic, pretest, posttest, and attitudinal data. The demographic survey revealed that more than half the students in the program are female, and that the students are older than most college students and have rather low high school grades. Analysis of attitudinal data revealed very positive student attitudes toward the program. A comparison of pretest and posttest scores revealed dramatically significant student gains. The learning packages section of the document presents the program's broad objectives (called theory practice units) and the accompanying performance objectives (called components). Also included in the learning packages section are program curriculum materials, reading lists, syllabi, glossaries, examinations, and quizzes. (Author/JM)

Part 1 of a three-part report on fringe benefits in the schools, this study focused on 1977-1978 fringe benefits provided for school superintendents. Data were collected through a survey instrument mailed to a national sample of 1,877 public school systems. Data on leave provisions, group insurance programs, professional liability insurance, retirement plans, severance pay, tuition, reimbursement provisions, and payment of professional organization membership dues are presented. Additional information concerning payment of transportation and conference expenses, provisions for serving as a professional consultant outside the school system, and physical examination benefits are reported. Also, such basic data as superintendent's salary, contribution to a tax-sheltered annuity fund, and length and terms of present employment, as well as details on annuity policies provided by the school board, individual life insurance policies, expense account provisions, and payment of membership dues in civic and social organizations are included. Information is presented by state and in table form and analyzed by four enrollment groups, five pupil

expenditure levels, and eight geographic regions. (Author/JM)

Identifiers-Seattle Public Schools WA

The state of Washington is moving towards the assumption of the full costs of public school student transportation. This move has increased interest at the state level in transportation costs originating at the local district level. These costs have been relatively high in the Seattle school district, complicated by the city's geographic and demographic characteristics and traffic flow patterns. The city's ethnic and cultural diversity adds the difficulties of busing to achieve racial balance and to provide adequate bilingual education. Transportation costs projected for 1978-79 were $1,222 for each special education pupil, $420 per pupil in the desegregation program, and $351 per pupil for those transported because they lived over two miles from their schools. This document discusses these costs and other factors in Seattle's student transportation program, including the ramifications of the contracts with school bus and city bus companies. An addendum treats the rationale behind transportation decision-making in greater detail, using five examples from the Seattle district. (Author/PGD)

This study compiles summaries of the state legal standards governing public elementary and secondary education. The legal standards include state constitutional provisions, state statutory provisions, rules and regulations officially promulgated by either state boards of education or state departments of education, and less formal state administrative material. The summaries are organized by topic to facilitate cross-state comparison of the legal provisions in a variety of subject areas. The classification system has four main divisions. Section 1 concerns the distribution of powers, duties, and functions among educational officials, official bodies, and administrative units. Section 2 is divided into three categories: educational courses and programs, educational materials, and school property and facilities. Section 3 is concerned with the quality of the educational process and deals with such topics as accreditation, certification, and personnel evaluation. Section 4 concerns support services and other subjects collateral to, but often directly connected with, the educational process. Because the compilation uses summaries rather than full texts of the legal provisions, it cannot be used to determine the precise requirements of the law in any setting. (Author/IRT)

Descriptors-Career Education, *Educational Quality, *Experiential Learning, Learning Experience, Participant Satisfaction, Secondary Education, *Student Opinion
Identifiers-Experience Based Career Education

Reforms suggested in several major national assessments of secondary education have led to the development of a number of experiential, community-based programs for secondary students. Experience-Based Career Education offers such programs to over 15,000 students in all 50 states. Of these, 218 students from five states were administered an Experiential Learning Questionnaire developed using the critical incidents method, open-ended questions, and rating scales based on propositions derived from Social Learning Theory. The questionnaire revealed what the students regarded as the qualities distinguishing excellent learning experiences from those generating little learning. Among demographic variables considered in the testing process, only sex showed consistent discrimination among responses. Results indicated that opportunities for assuming personal responsibility and for learning things not previously anticipated, as well as the existence of informal rather than formal relationships with adults at the field experience site, were marked characteristics of high level learning experiences. This document concludes with several recommendations concerning program design, the role of the community resource person, and future research. (Author/PGD)

Descriptors-*Administrative Organization, Administrative Personnel, Career Ladders, Career Opportunities, Educational Administration, Elementary Secondary Education, *Occupational Mobility

Identifiers-Michigan

An organization's employees can usually expect certain kinds of changes in their positions during the course of their careers. Careers usually begin in entry positions from which employees are promoted once sufficiently trained. Other positions are notable as positions for objective analysis of the employee's potential. Performance in such positions determines whether the employee advances in the hierarchy or is shunted off to a plateau position where little advancement can be expected or to an exit position from which the employee leaves the organization. A study of job histories over a five-year period (1968-73) for all of Michigan's public school employees except clerical and janitorial personnel permitted identification of public school career patterns. Supplemental data concerning the characteristics of the school systems and the populations of their districts helped in the description of these career patterns. Analysis revealed three basic career paths, described in some detail in this document. One path leads from the position of instructional/curricular supervisor through central office positions to the superintendency. A second path leads to the superintendency through secondary school administration. The third path leads to the principalship of the elementary school and rarely further. (Author/PGD)

A Model of the Dynamics of Bargaining with a Case Study in Education.
Pub Date-6 Jun 79
Note-20p.; Paper presented at C.S.S.E. Conference (Saskatoon, Saskatchewan, June 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143) - Reports - Evaluative (142)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Case Studies, *Collective Bargaining, Elementary Secondary Education, *Mathematical Models

This document describes and discusses a mathematical model of the dynamics of bargaining. The model was designed to show the development of the bargaining process and to provide a means by which a prediction may be made with respect to settlement or stalemate. Allowing for multiple goals of the bargaining parties and changing weightings of those goals permit the model to portray the dynamics of bargaining better than more complex models that depend on rational development of single-goal packages. A test of the model in an actual bargaining situation indicated its potential utility. By requiring comparative weightings of the issues under negotiation, use of the model encourages a less intuitive process than is typically the case. The outcome of each round of negotiations is reduced to a set of figures that can be valuable to a mediator, should one be called in. Following sufficient testing of the model, it may be possible to draw a theory of bargaining dynamics from the information gathered. (Author/PGD)

This booklet explains a program of discipline and suspension for students who come in conflict with school policy. The Alternative Discipline and Suspension Program (ADSP) operates in an environment of strict adherence to set rules where a student must earn advancement through and eventually out of ADSP back to regular classroom attendance. This booklet explains the basis of the program accumulating points and the four phases, which include a final phase of transition back to the classroom. Criteria listed for referral to ADSP include infractions such as theft, drug use, and truancy. Rules and regulations for the alternative program are listed, and a fill-in evaluation form is included at the end. (Author/LD)

Identifiers-*Assembly Bill 65 (California 1977), California, *Proposition 13 (California 1978), Serrano v Priest

This paper, number 18 in a series, chronicles the politics of school finance reform in the state of California from the mid-sixties to the passage of Proposition 13. It provides a description of the school finance setting prior to the consideration of Assembly Bill 65, including such events as the Serrano I and II decisions and the state legislature's first response to the court mandate, Senate Bill 90. The major focus of the paper is the process by which AB 65 evolved from a series of proposals through the committees and floors of the two chambers into law. The final section of the paper examines the modifications caused by Proposition 13 on the school finance system in California. (Author)

Descriptors-Congenitally Handicapped, *Downs Syndrome, *Etiology, *Fathers, Genetics, *Heredity, Mentally Handicapped, *Mothers, *Parent Role

Identifiers-*Chromosomes

The paper refutes the long held belief that Down's syndrome is the result of maternal age and maternal etiology. The author cites new evidence which demonstrates that Trisomy-21 (the presence in the chromosome of an extra arcocentric chromosome resulting from non-disjunction), the major cause (95% of the cases) of Down's syndrome, can originate in the egg or the sperm. Maternal origin was indicated in 74% of the cases and paternal origin was indicated in the 26% of the cases reviewed in the paper. The author concludes with a study of 37 college texts dealing with exceptionality (published between 1970-1978) reviewed for etiological considerations of Down's syndrome. Among findings of the review was that of the 35 texts which mention Trisomy-21, 26 include information regarding maternal origin and maternal age dependency. (Author/PHR)

Descriptors-*Changing Attitudes, *Handicapped Children, *Learning Activities, *Role Playing, *Simulation, Teaching Methods, Workshops

The manual presents activities designed to allow individuals to experience the sensations, feelings, attitudes, limitations, and perspectives of handicapped persons. The first section details aspects of workshop planning, including a review of experiential learning theory, information on group structure, group size, physical setting, workshop leadership, and activity schedules (sample flow charts); and guidelines for workshop publicity, followup discussions, and evaluation. A workshop planning checklist is provided. The second part of the book presents 26 structured exercises designed to simulate the following types of handicaps (sample exercises designed to simulate the following types of handicaps (sample exercises in parentheses): visual handicaps (walking with a mask on and a sighted helper); aural handicaps; (an unfair hearing test); mental retardation (reading made uneasy); communication disorders (communication without spoken words); learning disabilities (mirror writing); and motor/orthopedic handicaps (walking with sticks to experience long leg braces). Four exercises address reactions to general handicapping conditions. Role playing ideas are presented to examine a handicapped child's first day in a regular-class and to view people's reactions to a handicapped person in a social situation. Suggestions for community experiences complete the manual. (CL)

The document is comprised of objectives and information on step-by-step tasks for instruction of trainable mentally retarded students and for development of individualized education programs. Each objective includes information on materials, behavioral criteria, and a chart to assess task analyzed steps. Four main skill areas are covered (sample instructional objectives in parentheses): communication (verbal and nonverbal expression, pre-reading, reading, and writing); daily living skills (self feeding, putting on and taking off clothes, fastening clothes, washing hands, toileting, grooming, cleaning, and table setting); motor skills (drawing, pegboard tasks, working puzzles, balancing, imitating gross motor movements, and handwriting); and quantitative skills (counting, addition, subtration, telling time, counting change, and managing money). Descriptors-*Behavioral Objectives, Games, *Leisure Time, Mentally Handicapped, *Physical Activities, Recreation, *Recreational Activities, Skill Analysis, *Task Analysis, *Trainable Mentally Handicapped

Designed to meet the need of trainable mentally retarded persons for recreation skill training and for opportunities to experience leisure/social skill development in a community setting, the packet provides task analysis information on 114 activities. Information is provided on behavioral objectives, basic skills required, materials and procedures, task steps, teaching hints or game variation, and a grid sheet of analyzed steps for each skill. Activities are classified according to the following seven types (sample activities in parentheses): ball activity (volleyball and ball tag); active games (pin the tail on the donkey, ping pong, and tossing games); music; card games (solitaire); skill activity (pick up sticks and ball rolling); table games (silly sandwitch, checkers, and tic tac toe); and active circle games (ring around the rosie). Descriptors-Auditory Perception, Cognitive Development, Elementary Education, Emotional Development, *Evaluation Methods, *Handicapped Children, Language Development, Motor Development, Preschool Education, *Screening Tests, Speech, *Test Selection, Visual Perception
Identifiers-*Project SEARCH (Minneapolis), Self Help Skills

The directory includes descriptions of over 130 developmental screening instruments for preschool and elementary aged children. The first section provides background regarding the development and use of screening programs, including the legal and social implications of screening. The second section discusses the criteria (administration, population, measurement, and test selection) to consider in the selection of a screening instrument. The final section contains information on specific screening devices in the following developmental areas: social/emotional, language/cognition, speech and articulation, fine motor, gross motor, visual reception, auditory reception, and self-help skills. Appended are a tabular summary of all instrument described in the directory and information on the SEARCH (Special Education and Related Child Health) Literature File on Screening. (PHR)

Descriptors-Data Collection, Elementary Secondary Education, Evaluation Methods, *Home Instruction, Mentally Handicapped, *Outreach Programs, Parent Education, *Parent Participation, *Parent School Relationship, Parent Teacher Conferences, *Trainable Mentally Handicapped
Identifiers-*Project SEARCH (Minneapolis)

The paper provides guidelines for establishing an outreach program to increase communication and skill development of trainable mentally handicapped students (ages 5-16 years) based on the Project SEARCH (Special Education and Related Child Health) program at the Emerson School (Minneapolis, Minnesota). Following an introduction, meetings between parents and staff, and the data recording system (for noting student progress, parent teaching time, and teacher contact time) are outlined. The organization and scheduling of home visits and parent instruction are detailed. Methods for evaluating the program's effectiveness are discussed, as well as solutions to problems that arose during the course of the project. Among the extensive appendixes are tables of outreach objectives, recording forms, guidelines for determining the amount of direct service to parents, parents' surveys, and teacher evaluation forms. Descriptors-Clinical Diagnosis, Educational Programs, *Educational Trends, Elementary Secondary Education, *Foreign Countries, *Learning Disabilities, Neurology, *Program Development, Psychiatry, Reading Difficulty, *Spanish Speaking, Teacher Education
Identifiers-*Chile

The paper focuses on the growth and development of special education for learning disabled children in Chile with particular emphasis on the contribution of child psychiatry and pediatric neurology departments of hospitals and the contribution of universities in training specialists. Initial sections provide a background on primary education in Chile and a review of socio-cultural characteristics which affect the types of problems encountered in special education in underdeveloped countries. A third section outlines the history of special education in Chile. A final section describes the functioning of the special education system in terms of diagnosis and rehabilitation of learning problems, a case study of a child with reading problems, methods of diagnosis and evaluation, and research in such areas as teaching reading and clinical investigations. A growing interest in diagnosis, treatment, and research in reading problems is attributed to high incidence of early school failure and lack of research on and materials for Spanish learning disabled students. Case Study of the Implementation of P.L. 94-142: Preliminary Findings Summary.

Education Turnkey Systems, Inc., Washington, D.C.
Pub Date-30 Jun 78
Note-76p.; Contains some small print
Pub Type- Reports - General (140)
EDRS Price - MF01/PC04 Plus Postage.
Descriptors-Due Process, Evaluation Methods, *Federal Legislation, *Handicapped Children, Identification, Individualized Programs, Mainstreaming, Parent Participation, Rural Urban Differences, *State Departments of Education, Student Placement, Suburban Environment
Identifiers-*Education for All Handicapped Children Act, *Local Education Agencies

The paper discusses the activities and processes by which the local education agencies (LEAs) are implementing the provisions of Public Law 94-142 (Education for All Handicapped Children Act) and describes and analyzes the consequences which occur at the individual LEA/community level. The preliminary findings of a series of nine case studies of LEAs in rural, suburban, and urban settings in three states are presented. After reporting the general findings, the paper explores the activities and consequences of the major provisions of the law (childfind efforts, individualized educational plans, evaluation, placement, due process and parent involvement, and least restrictive environment). Processes and consequences common to all states and those unique to one setting are related. The process dynamics of implementation at the LEA level are explored. Appendixes include State Education Agency and LEA descriptive information, summary descriptions of the case studies, activities and study methodology, and summary tables of the consequences. (PHR)

The Behavior Observation Scale for Autism (BOS): Factor Analysis of Behaviors.

California Univ., Los Angeles. Dept. of Psychiatry.

Spons Agency-California Univ., Los Angeles.; National Inst. of Mental Health (DHEW), Rockville, Md.

Pub Date-Aug 78

Grant-MH-29248; Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Autism, Behavior Patterns, *Behavior Rating Scales, *Clinical Diagnosis, Early Childhood, *Exceptional Child Research, *Factor Analysis, Identification, Infancy, Mentally Handicapped, *Observation

Identifiers-*Behavior Observation Scale

Data on 36 autistic, 30 mentally retarded (MR), and 22 normal children (23-65 months old) was collected to develop a method of objective behavioral assessment for diagnosing autism and documenting symptom changes over time. Ss were observed and rated on the Behavior Observation Scale, an instrument which contains 67 objectively defined behaviors in the areas of general behaviors, language, response to stimuli, attending response, response to being held, inappropriate response to pain, and motility disturbance to stimuli. Factor analyses were performed for each diagnostic group. When the individual groups were examined, the autistic group could best be characterized by behaviors reflecting inappropriate interaction with people and objects; the MR group could best be characterized by solitary behaviors; and the normal group behavior could best be characterized by appropriate interactions with people and objects. (Operational definitions and procedures are detailed, and factor analyses of the preliminary data on 89 children are reported.) (SBH)

Hasazi, Susan E.

Relationship of Demographic and Interpersonal Factors to Consultant Effectiveness.

Pub Date-Apr 79

Note-19p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April, 1979) ; Page 19 marginally legible

Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Community Characteristics, *Consultants, Elementary Secondary Education, *Exceptional Child Research, *Handicapped Children, Resource Teachers, *Success Factors, *Teacher Characteristics

A study involving 42 special education consultants was conducted to determine the contribution of selected consultant characteristics and community demographic variables to the effectiveness of special education consultation. A review of the literature revealed that the consultant effectiveness is a function of multiple factors involving both consultant and community characteristics. Eight measures of consultant effectiveness were used in the study, including the number of children served, number of programs developed per child, and mean academic gain of children. Three stages of the consultation progress were considered: contact or referral, program implementation, and outcome or program effectiveness. Among findings were that the referral stage seems to be influenced primarily by community demographic variables and the consultant s integrative complexity and years of experience; that the mode of program implementation is a function of socioeconomic factors, as well as consultant teaching experience and interpersonal behavior; and that academic gain is influenced most strongly by consultant interpersonal behavior. (SBH)

A Look at the Memory Performance of Retarded and Normal Children Utilizing the Levels of Processing Framework.

Pub Date-Apr 79

Note-77p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April, 1979, Session 24.07)

Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors-*Attention, *Cognitive Processes, *Educable Mentally Handicapped, Elementary Education, *Exceptional Child Research, *Memory, Mentally Handicapped, Recall (Psychological)

Memory performance differences of mental age matched (9-12 years) educable mentally retarded (EMR) (n 56) and normal (n 56) children were examined in two experiments using the F. Craik and R. Lockhart levels of processing framework. In experiment 1, Ss were randomly assigned to an incidental, intentional, or planned intentional learning condition, to determine the effect on recall, as well as to explore metamemorial abilities and memory strategy usage. In experiment 2, heart rate was additionally recorded during task performance (incidental condition) to examine the possibility of an attention deficit affecting EMR performance. Although all Ss displayed recall improvement over levels and learning conditions, the generally inferior performance of EMRs did not appear to be due to attention deficit. (SBH)

Identifiers-*Multiple Talent Teaching

The result of a research conference, the document contains a collection of short studies and implementation experiences of leaders in the field of multiple talent teaching. Contributors represent 12 states: Alabama, Florida, Idaho, Illinois, Iowa, Kentucky, Minnesota, New Hampshire, Texas, Utah, Wisconsin, and Wyoming. Each presentation generally touches on six points: (1) how their program was started and when and how financed; (2) coverage of teachers, schools, districts, etc.; (3) evaluation measures and findings assessment of success and failures; (4) contributions made to Multiple Talent Teaching; (5) recommendations to those interested in adopting teaching for multiple talents; and (6) prospects and issues ahead. Among the programs considered are Project Impact, Project Implode, Talents Unlimited Project, Project Reach, and Teacher Corps Project. Entries include the following: ``New Measures Relevant to Talent-Focused Education'' (R. Ellison); ``Talents Unlimited in Pre-Service Education'' (C. Schlichter); ``Eleven Multiple Talent Elementary Schools'' (B. Thomas); ``A Teacher Corps Project on Multiple Talents'' (J. Hainsworth); ``Idaho's Awakening to Multiple Talent Teaching'' (W. Freeman); ``Underlying Bases of Multiple Talent Teaching'' (C. Taylor); and ``A Theoretical Model for Training of Multiple Talent Teachers (J. Juntune and L. Worthley). (SBH)

Psycho-Educational Intervention: Implications for Learning and Delinquency.

Coney Island Hospital, Brooklyn, N.Y. Psycho-Educational Div.

Pub Date- 77

Note-16p.

Pub Type- Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Attendance, *Delinquency, Exceptional Child Research, Followup Studies, *Intervention, *Learning Disabilities, Literacy, Program Effectiveness, Reading Ability, *Reading Instruction, *Remedial Instruction, Therapy

The follow-up study of 47 learning disabled children (mean age 9 years when first interviewed) focused on current reading ability, school status, and involvement with the police. The Ss had all attended a clinic for 2 1-hour sessions weekly for periods of from 5 months to 2 years. The Ss also participated in therapy groups and crisis intervention. At the time of the follow-up study the Ss' mean age was 15 years, and they had all been separated from the clinic for at least 2 years. Findings showed that none of the Ss had had a major encounter with the law, 81% were now functionally literate, and all were either in school or in paid employment. The results indicate that learning remediation may have an effect on the student that far transcends reading improvement, as the projection for this population without intervention is that approximately 1/3 would have had encounters with the law for antisocial behavior. Descriptors-Attitude Tests, *Educational Diagnosis, *Educational Objectives, *Educational Planning, Elementary Secondary Education, *Gifted, Learning Activities, *Performance Criteria, *Program Evaluation, Self Concept Tests, Tests

The guide is designed to assist administrators and teachers at the school site level in planning and carrying out evaluation of their gifted programs. After an overview, the importance of instructional objectives is discussed, including the components of measurable performance objectives. The selection of educational activities is explored and criteria for assessing the qualitative difference of the activities is outlined. The use of measurement instruments and sources of evaluation data are presented. Various types of tests, such as teacher-made tests, department, school, or district-wide tests, and norm-referenced tests, are defined. Problems and methods of measuring attitudes and self concept are explored. The use of the written plan (the format for stating the objectives, activities, and evaluation of the program) is explained. Appended are a list of sources of information, a partial list of measurable factors available in most school settings, performance objectives for the 1975-6 program, a sample of the written plan, a sample evaluation of the written plan, and sample evaluation instruments. Descriptors-*Administrator Responsibility, Elementary Secondary Education, *Gifted, *Management, Models, *School Services, State Standards, *Teacher Responsibility

The manual is designed to help educational personnel handle day-to-day responsibilities and managment of programs for the gifted in the San Diego City schools. The first section explores program maintenance and describes services, identifies departmental sources, and offers suggestions for optimum use of services. The second and third sections suggest means of providing the programs within parameters imposed by state requirements and give examples of models available to sites and guidelines for completing each section of the written plan and evaluation forms. The fourth section covers procedures for the expenditure of site funds. The following three sections are for individual site use (headings are provided for the written plan, the budget, and site plan evaluation). The eighth section is a compilation of selected resource material. The final section contains selected bibliographies, including professional references for educators, parents, and references on the disadvantaged gifted. Also included are abstracts of selected materials on curriculum for the gifted and talented. (Author/PHR)

Pub Type- Reports - Descriptive (141)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-*Activities, *Discussion Groups, *Gifted, *Leadership Responsibility, Secondary Education

The booklet explains the activities of a Think Tank Day designed by the staff, gifted students, and parents of Pasadena High School to focus on what leaders could do for their school. After outlining the design of the day and briefly describing the movie which was presented to stimulate discussion, a list of 37 ``boxes'' people at the high school get into (such as peer group pressure and apathy) and a list of 28 ways to get out of the boxes (for example give teachers more money to enliven classes) are provided. It is explained that the students also made lists of the things they were proud of about the high school, and then brainstormed on five topics (ways to increase communication between students and others, ways to turn students on to learning, ways to turn weary faculty on, ways to increase participation, and ways to decrease apathy). The author states that the final activity of the day was preparing lists of practical suggestions to improve the school (such as establishing a student jury system and getting the uninvolved involved). EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Autism, *Behavior Change, *Behavior Problems, *Downs Syndrome, *Exceptional Child Research, *Operant Conditioning, *Positive Reinforcement, Preschool Children

In a study of behavior modification two Down's syndrome preschool children, the first a 5-year-old boy with autistic behavior patterns and the second a 4-year-old girl whose behavior problem was to reject other children, were examined. The first S was engaged in ball catching activities with a teacher with positive reinforcement (playing the S's favorite music) for returning the ball to the space between the teacher's legs. The activities lasted for a 1-year period, at which time the S was actively playing catch with his teacher. Among conclusions were that the S's autistic behavior patterns were remarkably modified and the reinforcement function was verified. The second S was engaged in trampoline play with a teacher and the first S. Positive reinforcement (praise, physical contact) was given for target behaviors (such as laughing, giving the first S a toy, or touching him). Results after 20 sessions showed that the second S's approach behavior had changed considerably. (Tables of S responses are included.) (PHR)

The transcript of a four-part radio program on learning disabilities (LD) focuses on issues involving the definition, identification, and education of LD children. Definitional concerns are voiced by J. Gallagher, S. Kirk and S. Richardson. Controversy over prevalence estimates is discussed. Teachers of LD children comment on effective identification and education strategies for dyslexic and LD students. Teacher training is examined by M. Frostig and J. Gallagher. Reactions of an LD elementary student and an LD adult are cited. Other topics covered include reading and emotional problems of LD students, dangers in labelling children LD, and the teacher's role in working with LD students. (CL)

Identifiers-*ACCEPT Model

The paper describes the ACCEPT'' (A Community and Career Education Process for Training the Handicapped) Model, designed to deliver career education services to lower-functioning handicapped children (trainable mentally retarded, moderately multi-handicapped, and variations of functional retardation regardless of primary disability) ages 3-21 years. The model is explained to have five major components comprehensive needs assessments of target populations, design of coordinated training and awareness models, implementation of training and awareness models, development of mechanisms for coordination of available community resources, and dissemination of the results and model processes of the project. Sections address the following areas: populations to be served, review of previous efforts, 14 major objectives of the model (presented in table form) with subordinate objectives and activities), staffing at three levels (administrative, program, and secretarial), staff development, record keeping systems, identification and assessment of handicapped children, instructional intervention, (an essential element being the use of intensive task analysis techniques), parent-family participation, and dissemination. Descriptors-*Academic Achievement, *Academically Gifted, *Creativity, Elementary Education, Longitudinal Studies, Program Effectiveness, Program Evaluation, *Self Concept, Social Relations, *Student Attitudes, *Talented Students

The paper summarizes a 3-year longitudinal study of a differentiated education program for elementary students with exceptional academic and arts abilities. It is explained that three program options were examined (interest activities outside the regular classroom, curriculum area learning centers, and enrichment). Analyses of pre- and posttests on the SRA Achievement Tests, Torrance Tests of Creative Thinking, Piers-Harris Children's Self-Concept Test, and FIRO-BC, as well as self-reported attitude scales and parent and teacher surveys are reviewed. Presented are findings on the program's effect on the following aspects (sample findings in parentheses): academic achievement (the performance of Ss improved beyond the expectations of normal maturation and development); creativity (Ss had meaningful growth in creativity during their participation in the program); social relations (the program had little or no effect on the social relations of Ss); self concept (Ss had slightly higher scores on the self concept scale than the general population); and attitude toward school and learning (there was a net change in the direction of a more positive attitude toward school and learning. Descriptors-Educational Programs, *Foreign Countries, Low Vision Aids, Medical Treatment, *Rehabilitation Centers, Technology, *Visually Handicapped

Identifiers-Sweden, *USSR

The document reports on a 10-day tour to study rehabilitation facilities for the visually handicapped in the Soviet Union. Briefly described are the programs of the following institutions that were visited: Helmholtz Institute of Opthalmology, Specialized School Number 5 for Partially Sighted Children, Scientific Research Institute of Defectology, and the All Russian Society for the Blind. Experiences are considered in terms of the blindness system, low vision aids, medical rehabilitation, and research and development on technical aids and job situations. Differences and similarities between the Soviet Union and Sweden are mentioned. (SBH)

Identifiers-Filial Therapy

The paper describes a collaborative project carried out with staff of an IIWAS (Individual Instruction with Augmented Staffing) classroom and clinical staff of IJR (Institute for Juvenile Research) to provide educational and mental health services to 16 Black inner city children (10-12 years old) with low academic achievement and a variety of behavioral difficulties and symptomology. Goals of the program are outlined as demonstration of a model in which traditional treatment services and an academic program are coordinated in a public school, in which teacher and parent form a joint partnership aimed at enhancing the child's academic growth with the mental health clinician as a consultant to the teacher, and in which filial'' therapy is used to reengage the parents with their children. The presentation covers the following general areas: general descriptive material necessary to identify the special classroom, community and participants and an explanation of the program rationale; specific developmental stages of the program; techniques utilized to engage unmotivated'' parents in the academic process; the treatment modalities utilized to enhance and support emotional growth in a public academic environment; and the working relationship between teaching and clinical staff. Descriptors-Autism, *Developmental Disabilities, *Federal Legislation, *Federal Programs

Identifiers-Congress 95th, *Developmental Disabilities Act

The document contains transcripts of the Congressional hearings on the Developmental Disabilities Act Amendments [illegible]978 (H.R. 11764), legislation designed to improve and coordinate provision of services to the developmentally disabled. Presented along with the text of H.R. 11764 are the texts of H.R. 278, H.R. 2151, and H.R. 10059 (all part of the Autistic Children Research Act). Statements from the following individuals are among those give (affiliation in parentheses): Mary S. Akerley (past president, National Association for Autistic Children); Roy V. Bruninghaus (executive director, North Carolina Council on Developmental Disabilities); Robert R. Humphreys (commissioner, Rehabilitation Services Administration); Norman V. Lourie (chairman, National Task Force on Developmental Disabilities); Richard Schiefelbusch (American Association of University Affiliated Programs for the Mentally Disabled); and Richard E. Verville (counsel, National Easter Seal Society for Crippled Children and Adults). Also provided are additional materials which include a summary of service network plan year objectives and associated implementation activities; national projections of the total number of developmentally disabled to be served for fiscal year 1978; Being Disabled in America'' (a concept paper by R. Humphreys; and a statement submitted by the National Association of Private Residential Facilities for the Mentally Retarded. (SBH)

Identifiers-Parent Resources

Intended for parents and teachers of the physically handicapped, the booklet reviews the present clothing picture and provides suggestions for solving clothing and dressing problems. In an initial section addressed to parents the chapters cover the need for children to function independently, selection of the person and timing for training in self-dressing, and guidelines for meeting the clothing and dressing needs of the child. The next group of chapters includes sections with the following headings: why are clothes important to a child; what kind of clothing should you and your child select; what size do you buy; what fabrics do you buy; will it wear well; and what are the child's needs (regarding underwear, footwear, sleepwear, tops and bottoms, dresses, outerwear, swimwear, and helping children help themselves). A final section offers tips for teaching dressing skills and suggestions for easier dressing. A list of readings and resources on aids to independent living for the handicapped is also included. Illustrations are provided throughout the booklet. (SBH)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Adjustment (to Environment), *Behavior Rating Scales, *Classification, *Handicapped Children, *Mentally Handicapped, Student Placement, Testing Problems, *Test Validity
Identifiers-*Adaptive Behavior Inventory for Children

The paper reviews and critiques the Adaptive Behavior Inventory for Children (ABIC) from the perspective of its utility in the assessment of adaptive behavior for special education eligibility. It is explained that the ABIC, a parent interview consisting of questions about a child's home and community activities, has recently been normed and used on a sample of low-income Mexican American children in the Corpus Christi Independent School District (CCISD). The paper focuses on a thorough investigation of the problems encountered by CCISD in using the ABIC for classification of children as mentally retarded. Problems and limitations of the ABIC for classifications of children as mentally retarded. Problems and limitations of the ABIC are pointed out for two major areas: failure to take into account environmental factors which may affect the acquisition of adaptive behavior, and structural characteristics which inhibit the usefulness of ABIC scores. These problems, as well as theoretical and philosophical issues, are used to support the contention that a new adaptive behavior instrument is needed. (Author/SBH)

Descriptors-Administration, Elementary Secondary Education, *Exceptional Child Research, *Handicapped Children, *Program Evaluation, *School District Autonomy, *State School District Relationship

Identifiers-*New York (Bronx)

Interview data were obtained from teachers, principals, and parents of children with special needs, as well as from supervisors and executive officers of parent advocacy and/or provider groups, to study the Bronx, New York, Special Education Regional Office (BRO). Three program areas were investigated: management, communications and liaison, and program development and supervision. Among findings were that BRO appears to utilize its resources to obtain accurate student data and to maintain constant audits on class attendance; that BRO is aggressive in moving classes, in consolidating classes, obtaining and using adequate space in school buildings, and in general, in fighting to bring more resources to the Bronx; and that where direct comparisons were made the BRO performed better than the still largely centralized Bureaus. Findings led to a proposal that the Division of Special Education, functioning through field offices, become the financier, auditory, advocate, and standards developer for children with special needs while local districts be charged with the responsibilities for day-to-day operations of programs for all children including those with special needs. (SBH)

Descriptors-*Administration, Elementary Secondary Education, *Exceptional Child Research, *Handicapped Children, *Program Evaluation, *School District Autonomy, *State School District Relationship

Identifiers-*New York (Bronx)

The report documents the findings of a pilot project in which teachers, principals, parents of special needs children, supervisors, and executive officers of parent advocacy and/or provider groups were interviewed to investigate the organizational effectiveness of the Bronx (New York) Special Education Regional Office and to determine its applicability to other boroughs in New York City. Chapter 1 reviews the study design, purposes of the study, organization of the BRO, and procedures (including study limitations, data collection, and data analysis). Outlined in a second chapter are findings related to the accuracy and ease of data collection, placement of students, management (in areas which include transportation, space, and resource distribution), communication/liaison (between such groups as supervisors, principals, teachers, and parents), and program and personnel development. A final chapter offers recommendations in six areas: (1) increased classroom and clinical support personnel for special education students, (2) more thorough and rapid evaluation and placement procedures, (3) more equitable funding and resource distribution (given directly to schools or carefully monitored to insure appropriate use by districts), (4) greater communication with school and community persons, (5) teacher training, and (6) greater parent involvement in their children's educational program. Among appendixes are a report on development of interview schedules and questionnaires, sample interview forms, a description of the sampling procedure, and statistical data on the distribution of students by handicapping condition and race. The Hemispheric Specialization Construct. Developmental and Instructional Considerations for Creative Behavior.

Pub Date-Apr 79

Note-27p.; Paper presented at the National Association of School Psychologists (San Diego, California, April, 1979)

Pub Type- Information Analyses (070) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-Cerebral Dominance, *Creative Development, *Creativity, Creativity Tests, Elementary Education, *Lateral Dominance, *Neurology, *Teaching Methods

Research relating to the relationship between hemispheric specialization and creativity is explored with particular emphasis on implications for elementary education. Physiological and psychological evidence is examined for the construct that hemispheric specialization means that the two hemispheres of the human brain are specialized for different modes or styles of information processing. Information is provided about a new creativity test which incorporates into its rationale the notion of hemispheric specialization. Finally, recommendations are made about how to achieve desirable cognitive and affective instructional outcomes. It is suggested that teachers should strive to develop in their students both left-hemisphere and right-hemisphere information processing skills; that elementary education programs provide opportunities for guided discovery and nonverbal (visual-motor and tactile) expression; and that teachers should encourage students to generate new and efficient strategies for information gathering, concept formation, and problem solving. Descriptors-*Developmental Disabilities, Evaluation Methods, *Federal Legislation, *Handicapped Children, Individualized Programs, Models, Norms, *Program Evaluation, Research Methodology, *Research Problems, *Research Utilization
Identifiers-*Developmental Disabilities Bill Rights, *Education for All Handicapped Children Act

The paper compares evaluation requirements established under P.L.

94-103 (Developmental Disabilities Assistance and Bill of Rights Act) and P.L. 94-142 (Education for All Handicapped Children Act). The correspondence of the requirements to traditional evaluation models is noted, and obstacles to implementation of the evaluation procedures are detailed. The nature of requirements for individualized education programs (P.L. 94-142) and individual habilitation plans (P.L. 94-103) is examined, and problems arising from the suggested use of normative models for program evaluation are discussed. Among reasons given for the impracticality of the norm based model are the limited availability of normative measures for low functioning or deviant subpopulations and the occurrence of unusual developmental patterns in handicapped individuals. The under utilization of social program evaluation data is explored and the political nature of evaluation information is discussed. (CL)

Descriptors-Academic Achievement, Age, *Community Characteristics, *Consultation Programs, *Exceptional Child Research, *Handicapped Children, Models, State Programs, Success Factors, Teacher Characteristics
Identifiers-Consulting Teacher Model, Vermont

To determine the relationship of characteristics of the consulting teacher model to measures of school achievement, special education for 1,628 children in 42 Vermont sites was examined through a stepwise multiple regression analysis of 17 variables descriptive of service, teaching, community, and school achievement. Service variables included child age and prior learning. Teaching variables included proportion of in-class instruction, amount of instruction, size of child caseload, and size of teacher caseload. Community variables included income, years of schooling and tax effort of community members. School achievement variables included gains in math, reading, and academic performance as well as proportion of instructional objectives achieved. Results indicated negative relationships of proportion of in-class instruction and size of teacher caseload to school achievement. Positive relationships were revealed for amount of instruction, child age, and consulting teacher self-rating to school achievement. (CL)

Four Approaches to Classification of Mental Retardation.

Pub Date-Sep 78

Note-24p.; This is a revised version of the Paper ``Effects of Four Assessment Approaches on a Special Education Population,'' presented at the Annual Meeting of the American Psychological Association (Toronto, Canada, September, 1978); Pages with tables may not reproduce well due to smudged background

Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Adjustment (to Environment), Blacks, *Classification, Cultural Pluralism, Educable Mentally Handicapped, *Evaluation Methods, *Exceptional Child Research, Intelligence Tests, *Mentally Handicapped, Mexican Americans, *Minority Groups, Nondiscriminatory Education, Psychological Tests, Psychometrics, *Socioeconomic Influences, Test Bias, Trainable Mentally Handicapped

Four approaches to the classification of 110 students as mentally retarded were investigated. The frequency of classification of educable mentally retarded (EMR) and trainable mentally retarded (TMR) and nonretarded (NMR) Ss from three racial-ethnic groups (Anglos, Mexican Americans, and Blacks) and two socioeconomic groups (middle and low) was compared. Classification approaches included the full scale IQ approach; the psychometric approach which involves multiple criteria and multiple tests; the pluralistic approach which uses J. Mercer's Estimated Learning Potential (ELP) to adjust Wechsler Intelligence Scale for Children - Revised IQ scores; and the adaptive approach which incorporates the traditional psychometric tests and the Adaptive Behavior Inventory for Children. Results indicated that the adaptive behavior approach classified the fewest students as mentally retarded at both levels (EMR, TMR), while also declassifying the most students as not mentally retarded. The pluralistic approach classified fewer students as EMR or TMR than the modified psychometric or traditional IQ approaches, but more students than the adaptive behavior approach. The adaptive behavior approach had the greatest impact on Mexican American and Black Ss, followed by the ELP approach. The adaptive behavior approach was most conservative in the classification of middle and low socioeconomic status Ss. (Legal and practical considerations involved in nondiscriminatory evaluation and declassification of students as retarded are addressed.) (CL)

Descriptors-*Adjustment (to Environment), Adolescents, Adults, *Behavior Change, Children, *Community Programs, *Exceptional Child Research, Inservice Education, *Mentally Handicapped, *Staff Improvement

Effects of inservice training and consultation with 33 staff members involved with 97 mildly to severely mentally retarded children and adults living in group homes and apartments throughout Pennsylvania were examined. Training focused on behavior management and group dynamic strategies for skill development and alteration of socially aversive behavior among residents. Results of pre- and posttests of adaptive behavior revealed significant multivariate and univariate gains in adaptive behavior of the residents as well as differences across both assessments combined, between apartments and group homes. Gains were noted for the following behavior areas: language, time measures, writing, reading, shopping, financial dealings, social initiative, cleanliness, care of clothes, health, peer attitudes, and dominance. Overall level of six adaptive behavior dimensions appeared to be highest for residents of adult apartments, followed in descending order by adult short-term group homes, adult long-term group homes and children's residences. (CL)

Identifiers-*Group Homes (Handicapped)

Seventy mildly to severely mentally retarded adults living in group homes and apartments throughout Pennsylvania were evaluated with an instrument to assess adaptive behavior (Assessment of Basic Competence Scale) on two occasions separated by a 6-month interval. Prior to the initial assessment, direct-service staff participated in a 4-day workshop concerning behavior change strategies. During the next 6 months, staff were offered follow-through consultation regarding implementation of the strategies. Results indicated the following findings: multivariate and univariate differences between residents of group homes and residents of apartments with the latter group showing higher scores on two variables (food preparation and sexual awareness); multivariate and univariate differences between initial and followup adaptive behavior assessments with gains occurring on 27 variables for residents of group homes and apartments; and no differential magnitude of change in adaptive behavior of residents living in group homes compared to apartments. Pub Date- 78
Note-143p.; Submitted in partial fulfillment of the requirements of the National Ed.D. Program for Educational Leaders, Nova University
Pub Type- Reports - Descriptive (141) - Reports - Evaluative (142)
EDRS Price - MF01/PC06 Plus Postage.
Descriptors-Elementary Education, *Handicapped Children, Individualized Reading, *Mainstreaming, Program Development, *Program Evaluation, *Reading Instruction, Reading Skills

The practicum report documents the development of a mainstreamed reading program for exceptional children in grades 2-4, and describes its pilot testing with 22 second grade, 21 third grade, and 21 fourth grade students. The specific process and terminal goals of the practicum are presented. The reading program is explained to have included elements traditionally associated with individualized approaches (meeting individual differences, purposes, and interests through individual pupil-teacher conferences; group instruction based on developmental skill needs and interests for specific purposes; self pacing of learning; and self selection of a part of the instructional material). Empirical evaluation is said to have shown that participating students (both special needs and non-special needs) were able to improve their reading skills to a significantly greater extent than they were able to previously. Practicum students were also noted to display less frustration in dealing with their peers and with their classroom activities. Among seven appendixes are sample recordkeeping forms, checklists, and a list of objectives, instructional strategies, and independent learning activities for the mainstreamed reading program. (CL)

Descriptors-*Educational Trends, Elementary Secondary Education, *Equal Education, *Federal Legislation, *Handicapped Children, Interviews, Parent Role, Teacher Education, *Trend Analysis

Thirteen author-contributed papers, interviews, and discussions focus on historical trends in the education of handicapped children and youth. The first section provides three perspectives on the status of exceptional child education through interviews with members of Congress (J. Randolph, H. Williams, C. Perkins, And A. Quie), the Bureau of Education for the Handicapped (E. Martin, and J. Harvey), and The Council for Exceptional Children (W. Geer and P. Jones). The second section presents the following eight papers: Especially for Special Educators: A Sense of Our Own History (B. Aiello); The Early Years: Prologue to Tomorrow'' (W. Abraham); Great Moments in the History of The Council for Exceptional Children'' (F. Lord); Parent Groups: Their Role in a Better Life for the Handicapped'' (L. Cain); Special Education Research: Retrospect and Prospect (H. Prehm); The Past is Prologue: Teacher Preparation in Special Education'' (F. Connor); Law, Litigation, and Handicapped Children'' (J. Melcher); and Who Are All the Children?'' (W. Lance). A current awareness paper prepared by The Council for Exceptional Children for the White House Conference on Handicapped Individuals completes the text. (CL)

The Essay as a Mediation Instrument in the Special Classroom.
Pub Date-77
Note-32p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Behavior Change, *Educable Mentally Handicapped, *Essays, Exceptional Child Research, *Mediation Theory, Mentally Handicapped, Secondary Education, *Self Control

The effects of mediation essays on assignment completion and inappropriate talking of five mildly retarded high school students were examined. The teacher kept records of percent of assignments completed and occurrence of three talking out behaviors (talking to one's neighbor, making noise in class, and talking to one's self). Students were first treated verbally and asked R. Blackwood's four question format: What did you do that was wrong? What unpleasant things happen when you do it? What should you have done? What nice things happen when you do what you should? Then Ss were presented with a standard essay to copy (samples are appended). Results indicating increased consistency of student performance supported the usefulness of the essay mediation technique in reducing talking out behavior. In addition, the teacher found the procedures easy, positive in nature, and time efficient and felt that the approach produced a quieter classroom. (CL)

Identifiers-Beery Visual Motor Integration Test, Illinois Test of Psycholinguistic Abilities, SCREEN Battery, Wechsler Intelligence Scale for Children

A multi-faceted study followed up 800 children originally administered SCREEN, a comprehensive early identification screening battery. Ss were given an individually administered diagnostic battery: The Illinois Test of Psycholinguistic Abilities (ITPA), The Wechsler Intelligence Scale for Children (WISC) Verbal Scale, The Beery Visual Motor Integration Test (VMI), and an Experimental Phonetics Test. Factor Analysis on the SCREEN battery and on the ITPA within the high risk'' sample yielded more complex factor structures which provided substantial construct validity for both tests. Evidence suggested that the SCREEN battery is an adequate to substantial predictor of achievement tests. Concurrent and predictive validity studies indicated that the ITPA and PIAT (Peabody Individual Achievement test) were better predictors of school achievement than were the WISC scale and the VMI. Separate cluster analysis of the SCREEN battery and ITPA revealed homogeneous subclusters of Ss who displayed specific patterns of deficits. Results demonstrated that there is a reliable and valid technology for identifying relatively homogeneous groups of learning problem children. (Author/CL)

The Aspirations and Dilemmas Involving Sex Education for the Mentally Retarded.

Pub Date- 76

Note-12p.

Pub Type- Opinion Papers (120) - Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Attitudes, *Mentally Handicapped, Normalization (Handicapped), *Psychological Needs, *Sex Education, *Social Development, Socialization, *Values

The paper discusses issues involved in providing sex education to the mentally retarded. Research is reviewed which cites the need for and desirability of sex education, including enhancing socialization, fostering sound personality development, teaching sexual appropriateness in terms of time and place, allowing for emotional and physical release, and decreasing the probability of sexual exploitations. Arguments agains sex education are seen to include concerns regarding teaching attitudes and values, training of instructors, encouraging of premature sexual sophistication, and invading the privacy of the family. The author concludes that sex education is an important part of normalization. (CL)

Descriptors-*Custodial Mentally Handicapped, Daily Living Skills, Definitions, Developmental Disabilities, Mentally Handicapped, *Reinforcement, *Task Analysis, Teaching Methods, *Trainable Mentally Handicapped, *Training Techniques
Identifiers-*Try Another Way

Intended for use in training conferences, the manual describes the philosophy and procedures of Try Another Way, an approach for teaching moderately, severely and profoundly mentally retarded persons and developmentally disabled persons difficult to train. An alternative definition of retardation is proposed which stresses level of functioning determined by the availability of training technology. Try Another Way is explained to use task analysis to teach manual tasks to the retarded. The manual covers the following aspects of the approach: task analysis (explanation and an example of teaching a complex assembly task to retarded blind persons); rules for training and reinforcement; a discussion of the concept of influence; and an interview with M. Gold in which he emphasizes the need for systematic training rather than diagnosis. Four training projects and their task analyses are presented (shaking hands, building pallets, washing hands, and folding napkins). The remainder of the manual provides information on publications, films, and training services available from Marc Gold and Associates, Inc. (CL)

Descriptors-Custodial Mentally Handicapped, *Delivery Systems, *Developmental Disabilities, *Mentally Handicapped, Normalization (Handicapped), *Program Evaluation, *State Programs, *Task Analysis, Trainable Mentally Handicapped
Identifiers-*California

The report summarizes a 2-year project to train personnel in California agencies, facilities, schools and state hospitals in the principles of Try Another Way, a normalization-geared approach using systematic task analysis to teach moderately to profoundly retarded and severely developmentally disabled persons. The report's first three sections discuss the purpose, goals, strategies, and interlocking roles of the project. A fourth chapter describes the results of the project's impact on the California service system and the impact that training had on agency clients. An evaluation of the project's strengths and weaknesses is followed by recommendations to departments of state government, human service agencies, and individual trainers. Among six appendixes are a list of completed task analyses and objectives for participants and a task analysis rating system. (CL)

Identifiers-*University of Khartoum (Sudan)

A research project on study habits was conducted at the University of Khartoum, Sudan. This report includes: (1) an overview of the university and the background to the study; (2) previous research on study habits undertaken at the University of Khartoum and elsewhere; (3) the project goals and procedures; (4) findings concerning language proficiency testing and contributions to academic success; (5) anecdotal data obtained from interviews, diaries, and observations; and (6) recommendations based on the findings. Language proficiency tests in Arabic and English reading and in Arabic and English dictation were integrative measures, testing global skills related to general language proficiency. The study sought to determine the effect on university performance of the following variables: the Sudan School Certificate, interviews, secondary school attended, proficiency tests, and university English final examinations. Eight months after the orignial testing, subjects were retested in reading and administered a questionnaire. The conclusions are that English language proficiency is a major problem for the preliminary-year students and that there are potential problems of a linguistic and an attitudinal nature with Arabic as a medium of instruction in the university. Monolingual and Bilingual Development Patterns.

Pub Date-78

Note-15p.; Paper presented at the Second Language Research Forum (Los Angeles, California, October, 1978)

Pub Type- Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Bilingualism, *Child Language, Communicative Competence (Languages), *English, Grammar, Interference (Language Learning), *Language Development, Language Dominance, Language Patterns, Language Skills, Linguistic Performance, Listening Comprehension, *Monolingualism, Morphology (Languages), Preschool Children, *Spanish, Verbal Communication

Similarities and differences in language acquisition and variations in patterns of language dominance were studied with three four-year-old girls. The ideographic study of child speech involved a monolingual English-speaking child, a monolingual Spanish-speaking child, and a bilingual English-Spanish-speaking child. The following measures were used: auditory comprehension, syntax and morphology, and temporal analysis (speech rate, pauses, and hesitation phenomena). Formal testing supplemented observation of children's speech in natural settings. Testing sessions were conducted approximately every 6 months and when the bilingual child had extended exposure to either language. Data were collected in the United States and in Mexico. Certain similarities have been found in monolingual and bilingual development. Bilingual development is both enriched and affected negatively by the constant exposure to two languages: enrichment takes place in vocabulary and facility with language, while morphology and syntax are affected negatively (in both languages) by the interference of one language system with the other. Descriptors-*Composition Skills (Literary), *Content Analysis, Course Objectives, *English (Second Language), *English Instruction, Higher Education, Second Language Learning, Student Needs, *Textbook Content, *Textbook Evaluation, Writing Skills

English as a Second Language (ESL) composition textbooks were compared with freshman composition textbooks through a national survey of U.S. universities. A detailed content analysis of nine ESL and eighteen English composition texts was conducted. A questionnaire was sent to selected universities asking the faculty to answer textbook-related questions, and data were obtained concerning course goals, instructors, and students. Results indicate the importance of textbooks in the teaching of composition. Texts were used in virtually all of the 66 courses in the study, and in over half of these courses, the contents of the textbook closely reflected the goals of the course. The content of ESL texts were shown to be different from English texts in the amount and type of composition instruction offered, yet ESL and English instructors reported that they worked toward the same writing goals. The apparent discrepancy between expressed ESL composition goals and actual practice suggest the need to re-evaluate ESL courses and textbooks to determine whether ESL students are receiving composition instruction necessary for survival in American universities. Suggestions are offered on ways in which ESL composition textbooks could be improved to better meet the writing needs of university ESL students. (SW)

Descriptors-*Academic Achievement, *Bilingual Education, Bilingualism, Cultural Awareness, Educational Objectives, Elementary Education, Ethnic Groups, *Language Instruction, Language Programs, Parent Attitudes, *Program Effectiveness, *Program Evaluation, Questionnaires, Teacher Attitudes, *Ukrainian
Identifiers-*Bilingual Programs

An evaluation study is presented of a primary grades Ukrainian-English bilingual program. The study focuses on three areas: (1) pupil academic achievement; (2) pupil cultural achievement; and (3) the perceptions of relevant groups concerning the bilingual program. One hundred forty-eight students in grades one, two, and three were matched with control groups on the following variables: grade, sex, age, primary mental ability score, and socio-economic status. The major findings indicated that student achievement in the bilingual program matched that of students in the regular program in English language arts and mathematics. Test results and perceptions of teachers and parents showed that students made significant progress in learning the Ukrainian language and understanding Ukrainian culture. Parents and teachers indicated that program objectives were generally appropriate and were being achieved to a large extent. Teachers expressed a need for further in-service training and for additional curricular and instructional materials. A majority of parents indicated that instruction in Ukrainian should continue beyond the primary level and that some subjects could be taught in that language. A discussion of the implications of the study and suggestions for further research concludes the study. (Author/AMH)

Identifiers-*Esperanto

The Final Act of the Conference on Security and Co-operation in Europe, linguistic problems in the way of cooperation, language differences and the potential for discriminatory practice, and the need for a new linguistic order are discussed. It is suggested that misunderstandings arising from differences of language reduce the ability of the 35 cooperating states to promote health, education, nutrition, economic well-being, or the mutual understanding on which all these efforts depend. Problems of language manifest themselves in all areas of international cooperation. Not only is there the problem of simple comprehension but also the problem of discrimination: certain states enjoy marked linguistic advantages not shared by others. It is suggested that a neutral international language, easy to learn and to teach, could become the normal and accepted idiom of European, if not worldwide, communication. Esperanto, based on certain European languages, could be the international language to enable various states to treat one another on a nondiscriminatory and equal basis and to deal directly with their common problems. National languages could be preserved for internal use, and cultural pluralism could be elevated from principle to practice. Steps are recommended for using Esperanto to promote international cooperation through incorporation in the Final Act. (SW)

The Relationship Between Language Acquisition and Cognitive Development.

Pub Date-77

Note-24p.

Pub Type- Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Cognitive Development, Intellectual Development, *Language Development, Language Role, *Learning Theories, *Linguistic Competence, *Linguistic Theory, *Thought Processes

Theories concerning the relationship between language acquisition and cognitive development are examined, and implications for education are discussed. There is disagreement about the sources and processes involved in achieving linguistic performance, and in particular, determining linguistic competence. Among the many theories and modifications of theories are the following: (1) thinking is identical to speaking (Watson, 1923); (2) thinking and speaking interrelate and yield a third unique process of language (Vygotsky, 1962); (3) words and syntactic structures of a language determine how a speaker perceives the world and how he thinks (Whorf, 1956); (4) thinking is an information-processing phenomenon (Bruner, 1964); and (5) speaking is a function of thinking. Various interpretations of the last notion have been proposed by Chomsky (1965), McNeill (1966), Katz (1966), and Piaget (1967). It is suggested that while language acquisition may not be a sufficient condition for thought with respect to most cognitive functions, it may play a role in significant ways that are at present little understood. Language may well have a more significant role in the formation of thought than Piaget would allow, even though it may still not be the principal determinant of thought claimed by Bruner and Vygotsky. Descriptions are presented of 13 foreign language programs in Texas schools that were chosen as representative of all the successful foreign language programs in the state. Fifteen additional programs, listed by education service center region, are briefly described. Overriding characteristics of a successful program are: (1) the program keeps students involved in a multitude of in-class and out-of-class activities, (2) the program gives the students as many opportunities as possible to use their language skills and to increase their knowledge of another culture, and (3) the program has goals based on the needs of students and provides activities which lead to the accomplishment of the goals. An index to the successful programs is provided by language, level, or size of school district. (SW)

Descriptors-College Bound Students, Communicative Competence (Languages), Conversational Language Courses, *Cultural Awareness, *Instructional Innovation, Junior High Schools, *Language Programs, *Language Role, *Linguistic Performance, Low Achievers, Middle Schools, Noncollege Preparatory Students, Secondary Education, *Second Language Learning

Four types of exploratory foreign language programs are described: (1) the language overview course, (2) the trial-study course, (3) the Level I offering, and (4) the course for the non-college bound. It is largely in the middle schools (grades 6-8) and junior high schools (grades 7-9) that exploratory programs are being used. The language overview course is designed to increase or to develop student linguistic awareness through an educational experience in the basic social phenomenon of language. Approaches to language overview courses are the linguistic-centered approach, an approach that samples several language families, and the Esperanto approach. The trial-study language course provides a linguistic and cultural experience that permits the student to sample language study prior to registering for a regular sequence course. The level I middle grade offering is the first phase of second language learning. Two types of foreign language course for the non-college bound student are the conversational, cultural approach that minimizes written and grammar areas and the program for the very low achiever. A guide on foreign languages is presented for counselors, administrators, teachers, and parents. An introductory section discusses reasons for foreign language study, college entrance or exit requirements, foreign language and SAT scores, careers that use foreign languages, myths about learning foreign languages, and information about French, German, Latin, Russian, and Spanish. Also discussed are: (1) the number of people who speak the major foreign languages of the world as estimated in 1978, (2) opportunities to experience real and simulated foreign language atmospheres, (3) suggested program planning for junior high students, and (4) foreign language planning for college. A chart summarizes what research studies show about foreign languages and the following basics: English vocabulary, reading skills, transfer, self-concept, cultural enrichment, creativity, and communication skills. A quick test for determining probable success for learning a foreign language is also included. (SW)

Descriptors-Arabic, Comparative Analysis, Contrastive Linguistics, *Deep Structure, *English (Second Language), *Error Analysis (Language), *Error Patterns, Interference (Language Learning), *Language Patterns, Language Research, Language Usage, Phonemes, *Phonetic Analysis, Phonology, Pronunciation

Native speakers of Egyptian Arabic make errors in their pronunciation of English that cannot always be accounted for by a contrastive analysis of Egyptian analysis of Egyptain Arabic and English. This study focuses on three types of errors in the pronunciation of voiced and voiceless th'' made by fluent speakers of English. These errors were noted during informal conversations. While not all of the errors can be explained by the surface structure of the native language phonemes, they all fit into a unified system which can be described. The unified system implies that the behaviors are governed by the way in which the deep structure of the native language phonemes act in relation to the target language. (Author/AMH)

Eighteen model syllabi are presented for teaching Spanish to native speakers of Spanish. The syllabi were produced during a summer institute, entitled Teaching Spanish to Native Speakers of Spanish,'' in order to meet the unique language situation of U.S. hispanophone students. Traditional lower division Spanish-as-a-foreign-language courses are totally inappropriate for the fluent or almost fluent native speaker. At the same time these U.S. hispanophone students have had little exposure to written Spanish since they have been educated from the early grades in English. The need for specially-designed sequences of one to four semesters of language instruction to develop the natively-acquired language resources the students bring to the classroom led to the summer institute program. The institute brought together individuals already involved in teaching Spanish to native speakers. The central objective of the institute was the improvement of curriculum not only at participants' institutions but also across the nations. (SW)

Identifiers-*Dialogs (Language Learning)

Second language teaching methodologies have been oriented toward their subject matter as the acquisition of form. This orientation does not distinguish sufficiently between language as grammatical competence and language as verbal strategy. There are many matters falling under the heading of ``verbal strategy'' which should become part of an instructional program. This paper treats the presentation of verbalizations in various languages that are generated by specific cultural encounters, such as greetings, leave-takings, countering insults, gaining the upper hand in conversations, and displaying attentiveness. A technique known as the ``dialog with options'' is proposed as one way to teach verbal strategies and conversational interactions. This technique requires students to construct their own interchanges around a topic that has multiple interpretations. In addition to examples of ``dialogs with options,'' a number of selections from literature are provided as illustrations of verbal strategies and role-playing through the medium of diverse languages. (Author/AMH)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Association (Psychological), Associative Learning, *Cognitive Processes, *Inhibition, Learning Activities, *Learning Processes, *Learning Theories, *Memorizing, Memory, Psychology, *Recall (Psychological), Semantics

Two hundred sixty-five subjects learned a mixed list of paired associates in an AB, AD and AB, CD transfer paradigm. Two levels of semantic processing were factorially varied across original and interpolated pairs. Recall of original pairs was shown to be directly related to the processing depth of original pairs in both paradigms and inversely related to the processing depth of interpolated pairs in the AB, AD paradigm, but not in the AB, CD paradigm. Twenty additional subjects intentionally learned and recalled the same list and showed significant retroactive inhibition for original pairs in the AB, AD paradigm. The findings indicate that interference does not occur in a mechanical fashion, but is sensitive to subjects' level of perceptual analysis of the pairs. (Author)

Assessment of Language Needs of Native Primary School Students Entering English Schools... With Suggestions for Programming to Meet Their Needs.

Manitoba Dept. of Education, Winnipeg. Native Education Branch.

Pub Date-Aug 78

Note-34p.

Pub Type- Reports - Research (143) - Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-Comparative Analysis, Elementary Education, *English (Second Language), Figurative Language, Kindergarten Children, *Language Instruction, Language Programs, *Language Research, *Language Skills, Language Tests, Linguistic Performance, *Second Language Learning, Student Evaluation, Student Needs, *Teaching Methods

American and Canadian research is reviewed concerning the language needs of native primary students entering English schools from homes where a language other than English is spoken, and a study is reported that contrasted the language performance of children entering school from homes where only English is spoken and from homes where a language other than English is spoken. The Carrow Elicited Language Inventory test was administered to 60 kindergarten students. The raw score age equivalent for the students from English speaking homes was from five to six years while it was from two and one-half to three years of age for the students from native homes. Differences between the two groups for grammatical errors occurred primarily in the verb, pronoun, contraction, and conjunction categories. Implications of the results are discussed. The following four commercially available language development programs are evaluated in terms of their designs for language development: Developmental Syntax Program, Distar Language, Interactive Language Development, and Portage Guide to Early Education. An annotated bibliography is also included. (SW)

Descriptors-*Communication (Thought Transfer), *Deaf Children, *Deaf Education, *Deaf Interpreting, English, Language, Language Development, Language Processing, Language Skills, *Manual Communication, *Sign Language
Identifiers-*Signing Exact English

A brief review of language development research and the English skills of deaf children is followed by a rationale for using manually signed English with these children. The principles of Signing Exact English are explained, stressing that to obtain maximum visual input English should be signed exactly as it is spoken, including synonyms, word endings, idioms, etc. The major portion of the book consists of line drawings and descriptions of signs for numbers, the alphabet, contractions, affixes, approximately 3200 vocabulary items, and a listing of signs grouped by families, utilizing the same movement and differing in hand shape only. Several pages of selected references and resources for further study are also included. (Author/AMH)

The Transfer of Reading Skills From First to Second Language: The Report on an Experiment with Spanish Speakers Learning English.

Pub Date-78
Note-34p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*English (Second Language), Language Instruction, Language Processing, Language Research, Language Skills, Reading Comprehension, Reading Development, *Reading Processes, *Reading Research, *Reading Skills, *Second Language Learning, Skill Development, Spanish Speaking, *Transfer of Training

Certain aspects of the reading process have suggested that second language reading skills are determined to some extent by native language reading skills. Some of this research is reviewed here and an experiment is described in which the reading skills in Spanish and English of three groups of Spanish speakers learning English are compared. Comprehension tests were given to each of the groups. Two articles from ``The Readers Digest,'' one in English and one in Spanish, were used for the speech comprehension tests, and cloze tests were used to measure intensive reading comprehension. It is shown that the highest English proficiency group had a strong significant correlation between reading skills in the two languages, the middle group had a slight correlation, and the beginners had no correlation. It is concluded that reading for meaning is a skill which is non-language-specific and so is transferred to a foreign language that is being learned. (Author/AMH)

Identifiers-*UNESCO

A meeting of the United Nations Educational, Scientific, and Cultural Organization confirmed that teachers and research workers have been faced with the problem of diversification of methods and techniques in language teaching and with the necessity of adapting approaches to the specific needs of the many categories of learners. A new approach in teaching that has been observed is a move toward greater individualization of language teaching. The relationship between diversification and the individualization of teaching is unsatisfactory on its existing basis. A review of the language teaching situation in the various countries represented at the meeting and in a number of other countries revealed shortcomings in the following areas: (1) teaching materials, (2) equipment, (3) teacher training, (4) the contribution of language sciences, (5) teaching methodologies, (6) second language teaching at an early age and total immersion experiments, (7) definition of objectives, and (8) information and international cooperation. The diversification of modern language teaching involves consideration of three fundamental problems: how to define the objectives of language teaching, how to determine the language needs of the learners, and how to define the groups of learners. Instructional innovations, the teaching of languages to adults, and research developments are discussed. Proposals for future action to ensure the required diversification of language teaching are offered. (SW)

Identifiers-Interlanguage

A review of the literature on child language reveals little research on overgeneralization in the speech of the bilingual child. Questions arise regarding (1) the existence of interlingual overgeneralizations, and (2) the possibility that monolingual deviations and bilingual code switching might be forms of overgeneralization. Because a model for identifying overgeneralization in other languages or in bilinguals is lacking, a competence-based model and definition of overgeneralization are supplied in this study. Using this model and definition, 42 overgeneralizations are identified in the language samples of five Spanish-English bilinguals between the ages of two and five. Spanish was chosen for the study because its great variety of root and affix variants allows greater scope for the discussion of preference. No interlanguage overgeneralizations'' were found, possibly indicating that inflections become language specific earlier than entire lexemes. In both Spanish and English, affix markers are preferred over other types of internal markers. Frequency of use of roots and affixes by adults in the child's environment apparently determines the child's preferred roots and affixes. A suggestion is made that the is a distinct type and is a result of a different process. Actually, they are all an attempt at simplification and so are overgeneralizations. (Author/AMH)

Identifiers-*New York (New York)

A needs assessment survey was conducted of the Russian-speaking immigrant population in New York City. Program goals were: (1) to identify the public and priviate schools with concentrations of Soviet immigrant students; (2) to survey the programs established in the identified schools and their levels of instruction; (3) to identify the bilingual (Russian-English, Russian-Hebrew, Yiddish-English) teachers in the schools; and (4) to assess the availability of instructional materials in Russian, Hebrew, or Yiddish. Data and a brief narrative and analysis are presented based on responses obtained from two types of questionnaires: a school questionnaire distributed to all public and private schools in the city, and a parent trilingual questionnaire distributed to Soviet immigrant parents. Based on the findings, a Russian-English and a Russian-Hebrew language arts program is proposed. To deal with children distributed throughout the grades, a nongraded curriculum approach with initial concentrations appropriate to the early and middle elementary levels is suggested. An important role in the selection of these materials is the Jewish ethnic, historical, and cultural experience in the U.S.S.R., Israel, and in the United States in order to strengthen the students' awareness of their cultural identity and heritage. A Russian version of the report is also included. (SW)

Borrowing and Its Implications for Turkish Phonology. Kansas Working Papers in Linguistics, Volume 3.

Kansas Univ., Lawrence. Dept. of Linguistics.
Pub Date-Jun 78
Note-12p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Consonants, *Language Patterns, *Language Research, *Linguistic Borrowing, *Phonology, *Turkish, *Vowels

Borrowing and its implications for Turkish phonology is examined, focusing on words with initial and final consonant clusters. A brief summary of the relevant portions of Turkish phonology is presented. A formulation of the rules of lateral conditioning and velar conditioning is shown to successfully account for almost all the relevant borrowing naturalizations into Turkish. These rules are internally motivated. It is contended that it would be preferable to give up Foster's formulation which makes the assumption that backness of the velars and the laterals is determined by the adjacent vowels. The proposed formulation provides a nearly uniform treatment of cluster restrictions, predictability of the suffixed forms, and the reduction in the number of exceptions. The need for a thorough reconsideration of the interaction of vowel harmony and consonant harmony is indicated. (SW)

On Syntactic Ambiguity.
Pub Date-78
Note-24p.; Paper presented at the Autumn meeting of the Linguistic Association of Great Britain (September 18, 1978)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Ambiguity, *Deep Structure, Discourse Analysis, Grammar, Language Research, Language Skills, Language Styles, Language Universals, Linguistic Theory, Semantics, Sentences, *Sentence Structure, Speech Communication, *Structural Analysis, *Surface Structure, *Syntax

The source of syntactic ambiguity and facts concerning the resolution of such ambiguity are discussed in this paper. The attitude of generative linguists towards ambiguity is examined, and a working distinction is drawn between vagueness and ambiguity. The consequences of this distinction are then examined for syntactic ambiguity and an ordering hypothesis for syntactic rules is proposed. The main issue is the ordering that must hold between optional and obligatory rules. Three observations about syntactic ambiguity are presented: (1) it often escapes attention; (2) even when pointed out to a hearer, the hearer may find it difficult to resolve; and (3) disambiguation by paraphrase is often possible. It is shown that if a linguistic theory wants to take these three factors into account, it must be concluded that syntactic ambiguity is the result of the application of optional rules. The consequence of this conclusion, given the approach to rule orderino, is that for every n'' ways that a sentence is syntactically ambiquous, there must be at least n-1 unambiguous paraphrases. This consequence is tested on three well-known types of ambiguity. In conclusion, observations are made about possibly controversial points, namely, the definition of synonymy and disjunctive rules. Descriptors-*Black Culture, *Black Dialects, Blacks, *Black Students, *Caucasian Students, *Cultural Factors, Cultural Interrelationships, Dialect Studies, Discourse Analysis, Elementary Secondary Education, Grammar, Language Research, Language Variation, School Segregation, *Social Adjustment, Social Influences, Sociolinguistics, Syntax

Identifiers-*Black English

A detailed study is reported of the linguistic adaptation of a white girl in a predominantly black school in Camden, New Jersey. The girl is a cultural heroine in the area, having earned the admiration of both blacks, and Puerto Ricans by her ability in fighting, dancing, talking, and dealing with the opposite sex. Subjective reaction tests show that most people hear her as black; whites hear some white influence, but black listeners hear nothing but black patterns. A detailed linguistic analysis shows that she has overshot the rules of the Black English Vernacular in five cases, and developed a special grammar of her own, but that this has not disturbed the effectiveness of her social adaptation. It is concluded that, in order to survive, the subject has nearly assumed the identity of the blacks in her environment. (Author/AMH)

Descriptors-*Bilingual Education, *Bilingual Teachers, College Role, *Educational Policy, Higher Education, *Language Attitudes, Language of Instruction, Political Influences, State Departments of Education, *Teacher Education, Teacher Role

Difficulties involved in staffing bilingual education programs in Australia are discussed. Bilingual teachers are defined as speakers of English and a community language that is the mother tongue of a sizeable non-English speaking group. Viewpoints are based on an attempt to implement a small-scale teacher training program at La Trobe University. The experience was limited to post-primary teacher trainees destined mostly to work in state schools in Victoria. It is suggested that teacher training institutions do not want to train bilingual teachers. There are few people in Australia who have a command of both English and another language, such that they feel competent to teach in either language. Teacher training institutions are not interested in making a commitment to undertake the teaching of community languages. At La Trobe University, an effort was made to teach people with tertiary qualifications from non-English speaking countries. The Victoria Education Department does not have a policy on bilingual teachers. The existing machinery, together with the present economic and political climate, leaves bilingual teachers with little or no means of being placed in schools. Possible roles of bilingual teachers and problems they would face are outlined, and needs of bilingual student teachers are discussed. (SW)

A Functional Syllabus for Post-Intermediate E.S.L. in Papua New Guinea.
Pub Date-Dec 77
Note-11p.
Journal Cit-Australian Review of Applied Linguistics; v1 n1 p10-9 Dec 1977
Pub Type- Reports - Descriptive (141) - Journal Articles (080)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Educational Objectives, *English (Second Language), *Language Guides, *Language Role, Language Usage, Psycholinguistics, Secondary Education, *Second Language Learning, Sociolinguistics, Student Needs, *Teaching Methods
Identifiers-*Papua New Guinea

A functional syllabus for post-intermediate study of English as a second language (ESL) that was developed for the provincial high schools in Papua New Guinea is described. The framework necessary to analyze student needs and define learning objectives is based on languages uses. A language use'' is a semantic unit identifying the language user's immediate intended purpose in discourse. These communicative purposes are either primarily seeking to control behavior or primarily seeking to inform. Every language use is characterized by particular categories of accompanying referential meaning. These concepts may be (1) essentially subjective, requiring evaluation; (2) objective, involving data; or (3) logical, showing relationships between ideas. Language use as a framework relates communicative meaning and referential meaning and allows also for social and personal meanings. A single language use can be expressed in small or large units of discourse, including a discourse, an event, a development, a move, or an act. Breaking language use into units helps to analyze student needs, provides a framework for learning activities, and suggests meaningful situations of practice. Development of the syllabus and training of teachers are discussed. (SW)

Descriptors-*Discourse Analysis, Grammar, High School Students, Language Research, *Linguistic Competence, *Nonstandard Dialects, *Research Projects, Secondary Education, *Sentence Structure, *Structural Analysis, *Syntax, Verbs
Identifiers-*Australia (Sydney)

This assumption that non-standard speakers are limited in their linguistic ability is examined based on a larger study investigating the speech of working-class adolescents in Sydney, Australia's inner-city areas. Speech samples of four children are presented. An examination of verbal structures reveals that there is a predominance of simple verbs; there are also multi-auxiliary verb structures. The production of these forms indicates that the speaker does have such a structure within the linguistic range. There is also evidence within all four speakers of ability to handle a wide range of possible structures, ranging from simple one or two clause sentences to the most complex of embedded structures, comprising up to ten clauses. The four non-standard speakers exhibit a sure control of a wide range of verbal and structural patterns in their spoken language. This proficiency with language exists alongside of a proliferation of popularly-stigmatized non-standard dialect forms. The children who exibited the greatest number of non-standard forms in their speech also used the most complex structures. Implications for teachers are cited. (SW)

Descriptors-*Adult Students, *Age Differences, Audiolingual Skills, *Language Instruction, Language Skills, *Middle Aged, *Second Language Learning, *Senior Citizens, Student Needs, Teaching Methods

The different learning abilities of senior citizens and ways that older students can successfully maximize their learning effort in a class essentially designed for younger learners are discussed. Because of a regressed transformational drill behavior, the pedagogical hypothesis and the teaching strategy must de-emphasize a consistent audiolingual method which stresses repetitive practice of oral patterns and word sequences. In continuing education language classes with a number of aging learners, a compromise audiolingual program must be instituted but not at the expense of the basic objective of speech. The elderly learner is particularly strong on structural features and lexical items, but he cannot as quickly discriminate and imitate pronunciation accuracy. Research on the learning capacity of the elderly is cited. (SW)

Descriptors-Communicative Competence (Languages), Educational Objectives, *French, Higher Education, *Language Attitudes, *Language Instruction, Language Skills, Linguistic Competence, *Second Language Learning, Student Needs, *Teaching Methods, *Undergraduate Study

Assumptions and conclusions concerning language teaching at the advanced undergraduate level are presented, and suggestions of both general attitudes and practical activities to implement the conclusions are proposed. Although the practical experience and all examples are drawn from the teaching of French, the principles and methods should be adaptable to other languages. The conclusions are as follows: (1) language classes aimed at improving competence and performance should still be a core requirement at the third year level; (2) novel ways need to be devised to remotivate interest in key areas of competence still incompletely assimilated; (3) students need to be offered methods for defining the limits of their competence and for pushing back these limits; (4) methods are needed to develop performance skills through coordinating disparate knowledge, activating passive knowledge, and communication confidence; (5) a course should offer a variety of stimuli and scope for working at level of need, achievement, and interest; (6) a common core might be the analysis of and insistence on a number of these problem areas; and (7) texts need to be devised. Descriptors-Career Choice, *Career Development, *Career Planning, Filmstrips, French, German, *Instructional Materials, *Language Attitudes, *Language Instruction, Language Skills, Role Playing, Secondary Education, *Second Language Learning, Spanish

A package of supplemental materials for use in junior and senior high schools at all levels of language learning is designed to acquaint students with the concept of a second language as an adjunct career skill. Seven activities, designed to develop the student's career awareness, are to be completed in English, French, German, or Spanish. The activities include analyzing values that relate to job selection, role-simulation of career situations, and minidramas based on cross-cultural situations. A group on-site interview activity designed to show students the availability of careers in their own community that require the use of a second language is included. Two filmstrips that are available to supplement the material present the possible economic advantages of second-language learning and demonstrate the need for cross-cultural understanding. An orientation booklet contains basic information about careers and foreign languages and a detailed teachers' guide suggests strategies for implementing the activities. Some samples of the instructional material are included. (SW)

Descriptors-*Comprehension, *Language Research, *Learning Processes, Learning Theories, Linguistic Theory, *Memory, *Recall (Psychological), Retention, Sentence Structure

The effects of sentence imitation and picture verification on the recall of subsequent digits were studied. Stimuli consisted of 20 sentences, each sentence followed by a string of five digit names, and five structural types of sentences were presented. Subjects were instructed to listen to the sentence and digit string and then either immediately repeat the whole sequence or to indicate comprehension of the sentence by pointing to an appropriate picture and then to repeat the digit string. It was found that across all five sentence types digit recall was superior in the picture verification condition. There is a clear and consistent indication that the act of vocal repetition of a sentence provides a greater degree of interference in the digit recall than a simple verification of comprehension. The absence of sentence-type ordering suggests that the effect of sentence complexity on digit recall must be assigned to the regeneration phase of the imitation task. (SW)

Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Child Language, *Comparative Analysis, Contrastive Linguistics, *Discourse Analysis, Elementary Education, *English (Second Language), *German, Language Development, Language Research, *Linguistic Competence, *Sociolinguistics, Speech Communication, Verbal Communication

Linguistic and pedagogical considerations about children's use of a second language in the classroom are discussed with reference to samples of speech obtained from ten to twelve year old children in Germany. The children had been taught the second language of English. The speech is examined in relation to functional and sociolinguistic criteria of discourse analysis. Speech is analyzed as a series of three transactions: the first two transactions are mixed informing and eliciting transactions, and the third is a directing transaction. Classroom discourse in which the students' speech behavior is tightly controlled by the teacher and free speech in the classroom are both analyzed. A German version of classroom discourse is contrasted with an English one. Language functions are viewed as integrated into a model of communicative competence. Two texts are discussed that are meant to show how children play the roles of adults. Pragmalinguistic and sociolinguistic analyses of the English and German samples of free speech in the classroom give a clue to the behavioral strategies children use in order to participate successfully in second language discourse. Four strategies are discussed, and illustrations from texts are included. (SW)

Descriptors-Academic Failure, *American English, *Black Dialects, *Black Students, Caucasian Students, Disadvantaged Groups, Failure Factors, *Language Development, Language Research, *Linguistic Theory, Low Achievement Factors, Nonstandard Dialects, Reading Instruction, *Standard Spoken Usage, Textbook Selection, Urban Youth
Identifiers-*Black English

The research and theoretical rationale for differences between (urban) black and white students, particularly in achievement in language development, are discussed along with implications for the classroom. Theories about language acquisition and capacity that have developed to account for the poor school performance of urban black students include the deficit theory, elaborated and restricted language code theory, the genetic inferiority theory, and the difference theory. Linguistic assumptions about the nature of language, the assumption that deprived children are nonverbal, assumptions about the environment of the disadvantaged child, and problems with testing and textbooks are discussed. The following questions are addressed: (1) whether to teach standard English before or after initial reading instruction, (2) whether initial reading instruction for nonstandard speakers is dialect reading of traditional materials, and (3) whether reading materials should be revised so that grammatical forms unfamiliar to the nonstandard speaker are eliminated. The most radical proposal involves the use of black dialect readers. Proponents of dialect readers assert that there is enough difference between standard and nonstandard dialects to require the nonstandard dialect readers. Opposing viewpoints are presented. Drills that have been proposed to differentiate standard and nonstandard forms are presented. (SW)

Descriptors-*American English, College Freshmen, *English (Second Language), Higher Education, *Language Attitudes, Language Instruction, Language Research, *Linguistic Theory, Nonstandard Dialects, *Remedial Courses, Second Language Learning, Self Concept, Self Evaluation, *Standard Spoken Usage, Student Needs

The teaching of edited American English in a freshman composition course to remedial students and to students of English as a second language (ESL) is discussed. Edited American English (EAE) can be defined as the kind of standard written English that typically appears in textbooks, newspapers, and some periodicals. Remedial and ESL students need to learn the kind of English required in the academic environment and to understand why they need to learn it. They also need to feel good about themselves as language learners and as language users. A course designed to meet these needs includes the results of linguistic research and counseling. Information is presented on grammars and where they come from, dialectology, and sociolinguistics. Such exposure begins a process of consciousness-raising about language so that students become aware of what is expected of them linguistically. The importance of linguistic findings in the freshman composition class and the need for validation counseling as a way to help students gain a more positive view of themselves as language learners are discussed. (SW)

Descriptors-*Adult Students, *Communicative Competence (Languages), Educational Assessment, *Educational Objectives, Higher Education, *Language Instruction, Language Role, Language Skills, Language Usage, Learning Modules, Models, Multimedia Instruction, Needs Assessment, Secondary Education, *Second Language Learning, Student Evaluation, Student Needs, *Verbal Communication

An editorial and articles are presented on a European unit/credit system for modern language learning by adults. The contents are as follows: A European Unit Credit System'' by J. L. M. Trim; The Analysis of Language Needs: Illusion Pretext Necessity'' by Rene Richterich; Learning a Language Is Learning to Communicate'' by D. A. Wilkins; The Threshold-Level'' by J.A. Van Ek; and Multi-Media Strategies'' by Michel Kuhn. According to the editorial, the Council of Europe is trying to ensure that every European can at least acquire the minimum skills to allow himself to communicate outside his own country.

In the Modern Language Learning project for adults, language needs have been analyzed, and a threshold level has been defined as the minimum skills required to make oneself understood. A method of assessing achievement on a unit/credit basis has also been developed. (SW)

Predictors of Relative Clause Production.

Pub Date- 78
Note-17p.; Paper presented at the Second Language Research Forum (Los Angeles, California); M.A. Thesis, University of Southern California
Pub Type- Reports - Research (143) - Dissertations/Theses (040) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Grammar, *Language Proficiency, *Language Research, *Predictor Variables, *Second Language Learning, *Sentence Structure, Student Characteristics, *Syntax, Verbal Tests
Identifiers-*Relative Clauses

Predictors of relative clause production in adult second language acquisition were examined through a replication and extension of a study by Schachter (1974). The present study is different in that it was based on oral instead of written production and it was designed to examine avoidance with the consideration that avoidance presupposed choice. Two questions were asked of entering foreign students at the University of Southern California during an oral interview examination. One of the questions was meant to elicit a relative clause with a relativized subject, the other with a relativized non-subject. (Non-subject refers to direct object, indirect object, and oblique case NP's). Predictor variables were language background, overall target language proficiency, and the two input question types. A multiple regression analysis was performed. The results indicate that the order of importance of predictor variables in the determination of the frequency of the production of relative clauses is over-all target language proficiency, language background, and input question types. Although an avoidance strategy regarding relative clause production was found, there is a need to determine other contributing factors. (SW)

The Effects of Three Types of Verbal Cues on the Accuracy and Latency of Aphasic Subjects' Naming Responses.

Pub Date-May 77
Note-88p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC04 Plus Postage.
Descriptors-*Aphasia, *Cognitive Processes, Context Clues, *Cues, Error Analysis (Language), Language Handicaps, *Language Processing, *Language Research, Learning Disabilities, Learning Theories, Memory, Reaction Time, Reactive Behavior, *Recall (Psychological), *Response Mode, Retention, Speech Education, Speech Handicapped, Speech Therapists, Verbal Learning, Word Recognition
Identifiers-*Word Retrieval

This study deals with word retrieval problems of aphasic patients. This word-finding difficulty is a common characteristic of aphasics and many methods have been used by aphasia clinicians to attempt to remediate word retrieval skills. Cueing, one of the methods used, presumably facilitates word-finding by supplying additional information to the aphasic patient about the target word he is attempting to produce. This research attempts to measure the three types of cues on naming behavior of aphasics. Semantic, phonemic, and neutral verbal cues are studied to determine their effects on both accuracy and latency of aphasic subjects' naming responses. The results demonstrated clear individual differences in the way that the aphasics responded to the various types of cues. In general, phonemic cues proved to be the most effective in increasing response accuracy and decreasing response latency for these patients. Semantic cues, on the other hand, appeared to hinder communicative effectiveness as they decreased response accuracy and increased response latency when compared to neutral or phonemic cues. A review of the literature discusses several factors that influence performance on a naming task. (NCR)

Bilingual Education: A Cognitive Approach to Learning. CUNYForum, No. 3.
City Univ. of New York, N.Y. Graduate School and Univ. Center. Program in Linguistics.
Pub Date-77
Note-16p.; Paper presented at the Annual Queens College Conference on Bilingualism and Second Language Learning, (2nd, November 10, 1976)
Pub Type- Opinion Papers (120) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Bilingual Education, Child Language, *Cognitive Development, *Communicative Competence (Languages), Elementary Education, *Integrated Curriculum, *Language Development, Learning Theories, Linguistic Theory, *Sociolinguistics

The goals of bilingual education and its relationship to education are examined, and a model for bilingual education is proposed. A definition of bilingual education is emerging that permits the child to choose the mode of communication with which he is most comfortable. Cognitive psychology and its emphasis upon the child's active interactions with his environment is a strong argument for supporting mother-tongue instruction. Bilingual education designed as an integrated curriculum that is child-centered rather than teacher-centered is advocated. This model is designed to maximize cognitive growth and encourage symbolic activities through interpersonal interactions. All children are encouraged to manipulate their environment and explore their developing conceptualizations. The language that the child knows best is the medium for exploring and working through ideas. The learning of English is most effectively accomplished when children have an opportunity to use it in functional contexts with English-speaking peers. Integrating the curriculum will permit students to become familiar with the interrelationship between the parts of the curriculum and will prepare them to use all forms of language so that they can bring ideas and facts together without letting it interfere with the comprehension of concepts. This means that they will develop a communicative competence along with a cognitive competence. (SW)

Identifiers-*Fulbright Exchange Program, *Germany

The Fulbright-Hays Teaching Exchange with Germany is a one-for-one exchange for approximately twenty pairs of American and German teachers. American elementary and secondary school teachers as well as college instructors and assistant professors replace their German counterparts for an academic year at either a Hauptschule'' (a non-college track school with grades one through nine), a Realschule'' (a step up from the Hauptschule with grades one through ten), or a Gymnasium'' (a college preparatory school). This exchange provides the Fulbrighter with the opportunity to: (1) promote international understanding; (2) present American views on problems in the Unites States; (3) improve one's knowledge of the German language and school system; (4) increase one's awareness of German life and customs; (5) make German friends; and (6) explore many countries in Europe. This article focuses on three aspects of the Fulbright Teachers Exchange: (1) the teaching assignment in a Gymnasium''; (2) avenues of promoting international understanding such as, the use of educational and entertainment films, exchanges with an American school, German-American social gatherings and basketball games; and (3) the benefits of living in Germany for a year, particularly the comfortable living quarters, close friendships formed, and the opportunities for travel. A Review of the State of Machine Translation.
Pub Date- 79
Note-26p.
Pub Type- Reports - Descriptive (141) - Information Analyses (070)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Computer Oriented Programs, *Languages, *Linguistics, *Machine Translation, Programing, Syntax, Translation, *User Satisfaction (Information)

A review of the state of machine translation considers the historical development of the process, how it works, and results of users' evaluations. Machine translation is the process of translating one language into another through the use of the computer, following the linguistic and computational instructions supplied to it by human researchers in linguistics and programming. The texts to be translated have to be presented to the computer in machine-readable form. Only machine translation that does not involve human editing is considered. The machine translation process that is discussed is unidirectional between a pair of languages: the translation is possible only from Russian to English, for example, and not vice versa, in one system. One of the difficulties that machine translation is faced with is the ability of adjustment to context, but an advantage of machine translation is the speed. An evaluation was conducted by users of the Georgetown system in which translations were unedited translations of Russian texts into English. A second study reviewed evaluations by users of translations made with the FR-II system, involving translations of texts in mathematics, from French into Russian. Organizations that produce machine translations and details of their services and centers conducting research in machine translation are discussed. (SW)

Descriptors-Agriculture, Architecture, Chemistry, *Communicative Competence (Languages), Data Processing, Engineering, *English (Second Language), *English for Special Purposes, Language Instruction, *Languages for Special Purposes, *Language Skills, Mathematics, Physics, Postsecondary Education, *Reading Skills, Sciences, Second Language Learning, Technology, Vocabulary
Identifiers-*Technical Language

Technical English differs from everyday English because of the specialized contexts in which it is used and because of the specialized interests of scientists and engineers. This text provides exercises in technical and scientific exposition in the following fields: mathematics, physics, temperature effects, mechanics, dynamics, conservation of energy, gases and liquids, heat, sound, optics, light energy, magnetism and electricity, chemistry, plastics engineering, atomic energy, radioactivity, nuclear reactors, strength of materials, machine elements, civil engineering, construction engineering, concrete structures, architecture, power and mechanical engineering, electrical engineering, electronics, electronic data processing, and agriculture and forestry. Each lesson contains the following sections: (1) a discussion of the topic and an explanation of technical terms in context; (2) reading comprehension questions and problems; (3) an English-German glossary of important terms; (4) a grammar section containing examples in English and German, and explanations in German; (5) word study and symbols; and (6) writing exercises including translation exercises. Appendices deal with vocabulary, symbols, abbreviations, differences between American and British English, and pronunciation. (AMH)

Practical and Theoretical Concerns in Adult Vocational ESL: The Characteristics of Successful Vocational ESL Programs.

Pub Date-Feb 79

Note-20p.; Paper presented at the National Conference on Bilingual and English as a Second Language Approaches to Academic and Vocational Programs for Adults (Brownsville, Texas, February 22, 1979)

Pub Type- Reports - Descriptive (141) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Adult Education, *Adult Students, Behavioral Objectives, Career Development, *English (Second Language), *Job Skills, Language Role, *Language Skills, *Second Language Learning, Student Centered Curriculum, Student Needs, *Vocational Education

Characteristics of successful adult vocational English as a second language (ESL) programs are described, and psycholinguistic, sociolinguistic, and pedagogical insights are presented. Characteristics of a successful program are as follows: (1) they are learner-centered; (2) there is recognition that English can and should be learned for specific functions and domains; (3) behavioral objectives are specified that are job related and appropriate materials are used; (4) the vocational ESL program is embedded in a good vocational program; (5) the program is functional in nature; (6) there is recognition of the value of vocabulary in the job context; (7) the program builds on skills the adult already has; and (8) there is recognition of cross-cultural differences, especially those relating to education and language learning. Future research needs include: data-gathering of the actual language used in occupational situations, determination of what really matters among the various language skills, evaluation of existing materials and programs in vocational ESL and adult ESL in general, and more assessment of learner needs. Descriptors-Audiovisual Aids, *Discourse Analysis, *English (Second Language), *English for Special Purposes, Higher Education, Instructional Aids, Instructional Materials, *Language Instruction, Second Language Learning, *Teaching Methods, Technical Education, *Visual Aids

This paper investigates the discourse structure of the practical demonstration, particularly the effect produced by the presence of a visual display. The Practical Demonstration (PD), as used in technical education, differs from the lecture in having a visual display; the speaker carries out an operation as he explains it. This affects the structure of the discourse in the following respects: (1) there is a feedback mechanism whereby students can ask and be asked questions; (2) the visual display gives coherence to the verbal text at all levels of discourse; (3) paralanguage (indicating, gaze direction etc.) links the verbal text and the visual display and is therefore a major cohesive device; and (4) the visual display provides an ongoing source of reference for the text. The pedagogical implications of this are that students of Technical English must be sensitized to the way the speaker uses the visual display if they are to cope adequately with technical instruction in English speaking institutions. Samples of illustrative materials are included. (Author/AMH)

The application of an approach to language and language learning to the design of an eight-week summer course in English for Saudi Arabian students is described. Given at the Institute of English Language Education in Lancaster, England, the course consisted of three introductory mini-units, each providing one day's material, and six main units, each of which occupied a week. The view of language and language learning on which the course was based is discussed as well as cognitive and affective processes that influence learning. The overall course plan is outlined and the major components of a teaching unit are described. Sample materials, exercises, and teaching notes are included. (Author/AMH)

Descriptors-Adult Students, *Communication Skills, Communicative Competence (Languages), Conversational Language Courses, English (Second Language), Group Activities, Group Behavior, Group Discussion, *Group Dynamics, Higher Education, *Interpersonal Competence, Language Fluency, *Language Instruction, Language Skills, Learning Activities, *Second Language Learning, Sensitivity Training, Skill Development, *Speech Communication, Teaching Methods

This paper describes the method adopted in a short course to improve group interaction in the foreign language classroom by giving students the opportunity to engage in group interaction and in this way sensitizing them to group dynamics. It provides the outline and rationale of the course, a detailed description of one unit, and evaluation comments. Each unit, lasting about two hours, has the following components: (1) problem-solving activity; (2) feedback on group interaction provided by an observer; (3) a language input session intended to remedy some of the communication problems; and (4) a section called mass production'' in which students put to use what they discussed in the feedback. Interactional analysis, teacher observation, and a discussion of the course by students were used to evaluate the course. (AMH)

The need for change in the way language is understood and treated in schools is discussed. It is important: (1) to see the need for knowledge of the language situations of the United States, (2) to support training and research to obtain such knowledge, and (3) to change the relationship between linguistics and education. The language situation of Black Americans, Native Americans, and Spanish-speaking Americans, uses of language and ethnic heritage, and the issue of bilingual education for communities of Chinese, Japanese, Filipino, and others are addressed. Initially in the field of linguistics, language structure was divorced from language use, but now language use is included by most along with language structure. A linguistics that is truly the science of language and a foundation for education will need to be part of the study of communicative interaction. Linguistic competence needs to be viewed as part of communicative competence, and the character of competence needs to be understood in relation to the social history and social structure that shape it in a given case. The concepts of inherent heterogeneity and hidden hegemony in relation to language problems are discussed. Equality of opportunity and the development of the fullest linguistic potential of the child are also addressed. (SW)

Descriptors-*Communism, Educational History, Governmental Structure, *Government Role, *Nationalism, *Political Influences, Public Policy, Social History, *Socialism, Social Problems, Social Studies
Identifiers-Autocracy, *Russia, *USSR

Historical, philosophical, and social perspectives concerning the development of Soviet society are presented. The concepts of orthodoxy, autocracy, and nationalism that were integral to Russian life for nearly one thousand years of history are discussed, and principles of socialism and communism that were inaugurated in November 1917 in accordance with Marxism-Leninism are described. Analysis of certain major areas of Soviet policy indicates that Russian tradition and contemporary social pressures have forced or persuaded the Politburo to depart from the guidelines of classical Marxism in several instances: (1) long-time retention of severe restraints on civil liberties; (2) reduction of trade-union authority; (3) creation of elite castes in government, management, diplomacy, the military, and even the arts; (4) failure to make a higher standard of living a real goal in any of the several Five-Year Plans so far adopted in the Soviet Union; (5) increased contradiction between mental and manual labor, and between urban and rural life; (6) dissolution of the Communist International and the failure to preserve a united front of the socialist nations; and (7) toleration of religious practices and the restoration of the Church to active participation in social affairs. Persistent problems which 60 years of Soviet socialism have failed to ameliorate are discussed. (SW)

Identifiers-Asia (Southeast)

The topic of international education and higher education is discussed from an Asian viewpoint. Expectations of higher education, international education in a changing world, and international cooperation in higher education are considered. The expansion of universities in industrialized and in developing countries is noted, and information is presented on the growth of universities in Southeast Asia. Although problems have been encountered in most countries, international education has become an important component of Southeast Asian universities. The creation of the United Nations organization at the end of the Second World War brought in a new era in international education. Among the reasons contributing to the broadening of the scope of international education over recent years are the facts that: (1) internationalism has become a way of life; (2) countries in the modern world have become more interdependent than ever before; (3) the globe has become smaller with the advance of science and technology; and (4) communication technology has made advances. Along with numerous intergovernmental and private organizations, higher education has taken the lead in establishing the various channels of cooperation among scholars in different parts of the world. The promotion of world peace and progress depends, among other factors, on international education. (SW)

The basic classroom reading program and the English as a Second Language Program (ESL) in the elementary school are related, yet a gap exists between them. It is suggested that the gap can be bridged in several ways: by bilingual education, through an individualized language experience approach, and by a process called Bridge English.'' Bridge English would require the ESL profession to collaborate with the classroom teacher and the regular basic reading program through reordering what is taught in ESL classes to meet the specific needs of a specific reader. The language of the target text in basic reading is analyzed and oral language lessons based on this text are developed in order to make this language meaningful to the child. Several examples are given of the lexical and syntactic analysis of a basic reader and corresponding ESL activities are suggested. Two accounts of personal experiences using the approach are given. Identifiers-*Elementary Secondary Education Act Title VII

A report is presented of the 1977-78 demonstration bilingual program of the Austin Independent School District. A program description, status reports, and information on the evaluation of the program are provided. The instructional component of the program is designed to provide bilingual instruction in language arts, reading, and math. The curriculum development program component is designed to develop sequential guides for Spanish and English oral language and reading instruction. The staff development component includes one week of preschool teacher training and on-site individualized training throughout the school year. The parental involvement component focuses on informing and involving parents of project students. A major activity of all components is the preparation and implementation of an activity-oriented/experience-based curriculum. Evaluation concerns three areas: (1) evaluation of and feedback concerning on-going project activities; (2) measurement of reading, math, and oral language development of students; and (3) evaluation of the relative benefits of using at-home study units by parents. Evaluation findings, assessment instruments, and questionnaires are included. (SW)

Descriptors-*Adolescence, *Child Language, *Cognitive Development, Cognitive Processes, *Language Development, *Language Research, Linguistic Theory, Psycholinguistics, Social Influences, Sociolinguistics, *Vocabulary Development
Identifiers-Piagetian Theory

A preliminary study was conducted to identify the precipitating conditions and strategies used for vocabulary acquisition and to relate these findings to one theory of elementary and post-elementary cognitive development. Twenty-six college seniors were asked three questions regarding precipitating conditions and strategies used for vocabulary acquisition during the elementary and post-elementary years. Four categories of precipitating conditions were identified: (1) appealing sound and/or adultness,'' (2) immediate usefulness, (3) strong emotion, and (4) peer usage. Appealing sound'' was most frequent during elementary years and peer usage'' was most frequent during post-elementary years. A two-part acquisition strategy was found that included search for meaning and rehearsal. It is concluded that the influence of affect on vocabulary acquisition during elementary and post-elementary years may be far more pervasive and varied than had previously been suspected. Strategies used for vocabulary acquisition are strikingly similar and noticeable for the degree of conscious, deliberate involvement on the part of the learner. Piagetian and neo-Piagetian theories of cognitive development are important in interpreting vocabulary acquisition. (SW)

A synchronic structural description is presented of Haitian Creole as spoken in the Port-au-Prince-Jacmel area, concentrating mainly on phonology and morphology. Historical information and commentary are presented on diglossia and illiteracy, two intertwining sociolinguistic problems of Haiti. A detailed analysis is presented of the Creole sound system, including exemplification and discussion of the phonemics and phonetics of the Port-au-Prince dialect. Front rounded vowels, affricates and nasals, and the systematization of descriptive features are discussed. A structural and functional analysis of the Creole form-classes is presented, and the determiner, the adverb, the verb, and the copula are given definitions and treatment in the analysis. Sixty pages of Creole texts in phonemic transcription are presented and annotated with sociolinguistic comments. (SW)

Role and Variety in Popular American Fiction: The Case of the Dime Novel.
Pub Date-78
Note-13p.; Paper presented at the joint meeting of the American Dialect Society and the Conference on New Ways of Analyzing Variation in English (7th, Washington, D.C., November 3, 1978)
Pub Type- Speeches/Meeting Papers (150) - Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-American Culture, American English, *American Literature, Analytical Criticism, Cultural Factors, Dialect Studies, Language Attitudes, Language Research, *Language Role, *Language Usage, *Language Variation, Literary Criticism, Nineteenth Century Literature, Nonstandard Dialects, *Novels, *Social Dialects, Socioeconomic Influences, Sociolinguistics, Standard Spoken Usage

Dialect writing in nineteenth-century America has been used as a source of evidence about popular American language and culture. Works employing dialect have been studied as documents embodying perceptions of the relation between character, role, and moral values on the one hand, and speech variety on the other. Critics have noticed the difference between the pompous narration in many of the works and the colorful dialect of the characters in them. One study of the dime novel centered on the development of the American hero and demonstrated the improtance of dialect as an indicator of social standing and moral worth in the popular world view found in dime novels. By shifting attention to the varieties of language used in dime novels one can gain insight into attitudes toward language in its social setting. The conspicuous use of exaggerated varieties of English apparently indicates the importance attached to variation by both authors and the reading public. This paper analyzes the relation between the varieties of the dialect used in one dime novel and judgments about the origin, roles, and moral worth of its characters. The popularity of these books suggests that such an analysis can add an historical perspective to the understanding of current attitudes toward languages. (Author/AMH)

Descriptors-Applied Linguistics, Connected Discourse, *Discourse Analysis, English (Second Language), Language Patterns, *Language Proficiency, Language Research, Language Skills, *Language Styles, Language Usage, Linguistic Theory, *Paragraph Composition, Paragraphs, *Rhetoric, Semantics, Sentences, Speech Communication, Speech Skills, Syntax

In a written discourse consisting of a string of ``psychological paragraphs,'' there is in each such psychological paragraph a ``head'' structure containing the topic which derives from the deep structure of the discourse. That ``head'' assertion differs from all other assertions in the psychological paragraph in that it carries new information. The topic expressed in the head assertion is maintained through the remainder of that psychological paragraph by the operation of ``focus'' which is achieved through appropriate choice among available syntactic alternatives. An attempt to provide empirical verification of these assumptions is described. It seems that native and non-native speakers differ in their ability to determine what presuppositions may in fact be shared between writer and reader in a given communication setting (a cultural problem). Secondly, native and non-native speakers differ in the strategies they can bring to bear on the maintenance of any given topic because they have available different sets of syntactic alternatives among which to choose. The non-native speaker uses available syntactic alternatives from his native language and arranges those alternatives in terms of the rhetorical preferences of it. Therefore it would appear that knowledge of the syntax of the second language is not in itself sufficient. There is a need for more elaborated studies of the intersentential syntax underlying focus in various languages. (Author/AMH)

Grammatical Patterns in the Spoken Spanish of Bilingual Teenagers. CUNYForum, No. 3.

City Univ. of New York, N.Y. Graduate School and Univ. Center. Program in Linguistics.

Pub Date-77

Note-10p.; Paper presented at the annual Queens College Conference on Bilingualism and Second Language Teaching and Learning (2nd, November 1976)

Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Bilingual Students, Communicative Competence (Languages), *Error Analysis (Language), Grammar, Informal Assessment, Interviews, Language Patterns, *Language Proficiency, Language Research, Language Usage, Listening Comprehension, Peer Evaluation, *Puerto Ricans, Self Evaluation, *Spanish, Spanish Speaking, *Speech Skills, Teenagers, Verbal Ability

Identifiers-*Grammatical Acceptability Judgments

Twelve teenagers of Puerto Rican origin were interviewed to determine their proficiency in speaking and understanding Spanish. Three levels of oral Spanish proficiency were established as reference points on a continuum by using self-ratings, peer-ratings, and self-reports of usage. These impressions were verified by the number and type of errors made by each group, the number and type of verb forms correctly used, and the use of English. The study exposed the following general characteristics of the teenagers' Spanish: (1) comprehension exceeded expressive ability; (2) the verb system showed a great deal of variation, but there were no attempts to simplify it in a pidginization process; (3) the present perfect tense was not used; (4) the use of the subjunctive varied with the fluency of the speaker; and (5) the interviewer was not addressed with the third person singular. Fifteen adult Spanish speakers judged the acceptability of sentences transcribed from the interview. Unacceptable practices included English syntax and vocabulary, verbs incorrect for person or number, indicative used for subjunctive, and present or subjunctive used for conditional. (Author/JB)

Descriptors-*Collective Bargaining, *College Faculty, Colleges, Community Colleges, *Faculty Organizations, Higher Education, Junior Colleges, *Negotiation Agreements, *Organizations (Groups), *Unions, Universities

Identifiers-American Association of University Professors, American Federation of Government Employees, American Federation of Teachers, American Fed of State County Municipal Employees, National Education Association

Institutions and campuses with faculty collective bargaining agents are listed. Two-year and four-year institutions are listed under the following groups: the American Association of University Professors (AAUP); the National Education Association (NEA); a coalition of AAUP and NEA affiliates; American Federation of Teachers; independent agents; American Federation of State, County and Municipal Employees; and American Federation of Government Employees. Statistical tables provide data on: college faculties with bargaining agents by campus count and by institution count; faculties with or renegotiating contracts by campus count and by institution count; and types and number of agents by state within region for four-year and two-year institutions. In 1977 the number of newly unionized institutions was matched by the number of institutions rejecting collective bargaining. (SW)

Descriptors-*Academic Standards, *Accreditation (Institutions), *Agency Role, Consumer Protection, Court Cases, Educational Quality, Federal Government, *Federal Regulation, *Government Role, *Postsecondary Education, Private Agencies, Program Evaluation, Student Loan Programs, Welfare
Identifiers-*Accrediting Agencies, Korean War GI Bill, *Office of Education

The legal question of the scope of administrative authority Congress has actually conferred upon the Commissioner of Education in the listing of accrediting agencies of institutions of higher education is addressed. To ensure that its tax monies would not be paying for substandard education, but to avoid controlling education, the government, through the 1952 Korean War GI Bill, began its reliance on private accrediting agencies. State approval agencies were authorized to approve courses offered by an institution that had been accredited by a nationally recognized accrediting agency, and the Commissioner of Education was authorized to list such accrediting agencies. However, during the past decade, private accreditation has been criticized and, in response, the Office of Education has expanded its role until it has begun to proximate that of a regulatory agency. Abuses of the guaranteed student loan program, advertising, business practices, refunds, and other wrongdoing have been targets of regulations. Much of the criticism and Office of Education response assumes that Congress has given administrators broad authority to fashion standards governing the selection of those accrediting agencies it will list, as long as the standards serve public interest as currently perceived. It is demonstrated in this report that the scope of administrative discretion is narrower than many critics and government officials have assumed, and that many of the proposals for change have been directed to the wrong branch of the government. Descriptors-*College Role, Colleges, *Economic Development, Educational Economics, Employment Opportunities, Expenditures, *Financial Support, *Higher Education, Institutional Characteristics, *School Community Relationship, Social Influences, Universities
Identifiers-*Economic Impact, In State Students, Out Of State Students, Spending Patterns, *Vermont

The economic and social impact of the 22 colleges and universities in Vermont is summarized. Each institution used an economic impact estimating model developed by the Higher Education Planning Commission that measures short-term cash flows and expenditures, and additional surveys prepared by the project steering committee. Questionnaires from each school provide summary data on: employees by general occupation; assets and recent construction expenditures; institutional revenues by in-state/out-of-state; enrollment, including non degree and summer sessions, by in-state/out-of-state; and degrees and certificates awarded by in-state/out-of-state. Individual institutional data are provided for: Bennington College, Castleton State College; Champlain College; College of St. Joseph the Provider, Community College of Vermont, Goddard College, Green Mountain College, Johnson State College, Lyndon State College, Marlboro College, Middlebury College, Norwich University/Vermont College, Saint Michael's College, School for International Training, Southern Vermont College, Trinity College, University of Vermont and State Agricultural College, Vermont Institute of Community Involvement, Vermont Law School, Vermont Technical College, and Windham College. Descriptors-Business, Decision Making Skills, Educational Objectives, Educational Trends, *Education Work Relationship, Higher Education, Humanities, *Liberal Arts, Liberal Arts Majors, *Private Financial Support, Problem Solving, *Professional Development, *Relevance (Education), *School Industry Relationship, Specialization

The increasing trend toward specialization in education and reasons why corporations need college graduates educated in the liberal arts are discussed. Individuals are needed by corporations with a broad cultural background and high cognitive capacity for problem-solving and for perceiving profit-taking within the context of moral principles and social values. Employees are needed who are capable of sustained intellectual growth who will be able to adjust the policies of the corporation to the changing circumstances of the later twentieth century, and who will be able to communicate with their counterparts in other countries. Corporations should recruit a fixed percentage of new employees from among the various fields of liberal arts, or, at the very least, insure that an appropriate mix of specialists and generalists are recruited. Problems faced by undergraduate and graduate level liberal arts programs and the corporate obligation to financially support higher education, particularly undergraduate liberal arts programs, as well as the research in the humanities and human sciences are discussed. Arguments for liberal arts study that have been presented throughout history are noted. Members of the board of directors, board of advisors, and staff officers of the Council for Financial Aid to Education, Inc., are also listed. (SW)

Descriptors-*Astronomy, College Majors, *Doctoral Degrees, *Employment Opportunities, Enrollment Rate, Graduate Study, *Graduate Surveys, Higher Education, *Masters Degrees, Minority Groups, *Physics, Student Characteristics

The 1977-78 annual Graduate Student Survey analyzes information supplied by graduate physics students and also includes graduate astronomy students. Highlights of the findings are: a continuing decline in the number of graduate physics degree recipients; the reassurance of a steadily improving job market for new physicists with graduate degrees; a five percentage-point decrease in the proportion of graduates who accepted postdoctorates with a corresponding increase in employment offers with potential permanence; and a decline in astronomy enrollments and graduate degree recipients. Data are presented on the following areas: employment offers for new physics doctorate and masters recipients, 1973-78; characteristics of the graduate physics student population, 1977-78; characteristics of minority-group graduate physics students; graduate physics students by subfield and years of graduate study completed, 1977-78; sources of support by sex and degree status; number of advanced graduate physics students specializing in selected experimental or theoretical subfields by years of graduate study completed; type of research performed by doctoral candidates with respect to years of graduate study completed; employment offers for 1977-78 doctorate recipients by subfield and type of research; type of employer and work activity of physics terminal masters; and characteristics of astronomy graduate students and doctorate recipients. This report extends earlier Carnegie Council comment on and advice about the proper ethical condition for higher education. Higher education in the United States is thought to have made many positive contributions to ethical conduct; yet some signs of deterioration are observed in important parts of academic life. Fourteen recommendations are made for specific action in these areas: student consumer education; information centers for better student choice; institutional codes of rights and responsibilities; statements and enforcement of penalties for ethical infractions; equitable, easily understood, and published grievance procedures; full and complete disclosure of institutional practice; the increased involvement of regional accrediting agencies in matters of institutional rights and responsibilities; state standards in approval of degree-granting programs; decreased federal involvement in some areas; simplification of procedural compliance with federal regulations, and elimination of some procedural regulations; and federal and state legislation to facilitate collection of defaulted student loans. Information on cooperative education programs gathered by survey is presented. Listed are 992 programs operational with 459 junior-college programs and 533 four-year-college programs. In addition to listing the colleges and universities with such programs, six categories of information about the institution and the program are provided if known. The categories are: (1) institutional level; (2) the curricula that have the cooperative plan; (3) the length of the cooperative workterm; (4) the number of workterms provided by the program; (5) the number of years required for the degree; and (6) whether or not degree credit taking the place of credits earned through the classroom is given based on cooperative work experience. In addition, the listing notes whether the program is fully operational or recently put into operation, and includes the enrollment for the 1977-78 academic year. The listing is in chart form, by state. (Author/MSE)

Descriptors-Access to Education, College Choice, Equal Education, *Federal Aid, *Federal Legislation, *Federal Programs, *Federal State Relationship, Higher Education, Loan Repayment, Program Administration, Program Costs, Program Improvement, Public Policy, State Government, Student Employment, *Student Financial Aid, Student Loan Programs

In 1979 the Congress and the administration will consider legislation to extend and revise the Higher Education Act and, in the process, will review the structure of the student-aid system. Several alternatives are likely to be considered, but a fourth is proposed here: a major overhaul of the existing package of programs to make them more equitable in their impact and more sound in their administration at about the same cost to federal and state governments combined. This alternative considers the significant accomplishments of the federal student-aid system to date, and suggests specific improvements in four areas: (1) the introduction of an explicit self-help component (through earnings and borrowing) by the student himself; (2) a loan system that makes loans more easily and widely available and at much less risk of heavy default rates; (3) additional assurances of equality of opportunity for all young persons to obtain a college education if they wish; and (4) a greater range of choice for students and potential students. Financial and statistical data are provided as illustrations. (Author/MSE)

Descriptors-College Curriculum, College Instruction, *Course Content, Course Evaluation, Curriculum Development, *Curriculum Evaluation, Higher Education, *Interdisciplinary Approach, Resource Guides, *Teaching Methods

The problems of instruction in interdisciplinary fields of college curricula are addressed in this guide, which is an outgrowth of a seminar. The observations on interdisciplinary studies apply both to programs of interdisciplinary studies as well as to individual interdisciplinary courses. The problems faced by the practitioner of interdisciplinary studies are also faced by all teachers regardless of field. The developmental process of general teaching methods is applied to the special problems of interdisciplinary studies in this guide. The following areas are addressed: definition of interdisciplinary studies, course and content selection for interdisciplinary studies, production and implementation of interdisciplinary courses and curricula, evaluation of interdisciplinary studies, and common problems with interdisciplinary teaching. Using Peers in Instructional Development.

Pub Date-1 Mar 79
Note-14p.; Paper presented at the conference on Faculty Development and Evaluation in Higher Education (Orlando, Florida, 1979)
Pub Type- Information Analyses (070) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Classroom Observation Techniques, *College Faculty, Effective Teaching, Faculty College Relationship, *Faculty Development, *Faculty Evaluation, Higher Education, Instructional Improvement, *Observation, *Peer Evaluation

Peer observation is discussed as an aid in instructional development, rather than a method for teacher evaluation. A team effort, consisting of from three to four peers who observe each other from four to seven times during the span of one term offers the greatest likelihood that instruction will be improved. Whether these groups are elective or assigned, disciplinary or interdisciplinary, is a matter of institutional preference and each combination offers unique advantages. Instructing faculty members in the terminology, philosophy, and methodologies of observing the teaching/learning process is crucial, and the orientation sessions require an introduction to the educational jargon used in observation. An orientation, or pre-observation conference can allow the observee to provide the team with his objectives for the lesson they are to observe and the criteria for the observation. Observation in the classroom should be unobtrusive. In a post-observation conference the observee analyzes the achievement of the lesson objectives, and the team provides feedback based on their data sheets. Based on the discussion, the observee can plan to increase some behaviors, such as questioning, or maintain the use of techniques which were successful. Evaluation of the effectiveness of a peer observation program is discussed. (SW)

Descriptors-Educational Legislation, *Educational Policy, Educational Status Comparison, Federal Government, Federal Legislation, *Government Role, *Higher Education, Institutional Role, *Policy Formation, Professional Associations, *Public Policy, Resource Guides, State Government

A guide, designed especially for non-American educators, presents information to promote understanding of the U.S. policy-making process in higher education. Levels for policy analysis concern individuals, institutions, groups of institutions, state and local levels, national level, transnational level, and comparison of countries. Representative policy issues can be viewed from the perspective of institutions, state governments, national governments, and transnational level. For each of these levels of analysis, issues and types of agencies and concerned parties are listed. Institutions are listed under the following categories: U.S. agencies, state and regional agencies, associations, university and research centers, unions, international organizations, special study groups, and other organizations. U.S. legislation pertaining to higher education is also listed. Background reading materials are provided for the following areas: institutional, state policy, national policy, transnational, periodicals, bibliographies, data sources, and special reports. (SW)

Descriptors-*Articulation (Program), *College Cooperation, *Community Colleges, Higher Education, Interinstitutional Cooperation, Program Coordination, *State Colleges, *Statewide Planning, *Transfer Policy

Identifiers-*Florida

An articulation agreement is described that was developed between Florida's statewide community college system and statewide university system. The 1971 articulation agreement was a compromise between the two college systems. Listed are the specific transfer policy provisions of the articulation agreement and functions assigned to the Florida Articulation Coordinating Committee. The committee has periodically established special task forces to create a process of consultation to develop articulation policies or solve problems. Functions of task forces that have been formed are outlined. A common course numbering system, a scheme or logic for colleges and universities to use in numbering and designating their courses, has been one of the most significant steps in the ongoing development of articulation in higher education in Florida. Both universities and community colleges have appointed liaison officers to assist in the transfer of students. New thrusts in articulation include: the promotion of time-variable, competency-based academic programs, especially in Associate of Science programs; the growth in the number of Associate of Science degree graduates successfully transferring to university-level programs; the statewide mandate to implement time-shortened and time-variable degree programs; increased shared use of facilities between community colleges and universities; and increased international exchange. Descriptors-*College Instruction, Educational Accountability, Educational Objectives, Geography, Higher Education, *Independent Study, *Individualized Programs, *Instructional Innovation, *Instructional Media, *Learning Laboratories, Microbiology, Science Laboratories, Zoology
Identifiers-*Indiana University Bloomington

An audio-tutorial approach that has been implemented at Indiana University in Bloomington focuses on student learning rather than the mechanism of teaching. The basic component of an audio-tutorial course is a taped presentation that acts as a tutor, guiding the students through a sequence of readings, filmstrips, diagrams, tables, and other media. The tape is not simply a recorded lecture; the students are frequently directed by the tape to stop and analyze materials, plot data, examine a filmstrip, apply principles, and discuss conclusions. An instructor is always present when the tapes are being used. Use of the audio-tutorial laboratory in zoology, microbiology, and geography classes is discussed. The most important advantage of the approach is that it allows procedures for specific techniques to be given to students on an essentially individualized basis when the student is ready for them. In the microbiology course, the audio-tutorial approach also became an integral part of the evaluation process. (SW)

Descriptors-College Students, *Discussion (Teaching Technique), *Educational Objectives, *Evaluation Methods, Higher Education, Learning Experience, Questioning Techniques, *Records (Forms), Religious Education, *Self Evaluation, *Student Evaluation, Undergraduate Study

Identifiers-Indiana University Bloomington

A self-grading form that was developed for a large introductory religion course was designed to clarify the objectives of the discussion session, provide a uniform grading process, allow the student a chance to assess his own performance, and stimulate the student to consult with the assistant instructor (AI) for improvement in discussion. A syllabus coordinates lectures with a weekly discussion focus. The AIs are trained not to lecture or provide discussion questions. Students are asked to hand in a discussion question each week, and students have a right to evaluate themselves using a standardized evaluation form. The form is designed to serve as a means of communication between the student and the AI and a way to assign a grade to the student for participation in the discussion. Student evaluation is concerned with the following factors: attendance, submission of questions, kinds of questions, clarity of expression, preparation, courtesy, tolerance, ability to relate materials, and listening. The form, which is appended, can be easily modified to fit other disciplines. (SW)

The Interaction Between Learner Characteristics and Two Methods of College Instruction: Conventional and Mastery Learning.

Pub Date-79
Note-17p.; Paper presented at the American Educational Research Association annual meeting (San Francisco, California, 1979); based in part of doctoral dissertation of Jon R. Root
Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Achievement Tests, Animal Science, *Cognitive Style, *College Instruction, Comparative Analysis, *Conventional Instruction, Educational Diagnosis, Educational Objectives, Higher Education, Independent Study, Instructional Innovation, Learning Modules, Lecture, Locus of Control, *Mastery Learning, Multimedia Instruction, Recreation, Student Characteristics, *Student Evaluation, *Teaching Methods
Identifiers-California Psychological Inventory

A study was conducted to determine whether conventional instruction and mastery-based auto-tutorial instruction interacted with learning characteristics that were found to be instruction-interactive in previous research. Conventional instruction consisted of lecture with discussion and laboratory periods. The mastery-based auto-tutorial instruction consisted of multi-media modules that the learner studied until mastery was attained, and student-teacher communication was minimal and occurred only in individual discussions. Undergraduates enrolled in an undergraduate course in wildlife recreational techniques were administered the following tests: the Ac (achievement via conformance) and Ai (achivement via independence) scales of the California Psychological Inventory, the internal-external locus of control scale (Rotter, 1966), a multiple-choice achievement test covering content from the experimental unit, a delayed achievement test developed and administered eight and one-half weeks after the experimental period, and semantic differential scales designed to measure student attitudes. The findings indicate that one can enhance learning by using Ac scores to match students with an instructional treatment. Students with low Ac scores achieved better when assigned to mastery instruction and students with high Ac scores achieved better when assigned to conventional instruction. (SW)

Identifiers-*Karachi University (Pakistan), Pakistan

Studies were conducted to determine whether measures of intellectual merit that are used as criteria for admission to the University of Karachi in Pakistan have predictive validity. The predictive validity of the intermediate examination score was studied with recent graduates of the pharmacy, medicine, and engineering schools. Additional studies of business school and arts and sciences graduates were also conducted. Regression analyses indicated that the current criterion of merit (intermediate score) explained little of a student's subsequent university performance. Even after including matriculate test scores and several independent variables in the analysis, the regressions had little predictive power. Possible explanations of the findings and a discussion of the pros and cons of merit-based admissions criteria are presented. (SW)

Interaction of Student Characteristics and Student-Faculty Relationships in the Prediction of Freshman Year Voluntary Persistence/Withdrawal Decisions.

Pub Date-Apr 79

Note-40p.; Paper presented at the American Educational Research Association annual meeting (San Francisco, California, April 1979)

Pub Type Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-College Environment, *College Freshmen, Followup Studies, Higher Education, Interpersonal Relationship, *Persistence, Private Colleges, Questionnaires, *School Holding Power, Student Attitudes, *Student Characteristics, *Student College Relationship, Student Opinion, *Withdrawal

The interactive influence of student characteristics and eight measures of student-faculty relationships on the prediction of freshman year voluntary persistence/withdrawal decisions was studied. A questionnaire was sent to the total population of incoming freshmen at a large, independent, residential university in New York State. Usable responses from 1,457 students provided information on expectations of the college experience and selected background information. A second questionnaire on the reality of the college experience was sent to the students during the spring semester of the following year. Of the 1,457 students, usable responses were received from 773 freshmen. Student-faculty relationships were measured on eight scales; six of the scales were concerned with the frequency of student-faculty informal contact. The remaining two scales assessed students' perceptions of the quality and impact of their informal interactions with faculty and faculty concern for teaching and student development. Eight measures of student-faculty relationships explained a statistically significant additional 14.4 percent of the variance in persistence/withdrawal decisions, after 14 pre-enrollment characteristics and five measures of freshman year social and academic integration had been statistically controlled. Descriptors-Comparative Analysis, Decision Making, *Educational Finance, *Fund Raising, Higher Education, *Individual Characteristics, Information Sources, Institutional Research, *Private Colleges, *Private Financial Support, Public Relations

Identifiers-*Donors, *University of Miami FL

A study was conducted at the University of Miami to identify factors that might distinguish between donors and nondonors to the financial support of private universities. The theoretical framework for the study was based largely upon Lecky's self-consistency theory of personality. Three groups of donors and a group of nondonors to the University of Miami were identified. A questionnaire was sent to 272 individuals and 151 usable responses were obtained. A two-group stepwise discriminant function analysis (Fisher) was applied to the questionnaire-generated data. Regardless of whether they were donors or nondonors, respondents perceived themselves as being more generous than other persons. They also perceived themselves as being less influenced by outside forces when making a decision to give money. Profiles for the donor and nondonor groups were developed. Information is presented on attitudes and beliefs about higher education issues, philanthropic views of others and of self, factors that influence decisions to give money to a private university, perceptions and information sources concerning the University of Miami, and demographic characteristics. Descriptors-*Academic Freedom, Centralization, *Compliance (Legal), Decision Making, Educational Administration, *Federal Regulation, Government Role, *Government School Relationship, *Higher Education, *Institutional Autonomy, School Organization, Trend Analysis

The impact of increasing federal regulation on American universities is discussed based on an informal survey of senior academic and administrative officials in 13 public and private universities. As government regulation is becoming more intensive and compliance more resource- and time-consuming, government is perceived as having little appreciation for the power and value of academic freedom. With stipulated administrative procedures and required bureaucracy have come pressures toward centralized institutional decision making and away from the traditional decentralized collegial style. The need to recognize the differences between universities and other types of institutions is emphasized. The most serious challenges to institutional freedom are imposed by the implementation of federal affirmative action and costing policies administered by the Department of Health, Education, and Welfare. The heart of the debate over regulation and autonomy is the concern to protect traditional freedoms in the four areas of curriculum, faculty recruitment, student admission, and methods of teaching. The need for universities to improve their legislative skills and two activities that have recently been undertaken by several higher education associations to address regulatory problems in research are discussed. Identifiers-*Europe, France, Sweden, United Kingdom

Public policies in France, Sweden, and the United Kingdom are compared with regard to quantitative developments in higher education. The analysis is focused on the issue of private versus social demand, but more detailed aspects of quantitative planning also are addressed. The following question is discussed: why Sweden adopted a system of quantitative planning in higher education that included a system-wide numerus clausus'' largely based on social demand, while France and the United Kingdom continued to rely mainly on private demand? Five possible determinants are examined: financial resources, national planning traditions, issue webs,'' policy inheritances, and specific policy processes. The effectiveness of the governments in predicting and meeting private demand is analyzed, and the record in areas where manpower planning has been attempted is examined. (SW)

Descriptors-Access to Education, *Comparative Education, Educational Status Comparison, Educational Trends, *Enrollment Rate, Foreign Countries, Government Role, *Higher Education, *Organizational Climate, *Public Education, School Organization, Social Factors, State Colleges

Identifiers-*Belgium, *France

The patterns of development of mass higher education in France and Belgium are compared. Student enrollment data, governmental measures taken to meet needs, and effects of the action within higher education are examined. Results of mass higher education in terms of its principal expectations and future prospects are also analyzed. France and Belgium are eighth and ninth respectively in the rate of increase in higher education from 1950 to 1965. In France the transition to mass higher education has led to a complete restructuring of the predominant sector of higher education, and the process is even now incomplete. Belgium has made this transition without significant alterations in the basic structure of its institutions. The cases of the two countries offer some suggestive material about the social consequences of different forms of system organizational structure in higher education. (SW)

Descriptors-*Policy Formation, *Public Policy, Research Problems, *Research Utilization, *Social Science Research, Social Sciences

Reasons for underutilization of social research in public policy-making and the complexity of the concept of utilization are discussed. Among the factors affecting underutilization are the limitations of the social sciences and shortcomings of specific policy research. A common explanation of underutilization is the allegedly long-established neglect on the part of government of the potential contributions of social research. Another limit on research utilization is the fact that time is often a very scarce resource in policy-making. Additionally, research is also costly; the fragmented character of policy-making works to the disadvantage of research-based knowledge; and sophisticated social research methodologies are difficult for policy-makers to assess. Underutilization or nonutilization of social research is also thought to be due to the differences in values, language, reward systems, and professional affiliations between policy-makers and researchers. It is noted that social research is almost always used for partisan purposes in the policy process, and that the role of research can only be understood within the context of the entire policy process. Identifiers-*On Campus Students, Spending Patterns

Information is presented about the costs of pursuing education beyond high school at different institutions. An introductory section analyzes student-expense data on a nationwide basis. Student expenses are listed for approximately 2,930 postsecondary institutions. Analyses are provided for four different budget types: budgets for dependent resident students living on and off the campus, a budget for dependent commuting students, and one for self-supporting students. These budgets for the four different student categories represent average costs, and any individual student at an institution may have expenses that vary from these. A student expense budget is an all-inclusive summary of both direct educational and living expenses. The expense budget for the typical student at a postsecondary institution is made up of five principal parts: tuition and fees, books and supplies, room and board, personal expenses, and transportation. Tables provide data showing how postsecondary education expenses are changing and how expenses vary by College Board region. (SW)

A longitudinal study has been conducted on 1960 graduates of a stratified sample of 28 medical schools to provide information on physician characteristics as they relate to career decisions. This 1976 followup study, with a response rate of 73 percent, provides information on the practices of 1,850 respondents. Of approximately 900 items of information collected during the interval, 49 variables were identified for close scrutiny, after a series of data reduction measures. These remaining variables were categorized as belonging to one of six classes of information: (1) general background factors; (2) personal qualities or attitudes as measured during medical school; (3) achievement measures, obtained at the same time; (4) characteristics of premedical college attended; (5) characteristics of medical school attended; and (6) personal factors at the time of graduation from medical school that might operate as constraints on future choices. Identifiers-*College Applicants, New York, *State University of New York

Data collected during the seventh and eighth annual studies of the application and enrollment patterns of State University of New York (SUNY) transfer students are tabulated. For the purpose of this study, transfer students were defined as undergraduate students who were enrolled at a SUNY institution for the first time in a fall term, but who had attended other colleges or universities prior to the given fall term. Summary tables provide information by prior institution and student level for four-year and two-year institutions and for the four coordinating areas. Enrollment trend information for Fall 1967 through Fall 1977 is provided for transfer, continuing, returning students, and for full-time undergraduate students by level at the four-year institutions. Detailed information is provided on undergraduate transfer students for each institution for Fall 1976 and Fall 1977. A map indicating the constituent institutions of the State University of New York and a publications list are appended. (BH)

Identifiers-*Australia, *Nursing Education, Position Papers

A study of the education and training of nurses in Australia by the Tertiary Education Commission of Australia is presented. In September 1977 the Minister for Education appointed a committee to advise the Commission on possible developments and changes in nurse education and training. Data were collected from visits and consultations with representatives of hospitals, professional nursing organizations, and related health care professionals. The report includes a brief historical review of the nursing profession and the current system of nurse education and training. Investigation into the current supply of Australian nurses and the financing and costs of their education revealed a lack of data about the number of nurses, their distribution by age, sex, qualification, type of practice, and geographical location. Problems related to hospital-based nurse education and issues influencing future nurse preparation are examined. Also addressed are: expansion and costs of nurse education in colleges of advanced education, psychiatric nursing and mental deficiency nursing, post-basic nurse education, and continuing education. Recommendations from the study focus on standardizing the accreditation and quality of nursing education. Specific recommendations are included for: basic nursing courses, post-basic courses, nurse educator programs, nursing staff development opportunities, and continuing education. It is also suggested that resources be made available by both the health and education systems for research into nursing education and evaluation of present nurse education programs. (BH)

Descriptors-*College Faculty, *Faculty Development, Foreign Countries, Higher Education, Needs Assessment, *Program Administration, *Sabbatical Leaves
Identifiers-*Australia

A study on the system of study leave that exists in Australian universities and colleges of advanced education was conducted by the Tertiary Education Commission. A draft report, which is appended, was issued in May 1978 and public comment was invited on the report. The comments that were received on the draft report are summarized, and the commission's views on the desirable modifications to present arrangements for study leave and staff development leave are presented. Problems of implementation and the commission's recommendations are also included. Study leave'' is used as a generic term to cover both outside studies programs and professional experience programs. Commission views address the following areas: institutional autonomy, availability of study leave, location of study leave, participation in study leave, accountability, length of absence, conferences, other absences, fares and traveling allowances, outside grants and earnings, general staff, improvement of qualifications of academic staff in colleges, and implementation. Identifiers-Hunter College NY, Note Taking

To help schools recruit and retain their students without lowering academic standards, a full semester freshman seminar designed to train new college students in the skills they will need is proposed. The importance of this approach in light of the growing competition among colleges and universities to attract students is discussed. Increased access to education has made the traditional freshman orientation inadequate and requires that orientation programs change their focus to meet student needs. A step-by-step approach to establishing and teaching a freshman orientation seminar is presented, based on the experiences of Hunter College's Freshmen Seminar Program. The fundamentals of curriculum design and content as well as teaching methods for the seminar are described, including: lesson plans, games, attitude inventories, and role playing. The three curricular components of the freshman seminar are: information, skills, and attitudes toward being a student. Remedial courses and other activities include note-taking, test taking, class participation, interacting with instructors, and developing realistic attitudes towards learning. The goal of the freshman seminar is viewed as attitudinal: to help the entering college student see himself as an active participant in the process of learning rather than a passive recipient of an educational system. Formats of seminar sessions are described and three classroom dialogues are provided. Appended are a course description, course information sheet, and program planning exercise. A selected bibliography is included. (BH)

Identifiers-Administrators, American Association of University Administrators, American Association of University Professors, *Legal Analysis

An overview of legal issues that relate to education, the abundance of new laws, newly applied laws, and judicial decisions in the field of education are discussed in this practical guide for educators. A historical orientation to some of the basic legal concepts in education is provided for: full disclosure, fair practices and nondiscrimination, financial exigency, due process, class actions, and computers. Possible legal remedies and recommendations to assist in preventing litigation are suggested and recent court cases and laws are used to illustrate issues. Implementation of due process and other required legal procedures, such as timely notice and avenues of appeal, are considered in relation to employment practices, collective bargaining, admission of new students, treatment of students on campus, and funding and facilities. Recommendations are provided for each policy area. Twenty-four federal statutes relating to education are briefly annotated. Appended are the Professional Standards for Administrators in Higher Education of the American Association of University Administrators, and the 1940 Statement of Principles on Academic Freedom and Tenure of the American Association of University Professors and the American Association of Colleges. Identifiers-*Lobbying, Position Papers

Position papers collected by the United States Student Association (USSA) outlining objections to the reimposition of a selective service draft are presented. The USSA believes that a draft is unnecessary because: total active military strength is maintained even when voluntary enlistment falls short of its goal; it would increase military costs; the all-volunteer force attracts more intelligent recruits; and it would not solve the problem of racism in the Armed Forces. The USSA also suggests that compulsory registration violates privacy and constitutional rights and that support for the draft is based on inaccurate projection figures. Supporting materials from the Friends Committee on National Legislation, the National Interreligious Service Board for Conscientious Objectors, and the Agency for Military and Draft Counseling are included. An overview of Congressional opinions and legislation pertaining to the draft are presented. Activities that can be undertaken by student governments and student groups to counter Congressional moves to reinstate the draft are provided, including petitioning, writing editorials, and contributing to radio talk shows. Names and addresses of contact people and organizations are also provided, as is a publications order list. (BH)

Identifiers-*Divestiture, Lobbying, Position Papers, *South Africa

This student resource guide prepared by the South Africa Catalyst Project for the United States Student Association (USSA) focuses on the student anti-apartheid movement and divestiture activities of American students. Divestiture of university-held stock in U.S. corporations operating in South Africa is the major focus of the student anti-apartheid movement. The USSA is seeking to apply pressure to U.S. corporations and the U.S. government to cease their support of the apartheid economy and military apparatus of South Africa. The history and activities of the U.S. student anti-apartheid movement are summarized. The escalation of student actions in the spring of 1978 in support of college and university divestiture is described. The USSA estimates that 110 schools have anti-apartheid groups. The goals and objectives of the movement are outlined and problems and challenges to divestiture are discussed. The process by which students can investigate university investments is explained, as well as various methods that can be used for divestiture including shareholder resolutions. A discussion of the administration's response to student pressure for divestiture centers on administration-sponsored Investment Advisory Councils and the Sullivan principles. Conflicts of interest relating to the divestiture problem and objections to the sale of Kruggerands in the U.S. are also discussed. A list of resources for anti-apartheid organizing is appended. The types and sources of financial assistance provided to undergraduate students by their institutions during 1976-77 were investigated as part of a survey conducted by the American Council on Education (ACE). A sample of 760 colleges and universities that comprise ACE's Higher Education Panel were asked to report the amounts and kinds of institutionally-funded aid provided to undergraduates. This encompassed all aid from private sources distributed exclusively by the institution. Public institutions included their state or local appropriations earmarked for student aid at the institutional or system level. The survey results indicate that during 1976-77 undergraduate students received more than $5.1 billion of their own funds to aid undergraduate students. Of this institutional assistance, 56 percent was provided as grants or scholarships, 36 percent as wages for student employment, and 8 percent as loans. More than 2 million students received some form of assistance from their institutions, averaging $454 in the public sector and $1,366 in the private sector per aided undergraduate. For 600,000 undergraduates, their institutions were the only providers of financial aid. Data are tabulated by the type and source of student aid, dependent undergraduate family incomes, and institution type. The survey instrument is appended. (BH)

Descriptors-*College Faculty, *College Instruction, Educational Objectives, Educational Theories, Effective Teaching, *Faculty Development, Higher Education, Learning Experience, Needs Assessment, *Postsecondary Education As a Field of Study, Student Teacher Relationship, *Teacher Attitudes, Teaching Methods, *Teaching Styles

The way in which teachers view teaching and learning and implications for the improvement of teaching were studied. A review of the relevant literature and of needs assessment reports based on teacher concerns was conducted, and interviews with faculty members were held. Suggestions based on preliminary results are offered. It is suggested that for many professors there is no recognition of pedagogy as a discipline, and some teachers appear to have difficulty in talking about, and perhaps in conceptualizing, teaching. Teaching is personal and identified with the teacher as a person, and some teachers discuss what they do in class with no reference to students. The most important need that teachers identified was time to increase content expertise. It is suggested that the underuse of instructional and faculty development resources may be related to the views that teaching is not a discipline and that teaching improvement is an individualistic activity requiring no expert assistance. Underuse may also be related to qualitatively different perceptions of teaching. (SW)

Descriptors-*Academic Rank (Professional), *College Faculty, Comparative Analysis, *Departments, *Expectation, Graduate Study, Grants, Higher Education, Institutional Research, *Organizational Climate, Private Colleges, *Researchers, Research Opportunities, Social Systems, State Universities

A study was conducted to determine how research by faculty members is responsive to uncertainty or inadequacy in the environment. The interrelationships among four variables were studied: perceived environmental uncertainty, complexity, boundary spanning activity, and environmental adequacy. It was proposed that the nature of the interrelationships among this set of variables will have important implications for understanding what kind and how much research is done by faculty members. Each of 22 graduate departments was conceptualized as a social system with faculty members as the unit of analysis. Twenty-five interviews were conducted with department chairs, faculty, and administrators at two major midwestern universities, one public and one private. Departments were sampled from the humanities, social, biological, and physical sciences. It is concluded that the certainty with which respondents at the two universities expect to receive grants appears to depend on the excellence of their departments, the developmental history of their department, the rank of the applicant, and the research area involved. Privileged access to the resources clearly reduces perception of environmental uncertainty. (SW)

Identifiers-Preparatory Schools

The effects of school type and curriculum on high school grades, plans for further schooling, and enrollment in higher education and postsecondary training were studied. The data were obtained from the National Longitudinal Study of the High School Class of 1972. The base-year sample contained over 16,000 seniors in over 1,000 high schools of all types. By 1976 there was an 87 percent retention rate among the original respondents. Grades were found to be lower at college preparatory high schools and higher at vocational-technical high schools. Plans for college were found to be unaffected by school type, and plans for further vocational training were somewhat lowered by attending a specialized area vocational high school. Academic enrollment was found to be more frequent as a result of attending a college preparatory high school, and postsecondary training, broadly defined, was found to be unaffected by school type. Possible reasons for these findings, ways high schools can influence students, and implications for further research are discussed. (SW)

Identifiers-Conflict of Interest, *Intellectual Property Rights

Governing board chairmen of 176 selected postsecondary institutions were surveyed to determine their levels of knowledge, involvement, and satisfaction concerning policies for extra-income-earning activities of the faculty. Such activities provide benefits to the faculty, the university, and to society, but potential conflicts of interest and problems in the use of salaried time and institutional resources have become increasingly apparent. The current survey, with a response rate of 63 percent, revealed that trustees have limited knowledge of policies existing at their institutions and have few plans for substantial future involvement. They also indicated that they are unwilling to delegate responsibility for policy development and implementation to administration, faculty, or students. Information was obtained on nine broad policy areas: internal load and overload, external activities, conflict of interest, production/use of educational materials, patents and inventions, continuing education/extension, salary reimbursement for externally-funded projects, Paid sabbatical leave, and computer usage. A sample questionnaire is included. (SW)

Identifiers-American Association of University Professors, American Federation of Teachers, *Bargaining Agents, National Education Association

Some of the critical choice points in the development of collective bargaining in public institutions of higher education are traced. The single most important aspect of the bargaining process that determines the nature of collective bargaining is enabling legislation. Changes that have appeared to influence the probability of unionization concern the renewed emphasis on accountability and the more permissive legal authorization for collective bargaining in higher education. Unit-determination refers to the composition or nature of the group of employees forming the bargaining unit. After the unit determination has been made, the next logical step is an election to see which, if any, of the potential bargaining agents will represent the unit. The three major union groups for teachers are noted, and some of the typical items included in a collective bargaining agreement in higher education are defined. Sources of difficulty in implementing a contract that has been accepted by both parties are discussed, as are challenges and decertification of a bargaining agent. (SW)

Identifiers-*Inter American Center for Teaching Statistics, Latin America, *Organization of American States

A study was conducted to evaluate the Inter-American Center for the Teaching of Statistics (CIENES), a center established in Santiago, Chile, by the Organization of American States (OAS) to improve statistical reporting and training. Study objectives were to evaluate the administration of CIENES, assess operating costs and program results, identify possible ways to better meet user needs, and identify possible duplication of effort and ways to operate more effectively. Documents were reviewed and interviews were conducted with OAS staff, CIENES students and graduates, and officials of concerned agencies and member states. Current needs in Latin America for CIENES and the role of the OAS are discussed. Information is presented on the three basic instructional programs in statistical techniques, applied social science statistics, and graduate-level mathematical statistics. Descriptive information is provided on the following topics: selection of candidates and recipients of technical assistance, physical plant and equipment, interview comments, operation costs and budgets, indicators of cost effectiveness, possible duplication of programs, multiplier effect of CIENES programs, publications, degree versus short courses, staffing, fellowships, and sub-centers. Descriptors-Associate Degrees, *Attendance Patterns, Bachelors Degrees, *College Attendance, *College Freshmen, Educational Objectives, Higher Education, *School Holding Power

Attrition/retention of two cohorts of first-time, full-time degree students enrolled at the State University of New York was studied. Attrition is defined as the failure to achieve some goal or objective. Students enrolling in bachelor degree programs and in two-year degree programs in the fall of 1971 and 1972 were studied. Information on the students is presented in the form of a flow chart that traces the progress of the cohort through the institution The 1971 and 1972 bachelor degree groups were divided into those who received a degree, thereby achieving their baccalaureate educational objectives, and those who did not receive a degree. The time allotted for completing a degree was divided to provide information regarding the number of students who, in terms of the conventional four-year program, finished early, on schedule, or up to approximately six months later. Those who did not receive a degree were further divided into those still enrolled, either part-time or full-time, and those no longer enrolled. For two-year program students, additional information is provided regarding the number and distribution of students who transferred to another college. (SW)

Data are provided on fall 1977 enrollment in American colleges and universities. Information is grouped under four major categories: summary tables, enrollment by level of institution, enrollment by state, and enrollment by institution. The data were obtained from the 3,130 two-year and four-year public and private colleges and universities and their branches included in the National Center for Education Statistics' Education Directory: 1977-78 Colleges and Universities.'' Race/ethnic and major field of study data were not collected in fall 1977. Background information on the survey population, questionnaire editing procedures, and a reproduction of the survey instrument are appended. Findings are summarized as follows: total enrollment in fall 1977 in all institutions of higher education increased 2.6 percent over the previous year; the trend toward increased enrollment of women continued in fall 1977; there were greater increases in part-time than in full-time enrollment in both public and private institutions; at public colleges and universities, there was an increase of 2.9 percent in first-time freshman enrollment in 1977, while the opposite was true for private institutions, which experienced a slight drop (0.1 percent) in first-time freshman enrollment. Identifiers *Colorado, University of Colorado Boulder

The historical pattern of resource allocation in American higher education as exemplified by public colleges in Colorado was examined. The reliance upon average cost information in making resource allocation decisions was critiqued for the special problems that arise from student enrollment decline or steady state. A model of resource allocation for institutional and interinstitutional decision making was designed based on the separation of expenditures into fixed and variable cost components. Measures for full costing, including partial opportunity cost accounting were incorporated into the model. The University of Colorado at Boulder was used to examine the cost structure in terms of average, marginal, variable, and fixed cost elements. The change in this cost structure was examined for a five-year period as personnel policies and enrollment changes were stimulated. Specific hypotheses were posited and tested. Results indicate areas of policy change and extensions for further research. It is concluded that a decrease in student number cannot be accommodated with the same policies as the growth period. A bibliography is included. (Author/SW)

Identifiers-*Academic Environment

Student and faculty perceptions of teaching styles, learning styles, and the use of various educational environments were compared at a small, highly selective liberal arts college. Student and faculty perceptions of the subject matter characteristics of academic departments and students' orientations to the subject matter of the departments were also analyzed. The theoretical framework that was adapted for categorizing different styles of teaching was developed by Richard Mann (1975). An adaption of the Student Learning Style Questionnaire developed by Grasha (1972) and Riechmann and Grasha (1974) was chosen as the basis for assessing student learning styles. Berquist and Phillips' (1975) classification of educational environments and

Biglan's (1973) model for the classification of academic departments were also adapted for the study. Kolb's Learning Style Inventory was used to investigate the learning styles of students in departments of varying subject matter orientation. Statistical data, a descriptive summary of the findings, and a brief bibliography are presented. (SW)

The growth of federal influence on American higher education and the roles of state and local governments are discussed. The shift of power to a central government and precedents that over the years have established federal involvement in educational issues that are not directly enumerated in the Constitution are addressed. A decision that affirmed the right of the federal government to establish the conditions under which grants-in-aid may be made also strengthened the position of the federal government and ultimately affected in direct ways all educational institutions. One way of identifying the level of involvement of the federal government in education is in terms of the amount of the funds educational institutions derive from federal sources. Four categories of federal involvement in education are: establishing and maintaining institutions; identifying issues and influencing educational policy through advisory committees or commissions; providing categorical assistance through grants-in-aid; and influencing policy and operation through issuing specific regulations concerning eligibility for federal funds. The states differ in the degree of centralization of authority and control, and the financial support of the schools is based upon the combination of state and local suppport. (SW)

Identifiers-*Kent State University OH

The application of multiple linear regression to the problem of identifying appropriate criterion variables and predicting enrollment in college courses during a period of major rapid decline was studied. Data were gathered on course enrollments for 1972-78 at Kent State University, and five independent variables were selected to determine the most likely indicators of future enrollment trends. The variables were: total departmental majors in elementary education, elementary education majors plus all those enrolled in service courses and allied majors, the number of elementary education freshmen enrolled for each year, total enrollment of the college of education by year, and total university enrollment. Data were analyzed using Multiple Regression Analysis: Subprogram Regression from the Statistical Package for the Social Sciences' (SPSS; Nie, Hull, Jenkins, Steinbrennar, and Bent, 1975). Total college enrollment proved to be the best single predictor. The technique proved to be 96 to 100 percent accurate in estimating course enrollments in seven of the 10 courses. It is also a valuable means for data-based decision-making and long-range planning when faculty committees must advise on administrative decisions. (Author/SW)

Identifiers-Provosts

Ten personal characteristics and seven administrative skills that differentiated effective from ineffective university leaders were assessed by multiple discriminate analysis. The personal characteristics identified by previous research (Skipper, 1975, 1977) are: responsibility, integrity, self-control, intellectual efficiency, flexibility, personal relations, leadership, motivation to achieve, dealing with problems, and creativity. Administrative skills identified by previous research are: planning ability, knowledge about position, organization and management, leadership, judgment, human relations, and quality of performance. The study sample consisted of 20 male university leaders holding positions of dean, provost, and president. The leaders represented two extreme groups: the 10 ``most effective'' leaders, and the 10 ``most ineffective'' leaders as judged by two different groups of fellow administrators. The variables of judgment, knowledge of position, intellectual efficiency, and flexibility were found to discriminate perfectly. An equation using the discriminate function weights of the four variables was developed to predict administrative effectiveness. (SW)

Identifiers-*University of California Los Angeles

A problem solving course designed to expose the student to the wide range of alternative problem solving techniques and to enable the student to use these methods in practical applications was developed at the University of California at Los Angeles. The course also exposes the humanities student to objective tools such as numerical models, while introducing the student of physical or life sciences to subject notions, such as values. The need for individual attention in some areas resulted in the introduction of a peer teaching program. The course material is based primarily on the book, Patterns of Problem Solving.'' In a recent evaluation of the course, a majority of the students stated that the course had improved their reasoning skills, and that they had applied the tools and concepts of the course to real-life situations. Results of the use of IQ tests to assess a similar course offered at St. Louis University and taught by Steve Barlett are summarized. (SW)

Identifiers-Grantsmanship, *University of Illinois Chicago Circle Campus

The ways in which a sample of faculty members from the University of Illinois at Chicago create curricula is described and compared with methods selected from the curriculum development literature. An overview is presented of the university's Curriculum Development Grants (CDG) Committee program, its historical development, and several domains of decision-making. Comparisons are made concerning: different orientations to the process of curriculum development and different positions on curriculum inquiry. Both individual proposal writers and CDG committee evaluators acknowledged the necessity to allow objectives to emerge from activity. The process of group and individual decision-making was found to be more political and value-laden than purely rational. Analysis of proposals also indicated that curriculum development is situational, that it embraces the entirety of the classroom environment. Study of the CDG process revealed a strong bias toward practical rather than theoretic inquiry. It seems that the more a proposal needs support, either economic or bureaucratic, the more it must be expressed in the language of the accepted epistemology. Further study is suggested before any definitive statement can be made about the syncretism of conflicting conceptions of curriculum. Information on curriculum development grants for 1979 is appended. (SW)

Hearings held before the U.S. House of Representatives on H.R. 7328, a bill to amend Title I of the Higher Education Act of 1965 to establish a system of grants for urban universities, are presented. An urban area means a standard metropolitan statistical area having a population of not less than 500,000 persons, and an urban university means an institution of higher education that is located in an urban area, draws a substantial portion of its undergraduate body from the surrounding urban area, has the present capacity to carry out urban-oriented education, research, and service activities, and offers a wide range of professional or graduate programs. The legislation authorizes Federal support for the development and delivery of programs by the university of research and services to aid cities with their problems. The urban university must submit a comprehensive multidisciplinary plan for the provision of educational, research, and service programs designed to meet specific problems faced by the urban area in which it is located, and the local government must review and comment upon the plan. An advisory council must be formed to review and comment upon all applications. Congressmen and representatives of universities and concerned agencies discuss the bill and the role of urban universities. (SW)

Identifiers-Michigan State University, Pennsylvania State College System, Pennsylvania State University, Position Papers, *Program Discontinuance, University of Pennsylvania

Some of the responses of colleges and universities to declining enrollments and diminishing resources are reviewed. Institutions have tried to reduce the size of their operations, reallocate resources internally, and retrench a number of faculty and programs. Several approaches to reductions, reallocations, and retrenchments in specific cases, including those at the University of Michigan, the University of Pennsylvania, and the Pennsylvania State College System, are reviewed. Nine observations about trends in institutional behavior as colleges and universities approach the decade of the 1980s are presented, including: there is a need to be more sophisticated about projected enrollment declines since they and their impacts will vary by region of the country; national concentration on projected enrollment declines has diverted attention from the equally-important area of the cost-income squeeze;'' and traditional governance patterns in colleges and universities are not well-equipped to handle faculty participation in an era of declining resources. It is concluded that only a few institutions, which either are geographically located in areas of population growth or have exceptionally high academic reputations, will escape the consequences of the long-run changes facing higher education. Appended are: checklists for academic quality assessment and program evaluation; guidelines for use in planning retrenchment in the state colleges and university of Pennsylvania; 1976 recommended institutional regulations on academic freedom and tenure; policy document on discontinuance of academic programs at the University of Michigan; and financial exigency and staff reduction statement of the Association of American Colleges. A bibliography is included. (SW)

Identifiers-Information Analysis Products, Objectivity

Literature relevant to administrative evaluation in higher education was surveyed. Reasons for the increasing importance of this type of evaluation, approaches to and components of an evaluation plan, some of the problems involved in the evaluation process, and use of results are discussed. The current literature indicates that increased presure from above and below and the demand for accountability from government and institutional constituencies make administrative evaluation important. Evaluation usually presupposes some sort of comparison either with predecessors, peers, some ideal, past performance, or others' expectations. Evaluation criteria usually concern administrative skills and personal characteristics. The idea of faculty involvement in administrative evaluation seems to be growing in acceptance but ultimate responsibility rests with the board. The greatest problem in evaluation is the difficulty of rational and objective judgment. Generally, higher education does not really lend itself very readily to systematic assessment. The use of results should be known and agreed to by all concerned prior to the actual evaluation process. (SW)

Descriptors-*Access to Education, *College Credits, Comparative Statistics, *Correspondence Study, *Educational Radio, *Educational Television, Equivalency Tests, Graduate Study, *Higher Education, Prior Learning, Private Colleges, State Colleges, Undergraduate Study

Identifiers-*Missouri, *Nontraditional Education

Information is presented on nonclassroom-based learning in Missouri higher education during the 1977-78 academic year. Only six institutions in the state reported using television, radio, newspaper, or correspondence study as a means of making college-level credit courses available to students. Correspondence study is a much more frequently used method in Missouri. Data are provided on undergraduate and graduate enrollment in credit television courses and in correspondence courses. Data are also presented for state and private institutions on the total undergraduate credit awarded by examination and by assessment of prior learning. It is concluded that these nontraditional instructional modes may be increasingly popular if segments of the population that have traditionally been underrepresented in higher education, such as older persons and minorities, become more active in pursuing college education. The data obtained for 1977-78 will be used as a comparative base for future studies. (SW)

Identifiers-*Missouri, *Public Higher Education, University of Missouri

The first in a series of annual analytical reports prepared by the Missouri Department of Higher Education from the annual state data collection is presented. Tables, charts, and graphs provide numerical data, supplemented by brief analyses, in these areas: enrollment by sector; enrollment trends for fall 1974 through fall 1978; fall enrollment summary with national comparison, full-time and part-time headcount, graduate and undergraduate enrollment; and five-year enrollment trends in the public sectors, the independent and professional/technical sector, the University of Missouri, state four-year institutions, state two-year institutions, independent institutions, and professional and technical institutions. Each sector of higher education in the state has experienced a leveling off of enrollments, and a slight decline in full-time-equivalent enrollment. The enrollment decline was greater for the public and technical/professional sectors than for the private sector. The data-gathering survey form and instructions are appended, as are pertinent definitions. (MSE)

Identifiers-*Missouri, *Public Higher Education, University of Missouri

Presented are data on student financial aid in Missouri collected as part of an annual state survey of higher education. In this first annual report the data are limited due to reporting limitations and inconsistencies, and the report is called preliminary. An introductory section discusses these limitations. In subsequent sections, supplemented with data tables, analyses are given in these areas: sources of student financial aid; composition of aid packages; the University of Missouri; state four-year institutions; state two-year institutions; independent institutions; and professional and technical institutions. Over $140 million in financial aid to students was reported in 1977-78. Among the conclusions drawn from this limited information were that: University of Missouri and independent sector students draw larger awards per capita than those in other institutions. Independent sector students received relatively more from the Missouri Student Grant Program and institutional sources, while public sector students received relatively higher proportions of aid from federal sources, including loan programs. Graduate student aid is included in all categories except the Missouri Student Grant Program. (MSE)

Identifiers-*University of Wisconsin Oshkosh

The impact of an alternative calendar that was developed to meet the needs of present and projected university constituencies at the University of Wisconsin-Oshkosh was assessed. The calendar combines a traditional two-semester system of 17 weeks each and an eight-week summer session with an alternative calendar that divides the fall and spring semester each into three modules and a summer semester into two four-week modules. The evaluation project, sponsored by the Fund for the Improvement of Post Secondary Education, sought to: (1) determine changes in attitude and campus activities and climate as a result of the new calendar; (2) measure student and faculty attitudes toward unique instructional formats, teaching strategies, and calendar time periods; (3) evaluate student performance in courses with various instructional formats and strategies; (4) evaluate the effectiveness of calendar activities in meeting the needs of specific student interest groups, part-time adult learners, commuting students, and others; and (5) assess the effective responses of faculty to the faculty development program that involves compensation for additional service for curriculum development, research opportunities, and inservice training. A summary chronology of evaluation activities, budget information, and findings and the following appendices are included: the evaluation team report, a report to the faculty on the calendar, and abstracts of two doctoral dissertations on the calendar. Identifiers-*Australia

Trends affecting higher education in Australia, issues relating to selection and admission, and difficulties that many students face during their first year in college are discussed. Declining enrollment trends and an over-supply of graduates in a number of fields, especially some science fields, are discussed. A shift of emphasis away from heavily vocational courses is predicted. Problems with the use of the high school certificate as a selection criterion, the need for deferred entry schemes to allow students to identify their interests, attitudes of young people toward higher education, and the interest of older people in gaining access to higher education are discussed. A consequence of the poor quality and quantity of information available to applicants prior to entry to college is the unrealistic character of the aspirations and expectations of many first-year students. Many students appear to be unable to make a psychologically smooth transition from high school to university or to cope with the continuing demands of advanced study. Recommendations are offered to improve some of the identified problems. (SW)

Identifiers-*Australia, University of New South Wales (Australia)

Information is presented on attitudes of students enrolling for the first time at the University of New South Wales in 1975. Attitudes toward higher education, anticipated difficulties in making the transition from high school to university, and ideas about the likely demands and rewards of advanced study were surveyed, using a forced-choice questionnaire. Based on 2,973 responses, it was determined that most students have a fairly strong desire to attend the university and appear to be intellectually and/or vocationally committed to obtaining a degree. A large percentage also felt that they had the ability to seek honors and/or proceed to a higher degree. Very few students perceived the possibility of experiencing difficulties in adjusting to university life and appeared confident of being able to cope with the transition to the university. Findings indicate that the number of students who actually do better than just pass in all subjects is very small. There is a great discrepancy between how students expect to perform academically and how they do perform. Data from the student counseling and research unit suggest that many students do experience difficulties and seek assistance. It is suggested that students might be experiencing difficulties in working independently or judging the standards of performance required. Approaches are suggested for dealing with unrealistic expectations and aspirations of students. The entering student questionnaire is appended. (SW)

Identifiers-*Australia, University of New South Wales (Australia)

Information is presented on part-time male students entering the departments of commerce, engineering, and science of the University of New South Wales in 1969. The major puroose of the survey was to obtain infomration relevant to the general studies program. In addition to asking the student his views on general studies, information was obtained on background characteristics, reasons for coming to the university, expectations, and ideas about the purposes of a university education. Reasons for part-time study include financial problems, poor school performance, independence, and uncertainty about future employment opportunities. A low success rate was found for part-time students. It is suggested that these failing students will drop out either by choice or because the university may not consider them suitable for further study. Comparative data on full-time students are presented, and suggestions for the university to meet the needs of part-time students are offered. (SW)

The nature of competent teaching is discussed and distinctions between competent and incompetent teaching are made. Teaching involves the intention to bring about learning and competence in a method designed to bring about learning. Teaching is defined as educative when it is conducted in a morally acceptable manner and when the content of what is to be learned is educationally valuable. In the case of the incompetent teacher, there is an extremely poor fit between the actions of the teacher and those of the pupils. Although reciprocity and cooperation may be poor, the pupils may still learn by their own efforts. It may also be the case that learning does not occur although the teacher displays a high level of competence. It is necessary for the teacher to know more than the learner. A teacher's responsibility for bringing about learning requires taking the initiative in encouraging students to be actively involved in the teaching-learning situation and a professional interest in the problems that students encounter and the ways in which they study. Familiarity with research into the practicalities of learning and the discussion of techniques with colleagues and students are necessary. Applications of these ideas to higher education and the issue of the authority of the teacher are discussed. (SW)

A one-day conference was held at the University of New South Wales in Australia to consider alternatives to the Higher School Certificate as a college selection device. The first address was by L. H. T. West, who outlined some of the current controversies in the debate about selection and presented evidence that pointed to serious weaknesses in the procedure in most common use in Australia. J. Beauchamp spoke from his experience as an admissions officer and stressed the need for a more humane and individual approach, and R. Campbell described the development of the school-based selection system that has just been adopted by the Australian National University. K. Mitchell gave an account of the complex and radical system that will be used to select the first intake of medical students at the University of Newcastle, and J. Frederich considered the problem from the viewpoint of the secondary schools and concluded that community attitudes are such that any system that is not based upon a public examination will have little prospect of being accepted. Identifiers-*West Virginia College of Graduate Studies

Through support from the Fund for the Improvement of Postsecondary Education, a model for providing graduate programs to full-time employed adults residing in remote locations of southern West Virginia was designed by the West Virginia College of Graduate Studies, a college that does not have a campus. The essence of the delivery model was to establish resource centers in remote locations that would enable students to complete coursework through use of mediated and printed self-instructional materials. Courses were constructed based on a systems model for instructional development. Workshops and seminars and demonstrations of the benefits of the model were conducted to gain full college commitment to the project. Six courses were developed and implemented, and a total of 597 students participated in the courses over two years. Attitudes toward the courses were surveyed, and approximately 80 percent of students indicated a positive attitude toward the course methods. Favorable results were also obtained from a cost analysis of the project. The effect of the program on the college is discussed. Course descriptions, course enrollment data, a sample attitude assessment instrument and results of course evaluation, sample formative evaluation instruments, and cost analysis instruments are appended. The State University and Community College System of Tennessee 1977-78 Annual Report provides information about the following: enrollments, graduates, faculties, libraries, academic development, desegregation efforts, public service and continuing education, student affairs, facilities development, business and finance, and planning. Basic elements of the year included: enrollments throughout the system increased by 3 percent over the previous year and the system maintained its ranking as ninth largest in the nation; fiscal support was increased; the system received an equitable share of the available state dollars; tuition and maintenance fees were not increased; system personnel were provided an average salary increase of 8.2 percent; and the General Assembly earmarked special funds for campus improvements for needed maintenance projects. Appendices include headcount enrollment data, information on degrees and certificates awarded in 1977-78 by university, data on faculty rank by degree for each university, a summary of library holdings, changes in academic units, off-campus locations of each university or college, summary of student financial aid awarded, information on construction programs, and financial data. A conference was held by the University of New South Wales, Australia, to enable staff and students to examine the purposes of student assessment, implications of various forms of assessment, and ways in which assessment might be most effectively conducted. Eric Daniels spoke on the jury system of assessment in architecture, Raja Bandaranayake spoke on the need for a rational and analytical approach to the planning of assessment, and Dixie Coulton spoke on student participation in the assessment process. Study groups considered the following areas: grading/assessment, continuous assessment, assessment as feedback to students and staff, student participation in assessment, and assessment of class participation. Workshop reports presented are: Diagnostic and Other Feedback Based on Exam Analysis,'' by Max Dunstan; Assessment of Laboratory Work,'' by Ian Sefton; Assessment in Pre-Service Teacher Education Programmes,'' by Lee Owens and David Smith; Essay Marking,'' by Stan Ross; How to Organise a Course without Grading,'' by Dave Boud; Selecting Appropriate Assessment Methods for a Course,'' by Jackie Lublin; and Criterion-Referenced Assessment,'' by Michael Bailey. A bibliography, rules of the law school on the use of the writings of others and plagiarism, and a paper on teaching the writing of academic papers by Peter Bamford are appended. (SW)

Identifiers-Australia, *University of New South Wales (Australia)

Skills tutorials for first year engineering students at the University of New South Wales, Australia, were introduced in order to develop an awareness of certain conceptual skills commonly exercised by practicing engineers. Particular skills include the manipulation of information in different forms, translation from one form to another, presentation of technical ideas, feasibility assessments, formulation of problems, and the use of models. The scheme also provides students opportunities to develop self-expression and to work cooperatively in a small group. The following program developments are described: formulation of aims of the exercises and the invention of problems, first trials and evaluation, and subsequent revision. A feature of the development strategy was the direct observation of the sessions and assessment of reactions and difficulties through interviews and administration of questionnaires. (SW)

A study conducted at Louisiana State University was designed to: determine demographic characteristics of master's degree graduates in school administration in order to draw conclusions concerning identifying profiles; ascertain the extent to which the graduates perceived the courses of instruction in their academic preparation as relevant to subsequent educational administrative functions; and to determine which additional courses of instruction not in the present curriculum were perceived as relevant professionally to current educational administrative function. Of the 215 questionnaires mailed to graduates in school administration, 151 usable responses were received. Based upon the findings, the following recommendations are offered: maintain the 12 courses of instruction that compose the school administration curriculum; introduce an elective course involving the study of human relations and possibly including the sociology of education and school discipline; introduce a one-semester, required administrative practicum; and introduce public speaking as an elective course. The seventh annual bibliography on collective bargaining in higher education is a selective survey of the literature of the field as it relates to faculty and nonfaculty in public and private colleges and universities. It is primarily a source of current references for 1978 but also includes pre-1978 references of particular interest at this time that were not included in earlier bibliographies. Surveyed materials include books, periodical articles, research reports, unpublished reports, speeches and noteworthy judicial and administrative agency decisions, and published bibliographies. The bibliography is arranged by subject and alphabetically by author or title within each subject. Author, title, and subject indexes are included. Access is provided to geographic areas and individual institutions as well as subdivisions of major subjects. A section is provided on a cumulation of current events citations that appeared in the five issues of the 1978 NCSCBHE Newsletters.'' Additionally, a bibliography of holdings at the Elias Lieberman Library is included. (SW)

A philosophical and pragmatic critique is offered of the pedagogical dilemmas confronting the educational establishment. It is argued that higher education institutions at present have no clear idea of what a liberal arts education ought to accomplish, what its scope ought to be, and how its goals ought to be reached. The academic community is failing to provide students with a broad and enlightened program of vocational training and are failing to equip them with rudiments of critical deductive reasoning, with aesthetic sensibilities, and with a basic understanding of various intellectual disciplines. It is contended that the recipient of a liberal arts degree ought to be intellectually and articulately equipped to assume an active, informed role in the democratic process, to become a responsible contributor to the economy, and to enjoy an enriched cultural life. Present-day trends can be reversed only through a reappraisal of the aims of higher education. Recommendations for reform, which spell out a coherent and sound philosophy of higher education and endorse a traditional liberal arts curriculum, are offered. A defense of grades and examinations and a discussion of current laxities that have been associated with poor teaching, unmerited awarding of tenure, and giving of doctorates with no requirement for skill in lecturing are discussed. Identifiers-*Biomedicine, Nursing Education

The fourth in a series of annual reports assessing the role of and need for federal training programs in the biomedical and behavioral sciences is presented. Highlights of this 1978 report include: (1) the results of surveys of the chairpersons of 1,324 basic biomedical science departments and 474 behavioral science departments in Ph.D.-granting institutions; (2) some changes in the model that has been used to project future demand for doctorate-level faculty in the basic biomedical, clinical, and behavioral areas; (3) discussion of the special circumstances of the D.D.S. and D.V.M. holders in relation to supply and demand for training in the clinical sciences area; (4) an analysis of the work activities of nonclinical behavioral scientists in academic and in nonacademic settings; (5) the identification of a limited number of specific fields within the basic biomedical, behavioral, and clinical areas that warrant special attention; and (6) the results of on-site interviews with deans and faculty of schools of nursing that either have or expect soon to begin doctoral-level research training programs. Chapter One provides a statement of the objectives of the 1978 report and a synopsis of previous reports, and sets forth recommendations for federal support in each area of research training for fiscal year 1980-82. Chapters Two through Six focus on the pertinent issues and recommendations for the basic biomedical sciences, behavioral sciences, clinical sciences, health services research, and nursing research. A glossary and a large bibliography are included. Appended are: descriptions of the research award programs for fiscal year 1979; agendas of conferences on health services research; recommendations and classifications for each field; and a survey of biomedical and behavioral science departments. Identifiers-*State University of New York Coll at Oswego, Student Retention

Students who withdrew from the State University of New York at Oswego during academic year 1974-1975 were surveyed to study the differences between them and their classmates who persisted. A sample of 52 students responded to questionnaires inquiring why they had chosen to attend Oswego, why they left early, and what their present educational plans or activities were. Characteristics of withdrawn students, showing major field of study, sex, class, grade point average (GPA), high school average, and responses to survey questions are tabulated. The results indicate that Oswego attracted substantial numbers of students who may not have intended to complete a bachelor's degree there. The average GPA of withdrawn students was 2.46, and female students left before graduation at a higher rate than male students. Only three in ten who withdrew expressed dissatisfaction with campus conditions as the main reason for leaving. Nearly eight out of every ten who left enrolled full-time at another college and 15 percent of those who left have returned to Oswego or intend to. It is suggested that from these findings the increased rate of withdrawal can be explained best by changes in the students. (BH)

Identifiers-Office of Education, Outcomes of Education

An in-depth assessment of cooperative (co-op) education training programs is presented. For the purposes of this research, cooperative education is defined as work and school experiences designed to complement each other. Five questions are addressed: (1) Are the training programs teaching the right things? (2) Is the training being done competently? (3) What are the outcomes of training? (4) Is training reaching the people who need it? and (5) What does training cost? Data were collected from the training directors of 16 workshops that were funded by federal grants to improve instruction in cooperative education. Questionnaires were also completed by training program participants, training program faculty, employers of co-op students, and co-op personnel who had never participated in training programs. Results indicate that: co-op education training workshops should concentrate on participant outcomes and learning objectives, the workshop faculty are competent, and more workshops for experienced co-op educators should be offered. Significant outcomes of the workshops included: a better understanding of the role of the co-op coordinator, knowledge of the benefits of co-op for employers, opportunities to meet with colleagues involved in co-op education, and increased knowledge of the relationship of co-op education to career education. Recommendations for pre-workshop needs assessment, the workshop program, and post-workshop activities are provided as well as general recommendations and ideas on the role of the U.S. Office of Education in co-op education. The survey instruments and tabulated results are appended. (BH)

Descriptors-College Environment, *College Students, *Commuting Students, Comparative Analysis, *Grade Point Average, Higher Education, Place of Residence, School Activities, Social Adjustment, *Student Characteristics, Student College Relationship, Student Needs, *Student Participation

Identifiers-*Auburn University AL, *On Campus Students

Problems experienced by nonresident students at Auburn University and areas in which they are receiving fewer opportunities for personal development, compared with residential students, were studied. Responses to a survey were obtained from 624 nonresident students and 223 resident students. Statistical data and a descriptive summary of the survey findings are presented concerning: general characteristics of students, financial data, academic and social life, and activities and services. The grade point averages of nonresident and resident students were almost identical. Resident students were found to be more likely to come from upper middle class or higher class homes than were nonresident students. It was found that nonresidents were less likely to form close friendships with students they did not know before comming to the university and that they dated less frequently than resident students. It appears that nonresident students are less satisfied than resident students with their social lives at the university. Campus activities in which nonresident students participate with much less frequency than resident students are listed. Recommendations concerning the planning and implementation of programs and services for nonresident and resident students are offered, and a sample survey is appended. (SW)

Identifiers-Academy of the New Church PA, Brigham Young University UT, Grove City College PA, Hillsdale College MI, Mississippi College

Speeches from the 1978 annual meeting of the American Association of Presidents of Independent Colleges and Universities are presented. Contents of the report are as follows: Earning Respect'' by Drew S. Days, III.; The College in Controversy: Government Relations 1978''; Until the Year 2000: Reflections of a Retired College President'' by John E. King; How a Businessman Looks at Higher Education'' by Richard L. Abbott; and The Health Hazards of the Presidency and What To Do About Them by James M. Crawford. In the first address, Drew Days, Assistant Attorney General for Civil Rights, discusses a recent controversy regarding Brigham Young University and explains enforcement of civil rights laws by the Civil Rights Division. A panel discussion with member presidents involved in government controversies involved: Alfred Acton, president of the Academy of the New Church; Charles S. MacKenzie, president of Grove City College; Lewis Nobles, president of Mississippi College; George C. Roche, III, president of Hillsdale College; and Dallin H. Oaks, president of Brigham Young University. Retired college president John E. King discusses cultural change, perceptions of trustees, and questions college presidents need to consider. Businessman Richard L. Abbott offers criticism of academic freedom at colleges and addresses the issue of financial support to higher education. Some suggestions for improving the health of college presidents is offered by James M. Crawford. (SW)

Descriptors-College Freshmen, *College Students, *Course Evaluation, Educational Change, Goal Orientation, Higher Education, *Instructional Innovation, School Surveys, Seniors, *Student Centered Curriculum, Student Interests, *Student Motivation, Student Reaction, *Teaching Techniques
Identifiers-*Michigan State University

Student instructional acitivity preferences and the apparent motives and substance underlying the preferences were analyzed. An 80-item classroom activity preference scale and a 12-item reaction to innovative instructional practices scale were administered to 746 new freshmen at Michigan State University. Responses to the 12-item innovative activity scale were obtained from 1,050 seniors in the spring of 1975 as part of a four-year followup study. Both freshmen and especially seniors appear highly positive toward most of the proposed innovations in academic practices. Students appear to favor innovations in general, but apparently not if the changes proposed appear impersonal, structured, prescriptive, or essentially task-centered. The activities checked by students as undesirable appear to indicate a rejection of serious study-type instructional tasks. Rejected activities seem to be largely those designed to produce systematic coverage of the basic course content and skills with grades and quizzes. The list of activities that students indicate as desirable appears to emphasize the personal element and is only remotely concerned with learning. The items instead appear to encompass activities that give students a feeling of immediate well-being, security or identity, and freedom from prescription, structure, or demands. Questions are raised about the use of student instructional preferences as a primary guide in instructional modification. (SW)

Descriptors-Academic Ability, Caucasians, *College Choice, *Educational Finance, Educational Quality, Financial Problems, Higher Education, Minority Groups, Parental Financial Contribution, *Private Colleges, Socioeconomic Status, *Student Costs, *Tuition

Identifiers-*College Applicants

The question of whether private colleges are pricing themselves out of the market is considered. An analysis of the actual application patterns of a sample of high-ability students indicates that colleges and universities are not pricing themselves out of the market. Despite substantial increases in tuition and other fees over the last several years, expensive private institutions continue to attract large numbers of qualified applicants from a wide variety of socioeconomic backgrounds. The major determinants of college choice for high-ability students and their families seem to be the academic ability of the student and the academic reputation of the institutions. Through a combination of the family's own resources and financial aid provided by various sources, families manage to come up with the $8000 plus it takes to attend one of these schools. The finding appears to be as true for low-income and middle-income families as it is for high-income families, and even more true for minority students than for whites. It may be that this finding holds only for students near the top of the ability range of college applicants. Figures are included to show the tradeoff between cost and quality, the relationship between application rates and the student's academic ability and family income, the general relationship between application rates and family income broken down by income category, and white and nonwhite applications to selective schools. Descriptors-College Majors, *College Role, Educational Objectives, Educational Philosophy, *Educational Trends, *Federal Aid, Government School Relationship, Higher Education, *Liberal Arts, *Relevance (Education), Social Problems, Specialization, Student Centered Curriculum, Student Opinion, *Values

The importance of the liberal arts for society as well as for the education of the individual is discussed in this speech. The liberal arts are integral to achieving proficiency in all disciplines; they provide the context of values in which further, specialized development takes place. Liberal education also affords a means of recognizing and utilizing the patterns of continuity that run through history, which free us from the tyranny of forever learning by trial and error. Liberal education is the vehicle by which the young acquire wisdom and skills of a civilization. Fewer students are electing to pursue courses of study in the liberal arts, and fewer required courses in these studies are being offered. The abandonment of the liberal arts raises disturbing questions not only about the role of the university but also about the foundations of society itself. In order to understand the meaning and impact of recent events affecting the decline in stature of the liberal arts, the recent past is examined. Federal aid to universities for socially-oriented programs of study, the trend toward specialization, and student demands for courses they perceive as relevant to their interests have had an impact on the liberal arts in higher education and also in the elementary and secondary schools. Reasons why liberal arts study are crucial in the face of societal developments are addressed. (SW)

Identifiers-Law Students

Access to and participation of blacks in higher education is described, selected federal programs are discussed, and many problem areas that will require continued national, state, regional, local, and institutional attention are briefly analyzed. Information on barriers to high school completion, the type of high school preparation that blacks receive, and complications concerning the use of competency testing are briefly discussed. Data were drawn heavily from the Fall 1976 Higher Education General Information Survey (HEGIS) and the Office for Civil Rights of the Department of Health, Education, and Welfare. Statistical data are presented on black student enrollment in higher education by various types of institutions, by level of study, by major field of study, and by state. Enrollment data are provided for fall 1976 and for previous years in some tables. Medical and law school enrollment data are also provided. The scope and impact of 18 federal programs sponsored by the U.S. Office of Education that are directly or indirectly related to the issue of access are discussed. An analysis is provided of the extent to which such programs have assisted black, minority, or low-income students to gain access to and participate more fully in higher education. Information on the impact of such programs on blacks is available to only a limited degree because data on participants were not systematically collected by specific racial-ethnic group. Recommendations are included. (SW)

Instructional improvement projects are described that were conducted during 1978 as part of a program at Memphis State University that gives small grants to faculty members. Full-time faculty members were invited to submit proposals they believed would lead to improvement of learning in their courses and might offer broad instructional implications. Seven criteria for selection of proposals for funding are explained. The budgets for the proposals funded ranged from $300 to $1600, with a mean of $861. The projects, divided into the following five categories, are described in detail: instructional planning and development, video technology in instruction, computer technology in instruction, audio-visual support of instruction, and faculty seminar in instructional improvement. In addition to providing money, the Center for Instructional Service and Research at Memphis State also helps faculty members conduct each project through systematic course development, development of instructional aids, application of educational technology, and design of evaluation plans. Identifiers-*Student Outcomes Questionnaire, *Student Outcomes Questionnaire Service

The Student Outcomes Questionnaire and the Student Outcomes Information Analysis Service (SOIS) developed by NCHEMS and the College Board are discussed. The term, student outcomes,'' is defined as the consequence of a student's enrollment in an educational institution and involvement in its programs. The importance of this type of information is discussed. General information and guidelines for using the questionnaire and the SOIS are presented. The SOIS provides services that include: (1) a plan for collecting student outcomes information and integrating it into a student outcomes information system; (2) general guidelines for conducting studies to obtain cross-sectional or longitudinal student outcomes information at the postsecondary level; (3) specific questionnaires for conducting student surveys; and (4) a question response-analysis service that provides computer printouts of analytical information. Questionnaires and services are provided for both two- and four-year institutions. Plans for developing and administering the questionnaires are provided as well as recommendations for developing a student outcomes data collection plan; using the SOIS Questionnaire Analysis Service; coding, processing, and analyzing the data; and interpreting the results. Appended are the two-year colleges questionnaires, the four-year colleges and universities questionnaires, samples of survey results, and questionnaire keypunching formats. (BH)

Degrees and formal awards conferred by Kentucky institutions of higher education during the 1977-1978 fiscal year are listed in this summary. A total of 20,944 degrees and awards were conferred by independent and state-supported Kentucky colleges and universities. State-supported institutions conferred 17,708 degrees and formal awards including: 8,978 baccalaureate, 4,285 masters and specialist, 159 doctoral, and 908 first-professional degrees. These institutions also conferred a total of 1,399 associate degrees. The remaining 1,979 associate degrees were conferred by the 13 University of Kentucky community colleges. Independent colleges and universities conferred 3,236 degrees including 2,223 baccalaureate, 434 masters and specialist, and 175 associate degrees. Four hundred and four associate degrees and formal awards were conferred by the seven independent junior colleges in Kentucky. Data are also included for eight business colleges, four graduate seminaries, and one undergraduate seminary. The data are tabulated by institution and by degree field. (BH)

Identifiers-General College MN, *Institutional History, *University of Minnesota

General College, an independent unit of the University of Minnesota, is described in this application for funds and associate status as a participant in Project IV of the Fund for the Improvement of Postsecondary Education. The college is an urban, open admissions school that focuses on the interdisciplinary and liberal arts component of the undergraduate curriculum. Various certificates, the associate of arts degree, and two baccalaureate degree programs are offered by the college. The importance of the open admissions policy in helping the college serve persons who are disadvantaged by traditional student practices or who would be excluded from higher education by conventional student selection/retention policies is discussed. Low tuition and utilitarian courses of study add a unique dimension to the program at General College. The history and future prospects of the college since 1932 are divided into three periods: formative years (1932-1942); war years (1942-1970); and the outreach years (1970-1980). The important characteristics and developments of each period are discussed. A four point proposal that would be implemented as part of General College's involvement in Project IV includes: (1) restructuring of the General College program; (2) intensification of the research and testing program; (3) orientation of tenure-track faculty to general/liberal education; and (4) expansion of reports on general/liberal education at General College. Each aspect of the proposal is described and the role that General College can play in the support and development of general education programs is discussed. (BH)

Identifiers-*Nursing Education

Projections of supply and demand for registered nurses (RNs) through the 1980's are presented with specific reference to the 14 southern states. The importance of manpower projections and studies for registered nurses is emphasized in light of figures that show the number of graduates from entry-level programs in the southern states has doubled since 1970. Enrollment trends for associate, baccalaureate, and graduate nursing programs are provided as well as ratios of employed nurses to 100,000 population for each southern state. It is suggested that the manpower outlook for registered nurses will be seriously affected by at least three important influences: (1) aspirations of registered nurses; (2) the shape of the health care delivery system; and (3) the pressure on the entire health industry to contain costs. National projections of nursing supply and requirement balances are discussed using statistics from three federally-funded research projects: (1) the Pugh-Roberts Study, (2) Dosie Projections; and (3) the WICHE Nursing Project. Based on the results of these projects, it is concluded that when states estimate requirements on the basis of need, the results point to a shortage and when based on extrapolation of current RN staffing patterns and utilization rates of health service, the results point to a surplus of RNs. Policy perspectives on the situation are discussed. It is recommended that shortages caused by uneven distribution be remedied and a set of competencies for various employment settings that relate to corresponding differences in baccalaureate versus degree training be developed. Descriptors-Academic Freedom, Admission (School), *Church Related Colleges, *Constitutional Law, Court Litigation, Discipline, Employment Practices, Governing Boards, *Government School Relationship, Higher Education, *Legal Problems, *Legal Responsibility, Nonprofit Organizations, Parochial School Aid, Private Colleges, Public Facilities, State Aid, Trustees

Legal issues confronting religiously-affiliated colleges and other nonprofit institutions are discussed in this study prepared by the Center for Constitutional Studies at the University of Notre Dame. Legal and structural relationships between colleges and religious bodies that are discussed include: governing documents, governing boards, principal officers, and budgets and assets. Liability issues ascending liability and individual trustee liability are examined. It is emphasized that if a religious body chooses to be involved in the life of a college or university, the leaders of colleges and religious bodies should have a clear understanding of the legal consequences of their relationships. Public financial assistance, the exercise of religious preference in employment policies, academic freedom, student admission and student discipline, use of publicly-funded facilities, and property relations are discussed as they relate to church-related colleges. Further research examining regulation of a religion and religiously-affiliated higher education is recommended as well as examination of the constitutional status of church-related colleges and universities. Appended are three papers: The Present State Of Roman Catholic Canon Law Regarding Colleges and Sponsoring Religious Bodies (James E. Coriden and Frederick R. McManus); Property Relationships: The United Methodist Church and United Methodist Related Colleges (Kent Weeks); and Property Relationships of Southern Baptist Colleges (Preston H. Callison). (SF)

The 59th in a series of reports on national collegiate enrollments, this report includes statistics, interpretations, and trends in enrollment in four-year and related institutions for 1978-79. The institutions surveyed included four-year and upper division colleges, universities, and other baccalaureate degree-granting schools, graduate, professional, and theological schools; and those two-year collegiate-level institutions administered by the institutions in the above categories. Total enrollment for the year showed a decrease of .3 percent. The loss occurred primarily in public institutions. Total full-time student enrollment was down .9 percent for 1978-79 while part-time enrollment was up by 1 percent. When the results of this study are interrelated with those of two-year college studies, the reported grand total in all 2,588 collegiate-level responding institutions was 10,625,562. Enrollment projections are also discussed and a glossary of terms is provided. (SF)

Identifiers-*State University of New York Coll at Oswego

Changes in costs and returns for academic departments at the State University of New York at Oswego were studied over the three academic years and corresponding fiscal years of 1972-73 through 1974-75. The following questions were addressed: how much was spent within each department; what was the cost per student semester hour generated in each department; and in what ways have these costs changed over the last three years? It was found that 11.95 percent more money was spent by all academic departments in 1974-75 than was spent in 1972-73, and that the cost per student semester hour increased 1.62 percent. A significant gain in instructional productivity is evident. Some departments experienced increased unit costs but in a few cases their cost per student semester hour generated remained below the college average. It was found that fluctuations from year to year are quite marked and can change the productivity status of a given department in significant ways. Statistical tables are included. (SW)

Descriptors-*Economic Factors, *Educational Finance, *Financial Problems, Higher Education, *Income, *Private Financial Support, *Taxes

Reasons for continuing to allow the charitable deduction for income tax purposes rather than changing to a tax credit equal to 30 percent of a person's charitable donations are presented. It is projected that support for certain charities, primarily colleges and universities, would decline after implementation of a tax credit system. The current financial crisis in higher education and the role of voluntary support to institutions are discussed. Theoretical arguments against substituting a tax credit for charitable deduction are offered. The view of charitable deduction as a tax subsidy is contested, and the tax credit is viewed as less equitable than the deduction. It is proposed that a tax credit substitution would substantially reduce giving by high income individuals to make gifts. A tax credit for charitable contributions would increase the disposable income of the wealthy, decrease the income of middle- and lower-income individuals, and result in a less progressive distribution of income than with a charitable deduction. It is concluded that the proposal to substitute a tax credit for the charitable deduction is as a matter of tax theory questionable, is as a matter of tax policy less equitable than the deduction, and is as a practical matter unacceptable. Identifiers-*State University of New York Coll at Oswego

Characteristics of students who withdrew from the State University of New York (SUNY) College at Oswego during 1975-76 were studied to determine if previously studied trends are continuing. Data are provided on the withdrawal rate for each undergraduate class, by sex, and by college major. The size of the freshman class and the numbers of degrees granted four years later are examined for Oswego and 11 comparable SUNY colleges. It was found that about 12 percent of registered full-time undergraduate students officially withdrew from college during 1975-76. This is a two percent increase over the previous year. The largest degree programs lost fewer students, in the aggregate, than did the total college. Women undergraduates continue to leave in good standing at a substantially higher rate than do men students. Although students continue to withdraw in slightly increasing numbers, the production of degrees continues to exceed the numbers of freshmen who entered four years earlier. Other similar SUNY units have the same experience. (SW)

Identifiers-*State University of New York Coll at Oswego

Changes in undergraduate degree production from 1972-76 at the State University of New York (SUNY) at Oswego were studied. The college has moved steadily toward becoming a multipurpose liberal arts college and it serves a sizeable number of students who begin their post-high school careers in community, agricultural, and technical units of SUNY. Data are presented concerning the extent to which the division of arts and sciences has been granting an increasing proportion of total degrees conferred. Proportional increases and decreases in degrees granted between 1972 and 1976 are shown for Oswego College, all of SUNY, and the entire state. It is recommended that the needs of transfer students be analyzed. (SW)

Descriptors-*Administrator Education, *Bachelors Degrees, *Curriculum Development, Educational Objectives, *External Degree Programs, *Health Services, Higher Education, Institutional Administration, *Nursing Homes, Program Development, Residential Care, Undergraduate Study

Identifiers-Nontraditional Education, *University of Pittsburgh PA

A project undertaken at the Graduate School of Public Health of the University of Pittsburgh to develop an undergraduate external degree program in health services administration with a major in long-term care administration is described. Program activities were designed to: develop a work plan, identify the parameters of knowledge and skills needed by administrators of long-term care institutions, review existing courses relevant to the broad knowledge and skill components required, modify and expand existing courses that can be used in the external degree program, select trainees and test the effectiveness of the program, publicize the program, and evaluate the new program. An addendum to the report considers cost components of nontraditional and traditional programs. Appendices include course guides on human relations and health and society, a sample student educational record form, a sample study plan, a summary description of the degree program, and a summary description of a similar program offered by Virginia Commonwealth University. Descriptors-*Career Opportunities, Doctoral Degrees, Employment Opportunities, *Employment Trends, *Enrollment Trends, *Graduate Study, Higher Education, *Post Doctoral Education, *Professional Development, Research Opportunities, Student Financial Aid, Trend Analysis

The nature of graduate education, the job market, and the problem of institutional self-renewal are considered. Trends of leveling off of graduate enrollment and of Ph.D. production and a dramatic increase in the level of postdoctoral training have occurred. The oversupply of Ph.D.-producing institutions and the need for financial support of graduate students so that institutions can maintain viable training programs are noted. Federal training support has continued to be reduced, and as financial support for students has shrunk, institutional costs have increased. Statistics illustrating increased costs in college operations are cited. Two other problems that threaten the job market and the future of graduate programs reside in the projections of the probable size of the student pool and the demography of the typical faculty. Statistics outlining the nature of these problems are cited. A flexible integration of the historical strengths of liberal education with the strengths of the professional school is proposed. The need for diversity in the advanced years of predoctoral training as well as in postdoctoral education, and the need to consider the private sector for new research and career opportunities are noted. Descriptors-*Advanced Placement, *College Credits, *Equivalency Tests, Higher Education, Transfer Policy

Identifiers-*University of Pittsburgh PA

Current policies and practices governing the transfer of credit at the University of Pittsburgh were reviewed. Both the general policies of the university and the specific policies of the School of General Studies, the degree granting unit, were included for study. Consideration has been given to expediting the progress of mature adults through the degree program by enabling them to benefit from their former education. A university manual defines how credits are transferred by transcript and what is meant by advanced standing'' and advanced placement.'' Determination of the transferability of credits is considered an academic responsibility of specific departments. Policies of the School of General Studies on the process of transferring credits, advanced placement and/or credit by examination, and alternative methods through which credit may be awarded toward a baccalaureate degree are outlined. The need for higher education institutions to have centralization and delineation of procedures for determining the acceptance of previously earned credits is stressed. (SW)

Identifiers-*State University of New York Coll at Oswego

Student course selection under a new curriculum at the State University of New York College at Oswego was studied. A second study objective was to determine whether there were differences in breadth of study between students who differed in academic promise as freshmen. Four years after entering the college, over half the students in the class of 1975 had earned a bachelor's degree. Male high-promise students (the top seven percent of entering freshmen) persisted to graduation at the highest rate, and female high-promise students experienced the lowest persistence rate. High-promise students majored in the physical sciences, mathematics, and communications studies significantly more often than did the regular undergraduates in their class. Biology, education, foreign languages, and social sciences (excluding psychology) attracted relatively few high-promise students. There was no significant difference between the high-promise and regular students in the selection of electives and general distribution requirements from each of 15 disciplines. First semester grade point average was determined to be an excellent predictor of cumulative grade point average. (SW)

Identifiers-*University of the Pacific CA

The final report is presented of the University of the Pacific's Program for the Coordination of Academic Planning and Professional Development. The program has the following objectives: to facilitate personal and professional growth of faculty; dispense teaching incentive awards and research grants; administer faculty development leaves; generate resources for the improvement of teaching/learning; extend faculty and staff participation in institutional planning; develop coherent programs across schools, colleges, and departments; assess program needs through institutional research; plan cost effective innovation; maintain accurate and current information for planning; and reallocate faculty resources to provide for full use of faculty. Critical issues involved in coordination, the nature of the programmatic areas, and the future of the program at the university are discussed. An external evaluation report conducted by Stephen C. Scholl is presented and appendices include the following information: guidelines for programs; summaries of 1977-78 faculty development leave projects, teaching incentive award projects, and scholarly activities; information about faculty development workshops; admissions, retention, financial aid, and enrollment distribution data; institutional goals inventory: and a report to the college president from the Special Committee to Consider the Cluster Colleges. Identifiers-CAMPUS Simulation Model, HELP/PLANTRAN Model, RRPM Model, SEARCH Model

A study on modeling systems was conducted to examine the extent of model use and the usefulness of the analytical models currently available. Specific study objectives were to identify: the users of some of the most frequently used modeling systems, the reasons for the selection of particular models, the problems and successes of implementation, user perceptions of the usefulness of models in decisionmaking and planning, and user perceptions of the likelihood of future use of models in institutions of higher education. A questionnaire was sent to project leaders to determine the selection process, objectives, implementation problems, and current and future use. A second questionnaire was directed to academic and financial administrators and focused on model-selection, objectives, and future use. A total of 394 institutions were identified as having access to one of the four modeling systems (CAMPUS, HELP/PLANTRAN, RRPM, and SEARCH). Representatives of 199 of the 394 institutions responded to the first questionnaire, and 132 representatives responded to the second questionnaire. It was found that there is considerably more willingness to rely on models for long-range planning than for day-to-day decisionmaking. A comparison of the responses of the two groups is made, findings are analyzed by institutional classification, and successes and problems are discussed. Sample questionnaires and a bibliography are included. (SW)

Descriptors-*Computer Oriented Programs, Educational Assessment, *Educational Planning, *Graduate Study, Higher Education, *Long Range Planning, *Models, Systems Approach

A computer simulation model for graduate education long-range planning is presented, and the national, state, and institutional forces acting on graduate education are examined. The model was designed to show the causal relationships between three major interdependent academic program elements within a large public university: undergraduate education, graduate education, and research. The Graduate Education Planning Model has been applied to the University of Amherst, both at the campus-wide graduate school level and at the smaller department/school level. The model's emphasis is on the institutional resources (students, staff, and budgets) that are directly reflected in the academic program, where parameters have been selected to allow the model to be applied either to an academic department or to the entire university's combined academic programs. The computer program is written in the FORTRAN Language and the model is based on the system dynamics approach. A bibliography is included. (SW)

Identifiers-*Postsecondary Education Core Design Project

Financial viability in postsecondary education is considered as part of the Postsecondary Education Core Design Project sponsored by the National Center for Education Statistics. Financial viability is defined within the scope of postsecondary education, and key policy issues at the national, state, and institutional levels are identified. Implications for data production and recommendations for ongoing statistical work are addressed. Types of data to be collected for financial viability studies include student enrollment and financial aid data, institutional financial status data, and academic program and activity data. Research needs at the federal level concern: access, choice, and pricing; productivity in postsecondary education; the cost of complying with federal and state legislation and administrative regulations; and capital requirements. At the state level it is recommended that studies be undertaken that describe how the various state planning procedures are functioning and how the states are dealing with the public-private college and university issue. Sample data collection aids, a brief summary of the literature, and an annotated bibliography are appended. (SW)

Identifiers-*University of North Carolina Chapel Hill

Students entering the University of North Carolina at Chapel Hill as freshmen in 1967-72 were followed for approximately six years after their initial enrollment to determine the number who received their bachelor's degrees from the institution. For all six freshmen classes combined, 49.9 percent received their degrees within four years, 64.8 percent graduated within five years, and 67 percent graduated within six years. Women were more likely to graduate and to take somewhat less time to graduate than men. Black students had lower graduation rates than white students, but the rates for blacks have been rising. Students who scored higher on the Scholastic Aptitude Test were more likely to graduate and to graduate earlier than students with lower scores. Students with higher predicted grade point averages tended to take less time to graduate, but they were less likely to graduate than students with lower predicted grades. Students who earned higher grades tended to take less time to graduate. Data on graduation rates from other institutions and the results of national surveys are included for comparison. (Author/SW)

Descriptors-*Delivery Systems, *Dental Clinics, *Dental Schools, Flowcharts, Health Services, Higher Education, *Institutional Characteristics, Institutional Evaluation, School Visitation, *Systems Approach

A study was undertaken to describe and document the dental school dental delivery system using an integrated systems approach. In late 1976 and early 1977, a team of systems analysts and dental consultants visited three dental schools to observe the delivery of dental services and patient flow and to interview administrative staff and faculty. Although the schools visited were selected to be reasonably representative, they do not constitute a statistically significant sample. Based on individual site-visit reports, information was synthesized to form a composite dental school dental delivery system description. Contents of the report are as follows: historical information on the dental school delivery system and information on the schools visited; a broad systems overview of the composite system and the components that make up the system; a discussion of the major characteristics of the system (organization, funding, services, effectiveness, efficiency, and quality assurance); and discussion of each element of the delivery system and of the flowchart that describes the composite system, as viewed from the perspective of the patient. Appendices include: the flowchart describing the patient flow through the system, examples of some typical patient record forms, a tabulation of clinic fees, and a bibliography. (SW)

Descriptors-Access to Education, Admission (School), *Affirmative Action, Constitutional Law, Court Doctrine, Discriminatory Legislation, Educational Discrimination, Equal Education, Equal Opportunities (Jobs), *Federal Legislation, Higher Education, Policy Formation, Public Policy, Racial Discrimination, *Reverse Discrimination, Selective Admission, Sex Discrimination, *Supreme Court Litigation
Identifiers-*Bakke v Regents of University of California, Powell (John)

The complete text of the Bakke decision and the Equal Employment Opportunity Commission's voluntary affirmative action guidelines are presented. Also included are: Statement by the U.S. Commission on Civil Rights on Affirmative Action; Presidential Memorandum on Affirmative Action Programs; and the United States Commission on Civil Rights Statement on Affirmative Action. These documents outline national policy with respect to affirmative action in education and employment. An introductory statement explains the diverse opinions of the Supreme Court that permit institutions of higher education to use race and national origin affirmatively in certain settings and in certain ways. Despite confusion, it is suggested that the decision is consistent with continuing federal efforts to encourage affirmative measures to overcome race, national origin, and sex discrimination. The first definitive statement by the executive branch on voluntary affirmative action in employment elaborates on these federal efforts. The guidelines of the Equal Employment Opportunity Commission offer a unified and comprehensive perspective on the lawfulness of voluntary affirmative action. (Author/SF)

Identifiers-*Southern Technical Institute GA

A practicum was conducted to develop a scientific management tool that would assist students in obtaining a systems view of their college curriculum and to coordinate planning with curriculum requirements. A modification of the critical path method was employed and the result was a time-based network model of the Industrial Engineering Technology curriculum at the Southern Technical Institute. The model pictorially displays the time-phasing and precedence requirements of all courses in the curriculum. Information is provided on the construction and use of the model to permit replication of the method for other structured curricula. A brief literature review and background information on the engineering curriculum are presented. An evaluation of the model indicated student preference for the model over other methods available.

Information on course requirements, course descriptions, and an evaluation questionnaire are appended. (SW)

Identifiers-Alabama

A personalized model for faculty development and a case study demonstrating its utilization are presented. The increasing need for strong faculty development programs is noted with specific reference to the increasing numbers and varying types of college students. To respond effectively to the needs of this burgeoning student clientele, provisions must be made to equip faculty to meet the demands of the profession. The model proposed includes six steps: (1) needs assessment; (2) identifying the most crucial needs; (3) defining problems, proposing strategies and actions; (4) determining tasks and identifying doers; (5) doing; and (6) progress reports and display of products. The model is designed for planning and implementing a series of activities that permit individual staff members to engage in those aspects of the program that seem most profitable or meaningful to them and to their own professional growth. It is suggested that for the program to be successful, the staff must believe faculty development to be important and participation in activities must be voluntary. A case study of an individualized faculty development program involving faculty from 18 colleges is presented. The Program for Development of Community College Faculty (FDP) was designed to provide personalized faculty development for Alabama's two-year colleges. FDP included a summer program, statewide conferences, programs in participating colleges, and graduate credit activities. A one- and three-year followup evaluation of the program are included. Appended are: programs for statewide faculty conferences, a sample semantic differential study, followup questionnaire to faculty, and a questionnaire for deans of instruction. (SF)

Descriptors-Administrative Change, *College Students, *Eligibility, *Federal Aid, Financial Support, Higher Education, *Need Analysis (Student Financial Aid), *Student Financial Aid
Identifiers-*Basic Educational Opportunity Grants, Office of Education

New procedures for the Basic Educational Opportunity Grant Program that must be followed for the 1978-79 academic year are presented. Financial aid administrators must follow these procedures to validate Office of Education selected Student Eligibility Reports. A uniform method of validating both Student Eligibility Reports not selected by the Office of Education and optional data elements is also presented. Background information that will be helpful in understanding the 1979-80 Basic Grant Validation project and examples of instances where validation is not necessary even if the Student Eligibility Report is flagged for validation is provided. Procedures related to making and withholding payment of basic grants and the method by which a financial aid administrator refers cases to the Office of Education, and the validation procedures for schools participating in the alternate disbursement system are discussed. A sample validation form, sample letters sent to students, and materials on edit checks are appended. (SW)

The Federal 504 Handicapped Access Regulations: A Case Study in Government-Higher Education Relations.

Pub Date-31 Jan 79

Note-166p.; Research prepared in collaboration with the Sloan Commission on Government and Higher Education; Best copy available

Pub Type- Reports - Evaluative (142)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors-*Access to Education, *Architectural Barriers, Compliance (Legal), Federal Aid, *Federal Legislation, *Federal Regulation, *Government School Relationship, *Handicapped Students, Higher Education

Identifiers-*Rehabilitation Act 1973 (Section 504)

Development and implementation of the Federal 504 Handicapped Access Regulations of the Rehabilitation Act of 1973 and the relationship between the government and higher education institutions are considered. The legislative history and overview of the regulations, institutional responses to the regulations, problems experienced by institutions with the regulations, and compliance and enforcement are discussed. The regulations are designed to eliminate attitudinal, procedural, and physical barriers confronting handicapped individuals. Field trips and interviews were undertaken with eight institutions, representing the public and private sectors, large and small schools, and urban and rural areas. Information about characteristics of the eight institutions, which are not identified, are included. The cost of compliance, and particularly of structural modifications, was the dominant concern for most institutions. Problem areas for institutions included: technical aspects of the regulations, problems of administration, and problems that relate to providing access. Views of handicapped students, an overview of institutional benefits and burdens from the regulations, and a list of some problem solutions are included. Compliance oversight is through written complaints from either individuals or groups to the Office of Civil Rights. Appendices include questionnaires used in institutional and government interviews and compliance deadlines for the regulations. (SW)

Identifiers-Patient Education

The need for health personnel in California and recommended targets for expansion of health sciences programs are presented in this report prepared for the California PostsecondarV Education Commission. The report focuses on the role of physicians, mid-level practitioners, nurses, pharmacists, dentists, optometrists, and health sciences education. Supply trends and projections, demand, utilization, clinical training, and special problems, and recommendations are considered for each field. Pertinent national legislation is assessed and it is suggested that the true impact of this legislation will not be felt on the state level for at least a decade. The effect of professional liability insurance rate increases on patterns of physician practice are also presented for the State as well as the impact of national health insurance on health manpower. Health sciences education programs are discussed focusing on the needs of the health care delivery system that are amenable to change via the educational system, and needs of the educational system itself. System changes that are recommended in the education field include improved practitioner attitudes toward primary care, and prevention of disease through patient and health education. Data for health services professionals including: geographic distribution, field, and speciality are appended as well as a list of accredited health professions schools in California and degrees conferred. An explanation of the basic project methodology is also included. (SF)

Identifiers-College Level Examination Program, College Proficiency Examination Program, Connecticut Board for State Academic Awards, *Nontraditional Education, *Regents External Degree Program NY, Thomas A Edison College NJ

Nontraditional methods of qualifying for a college degree are described in this student guide to off-campus study and examination. The three external degree institutions in the United States that offer these programs are discussed. They include: Regents External Degree Program of the University of the State of New York; Thomas A. Edison College of the State of New Jersey; and the Board for State Academic Awards of the State of Connecticut. Each step toward earning an external college degree is explained from how to begin the process to a discussion of the effectiveness of off-campus learning. A guide for working with the external degree institution is presented as well as advice on how to learn independently. Nonresidence college programs (programs with lower attendance requirements than conventional college study) available to students are discussed and a listing of these institutions is provided. A chapter is included on the College Level Examination Program, the College Proficiency Examination Program, Regents External Degree Examinations, and Thomas A. Edison College Examination Program. Also addressed are: libraries as centers for external learning; and help that can be obtained from colleges, corporate or government employers, and from the armed forces. Personal accounts of student's experiences in external degree programs are also provided. (SF)

Identifiers-Nursing Education

A detailed statistical review of state support for health manpower training during 1973, 1974, and 1975 with an inventory of state expenditures for specific health occupations in 32 states are presented in Volume One of this two-volume study conducted for the Health Resources Administration. Objectives of the study included: investigation of the availability of data on state and local support for health manpower training and development of methods for obtaining these data; and utilization of these procedures to collect information for FY 1974 and FY 1975. The two-phase study methodology is explained and financial data and program statistics for all major health professions and allied health occupations are presented. Financial support categories include: institutional support, capital outlay, student aid, and direct support. For each of the 32 states examined in depth, state funds by institutions and program are tabulated for each financial support category. Total financial support for health manpower training for all 50 states was $1.5 million during FY 1974, an increase of 23 percent over FY 1973. For 32 states the mean per capita higher education appropriation for health manpower training programs was $46.35, with an average figure of $5.29. Variations in program expenditures in different states ranged from a high of $15.26 per capita for Oregon to a low of $1.97 for Massachusetts. It is recommended that: the survey be repeated on a regular basis; the scope of the survey be increased; a mail survey be conducted; an index be developed and printed; and an in-depth analysis of state support be conducted that coordinates federal and state support indices. A glossary of related terms is provided. (SF)

Occupational Socialization in Graduate and Professional Education: An Annotated Bibliography.

Pub Date-78

Note-18p.

Pub Type- Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-College Role, *Graduate Students, Higher Education, Identification (Psychological), *Professional Education, *Role Perception, *Role Theory, *Socialization, *Student College Relationship, Student Teacher Relationship

An annotated bibliography concerning the socialization of students to the professional role of an occupation is presented. The literature deals with graduate and professional schools as socializing agencies and reflects disagreement concerning the relative importance of faculty student interaction, student culture, preexistent student characteristics, and program structure. Some sociologists question whether professional socialization occurs at all in the educational setting. Since major studies of medical education in the 1950's, the research in professional socialization has consisted primarily of small-scale empirical studies, and little comparative work has been attempted. Identifiers-Sweden

A longitudinal study conducted since 1965 in Sweden has investigated the role of higher education in the life situation of the individual adult. Study objectives have been to: chart the actual educational and vocational decisions made by young people; study the expectations of the individual concerning education and working life; identify psychological, social, and economic factors influencing higher education study and life choices; analyze the changes undergone by individuals as a result of higher education (attitudes and values); relate the individual's perception of higher education study to various aspects of his life history; and develop a theoretical base comprising models and methods useful in integrating various approaches. A psychological cost-benefit analytical model was developed to describe the decisionmaking process at the individual level and to predict choices of postsecondary activity. Literature reviews were conducted in the fields of psychology, pedagogics, sociology, and economics. Results of followup studies of pupils who left elementary school with no intention of adding to their education and additional studies of upper-secondary-school student experiences and perceptions are summarized. In 1980 the members of the study will be about 25 years old and will have completed their initial education and become established in the labor market. (SW)

Descriptors-*Academic Standards, *Accreditation (Institutions), Colleges, Educational Improvement, *Educational Quality, *Eligibility, Faculty Workload, Higher Education, Institutional Characteristics, Professional Education, Standards, Universities

The differences and similarities among the evaluative standards and guidelines of the 52 accrediting agencies recognized by the Council on Postsecondary Accreditation (COPA) are discussed. The U.S. system of accreditation (voluntary, nongovernmental, self-regulatory evaluation) is explained and the role of COPA in coordinating accrediting activities is discussed. Part I of this analysis provides an introduction and overview of the accreditation system. Part II considers those agencies recognized by COPA. They are subdivided into regional and national commissions. Specialized and professional accreditation is discussed in Part III. A total of 90 sets of standards used by accrediting agencies are examined. A general lack of consistency between the 52 agencies in assigning accreditation status is apparent. The confusion this generates for institutions is discussed as well as other criticisms of the accrediting process. To increase uniformity, an annual or biannual accreditation directory is recommended as well as agreement on basic nomenclature and conditions of accreditation. It is also suggested that a comprehensive overview of the interpretation, implementation, and application of accrediting standards would provide a valuable resource for American higher education. Descriptors-*Astronomy, *Bachelors Degrees, *Career Planning, College Majors, *Educational Planning, *Employment Opportunities, Enrollment Rate, Graduate Study, *Graduate Surveys, Higher Education, Minority Groups, *Physics, Student Characteristics

A 1977-78 survey of bachelor's degree recipients in physics and astronomy investigated graduates' postbaccalaureate plans. Highlights of the findings are: a small shift in postbaccalaureate plans away from graduate study and into employment for both physics and astronomy bachelors; an improved employment outlook for physics graduates with regard to an increase in positions that make extensive use of physics training; and an increase in astronomy bachelors who enter physics graduate study. Data are presented on the following areas: plans of physics bachelor degree recipients, 1968-78; characteristics of physics graduates, 1977-78; postbaccalaureate plans of minority group members among physics bachelors of the class of 1978; sources of anticipated support for first-year graduate study, 1973 and 1978; changes in employment outlook for the new physics bachelor's degree recipients, 1971-78; initial employment of physics graduates with bachelor's degrees, 1972-78; use of physics training by type of employment; full-time employment of new physics bachelor's degree recipients; starting salaries for new physics bachelors; and characteristics of astronomy bachelor's degree recipients, 1978; and use of astronomy education by type of employer for astronomy bachelors, 1978. Identifiers-*Southern Regional Education Board

The 1978-79 annual report of the Southern Regional Education Board is presented. Contents are as follows: information about SREB, sources of support, chairman's statement, president's report, and information about current SREB programs. SREB's new, revised profile of southern postsecondary education in the mid-eighties, information about enrollment projections for the eighties, and supply and demand for college graduates in the south by 1985 are presented. An Academic Common Market, established by SREB in 1974, has encouraged joint use of uncommon graduate programs by other southern states. This fall 370 programs will be shared regionally and the Market will include a dozen uncommon baccalaureate programs in allied health fields. Work accomplished on faculty development and improved fiscal management are outlined, and information is presented on testing of a nursing curriculum, manpower issues in nursing and allied health, new issues in the human services, and mid-level careers in mental health. Other SREB programs concern the educational attainment of black Americans, racial composition of faculties, and instructional change in black colleges. For each of the programs, participating institutions, staff members, and sources of support are listed. Recent SREB publications and information about SREB staff and finances are included. (SW)

Identifiers-*Postsecondary Education Convening Authority

The final report of the Postsecondary Education Convening Authority, a project of George Washington University's Institute for Educational Leadership and a program supported by the Fund for the Improvement of Postsecondary Education, is presented. The objective of the project was to bring about informed public policy in postsecondary education by enabling policymakers at the state and federal levels to become better informed on important issues. During its four-year history, the project focused on four issues: the licensure/approval of postsecondary institutions by states; the respective roles and functions of the states, the Federal Government, and the nongovernmental accrediting agencies in the governance of postsecondary education; the impact of government policies on improvement efforts in postsecondary education; and the emerging federal and state role in lifelong learning. Project objectives were largely carried out through convenings and publications. The convening authority was also a sponsor of research, an issue development process, a mediator, a provider of a neutral forum, a catalyst, a networker, and an innovator in conference design. Activities involving each of these functions are described, and project outcomes are outlined. The project director's final thoughts, a chronology of major activities and publications, and commentaries on the project by others are presented. (SW)

Identifiers-*University of Wisconsin Oshkosh

A project, sponsored by the Fund for the Improvement of Postsecondary Education, was conducted at the University of Wisconsin-Oshkosh to expand the Faculty College program, which is an on-going series of faculty development workshops and seminars. The project was designed to: implement and evaluate a series of in-depth special focus sessions that feature national leaders who would treat issues in one of the developing areas of the institution; provide support for faculty from external institutions to participate in the Faculty College program; develop alternative models for implementing comprehensive institutional change strategies that can be sustained without external resources; and assess the effectiveness of the interinstitutional multiplier strategy implemented through the project. The four special focus sessions focused on: university/high school cooperative programs, educational needs in nonschool settings, adult education, and improving undergraduate teaching. The project evaluation plan is outlined and the following conclusions are presented: the four sessions were positively evaluated by participants; 51 participating institutions derived some benefit from project experiences; and four models for implementing comprehensive institutional change strategies were developed. Responses regarding the multiplier strategy implemented through the project were mixed. Data from the evaluation studies and evaluation instruments are included. (SW)

Identifiers-*Connors State College OK

A custom-fit degree plan was developed and implemented at Connors State College in Oklahoma through support from the Fund for the Improvement of Postsecondary Education. The project objectives were to develop: a model of counseling, advisement, and instructional units; a comprehensive file of community and business resources; and a close community/college partnership by preparing realistic study plans meaningful to the economic structure of the area. The program was also designed to produce a formal plan for Individualized Career Education Plans, which was to be submitted to the regents for approval as a standard option at the college. During the first year, 200 freshmen were enrolled in the custom-fit degree plans. Because of policies adopted by the Oklahoma Regents for Higher Education, project counselors were only able to write 112 individualized degree plans in 1977-78. Many more students were assisted in planning for effective use of electives and options. Enclosed are a sample form for planning a student's courses of study and related information sheets and letters from schools across the country that are interested in the program. (SW)

Identifiers-Australia, *University of New South Wales (Australia)

A study was conducted at the University of New South Wales in Australia to determine what happened to applicants who deferred enrollment in 1975 and did not enroll in 1976 at the university. Additionally, information was sought about what deferring applicants thought they had gained from deferment and their opinions generally about the advantages and disadvantages of deferring. A questionnaire was mailed to deferring applicants, and further information was obtained from the admissions office and the computer printout of offers made by the Metropolitan Universities Admissions Centre. Based on a response rate of 63 percent, it was determined that about 74 percent of respondents were undertaking some form of postsecondary education. Analysis of findings is presented under three subheadings: students attending other universities, students attending any other postsecondary institution (including nursing), and persons not enrolled in any institution in 1976. Data indicate that most of the deferring applicants do continue to enroll in some form of higher education. Deferrent policy and practices at the university are discussed, and a sample questionnaire is appended. (SW)

Descriptors-*Computer Assisted Instruction, Computer Oriented Programs, Curriculum Development, *Educational Technology, Engineering Education, Foreign Countries, Higher Education, Instructional Improvement, *Instructional Innovation, Teaching Techniques

Identifiers-Australia, *University of New South Wales (Australia)

The impact of educational technologies on various curricula and on projected curriculum reform at the University of New South Wales is discussed. It is argued that the existence and use of such technologies can reach beyond being tools that simply provide assistance in instruction, and can often have considerable effect on the curriculum itself. Most of the examples are drawn from engineering education and are concentrated in large part on the educational uses of interactive computing. The term 'educational technology' embraces commonplace instructional aids also. The use of a Wang desk-top minicomputer in an undergraduate engineering laboratory and resulting efforts to employ the minicomputer to improve the teaching effectiveness of laboratory experiments are described. The innovative use of automated marking (through optical scanning of appropriate answer sheets) and use of computer marking of quizzes incorporating a variant of the standard multiple-choice format are also discussed. Innovation in educational technology can also affect the content of a course. The introduction and increasing availability of on-line remote computing facilities, in which students participate in dynamic interaction with models of engineering systems, can open up new areas of syllabus and new sets of course objectives. (SW)

Impression Formation and Classroom Design: The Impact of Spatial Arrangement and Neatness on Judgments of Teachers.

Pub Date-Apr 79
Note-13p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 1979)
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Classroom Arrangement, Classroom Design, *Classroom Environment, Environmental Influences, *Furniture Arrangement, *Open Plan Schools, *Space Utilization, *Teacher Behavior

A study was conducted to examine the impact of classroom arrangement (open versus traditional) and tidiness (messy versus neat) on observers' expectations about a teacher. A heterogeneous sample of college students was shown color slides of vacant elementary classrooms varying in terms of these two dimensions and asked to indicate their impressions of the teachers and the pupils who used the rooms. A multifactor, repeated-measures analysis of variance was conducted. Findings indicate that observers form strong impressions about a teacher's behavior and personality based on the neatness of the classroom. In addition, furniture arrangement had a significant impact, with open classrooms leading to more positive impressions of a teacher's responsiveness and creativity. (SW)

The institutional directory provides the basic information needed to identify and contact the degree-granting institutions of New York State. It serves as a reference for prospective students, New York State Education Department staff, the institutions themselves, and other individuals and organizations interested in postsecondary education. Four sections are included: (1) a description of the structure of the postsecondary education system of New York within the context of the University; (2) listings of the degree-granting institutions by sector and including fall 1977 enrollment figures and 1977-78 student costs; (3) appendixes with additional information on institutional programs, student services, selected organizations, and state department offices and publications pertinent to postsecondary education; and (4) an index of institutions by proper and popular name, organizations, and major topical areas. Identifiers-Ben Gurion University (Negev), Center for Educational Development in Health, *Israel

The final report of the Beersheva collaborative project in health manpower development is presented. The Center for Educational Development in Health (CEDH) (now located at Boston University Medical Center) worked with Ben Gurion University of the Negev to: field test the CEDH model for systematic curriculum design; design, implement, and evaluate a faculty teaching laboratory; and establish and maintain a collaborative relationship. The project was the first opportunity to test the model in a setting that emphasizes the training of primary care physicians and embraces both an underserved region in general and certain disadvantaged groups in particular. Creation of a curriculum development unit and a process for curriculum development is discussed, and the Beersheva Curriculum is described. The faculty teaching laboratory project involved teacher workshops, inservice training, development of units of instruction, use of learning packages in educational methods, and a learning resources center. The system for evaluating student performance and communication of results of the total project to medical educators in the United States are covered. Sample evaluation instruments, instructional materials, and other program materials are appended. An executive summary is included. (SW)

Identifiers-Australia, *University of New South Wales (Australia)

A study was conducted at the University of New South Wales to assess informal staff-student contact. A questionnaire was administered to a random sample of 100 staff, and 57 responses were obtained. Most contact outside of class hours were connected with matters arising from teaching activities but a number of meetings were held simply on the basis of friendship. Matters relating to the university generally and situations involving counseling gave rise to far fewer meetings. Most of the staff had extremely limited contact with students in social settings unrelated to the teaching role. The most common arrangement for contact was talking immediately after a class. Although almost half of the respondents felt that the amount of contact between themselves and their students was inadequate, only a small number believed that informal relationships with students was of no importance in university life. Shyness on the part of students was seen as the biggest obstacle. The other major obstacle seen by staff is their own lack of time. Findings from other studies on staff-student contact are cited. Identifiers-*Nontraditional Education, State University of Nebraska, *University of Mid America NE

Described are the investigatory procedures, research and development, and achievements and conclusions for each of 12 work assignments for the 13-month period from January 1, 1974 through January 31, 1975 relating to the University of Mid-America (UMA). UMA is a regional consortium, comprised of the University of Kansas, Kansas State University, Iowa State University, the University of Missouri, and the University of Nebraska. The projects were in the areas of: curriculum planning for open learning; alternative approaches to courseware development: costs and procedures; cost analysis and comparison; a five-year plan of operations and a five-year expenditure and income projection; administrative structures and plans for the State University of Nebraska; a prototype resource center and operational plans for a series of intrastate resource centers; evaluation and acquisition of existing courseware, and adaptation to the State University of Nebraska's needs; broadcast and other open-learning delivery systems; a plan to broaden the open-learning fiscal base to include private and other public sources; course development of two working prototype open-learning multimedia courses; planning for systematic development and evaluation of eight additional courses; and formative and summative evaluation of the open-learning courseware and delivery system. A variety of appendixes constitute more than half of the document. (MSE)

The Effects of Declining Enrollments on Transfer Policy.
Pub Date-May 79
Note-29p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Academic Standards, Access to Education, *Administrative Policy, Articulation (Program), College Admission, College Credits, *Declining Enrollment, Demography, *Enrollment Trends, Higher Education, Policy Formation, Student Characteristics, Student Personnel Services, Student Recruitment, *Transfer Policy, Transfers, *Transfer Students

Based on the current literature, new facts and developments, and observations and interviews with 22 exemplary institutions, this paper reviews the issues and assumptions underlying articulation and transfer, and provides a descriptive summary of emerging policies, practices, and trends. The paper begins with three introductory sections: background information, student demographics, and transfer issues. The major section, on issues, focuses on the academic quality of transfers and increasing the opportunity for transfer by removing artificial barriers. The central portion of the paper describes and summarizes the impact of declining enrollments on the major functions and academic areas of an institution. The development follows in sequence from articulation and recruitment through admissions and the awarding of credit to curricular concerns, student services, and institutional resources. In particular, the section on awarding credit covers D grades, exemption processes, full in-faith transfers, credit limits, extra-institutional credit, and transcripting. The concluding sections are devoted to current trends and near term changes. (Author/MSE)

Descriptors-*Cooperative Planning, *Higher Education, *Instructional Improvement, Librarians, *Library Instruction, Library Skills, *Program Effectiveness, Program Planning, Research Needs, *Student Needs, Teacher Role
Identifiers-University of Evansville IN

Effective library instruction must be course- and assignment-related, planned cooperatively by the librarian and course instructor, and based upon personal contact between the librarian and students, as illustrated by the instructional program at the University of Evansville library. Before beginning instruction, the librarian must determine the deficiencies of the professor and the students, as well as the necessity and validity of the assignment. A class presentation should be based on information provided by the professor in the form of syllabi, assignment sheets, questions, and suggestions. An annotated bibliography of important sources, specifically detailed handouts, transparencies, optional library tours, and individual instruction are key elements in the instruction program. In addition to expected outcomes, library instruction yields unanticipated benefits and problems. Although the future of this service is uncertain and is dependent on several factors, it will be a powerful tool in higher education for both students and the academic community. (CWM)

Descriptors-*Audiotape Recordings, *Autoinstructional Programs, *Core Courses, *Educational Radio, Higher Education, Instructional Innovation, Media Research, Media Technology, Program Budgeting, *Program Evaluation, *Statistical Data

Identifiers-Marsh Model, Message Design

An undergraduate core course covering the entire range of communication studies was content analyzed, scripted, and audiotaped for broadcast in 20 half-hour segments. The formats of the tapes included interviews, panel discussions, expository lectures, fabled narratives, and radio drama. An evaluation of the audiotaped materials was conducted by an external evaluator and consisted of a comparison between a group of students using the audiotaped materials and a group given a lecture course on the same content. The results of the evaluation favored further development of the audiotaped format, as it effectively delivered information to many students in considerably less time than the lecture course. A bibliography is included at the end of the first chapter, and the statistical analyses of the evaluation data are appended. (Author/JVP)

Identifiers-*Ohio

The highlights of the 1978 Ohio White House Conference on Library and Information Services are presented in this report. Brief sections describe pre-conference activities and the democratic processes of the conference, and summaries of the presentations indicate the major issues addressed at the meeting. Conference recommendations, listed under the specific speeches to which they relate, are collected and presented under six headings: (1) basic library and information services, (2) special services to special groups, (3) increasing awareness of library services, (4) technology, (5) library networks, and (6) library facilities and staff. The citizen and library-related delegates who were elected at the conference to represent Ohio at the national White House Conference in October 1979 are identified, and their library-related activities and interests are sketched. Lists of alternate delegates, advisory committee members, and conference participants are also included. (JD)

Identifiers-*New York

In this report, statistical evidence concerning library needs in New York as revealed by surveys of public, school, and academic libraries and school media centers conducted by the National Center for Education Statistics, is presented fully with comparisons to regional and national performance. Resources examined and tabulated include professional and support staff, collections of print and nonprint materials, acquisitions of print and nonprint materials, space, hours of service, and operating expenditures. To the extent that similar data on a state basis are available from the 1965 Inventory and from U.S. Office of Education reports of that period, comparisons with an earlier decade are made. Key findings are summarized at the beginning, and appendices are provided on methodology, and on indicators of need and New York standards. (Author/JD)

Identifiers-*Ivory Coast

This report describes the basic organization, management and evolution of the department producing "Tele Pour Tous," the first attempt to use national television in the Ivory Coast to bring educational and informational programs to a non-school adult, rural public. The department's task was (1) to produce TV programs, (2) to train and supervise TV animators, and (3) to stimulate interest in and viewing of its product. Discussed in the report are the decision-oriented methodology of the study; basic background information on the project including target audiences, program objectives, and policies; detailed examination of six key features of the program; a comparison of the national plan for out-of-school education with the new directions of the out-of-school department, and an analysis of how the program fits in the context of national planning strategies. Feedback procedures and information provided to instructors within computer managed learning environments were assessed to determine current usefulness and meaningfulness to users, and to present the design of a different instructor feedback instrument. Kaufman's system model was applied to accomplish the needs assessment phase of the study; and two sets of information were gathered: data from two questionnaires to 44 faculty members using computer managed instruction (CMI) strategies; and survey data from 115 institutions using CMI systems. Results led to the design of a feedback report to the instructor, structured by useful and relevant information content and coherent format. Training areas for instructors using feedback information from CMI systems were suggested, recommendations were given for the development of a CMI system user manual, and the importance of implementing appropriate feedback delivery mechanisms was emphasized. Relationships were also indicated between faculty members' characteristics and actual involvement with CMI learning environments. (Author/CMV)

Identifiers-*Ivory Coast

Building on previous evaluations of the ETV systems both formal and informal of the Ivory Coast, this study examines the system costs of the Extra Scolaire'' (E/S) program for rural adults. Educational television is utilized through the Ivorian primary system, and battery operated televisions have been widely distributed to schools in rural regions. The E/S system, begun in 1973, utilizes these facilities to reach adult audiences in the villages with a wide range of educational and informational TV programs related to national development. An animateur,'' usually a male primary school teacher, is charged with publicizing the TPT (Tele Pour Tous) broadcast, showing the program, and fostering post-broadcast discussion. This report provides a description of the E/S structure and the context in which it operates; specific estimations of the yearly costs of the various system components administration, program production, program transmission, support materials production and distribution, program reception, and system evaluation; a discussion of aspects of the E/S system which may entail social costs not captured by the monetary price measures used; a translation of the annualized cost description into cost functions as a means of viewing the cost impact of various policy decisions; and a discussion of various perspectives on the Ivorian development context within which the system costs must be assessed. Appendices provide examples of results of previous evaluations, and a list of references is attached. (Author/BBM)

Identifiers-*Ivory Coast

This study of the costs of educational reform undertaken in the Ivory Coast in 1971 focuses on the primary education level (children aged 7-12). Designed to ensure that 100 percent of the primary school-age children receive an education and to adapt the content of that education to the characteristics and needs of Ivorians, this reform entailed the introduction of television in the classroom, the establishment of a system of printed support materials, and a reorganization in teacher training. The first part of this report describes and provides projections for the development of primary education from 1971-1990, including the general organization, student enrollment, and flow, as well as costs in such areas as reception (television sets and equipment, electricity, and maintenance), television production, teacher education and training, and the printed support material system. The second part provides discussions of cost function and average costs per student, program financing, and educational resource allocations in the Ivory Coast. A comparison of current findings with those of an earlier study for the same period, general conclusions, and eight recommendations conclude the report. (BBM)

Identifiers-*Ivory Coast

This report is a final one in a series of 17 reports concerned with costs analysis/projections of the instructional television program and the Out of School Television (OSTV) project in the Ivory Coast. It includes an introduction to the OSTV project after its first five years of existence, a description of the main elements of the in-school reform, an outline of the progression of OSTV objectives, examples of the subject matter covered in OSTV broadcasts (Tele Pour Tous), and an explanation of the role of the primary school teachers serving as animators for OSTV. The series of reports on the OSTV program are discussed in the context of a social impact model,'' and each of the economic studies performed as part of this project is summarized under the appropriate educational level costs relating to primary schooling, cost implications for secondary education, and cost analyses for out of school education. Recommendations for action are presented for each level, with the OSTV recommendations categorized by order of magnitude: those designed to improve operations and impact without incurring any sizeable further resources, those which require a significant increase in resources, and those which demand higher decisions and a greater commitment by the government. A bibliography of project and related reports includes some titles in French. (Author/JEG)

Descriptors-Analysis of Variance, Elementary Education, Grade 4, *Instructional Improvement, *Listening Comprehension, Media Research, *Music, Reading Level, Retention Studies, *Sound Effects, Tape Recordings

This study was designed to determine if the addition of music and sound effects to recorded stories increased the comprehension and retention of information presented on tape to fourth grade students at three levels of reading ability. Two versions of four narrated stories were recorded, one version with music and sound effects, the other with only the narration. A listening comprehension test administered after students had listened to each of the stories was followed by a retention test two weeks later. Students listening to the music and sound effects versions scored higher on both the listening and retention tests. Implications of these findings are discussed, and a bibliography is included. The efficiency of educational broadcasting in the Ivory Coast is assessed from the standpoint of what and how physical and human resources are utilized. Information was obtained by reviewing the large volume of documents that have been published about the project and through interviewing personnel involved in its management and operation. The general organization of the educational television complex in Bouake, the costs of the production system, and the process by which programs are produced are described as is interaction in production among the producer, the printed support materials writer, and the director. Also detailed in the report are the organizational structure and utilization of resources, feedback and evaluation mechanisms and change from film to videotape production. Appendices include a glossary of acronyms, and a list of production problems and solutions recommended. (Author/JEG)

Identifiers-Hermes Satellite

The 25 projects described were concerned primarily with educational applications of communications satellites, although some projects in additional public services health, community development, and administration were included in the Hermes satellite program. Solicited by the Department of Communications (DOC) from agencies and organizations across Canada, these projects were selected from the 49 proposals originally submitted. Experiments which were approved were allocated portions of satellite time for conducting their projects. Evaluation of the public service sector projects was a major DOC priority. Each project had an evaluation plan and an external team contracted to prepare a general evaluation design and assess the overall significance of the educational experiments with respect to future uses of satellite telecommunications technology. The Hermes communications technology satellite was made in Canada and launched in the United States, representing a joint venture between the two countries. The Hermes educational projects stimulated considerable interest in educational applications of telecommunications satellite technology, and raised numerous questions regarding its effective and efficient use. The evaluations conducted provide initial information, but no definitive answers. (Author/JEG)

Identifiers-*Ivory Coast

The study described evaluated the reach and impact of 25 Tele Pour Tous Television for Everybody) programs on water and related issues which were broadcast by the Ivorian Out of School Television (OSTV) project in April-December 1975. This report discusses the relevance of the topic as a theme for an adult education TV program series, describes and analyzes the development of the two series of broadcasts and one individual broadcast, and explains the research design and methodology which provided the data to make an assessment of the impact of the TV programs in terms of awareness, learning and behavior, or action. Findings indicate that, although the program reached a considerable audience and generated a high level of interest, certain obstacles exist which make implementation difficult, and interest declines over time. It is suggested that the impact of such programs would be enhanced by the active promotion by OSTV of local Tele-Clubs as nuclei for action; by more active cooperation by government agencies and private organizations concerned by the issues in the preparation and follow-up of OSTV programs; and by limiting the number of communal actions advocated and proposed in the programs. Descriptors-*Developing Nations, *Employment, *Enrollment Trends, *Labor Demands, Labor Supply, Occupational Surveys, *Secondary Schools, Vocational Schools

Identifiers-*Ivory Coast

This paper analyzes the relationship between existing secondary and technical schools and employment in the modern private sector of the Ivory Coast. Enrollments in secondary and technical schools are examined, and the social demand for education, characteristics of the Ivorian labor market, and the matching of labor supply and demand are discussed. It is suggested that training should be directed toward those job categories with large shortages, and that an expansion of the technical school system would help reduce a predicted shortage of qualified employees. This volume describes the development and implementation of a two-way interactive cable television communication system and its effectiveness in urban administration. The full report is contained in Volume II (see related document), and the computer program documentation is in Volume III, Michigan State University-Rockford Two-Way Cable Project: Minicomputer System Software. The 4-year project in Rockford, Illinois, tested the minicomputer-controlled interactive instruction capability of two-way cable against more traditional learning situations during a 12-lesson course in prefire planning administered to the city's fire department. Included here are a comprehensive account of the experiment, a description and discussion of the two-way technology and its performance, a cost analysis for the training program, and the public policy implications of the project. Identifiers-*Ivory Coast

Six needs assessment studies are summarized from the point of view of rural needs, the media and information system, the educational situation, and expressed wishes on the part of spectators for TV program topics in the Ivory Coast. The six studies included were: (1) Ethno-Sociology Institute Study, 1974; (2) Evaluation Service Study A, 1975; (3) Evaluation Service Study B, 1975; (4) Out of School Department Study, 1976; (5) World Bank Study, 1976; and (6) Evaluation Service Study, 1977. Following the summary of studies are conclusions drawn and recommendations which encourage on-going needs assessment, seen to achieve several advantages. Concrete means of improving future data collection and applying results already obtained are suggested. (Author/JEG)

Identifiers-*Canada

The social values orientation of Canadian adolescents and pre-adolescents was analyzed to determine the effects of television choice on their values. Youth were randomly selected from ethnic and non-ethnic populations in Montreal and Windsor by percentages of subgroups listed in Statistics Canada for each city. It was assumed that ethnic and non-ethnic adolescents and pre-adolescents would differ in their value orientation, that social and moral values held by ethnic parents and youth would differ from those of non-ethnic parents and youth, and that these differences would be reflected in perceptions about television heroes and content. The most important question was whether or not heroes transmit values or simply reinforce them. An initial questionnaire indicated family attitudes about a number of social interactions values, against which six weeks of observations of viewers was compared. Findings indicate that television viewing during adolescence for both ethnic and non-ethnic groups appears to be related to personal need and identity, as well as to entertainment, and values appear to be reinforced by television. Descriptors-*Adolescents, Affective Behavior, *Childhood Attitudes, Cognitive Processes, Commercial Television, *Cultural Differences, Longitudinal Studies, Moral Values, *Parent Attitudes, Programing (Broadcast), Sex Differences, Social Values, *Television Research, Television Viewing
Identifiers-*Canada

The data analysis and findings of the first panel study of adolescents and pre-adolescents in Canada are described. This longitudinal study was designed to (1) gather data on television viewing of heroes and heroines in series in the home environment; (2) analyze verbal responses about television programs to determine values perceived and the cognitive processing strategies used by the two age groups, and (3) determine if biological predisposition of the sexes was a factor in information perceived and meanings assigned. Initial questionnaires were administered separately to children and parents to gather sociodemographic, cultural, media, and family relationship data prior to the experiment. Repeat questionnaires were administered after every two weeks of viewing of the child's favorite television show. Analyses of the responses to measure age and sex differences on four dimensions concrete/cognitive, concrete/affective, inferred/cognitive, and inferred/affective show clearly and specifically on what dimensions differences occur in perception of content by boys and girls aged 10 and 14. Identifiers-*Canada

In a recent study of ethnic and non-ethnic adolescents and pre-adolescents and their families, particular observation was made of perceptions of values by children and their parents in favorite television series viewed over a period of six weeks. While values were seen as a potential discriminator between ethnic and non-ethnic people, other data were gathered to ascertain degree of ethnicity as a secondary goal. The comprehensive questionnaire administered to 63 respondents (parents, adolescents, and pre-adolescents) contained a lengthy section on language use, social activities, lifestyle, interests, and media habits and values to assess ethnicity characteristics and patterns. It was predicted that ethnic families maintain a strong ethnic identity while living in Canada and this would be reflected in measurable behaviors. A descriptive listing of programs selected by non-ethnic children, and an analysis of their choices by value orientation is provided. (JEG)

Identifiers-*Ivory Coast

Designed to provide information for decision-making by Ivorian authorities in the planning of post-primary education over the coming decade, this study compares the implications of alternative policies or scenarios in terms of social impact, technological alternatives, enrollment, and costs. Two parallel channels are assumed open to students under all scenarios secondary education, with its present structure of a selective first cycle of general studies leading either to the labor market or to further education; and complementary education, a new channel which incorporates general education and work orientation components, with a high degree of flexibility in response to the preparation and needs of individual students. Each scenario is described by the choice of a particular option in each of the seven relevant areas of decision identified; these areas fall into three categories specification of alternative channels of post-primary education, options affecting student flow, and options affecting the efficiency (and cost) of providing post-primary education. Appendices provide additional data displays and an outline of selected technological alternatives. (BBM)

Identifiers-*Ivory Coast

This impact study for a series of Out of School Television (OSTV Tele Pour Tous) broadcasts on village water supplies presents a qualitative examination of some of the problems encountered in the organization of viewing groups in four selected villages. The research techniques used included questionnaires and feedback sheets on demographics, the socio-political situation, and the reception of each program, which were filled in by the official village observers; on the spot observations of the viewing groups; and individual interviews with villagers. In two villages, three successive broadcasts were directly observed and the ensuing discussion was tape recorded. For purposes of data analysis, the animation process was divided into four major areas: (1) the flow of information in the village about the broadcasts, (2) external and internal factors affecting public interest and attendance, (3) the typical operation of a single viewing session, and (4) the comprehension and acceptance of the broadcast message. It was concluded that the broadcasts were not reaching the traditional power structure in the villages, and that until the programs reach the opinion leaders or modernization permits the rise of a new parallel power structure, these broadcasts will remain a marginal force in implementing change in rural areas. Identifiers-*Ivory Coast

Rural adult education projects using television in Tanzania, the Ivory Coast, Dominican Republic, and Guatemala are described and compared with special attention given to objectives, organization, selection and recruitment of supervisors, monitors and participants, use of communication media, feedback and evaluation systems impact, and constraints. The Dominican Republic's Radio Schools of Santa Maria (RSM) is judged most successful in terms of impact and enrollment. It is suggested that RSC (Radio Study Campaign) in Tanzania acts the most directly as a means through which the state influences and transforms the socio-political climate and economy of the country in accordance with domestic and international political and economic power relations. Descriptors-*Conventional Instruction, Cost Effectiveness, *Developing Nations, *Educational Alternatives, Educational Development, Educational Innovation, *Educational Television, Rural Education, *Secondary Education, Technological Advancement

Identifiers-*Ivory Coast

Intended to provide information for Ivorian decision makers, this paper presents an overview of technological alternatives for the delivery of instruction at the post-primary level and their accompanying costs. Five alternatives for regular secondary education as it now exists in the Ivory Coast are reviewed: traditional, audiovisual-traditional, instructional television (ITV), ITV extension of the school (Mexican model), and distance learning. Uses of media in two approaches to terminal education and training programs are suggested, and the Telesecundaria System in Mexico is described in detail. Distance learning in adult formal/nonformal education is also discussed as a means of providing instruction for adults (18 and over) who have finished primary or drop out of secondary, and who wish to complete the first cycle of secondary, as well as for nonformal education or vocational training. Examples from other developing nations are cited, and the viability of this alternative for the Ivory Coast is discussed. A list of references is attached. (BBM)

Identifiers-*Ivory Coast

This report presents the results of two surveys conducted in January and April 1977 in the Ivory Coast to assess the impact of the Tele Pour Tous'' programs on rural audiences in terms of awareness, learning, and action. Descriptions of the socio-economic characteristics of the audience and their viewing patterns were sought, and attempts were made to determine the attitudes of the audience concerning Tele Pour Tous'' and to explore opinions about the benefits and beneficiaries of the programs. Eight conclusions drawn suggest that the Ivorian Out-of-School Educational Television project works, though minimally and inefficiently however the reach and effect of the programs could be improved by modifying their form, content and reception. Appendices include the questionnaires (in French), statistical data, and a list of programs broadcast. (JEG)

Identifiers-*Ivory Coast

The two surveys described in this report were conducted for the Out of School Television (OSTV) unit in order to learn more about the context in which its series of weekly programs for rural adults (Tele Pour Tous or Television for Everybody TVE) operates, and to study audience reactions to a specific series. Individual interviews with selected villagers in 30 villages provided data on patterns of mass media use for the first study, which probed such areas as radio ownership, radio access, content of radio listening, and information channels, television, and newspapers and printed material in the context of village life. Findings show that, while radio is still the dominant medium, television is playing an increasing role in village media habits, and the print media is also in active use. The second study focused on the impact of the TVE series on rural housing, and animators in 11 villages each interviewed 15 villagers who had seen all of the programs. Information sought included respondents' attitude towards the TVE programs; their trust in the programs; their attitudes towards traditional, adapted, and western housing; and their attitudes toward financing policy for adapted housing and perception of the responsibility for modernization of the village. Data and references are included. (BBM)

Identifiers-*Ivory Coast

Data for this analysis of the reactions of animators (facilitators) and villagers to a series of Out of School Television (OSTV Tele Pour Tous) broadcasts were collected through taped discussions with groups of villagers in their native dialects and separate interviews with animators. Designed to supplement data obtained through questionnaires, this study focused on those aspects of OSTV animation and impact which are difficult to assess through the written word, and obtained information directly from the villagers. Additional objectives included reinforcing ties created by the establishment of the observer network, providing field research experience for three Ivorian graduate students, verifying that reported decisions or actions had been taken as a result of OSTV programs, and determining if the water situation has improved since the showing of the program series on that topic. Animators and villagers identified several reasons for the wide gap between the two groups; however, the basic difficulty was seen to be that the primary teachers acting as animators are outsiders, frequently reluctant to involve themselves in village affairs, while the villagers consider development affairs to be village decisions and do not ask the teacher for advice. Topics suggested by villagers for future programs and the interview questionnaire for villagers are included. (BBM)

Descriptors-Charts, *Communication (Thought Transfer), *Computer Graphics, Computer Programs, *Curriculum Development, Educational Change, *Educational Trends, Graphs, Programing Languages, Technical Illustration
Identifiers-Computer Software, Instructional Development

The scenario of instructional development presented makes a case for relying on recent refinements of the computer as a tool for giving form to human knowledge. The computer is described as having a high capability to form ideas into a variety of shapes, and vary those shapes to appeal to people's sense of abstraction. The history of the development of computer graphics is traced, numerous illustrations of computer generated graphic displays are provided, and some of the implications of computer graphics for people who specialize in the communication of ideas are explored. Four references are listed. (Author/CMV)

Identifiers-Computer Software

The computer management system described, which administers tests and provides feedback to examinees, as well as progress summaries to instructional personnel, has been implemented at Florida State University. Located in the Assessment Resource Center (ARC), it has been used to manage the instruction of several thousand students enrolled in courses offered by 15 academic departments. Because of its relatively low cost, this system can be implemented on a large scale by many educational institutions; however, if such systems are to be effective, they must be designed into compatible and valid measurement and instructional systems. This paper describes the system, discusses relative costs for hardware and personnel and addresses some of the measurement and instructional implications of using the system. (CMV)

Findings of television research conducted in Montreal and Windsor, Canada, in February-May 1978, that studied numerous aspects of the parent-adolescent-television relationship are summarized in this report. Particular emphasis is given to differences between ethnic and English families, differences in the ways adolescent boys and girls perceive values in programming, and the role of the family. General findings are briefly noted and explained, while 13 major findings are listed and expanded upon with discussion. (JD)

Descriptors-Educational Change, *Educational History, *Relationship, Teacher Role, *Teaching, *Visual Aids, Visual Literacy

This essay examines the relationships between teaching and visual media over the last several hundred years, particularly the concept of illusion. The teacher as magician or shaman is explored and compared to contemporary theories of instruction and the use of media such as television, films, and slides. The teacher as artist and alchemist is also discussed with reference to the visual heritage that characterizes their thinking on man and the universe. Revolutionary changes brought by the 20th Century to the sciences and the arts are considered in relation to the role of educators, and visual literacy is discussed in the context of art education and the role of corporations. Descriptors-*Curriculum Development, Educational Development, *Educational Television, *Instructional Design, *Psychological Design Needs, *Sequential Approach

Instructional development models have been primarily concerned with audience analysis, content, media selection and sequencing, rather than the design of the program. They fail to analyze either the interaction between the content, learner, objectives, and medium, or how best to design the content for presentation through the medium. This paper analyzes the television media in light of the above criteria and presents a model which prescribes the development of a program in three distinct parts: (1) different types of introduction that can be used; (2) treatment of the content in the body of the program; and (3) different strategies for ending a program. Though not a research review per se, all recommendations are supported by references to research in psychology and instructional science. (JVP)

Identifiers-New York (New York), San Francisco Bay

A general discussion covering both the common problems and features of the full range of the mass media industries, and some economic notions central to understanding them, opens this report, followed by introductory essays for individual industries and consideration of public policy issues. The basic economic considerations common to the field which are discussed include media products, monopolistic competition, and advertising markets. Brief discussions and summaries presented for newspapers, broadcast television, book publishing, and other media (cable television, magazines, and radio) touch on their technology, development, and economic structure; up-to-date statistics are provided. Characterizations of markets developed to illustrate some of the problems and possible solutions to defining media markets focus on the umbrella structure of newspaper competition in the San Francisco Bay Area and the New York City media market. The identification and discussion of perceived policy problems found in one-newspaper cities, group and chain ownership across media markets, cross-media ownership in a given market, and product distribution conclude the report. Descriptors-Audiovisual Coordinators, *Audiovisual Programs, Data Bases, Educational Research, Educational Resources, Federal Government, Information Services, *Information Systems, *Military Organizations, *Program Evaluation, Systems Approach

The DAVA (Directorate for Audiovisual Activities) evaluation model was developed for the U.S. Department of Defense to generate studies, decision models, standards, and directives, with outputs coordinated by the military departments that implement the decisions through the major commands and down to the installation level. The 3-level model is designed to support a projected range of users including instructors, media developers, managers, and policy makers; it has been implemented within the existing Defense Audiovisual Information System which furnishes consolidated, comparable audiovisual management data on production output and capacity, as well as cost expenditures, and permits sharing of audiovisual resource information throughout the Department of Defense. Appendices include prior studies of audiovisual activities, definitions, a bibliography on evaluation, an audiovisual product reporting form and a facilities questionnaire, a summary annual report, specifics of the total evaluation program, and a forecast for the next 10 years. Descriptors-*Computer Graphics, *Manuals, *Painting
Identifiers-*Microcomputers

Written for beginners, this user's manual explains how to do microcomputer (MC) painting with the Microcomputer System for Educational Applications (MSEA) of the University of Illinois' Department of Secondary Education. It requires no knowledge of computers, and a step-by-step approach to the use of the many different tools used in this medium is provided. Instructions are given for starting the microcomputer and the microcomputer painting systems; equipment and the MC painting tools are described; and the user is told how to: paint with the narrow brush, erase, turn the system off, make shuffling transformations, save a painting, display the list of files (paintings or programs), load (recall) a saved painting, make a motif, make a block print, draw lines automatically, choose painting, and make a color-coded INFOTON Display of selected paintings. The three types of pure color mapping in the program are also explained. A table of the colors and their codes are appended. (JD)

Descriptors-*Closed Circuit Television, *Educational Television, Interaction, *Man Machine Systems, Media Research, *Television Research, *Visually Handicapped

Interactive classroom television (ICTS) systems were installed in two special education classrooms to evaluate their impact on the learning experiences of severely visually impaired students. During a 3-year experimental period, data were collected from approximately 14 elementary students measuring achievement, visual-motor integration, visual memory, and relevant social psychological dimensions. Outcomes were examined in within-subject analyses assessing the extent and pattern of change over time. Results indicated significant improvements across measurement areas. Achievement scores approximated grade normal by the final year, suggesting that the experimental system provided educational opportunities comparable to those experienced by the fully sighted. Media Panel is a research program directed toward media habits, causes and effects of TV use among children and adolescents, and viewer/media interaction in general. Results of this longitudinal study from 1970 to the present are presented in three sections focusing on the early work of the group, the preschool panel, and the primary school panel. The final goals of the project are to describe: (1) how TV enters the life of the preschool child, how it becomes a dominant factor, and how its importance is then reduced; (2) the relative importance of generational and maturational effects on the above process; (3) the possible consequences of TV on children's self image, job preferences, tendency to stereotype, and their image of society; and (4) the role of TV and other mass media as functional alternatives to and compensatory mechanisms for, satisfactory social relations. A list of references is attached. (JVP)

Descriptors-*Administrator Attitudes, *Information Needs, *Information Seeking, Management Development, *Management Information Systems, Man Machine Systems, *University Administration

This paper looks into the theory, and the practice of Management Information Systems (MIS) in the university setting, suggesting that university administrators are often more interested in ``soft'' information than ``hard'' information provided by MIS. Attitudes of university administrators are discussed, as well as management styles, supporting the concept that university situations cannot be treated as businesses except in such areas of the university environment as the bursar, registrar, and admissions. The information needs of university managers are also discussed. A description of how the MIS system is used at Pepperdine University is included in two sections which identify hard and soft data sources. Recommendations for initiating MIS in a university setting include the establishment of information objectives for institutions; use of those objectives to determine type or mix of data information needs analyses to be conducted; conduct of such analyses; and design and development of the information system that is ``right'' for the institution/situation. Descriptors-*Coordination, Costs, Educational Planning, *Instructional Materials Centers, Media Specialists, Printing, *Reprography

A printing and/or duplicating center can be a valuable addition to any school and the learning resources center is a likely host for it, as many functions of the media production staff are similar to those needed to support a duplicating center, and grouping similar functions is good management practice. However, several things should be considered before such an arrangement is made, e.g., the level of service to be offered, systems of control and supply, the availability of personnel, the need for maintenance, and the manner in which the activity will be funded. When added to the natural tendency for printing services to absorb nearby resources, a real potential for failure is created for the unwary administrator. (Author/JEG)

Descriptors-*Administrator Attitudes, Community Colleges, Degrees (Titles), *Educational Technology, *Media Specialists, *Paraprofessional Personnel, *Personnel Needs, Public Schools, School Surveys

This study was conducted to determine the perceptions held by public school and community college administrators in North Carolina, Virginia, and West Virginia concerning the types of personnel and the academic degrees held by these individuals in the field of educational media. Administrators were asked to respond to a prepared survey instrument designed to obtain information on the degree levels and on the number of librarians, educational technologists, combination librarians/educational technologists, and paraprofessionals who are presently employed in the three state area. In addition, the respondents were asked to project future personnel needs and degree levels sought. A third section attempted to identify additional competencies that would be desirable for persons presently on the staff and for future employees. The last section tried to determine the attitudes of the respondents toward the importance of educational media. The population used consisted of 235 administrators in the three states. The questionnaire and cover letter are appended. (Author/JEG)

Descriptors-Cognitive Processes, *Computer Managed Instruction, *Educational Improvement, Formative Evaluation, Learning Modules, Military Training, *Summative Evaluation, *Teaching Techniques, Time Perspective

This project designed and developed a specialized student skill module for providing rudimentary time management skills, and implemented and evaluated the effectiveness of this skill module for reducing course completion times and promoting positive student attitudes in the context of a computer-based progress management system. Evaluation subjects were Air Force trainees in a course taught under the Advanced Instructional System. Results of the 2-phase evaluation indicated that the combination of time management skill training plus progress management procedures reduced completion times by 11.2 percent as compared to a control condition having neither of these components, and by approximately nine percent as compared to a condition having only the progress management component. References and evaluation data are appended. (Author/JEG)

Descriptors-*Educational Environment, *Educational Research, Individual Characteristics, *Instructional Design, *Media Research, *Research Problems, Teacher Characteristics

Identifiers-*Aptitude Treatment Interaction

A summarization of media research inadequacies remains a standard feature of media literature reviews. A Gestalt solution would be a research model, applicable to field studies in educational institutions, which accounts for the total instructional setting. It appears that an appropriate research model must be directly related to the psychological, sociological, and physiological attributes of the learner, the teacher, the task, and the resources, which collectively result in an instructional environment. The objective form (physiological) and subjective meaning (sociological) of any learning task must yield a functional distinctiveness (psychological) in terms of the sensory information to be extracted by the learner. Descriptors-*Behavioral Objectives, *Educational Objectives, Educational Research, *Evaluation, *Instructional Design, *Student Behavior, Test Construction

This critical review of the literature on behavioral objectives is presented in four sections: definition of a behavioral objective; the function of a behavioral objective; consistent acceptable format for constructing behavioral objectives; and the pros and cons of behavioral objectives. The literature review reveals that current findings on the effects of instructional objectives provide no conclusive or consistent data on the relationship between the use of objectives and student learning, and it is suggested that there is a need to assess the behavioral objectives movement, to identify strengths and weakness, and to identify areas in which research is needed. A bibliography is appended. (Author/RAO)

Descriptors-Audiovisual Aids, *Behavioral Science Research, *Educational Research, *Educational Technology, *Media Research, Research Problems, *Research Utilization

The problems of relating research to practice are discussed in the context of what, why, and how. The what of recent research is illustrated by examples which suggest that media-related research is becoming more rigorous, analytical, and theoretical, and thus more reliable and generally applicable. The why is briefly argued with reference to the greater reliability of research-based information over that learned on the job by an individual practitioner. The how is considered by noting the large available reservoir of relevant findings and by describing a way of cognitively relating the practitioner's questions to the researcher's findings through their common interest in relating instructional conditions to instructional effects. A list of references is provided. (Author/RAO)

In Search of a Better Way to Organize Instruction: The Elaboration Theory.
Pub Date-8 Mar 79
Note-35p.; Paper presented at the Annual Convention of the Association for Educational Communications and Technology (New Orleans, Louisiania, March 8, 1979); For related document, see IR 007 416
Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-Complexity Level, *Course Organization, *Instructional Design, *Instructional Innovation, *Task Analysis
Identifiers-*Elaboration Theory

The Elaboration Theory of Instruction is an alternative to organizing instruction in terms of a hierarchical task analysis. The hierarchical organization results in an instructional sequence that begins with highly fragmented, small pieces of the subject-matter content, which many educators have found to be demotivating. The elaboration theory calls for beginning the instruction with a special kind of overview one that epitomizes the instructional content rather than summarizing it. Then it calls for elaborating on that overview, by adding detail or complexity in ``layers'' across the entire breadth of the content, one layer at a time, until the desired level of detail or complexity is reached. A brief list of references is provided. (Author/RAO)

Descriptors-*Educational Research, *Research Design, *Research Methodology, *Research Problems, *Research Skills, Research Utilization

This brief paper presents a sequential walk through a simple research setting a two group experiment to indicate common but avoidable design difficulties that may jeopardize the usefulness of the data obtained. The six flaws examined are the failure to select subjects from the population to which generalizations are to be made; failure to use randomization in assigning students to experimental and control groups; failure to use an adequate number of students; failure to maintain control over manipulation of the independent variable; failure to use reliable and/or valid measures of the dependent variable; and failure to use an appropriate statistical test. Several additional flaws that may creep into research studies are indicated in the closing comments, and three references are listed. (Author/RAO)

Student Contracts as One Method for Individualizing a Course Concerned with the Management of School Media Centers.

Pub Date-77
Note-40p.; For related document, see ED 144 534
Pub Type- Reports - Descriptive (141) - Reference Materials - Bibliographies (131) - Guides - Classroom - Learner (051)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-Classroom Materials, *Educational Methods, Educational Resources, *Individualized Instruction, Individualized Programs, *Library Education, *Media Specialists, *Performance Contracts

The second in a series of four papers describing a variety of methods for individualizing instruction in a graduate library media training program, this paper includes a brief description of the course and its goals, a series of 11 student teacher contracts dealing with the topics/concepts selected for inclusion in the course, and student bibliographies for each of the contracts. The first paper deals with the selection of materials, and the final two describe methods of individualizing cataloging and reference courses. The completed project will describe three approaches that were used to individualize four commonly taught courses in programs leading to the initial certification of public school library media specialists. The courses were developed and piloted between 1975-1977 and have been used with a variety of graduate and undergraduate students in a senior college in the southeast. (Author/JEG)

Note-34p.; Paper presented at the Annual Convention of the Association for Educational Communications and Technology (New Orleans, Louisiana, March 1979); For related document, see IR 007 416

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-*Childrens Television, Cognitive Style, Educational Research, *Eye Movements, Grade 3, *Individual Differences, Intermode Differences, *Reading Ability, Visual Measures, Visual Perception, *Visual Stimuli

The relationship of eye movements while watching television to reading ability, cognitive style, and mode of presentation was studied using as subjects 85 third-grade children who had been classified as good or poor readers by scores on the Gates-MacGinitie Reading Test; their cognitive style was measured by the Children's Embedded Figures which classified subjects as field dependent or independent. A Polymetric Eye Movement recorder was used to measure attention as children viewed seven static and seven dynamic segments from The Electric Company. The results indicated that the effects of these factors varied from segment to segment although several overall effects achieved significance. It was concluded that eye movement research is a useful tool for assessing individual differences across instructional modes. (Author)

The Effects of Self-Evaluation as an Instructional Feedback Strategy.

Pub Date-Mar 79

Note-30p.; Paper presented at the Annual Convention of the Association for Educational Communications and Technology (New Orleans, Louisiana, March 1979); For related document, see IR 007 416; Appendix A may not reproduce well due to small print size

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors-Audiovisual Aids, Educational Assessment, *Evaluation Methods, Expectation, Higher Education, *Self Evaluation, *Student Developed Materials, *Student Evaluation, *Summative Evaluation

This study investigated instructional methodology in relation to the effectiveness of different instructional feedback strategies that can be used in regular classroom situations. Experimental conditions were created to investigate whether, in addition to mastery learning strategies, either the student's ability to use stated criteria to judge his own performance would be affected or his performance improved by self-evaluation of products using specified criteria, or self-evaluation and instructor feedback on the accuracy of his evaluation. Subjects were 56 undergraduate students in media production classes who were assigned to either the control group, the self-evaluation group, or the self-evaluation/feedback group to measure the effects of these variables. Results indicate that the association between student self-evaluation and instructor evaluations on a final class project was negatively affected by student self-evaluation only, and positively affected by the combination of self-evaluation and instructor feedback on the accuracy of the student self-evaluations. Feedback was shown to be most effective in situations in which students had too much confidence in the quality of their materials. A list of references and three evaluation forms are appended. Descriptors-College Faculty, Comparative Analysis, Cultural Differences, Failure Factors, Higher Education, *Instructional Design, *Instructional Improvement, *Success Factors
Identifiers-Australia, *Educational Design, *Instructional Development, United States

This study applied a path model, developed from factors associated with instructional development success in the United States, to a similar instructional development environment in Australia. These factors included institutional commitment, faculty rewards, instructional design staff expertise, campus audiovisual production services, program evaluation, and faculty interest in innovation. A 3-part questionnaire was administered to project directors: Part I identified the general nature of the project and the person responding; Part II consisted of a 50-item measure of perceived success factors in instructional development; and Part III provided for self-ratings of project success. The most important findings have been the completely different factor structures. Where respondents in the United States saw the issues as provision of support services, organizational support with good administrative systems, faculty incentives, and financial resources, the Australian respondents saw the major issues as provision of support and administrative services, status of the project internally and externally, positive and clear innovative climate, and expertise and skills of the faculty to carry out the project. Descriptors-Advance Organizers, *Audiovisual Aids, *Behavioral Objectives, Educational Objectives, *Incidental Learning, *Intentional Learning, *Mass Media, *Media Research, Retention, Sex Differences, Student Attitudes

This paper reports a controlled field experiment conducted to determine the effects and interaction of five independent variables with an audiovisual slide-tape program: presence of learning objectives, location of learning objectives, type of knowledge, sex of learner, and retention of learning. Participants were university students in a general studies course. Test scores measuring intended and incidental knowledge were the dependent variables. The major finding supported Ausubel's subsumption theory in that use of learning objectives as an advance organizer presented before the slide-tape programs significantly increased intended learning. No significant loss was found for incidental learning; rather, the tendency was for the learning objectives to improve rather than lessen incidental learning. The use of learning objectives before the presentation had no significant effects on the affective variables measured and students liked the program more than when no learning objectives were used. (Author/RAO)

Descriptors-*Academic Ability, *Academic Achievement, Achievement Rating, Autoinstructional Aids, Autoinstructional Methods, *Cognitive Style, Geography Instruction, Higher Education, *Learning Theories, Mastery Learning

This study attempted to establish the relationship of cognitive aptitudes and styles to measures of general and more subtle academic achievement. It was expected that the associations of aptitudes and styles to general measures of achievement would converge to form similar correlational patterns; associations of aptitudes to more subtle measures of achievement would also converge, while associations of styles to subtle achievement variables would diverge. Subjects were drawn from a large-enrollment introductory geography course utilizing an auto-tutorial mastery design for college freshmen and sophomores. Relationships with the subtle achievement measures were as expected, but the associations with general achievement measures did not converge. It is suggested that future style research focus on simpler variables theoretically linked to mediational processes described in the theory of cognitive style. A list of references is provided. Descriptors-Elementary Secondary Education, *Environmental Influences, *Instructional Design, *Media Specialists, *Success Factors

Identifiers-*Instructional Development

This study was designed to determine the relationship between personal and environmental variables and the amount of reported instructional development done by media professionals at the K-12 level in the state of Alabama, as well as the effect of those variables on the reported performance of instructional development activities within each domain delineated by the AECT. The study also attempted to identify those factors which might lead to increased amounts of instructional development by K-12 media professionals. Conclusions revealed a positive relationship of competencies, attitude, budget, empathy, and non-supervisory time with reported performance of instructional development activities; however, it was found that volunteer assistance students or parents did not contribute to the amount of instructional development undertaken. Recommendations include competency testing for media professional preparatory program graduates, research into empathy training, and an increase in non-supervisory time for media professionals. A list of references is provided. (Author/RAO)

Descriptors-College Students, Higher Education, Illustrations, *Incidental Learning, Photographs, *Pictorial Stimuli, *Reading Comprehension, *Reading Research, Visual Aids, *Visual Perception
Identifiers-*Mathemagenics

Using mathemagenic-based research as a guide, this study attempted to determine whether the location of a picture (pre- or post-reading passage) or the type of picture (overview or specific incident) could affect reading comprehension. Ninety-two college students were randomly assigned to one of the cells in a two-by-two factorial design and required to read a text-like passage of approximately 1200 words.

Results add support to the idea that pictorial attributes can serve mathemagenic functions. As with inserted questions' research, this study found location to be a significant instructional variable, since pictures placed after a reading passage increased learning more than pictures placed before the reading passage. A list of references is provided. (Author/RAO)

Recall and Retrieval from Mapped and Programmed Text.

Pub Date-Mar 79
Note-17p.; Paper presented at the Annual Convention of the Association for Educational Communications and Technology (New Orleans, Louisiana, March 1979); For related document, see IR 007 416
Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Comparative Analysis, Information Retrieval, Information Seeking, *Information Theory, *Media Research, *Programed Instruction, Programed Texts, Prose, *Reading Materials, Reading Skills, *Recall (Psychological), Textbooks
Identifiers-*Information Mapping

Two methods of structuring textual material, information mapping and programmed instruction, were compared on the basis of their ability to facilitate recall and subsequent retrieval of information. Both methods produced very significant gain scores, although no differential effects occurred. Retrieval of information from the text, a task independent of recall behavior and based upon different textual search strategies, benefitted significantly from the structural characteristics of the mapping technique. A conceptual basis for the issue being studied was suggested: a comparison of systematically inserted adjunct questions and explicit content structuring for eliciting mathemagenic activities. A need for additional research to consider the level and type of learning and interactions with the characteristics of mapping and programming is indicated. A list of references is provided. Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Cognitive Processes, Grade 10, *Illustrations, Media Research, *Photographs, *Pictorial Stimuli, Secondary Education, Visual Aids, *Visual Discrimination, *Visual Perception, Visual Stimuli

This study examined the question of whether the integration of abstract and realistic visualization can improve the effectiveness of visualized instruction. Two methods of integrating visualizations were investigated. The first method used hybrid illustrations, i.e., a real color photograph into which a line drawing segment has been inserted. This provided an abstract illustration of the important relevant elements to be communicated, as well as an arousing realistic context. The second method was through the simultaneous presentation of both a line drawing and a real color photograph. In this treatment the abstract line drawing could communicate the essential information and/or facilitate looking at the realistic illustrations. Subjects for the study were 490 tenth grade students enrolled in a mandatory health class. The instructional script dealt with the construction and operation of the heart and was accompanied by 37 visuals, designed to illustrate concepts and relationships for which visualization is likely to be beneficial. The results suggest that designers of visualized instruction may expect to enhance its effectiveness under general conditions by inclusion of realistic visualization. However, the inclusion of abstract visualization or the integration of abstract and realistic visualization should be based on such considerations as pacing, general ability, and the type of instructional objective. Descriptors-Cardiovascular System, College Students, *Color Presentation, *Illustrations, Individualized Instruction, *Instructional Aids, *Intermode Differences, Media Research, *Visual Perception
Identifiers-*Black and White Presentation

The purpose of this study was to compute and analyze descriptive indices of efficiency assessing the relative effectiveness of a verbal and visual color code applied to self-paced learning and testing materials. The sample consisted of 176 college subjects randomly assigned to one of four treatment conditions receiving black/white (B) or color coded (C) materials: B learning and testing materials, or C learning materials but B testing materials. These materials consisted of a 21-page learning booklet on the human heart and an 80-item test measuring different levels of cognitive knowledge; content was identical except that in some treatment conditions a color code having meaningful physical form and associative value was applied. Subjects read through the learning booklet followed immediately by a test; six weeks later the identical test was administered to assess delayed retention. Time on learning and time on tests were recorded. Data indicated that while color coded learning materials facilitated achievement, additional time for acquisition and for retrieval was necessary. This primary relationship, in addition to secondary relationships, was discussed in light of each efficiency derivation. A list of references and several tables and graphs are attached. (Author/RAO)

Descriptors-*Cognitive Processes, Elementary School Students, *Illustrations, Media Research, *Motion, Pictorial Stimuli, Preschool Children, Visual Discrimination, *Visual Perception, Visual Stimuli

This experimental study was conducted in an attempt to determine how children four, seven, and 11 years old perceive implied motion cues in combination with a variety of objects. Ninety children, 30 in each age group, were shown 24 pictures. There were three kinds of objects, each with an inherent active and static dimension. Each of these six pictures appeared with one of three motion cues, and alone. The number of each of the picture styles identified as moving by each subject was determined. An age x object x activity x motion cues repeated measures ANOVA was used to evaluate the data. All main effects and all interactions were significant. It was concluded that children at different stages of development differ in their interpretation of certain graphic conventions. A list of references is attached. (Author/RAO)

Descriptors-Audiotape Recordings, *Audiovisual Aids, *Cartoons, Cognitive Processes, College Students, *Comprehension, Illustrations, *Intermode Differences, Library Guides, *Media Research, Sex Differences, Slides

This study investigates the effects of cartoon illustrations on female and male college student comprehension and evaluation of information presented in several combinations of print, audio, and visual formats. Subjects were assigned to one of five treatment groups: printed text, printed text with cartoons, audiovisual presentations, audio only presentations, and visual only presentations. Following the informative presentation, each subject completed a 25-item comprehension test and measures of self-reported enjoyment and helpfulness. The results indicated that there were no significant differences between the printed text, the cartoon text, and the audiovisual presentation in terms of comprehension scores. The cartoon text was perceived as significantly more enjoyable than any other presentation mode. There was a significant interaction between sex and presentation mode with males scoring significantly lower on comprehension in the cartoon text condition. A list of references and two data tables are attached. (Author/RAO)

Identifiers-Front End Analysis, *Instructional Development

Needs assessment is a fundamental part of evaluation, and yet it has not developed as rapidly in sophistication as other evaluation methodologies. This is largely due to the difficulty in measuring real needs, as opposed to wants, interests, etc. This paper discusses some of the critical issues in needs assessment, and outlines some of the fundamental questions that must be answered in order to design a valid and reliable needs assessment study. Emphasis is placed on the need for considering resources and constraints in designing a realistic approach to needs assessment. (Author)

Identifiers-Army Combat Arms Training Board

This project sought to meet documented Army training needs through the application of system analytic procedures. When doctrine, regulations, and school organization were investigated, it was found that regulations were clear and comprehensive, but that school organization lacked a clear training evaluation component. During the project, the Army reorganized the schools to reflect requirements of the regulations and to permit proper execution of the new training doctrine; this change greatly increased the role of evaluation in the schools. Recommendations were made about organization and regulations, and recommended doctrine was published in detail as the Interservice Procedures for Instructional Systems Development. Lessons learned and management recommendations are presented. (Author/RAO)

Descriptors-*Educational Development, Educational Improvement, Educational Planning, Educational Programs, *Educational Technology, *Elementary Education, International Programs, *Junior High Schools, *National Programs, Program Development
Identifiers-*Instructional Development, *Korea

This paper describes development and organization of educational resources in the Republic of Korea since 1970 and documents the activities of a team of consultants from Florida State University in assisting with that development. Project activities are reviewed, starting with the initial collection of information and data on the educational system, the economy, and national needs, and ending in a report of project accomplishments and recommendations. Throughout this time span the work of the consultants is reflected in educational models developed, learning experiences defined, and technological innovations tested. The reform of the elementary-middle school program, i.e., grades 1-9, was a primary concern for this project. Also reviewed are the activities of the Korean Educational Development Institute, which was established in 1972 in response to expanding programs and educational change. (RAO)

Descriptors-Educational Environment, *Educational Facilities, *Experiential Learning, Instructional Design, Instructional Innovation, Interaction, *Teaching Methods, Videotape Recordings

This design for an experiential exercise is comprised of three key characters the instructor, the facilitator, and the learner whose interactions affect the learner. This interaction takes place within the dimensions of a facility having a variety of technical advantages, such as videotape recording and other equipment, or simply in a classroom. The exercise itself is not complete without the added dimension of a debrief, which may be in any of several alternative formats ranging from the instructor talking with the learner to the sophisticated use of video equipment. Computer-Assisted Instruction: A Study of Student Performance in the Stanford CAI Ear-Training Program.

Pub Date-74

Note-17p.; Paper presented to the Music Educators National Conference (Anaheim, California, 1974)

Pub Type- Speeches/Meeting Papers (150) - Reports - Descriptive (141) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Computer Assisted Instruction, Educational Programs, *Higher Education, Instructional Innovation, Instructional Materials, *Instructional Systems, *Music Education, *Student Attitudes

This summary of the first study of student performance in the on-going CAI theory program at Stanford describes the principal features of drill and practice CAI lessons, the resistance to CAI by music faculty, and the objectives of the project to find the statistical correlations between student performance in the CAI ear training program and data about the participants' musical backgrounds, and to survey the students' attitudes toward the program. Three Hypotheses were tested: (1) there are correlations between the learning of intervals and chronological age, sex differences, and musical background; (2) there is an order of difficulty in which intervals are learned; and (3) students prefer drill-and-practice CAI instruction to the traditional classroom setting for repetitive drill. Statistical correlations were set up between items from a background questionnaire and the systematic errors recorded by the computer; students were surveyed again at the end of the course to determine their attitudes toward CAI. Results provided support for each of the hypotheses; however, it is recommended that the findings be tested further with a larger number of subjects and control groups. A description of the hardware and software used is included, as well as the questionnaire used for background information. (Author/JEG)

Barker, Bruce O.
Fault Tree Analysis: Its Implications for Use in Education.
Pub Date-76
Note-98p.; M.Ed., Utah State University
Pub Type- Dissertations/Theses (040) - Reports - Research (143)
EDRS Price - MF01/PC04 Plus Postage.
Descriptors-*Educational Planning, *Failure Factors, *Systems Analysis, Systems Development
Identifiers-Constraint Analysis, *Fault Tree Analysis

This study introduces the concept of Fault Tree Analysis as a systems tool and examines the implications of Fault Tree Analysis (FTA) as a technique for isolating failure modes in educational systems. A definition of FTA and discussion of its history, as it relates to education, are provided. The step by step process for implementation and use of FTA is described, and current applications of FTA to education are analyzed. A Fault Tree prototype is presented to suggest solutions to a problem in private education. A glossary is given in the Appendix, as well as a schematic of a prototype FTA. (RAO)

This paper provides a progress report on an investigation to validate and extend the autocatalytic model for the adoption of educational innovations. Three topics are dealt with: (1) a brief description is provided of the autocatalytic model and its current application, (2) the design of a survey to collect data for further tests of the model is described, and (3) certain problems encountered in the design of survey instruments and their theoretical implications are discussed. The survey instrument is appended. (Author/CMV)

Descriptors-*Computer Oriented Programs, Cost Effectiveness, *Educational Planning, *Instructional Design, *Military Training, *Program Evaluation
Identifiers-Air Force Air Training Command, *Instructional Development

This report describes MODIA (a Method of Designing Instructional Alternatives), and assesses its utility for planning instruction. MODIA is a computer-based interactive program that helps planners construct a blueprint of instruction, analyze the operation of the instruction, and estimate its cost. It was developed for the Air Force Air Training Command (ATC) and incorporates three programs the user interface, resources utilization model, and a cost model. Evaluation in the first phase measured cost effectiveness while the second evaluation phase assessed MODIA's utility to local managers, application procedures for Keesler Air Force Base, and the use of the cost model alone. ATC's evaluation of MODIA showed that training managers perceive themselves to be so constrained by policy that they do not take advantage of the opportunities for improved design that MODIA provides. It was also concluded that MODIA's potential can be realized only if it is used by policy-making organizations, with assistance from the operating level. (Author/RAO)

Identifiers-*Instructional Development

A brief review of some of the more important needs imposed by current and projected Department of Defense training problems is followed by descriptions of such automated aids as the LAMPS MARK III Weapons System and the Air Force's F-16 Instructional System Development (ISD) effort. These aids have been designed and developed in response to the need for empirically tested instructional methods to train personnel to operate increasingly sophisticated and complex weapons systems. Also considered are recent developments in automated task analysis, objectives hierarchies, media selection, syllabus construction, and training support analysis, and implications for computer assisted instruction and computer managed instruction are discussed. Pub Type- Reports - Descriptive (141) - Reports - Research (143) - Tests/Questionnaires (160)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-Childhood Attitudes, *Children, Childrens Books, Library Circulation, Library Collections, *Library Research, *Library Services, *Library Surveys, *Public Libraries, User Satisfaction (Information), *Use Studies

This study, commissioned to investigate how well the collection and services of the Regina Public Library meet the educational and recreational needs of the children of Regina, has tried to answer these questions: For what purpose do children in Regina use the public library? How well are the informational and recreational needs of library users met? What characteristics differentiate children who use the library from those who do not? Are there changes in policy, services, or collections which the library could make which would improve services to library users? and Are there changes the library could make which might encourage non-users to make use of the library? The study focused on school age children, and results are reported separately for the 6 to 9 year-old-group and the 10 to 12 group. Design and methodology for the study are described and the statistical analyses used are discussed. Recommendations are offered for three areas: policy and planning, collections and services, and programs and publicity. Two questionnaires are appended, one for library users and one for schools. A Children's Literature Adventure into Video.

Pub Date-78

Note-17p.

Pub Type- Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Childrens Literature, College Students, *Educational Television, Planning, *Production Techniques, Scripts, *Student Developed Materials

This paper discusses some of the problems encountered by students in an introductory children's literature course as they planned and produced brief television presentations centered around picture books suitable for an audience of young children. A rationale for the project is provided as well as a detailed review of the planning process. The widely differing techniques used for presentations are briefly described, the attendant success factors and difficulties are indicated, and results of a questionnaire completed by students at the end of the course are discussed. It was concluded that a number of measures would be necessary to make this a more worthwhile project in children's literature courses where the time that can be devoted to it is minimal. (RAO)

Identifiers-Educational Resources Information Center, ERIC

This handbook examines sources of information useful to educators and educational consultants who wish to learn about innovative practices and/or solutions to educational problems in other schools. A discussion of information storage describes the access to information in reports, periodicals, unpublished reports, and other materials through such special publications as indexes, bibliographic reviews, annual reviews, and yearbooks; some of the more commonly used of these publications are listed and described. Guidelines for defining the topic of an information search are provided to assist in the selection and examination of appropriate sources for the information desired. A description of the services provided by the federally funded Educational Resources Information Center (ERIC) data base includes the monthly index to its document collection, a monthly review of articles in professional journals, and the availability of items in the document collection. The advantages and disadvantages of computerized searches of the educational literature are discussed, and the computer search process is briefly described. A list of selected readings is included. Descriptors-*Library Administration, *Library Research, *Management, *Professional Associations, Publications, *Research Libraries, *University Libraries

Some of the conditions in research libraries which have shaped the Office of University Library Management Studies' (OMS) approach to library management studies are outlined, OMS activities during 1976 are described, as well as priorities for 1977. OMS work with member libraries in 1976 indicated that research libraries are primarily concerned with: (1) increasing financial pressures; (2) the need for improved processes for building, maintaining, and servicing collections; (3) the difficulty in understanding and influencing libraries' organizational environments; (4) the need to improve libraries' effectiveness by redefining their goals; and (5) the requirement to clarify the role of library managers and improve the use of staff resources. The OMS has responded to these concerns through the Management and Analysis Program, Management Skills Institutes, a goals-based staff performance appraisal program, the design of a focused self-study and subsequent pilot test, the Management Training Film Program, regional workshops, surveys conducted by the Systems and Procedures Exchange Center, and studies of the use of managerial and technical specialists, machine-based information services, and collection management in research libraries. An annotated list of the flyers and kits from the Systems and Procedures Exchange Center (SPEC) is provided, as well as a bibliography of OMS publications and documentation for 1976. (Author/CWM)

Descriptors-*Library Administration, *Library Research, *Management, *Professional Associations, Publications, *Research Libraries, *University Libraries

The Office of University Library Management Studies (OMS) activities which are reviewed include providing member libraries with resources and services ranging from research and development programs to information collection and dissemination programs and training. In addition to conducting Management Skills Institutes and regional and special focus workshops, the OMS prepared and distributed three major publications on the topics of library use instruction, audiovisual materials for

point-of-use library instruction, and library management issues in the 1970's. Two libraries completed the Management Review and Analysis Program and five surveys of member library practices were conducted by the Systems and Procedures Exchange Center (SPEC). The OMS also designed a Collection Analysis Procedure for research libraries, prepared a manual, and initiated three test library studies, as well as assisting the Council on Library Resources in testing the Academic Library Development Program at three demonstration libraries. A film on the issue of managerial leadership was acquired by the Management Training Film Program, which continued to make available resources for in-house library training programs. SPEC kits and flyers based on survey results are described, and a bibliography of OMS publications and related documentation is attached. (CWM)

Identifiers-*California, *Cooperative Information Network

A study was conducted to examine and evaluate the impact of the Cooperative Information Network (CIN) Staff Development Project (CIN-SD) in individual CIN libraries and to recommend methods for establishing on-going staff development programs in libraries. This report presents findings gathered from a survey employing questionnaires and interviews, provides an assessment through 12 conclusions, and proposes a number of specific recommendations. A large portion of the study is a staff development evaluation form, developed from the CIN staff development experience, and intended as a tool to assist library administrators and staff members in establishing on-going staff development programs in their libraries. Appendices provide the study methodology, survey findings, staff development questionnaires for libraries using and not using CIN-SD, schedules of interview questions (staff and administrator forms), and list of the systems and libraries participating in the study and the library personnel interviewed. CIN is a communications network among all types of libraries in five northern California counties intended to expand and improve information services. (Author/JD)

Intended to help librarians, administrators, and trustees better understand the ramifications of the new copyright law, Public Law 94-553, this brief document asks and answers some of the basic questions concerning compliance with it. Questions answered include: What is the new copyright law? What are the implications for libraries? What is fair use? What are the copyright guidelines? What are the minimum requirements which a library should meet for compliance? Should your library adopt a copyright policy? What are the guidelines of the National Commission on New Technological Uses of Copyrighted Works (CONTU) relating to Subsection 108 (g)(2) (interlibrary arrangements for photocopying)? What record maintenance is necessary? What is copyright clearance? How will copyright law affect contractual arrangements for purchase of serials or other materials? What effect does the law have on local archives? and Who is liable under what circumstances? Appendices provide the minimum guidelines for classroom copying of books and periodicals in nonprofit educational institutions, guidelines under fair use for music, and CONTU guidelines for interlibrary loans; a bibliography of primary and secondary sources is also included. Identifiers-*Avionics, Digital Avionics Information System, Training Requirements Analysis Model

The training requirements analysis model (TRAMOD) described in this report represents an important portion of the larger effort called the Digital Avionics Information System (DAIS) Life Cycle Cost (LCC) Study. TRAMOD is the second of three models that comprise an LCC impact modeling system for use in the early stages of system development. As part of the overall modeling system, the training model is an efficient tool for developing training programs on the basis of task, time, and resources criteria. This report explains the approach used in developing this model and its analytic value as a method for determining training requirements, as well as the methodology used to develop the task-related characteristic data necessary for its application to the DAIS. The model is described by explaining the techniques and algorithms used to accomplish its function, and the task dictionary, task characteristic parameters/values, and acronyms are provided in appendices. A bibliography is included. (Author/JD)

Identifiers-*Alaska Conference Library and Information Services

Based on the author's observation of the activities of this pre-White House Conference on Library and Information Services and a synthesis of the reactions of the conference delegates, this evaluation assesses the extent to which this conference, held in Juneau on March 8-9, 1979, met its own objectives. A discussion of library and information services in Alaska provides the reader with background for the conference. Evaluation goals and procedures are presented, as well as a statement of the goals and objectives of The White House Conference on Library and Information Services and the Alaska conference. The attainment of stated objectives, measured by responses to a participant evaluation questionnaire, is evaluated and followed by a summary of participant comments. A discussion of the success of the conference by seven additional criteria, conclusions, and recommendations conclude the report; appendices include the evaluation questionnaire (tabulated), examples of conference recommendations, and selected references. Identifiers-Library Services and Construction Act, Library Users, *Wisconsin

Intended to provide background information useful to delegates to the Governor's Conference on Library and Information Services (September 1978), the first five chapters of this annual revision of the state program constitute a citizen's overview of library and information services in the state, with some attention to matters national in scope: (1) Wisconsin and Wisconsin residents population profiles, economic indicators, trends in education, mass media/communications/technology, and library users profile; (2) local library and information services in the state; (3) the area and library and information services, with emphasis on cooperative and coordinated area services; (4) statewide library and information services; and (5) regional and national library and information services. The final two chapters Goals and Objectives: A Summary Update and Library Services, and Construction Act Criteria and Priorities focus on continuity and long-range planning. Maps are included that show the location of various kinds of libraries and library organizational areas in the state. (Author/JD)

Identifiers-Massachusetts

This comprehensive report of the pre-White House Massachusetts Governor's Conference on Libraries and Information Services includes background and planning information, a summary of events and speeches at the conference, and the resolutions resulting from the conference. Participants were predominantly lay people with some representatives of the library/information science community. The conference was designed to focus public attention on the need for information services, on the problems of access to information, on the role of libraries in providing information, and to fix responsibility for making plans and taking appropriate action. Planned by the Citizens' Advisory Committee, consisting of lay delegates and librarians, the conference was coordinated by a Core Committee representing library associations and types of libraries. Pre-conference activities included surveys of public library users and non-users, regional meetings, and public forums. The Conference addressed the issues of library role; present and future technologies; responsibilities of the private sector and federal, regional, and local governments; library cooperation and networks; library resources; copyright; and relationships among users, libraries, and the private sector. Results were coordinated by a resolutions committee. Excerpts of speeches, subcommittee reports, and questionnaire results are appended. (CWM)

Descriptors-Community Colleges, *Compensatory Education Programs, Curriculum Evaluation, *Educationally Disadvantaged, *Evaluation Criteria, Individualized Instruction, *Junior Colleges, Models, Remedial Instruction, Remedial Programs, School Holding Power, Spelling Instruction, Student Evaluation, Student Recruitment, Student Testing, Vocabulary Skills

Three Oregon community colleges collaborated to develop a model program to meet the learning needs of educationally disadvantaged students. The model consists of several Outcome Objectives, or goals for the program. The discussion of each objective includes background information relevant to the specific goal and a description of the methods used to achieve the goal. The objectives for the model are: (1) to identify basic skill levels in reading, writing, and mathematics required for entrance into and successful completion of various programs; (2) to evaluate the effectiveness of existing materials and techniques used with the educationally disadvantaged; (3) to describe a testing, counseling, and advisory service that will identify disadvantaged learners; (4) to identify and recommend methods of recruiting and retaining educationally disadvantaged students; (5) to develop individualized learning programs, specifically in spelling and vocabulary skills; (6) to identify and evaluate curriculum materials and instructional aids; and (7) to develop on-going assessment criteria to monitor students' progress. A substantial portion of the model consists of actual survey instruments, evaluation tools, tests and placement materials, curriculum guides, and bibliographic references. (DR)

Descriptors-*College Administration, College Faculty, Community Colleges, *Cost Effectiveness, *Efficiency, Faculty Development, Financial Problems, *Junior Colleges, Marketing, *Organizational Effectiveness, Personnel Needs, Personnel Policy, Productivity, Publicize, *Rural Schools, Small Colleges, Staff Meetings, Staff Utilization, Student Recruitment

While small rural colleges have much the same goals as larger institutions, they have fewer resources with which to work, and therefore their management problems are unique. In the areas of staffing, time management, staff development, and recruitment and promotion, the small college can increase management effectiveness. Despite increasing government regulation, and decreasing funds and qualified applicants, certain hiring problems can be met by: (1) requiring faculty to demonstrate dual competencies; (2) eliminating traditional administrative and instructional positions that can be replaced by paraprofessional positions; and (3) effectively using part-time faculty and graduate students. Effective time management can have a positive influence on daily, weekly, and annual planning, delegation of authority and best use of support staff, and time wasted or well-spent in meetings. In times of reduced resources, staff development seems to be the most feasible means of providing a needed skill in an organization. Doing so requires identification of specific needs, support by faculty and administration, and judicious use of techniques such as free consultants, in-house experts, and personnel exchange with other schools and industry. Finally, marketing can be most effective if it reflects environmental factors such as consumer freedom of choice, competition, efficiency, and social change. Appendices illustrate various strategies. Descriptors-Community Colleges, *Cooperative Planning, Cooperative Programs, Economically Disadvantaged, Economic Development, Federal Legislation, *Job Training, *Junior Colleges, *Legal Responsibility, Master Plans, *Program Administration, School Community Relationship, *School Industry Relationship
Identifiers-*Comprehensive Employment and Training Act

When the 96th Congress reviews the 1978 Amendments to the Comprehensive Employment and Training Act (CETA), their action may affect the community colleges. Therefore, it is important that community college administrators understand these Amendments. CETA's intent is to provide job training to economically disadvantaged persons to maximize their employment opportunities. Additionally, it provides for maximum coordination between CETA programs and economic and community development. Increasingly, the community college will be working with business and industry to train economically disadvantaged, un- and under-employed persons. College vocational curriculum, scheduling, and admissions may need adjustment to afford better coordination. The CETA Amendments which may be particularly significant to the community colleges are: (1) Title I now emphasizes administrative regulations; (2) it also requires that prime sponsors submit a master plan and annual plans with long-term goals for improving the labor market and economic conditions; (3) it requires prime sponsors to document consultation in planning with public and private program agencies; and (4) Title VII, Section 701, attempts to involve the local business community in CETA activities by providing a Private Sector Council, whereby businessmen function as brokers, advisors, and liaisons between prime sponsors and small business. Descriptors-Access to Education, *Adult Education, *Adult Education Programs, Community Colleges, Community Education, Community Surveys, Educational Needs, *Junior Colleges, Models, *Needs Assessment, *Older Adults, *Outreach Programs, Program Planning, Senior Citizens, Teacher Attitudes

Identifiers-Delphi Technique

Using the Delphi forecasting technique, a model program was designed to provide educational services to elderly members of the community served by the College of DuPage. A questionnaire was developed and administered to three groups: full-time faculty at DuPage (N 15), local officials and authorities on aging (N 13), and senior citizens of the county (N 100). Response rates for the three groups were 93.0%, 70.0%, and 33.0%, respectively. Questionnaire responses indicated consensus among all three groups that (1) seniors should participate in planning educational programs, (2) off-campus facilities should be utilized but seniors should not be segregated from other age groups, (3) full-time college faculty should teach courses for seniors, and (4) transportation problems can deter seniors from utilizing educational opportunities. The proposed program model incorporates the four steps of planning, organization, implementation, and evaluation, and recommends regular courses in a variety of subject areas taught by full-time faculty as a major component of the educational program. Flexibility in scheduling and location of facilities is encouraged for optimum participation, as is the development of expanded funding sources to support the program. Background information and a literature review are included and questionnaires and survey results are appended. (DR)

Descriptors-*Bachelors Degrees, *Educational Counseling, *Faculty Advisors, *Faculty Workload, *Individualized Programs, Junior Colleges, Noninstructional Responsibility, Organizational Change, *Postsecondary Education, School Surveys, Student Needs

In order to determine if the recently instituted, individualized baccalaureate (BA) degree program at General College had affected the time spent in, and the nature and scope of faculty advising, this study identified how much real time'' was spent by faculty in advising, with whom, and on what kinds of activities. During the winter quarter, 1978, each of the 96 faculty members were assigned three randomly selected weeks in which to record each advising contact; the length of time involved; the topical purpose of the meeting; and the classification of the advisee by year, program credits, and primary place of registration. Results indicated that faculty spent 5,374.5 hours in advising during the quarter an average of 55.9 hours for each faculty member invested in 147.2 visits. The day school student body was comprised of 80% associate of arts students, 5.1% adult special students, 7.5% BA students, and 7.5% who were not designated. Day school students received 76% of the advising time; BA students (both day students and Continuing Education and Extension students) received 12.9% of the time. Additionally, in advising day students, faculty spent 22.4% of their time on baccalaureate program-related activities. Thus, the study revealed that the individualized baccalaureate degree program required more advising time than expended in advising conventional lower-division programs. (MB)

High School Graduates History and Projections, 1973-1989. Institutional Research Report No. 78/79-8.

Mississippi Gulf Coast Junior Coll., Perkinston.
Pub Date-23 Jan 79
Note-6p.; Data tables have been deleted due to irreproducibility
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Cohort Analysis, Community Colleges, Declining Enrollment, *Enrollment, *Enrollment Projections, *High School Graduates, *Junior Colleges, Labor Market, *Population Trends

Historical data on enrollments in grades one through twelve and high school graduates in the four-county service area of the Gulf Coast Junior College District were collected for 1973 to 1978 and enrollments were projected for the years 1979 to 1989. Once grade and graduation figures were verified for accuracy, a Cohort Survival Method was used to determine the survival rate from one grade to the next. Three survival rates were computed, yielding three-, four-, and five-year averages for each of the four counties (George, Harrison, Jackson, and Stone). For the total four-county district, high school graduates numbered 4,037 in 1977. Peak enrollment of 4,235 is expected in 1978 and graduates are expected to decline to 3,602 by 1989, a decrease of 12%. The two larger counties, Harrison and Jackson, are anticipated to show declines of 13% and 10%, respectively, between 1979 and 1989, and Stone County to show only a very slight increase. George County graduates, however, are expected to increase by 30% between 1978 and 1989. Industrial expansion, increased highway construction, and high per capita earnings contribute to the expected growth in this county. Total population for the district is expected to increase from 272,977 in 1973-74 to 418,300 projected for 1995. (DR)

Providing students with the opportunity to explore academic/career alternatives during the first two years of college is a basic mission of the Division of Undergraduate Studies (DUS) of the Fayette campus of Pennsylvania State University, which provides the first two years of numerous baccalaureate programs. Effective academic advisement, which is crucial to this mission, is provided through a dual advisor system. The generalist advisor insures that the specialist (DUS-College) advisor has adequate information regarding the academic abilities and interests of the advisee, recent academic rule and curricular changes, and the advising process. The responsibilities of the DUS-College advisor are classified into two categories: procedural and substantive. Procedural reponsibilities include: maintaining a complete and up-to-date record of each advisee's progress; insuring that each advisee possesses or has access to appropriate academic information; and maintaining a working knowledge of academic actions which require advisor approval. Substantive responsibilities of academic advisement include: developing the student's schedule; developing a realistic academic plan cooperatively with the student; evaluating the student's academic progress; and exploring an appropriate long-range academic/career goal with the student. The criteria by which effective academic advisement is evaluated at the college are also explained in this descriptive report. (DJD)

Identifiers-*California

A set of long-term finance principles dealing with student fees, community services, and interdistrict attendance was presented to the Board of Governors of the California Community Colleges for adoption. It was recommended that the Board: (1) oppose any student tuition charges for credit instruction and for non-credit instruction in specified course areas; (2) support a permissive fee charge for community services, that is, a policy that fees for non-credit instruction could be adjusted for those unable to pay, such as senior citizens; (3) retain and increase base budget revenues for community services and provide public funding for one-half of the marginal cost of future changes in community service classes; and (4) liberalize current interdistrict attendance policies to permit students to attend the college and district of their choice, though district residents would have admission priority. Tentative principles for capital outlay funding are discussed, as are issues relating to compensation of part-time faculty, funding for the State Teachers Retirement System, and the "fifty-percent law" dealing with faculty salaries. No recommendations for action on these issues were made. Four appendices present background data and analyses for student fees, community services, interdistrict attendance, and long-term capital outlay. (DR)

Descriptors-Community Colleges, *Courses, Day Students, *Departments, *Dropout Rate, Dropout Research, Enrollment Trends, *Intellectual Disciplines, Junior Colleges, *Junior College Students, *Persistence

In order to investigate patterns of persistence in courses taken by day students at Los Angeles City College, class enrollment data were gathered at the end of the third week of the Fall 1978 semester, at the first and second census weeks, and on the last day of the semester. Additionally, the number of students receiving final grades other than W (withdrawal from class) was determined. Persistence rates were calculated as a percentage of third week enrollment. The study revealed an overall persistence rate of 61.3%, or conversely, that 38.7% of the students enrolled in day classes failed to complete the class with a grade other than W. Individual class dropout rate ranged from 0 to over 80%. The persistence rate of 61.3% is significantly below the Fall 1971 figure of 69.9%. Of 32 departments, 28 showed a lower persistence rate in 1978 than in 1971. Highest rates of persistence generally were experienced in two-year occupational subject fields, especially those related to health. The study report presents persistence rates for all courses alphabetically, then by combining courses into 90 subject fields and 32 departments. In addition, final persistence rates were rank ordered by department and compared with Fall 1971 data. (DR)

Identifiers-California, Vocational Education Data Systems

The study groups and task forces of the California Community Colleges (CCC) worked on various projects during 1978. A $67,658 federal grant was filed with the Department of Health, Education and Welfare to establish a Clearinghouse on International Education; the Grading Policies Study Group continued to examine existing regulations on selected policies with the intent of making recommendations aimed at system-wide grading consistency; and the Advisory Committee on General Education reviewed the work of the California State University and Colleges Task Force on General Education in order to make recommendations regarding CCC guidelines. The Vocational Education Data System (VEDS) was mandated as the major data collection effort for federally funded vocational education programs. At a special meeting with the Director of VEDS, the Board of Governors recommended a delay of implementation and re-evaluation regarding the need for additional information that is being required; the usefulness of this data; and the level of detail required. The Task Force on Community College Counseling prepared a Special Progress Report covering counseling program reductions and personnel changes resulting from financial restrictions. The main Task Force report and nine counseling sub-committee reports, plus the names of Task Force members are included in the Chancellor's Report. (DJD)

Identifiers-John Calhoun Community Coll AL

The purpose of this study was to construct a model for the design, development, and direction of continuing education programs for registered nurses at John C. Calhoun Community College. The model was based on data from various professional conferences; a review of the literature on continuing education in general and concepts of learning theory; and information supplied by 14 continuing education program directors about the model they currently employed. The study and resulting model allowed nurses to identify learning needs, gain desired education, and evaluate program offerings. The model, which is presented, consists of five phases: (1) an introduction which defines nursing and continuing education, and discusses the model itself; (2) a description of the setting (Northern Alabama) and the population (3,412 nurses) served; (3) an overview of the selection and membership of the advisory committee and its role in program coordination; (4) a statement of goals and objectives; and (5) an outline of the delivery system and specific aspects of planning, implementation, and evaluation of the continuing education program as conducted at Calhoun. The phases are graphically illustrated to demonstrate interrelationships among them. Fifteen appendices, comprising half of the report, include various program forms and documents, and a list of the 14 existing programs that supplied information for the study. (DR)

Descriptors-*Adult Education, Adult Students, College Curriculum, Community Colleges, *Curriculum Design, *Curriculum Development, Curriculum Planning, Enrollment Projections, Enrollment Trends, Ethnic Studies, *General Education, *Junior Colleges, Junior College Students, *Multicultural Education, Student Characteristics

This analysis of the curricular program for continuing general education of Montgomery College (MC) is presented in the context of the ongoing and increasing effort to provide continuing education to the nation's adult population. Section I discusses general education in the context of the public two-year college and its special curriculum. Section II discusses the distinction between ``general education'' and other aspects of the curriculum; presents several illustrative formats for general education programs; outlines a taxonomy of eight types of courses; and presents a two-level plan of ``general studies'' (or fields of knowledge) and ``integrative studies'' designed to stimulate analysis and application of knowledge from various fields. Section III discusses characteristics of the student population to be served by a general education program, specifically covering age, sex, and family income. It also includes three- and five-year population and enrollment projections. Section IV describes the current state of the curriculum at MC in terms of its legal, administrative, and policy dimensions. The report concludes with Section V on implications of the preceding discussions and recommendations for a continuing general education program. Suggested course titles are appended as well as a general resource bibliography and a special annotated bibliography designed to assist planners of general education courses related to multicultural themes. Factors in the Determination of Cost Effective Class Sizes. Report No. 009-79.

Kalamazoo Valley Community Coll., Mich.
Pub Date-Mar 79
Note-16p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Budgeting, *Class Size, *College Credits, Community Colleges, *Cost Effectiveness, Costs, *Estimated Costs, Expenditures, *Junior Colleges, Operating Expenses, Productivity, Student Teacher Ratio, Unit Costs

A system to determine cost effectiveness of class size should be based on both budgeted and actual expenditures and credit hours at the individual course section level. These two factors, in combination, are often expressed as cost per credit hour, and this statistic forms the primary means of evaluating planned inputs'' against actual outputs.'' For purposes of determining a cost-effective class size, it is not as important that fewer dollars were spent than were budgeted, or that credit hours generated exceeded or fell short of those planned. Rather, it is the control of the proportional relationship between these two factors which, if attained, can improve efficiency. Generally, the relationship between expenditures and credit hours should be close. However, budgeting these factors at the section level is not likely to increase planning accuracy many enrollment influences are beyond the control of planners. Additionally, several problems exist in implementing this type of cost effectiveness analysis. The cost of budgeting at the section level is likely to be prohibitive, and factors such as contractual obligations with the faculty, the nature and fluctuation of student enrollments, and student preferences for classes may all impair administrative ability to obtain optimum class sizes. Hypothetical cases are used to demonstrate the system, and an appendix considers the problems of assigning indirect costs at the section level. (DR)

Descriptors-Adult Education, Community Colleges, Community Surveys, Costs, Educational Facilities, Educational Interest, Educational Needs, Enrollment Projections, Job Training, *Junior Colleges, *Needs Assessment, *Noncampus Colleges, *Outreach Programs, *Program Planning
Identifiers-Pennsylvania

Eight feasibility studies, conducted since 1973, investigated the need for non-traditional approaches to two-year postsecondary education programs in areas of Pennsylvania not served by locally sponsored community colleges. The proposed institutions were modeled on a concept of colleges without walls.'' This concept involves (1) using existing physical facilities on contract or lease without proposing new buildings; (2) providing instruction at various geographic locations; (3) offering courses and programs that meet regional needs and conducting them near students' homes; (4) employing regionally available instructors primarily on a part-time basis; (5) providing decentralized counseling, registration, and similar administrative services; (6) implementing an open admission'' policy; and (7) cooperating with existing institutions. In this collection, each feasibility study is briefly summarized, listing report title, date, local sponsors, and the director of research. Most study reports incorporate needs assessment data from surveys of high school students, adults, and business and professional representatives, and most conclude favorably on the feasibility of such non-traditional educational offerings. Projected enrollments, estimated budgets, and availability of local resources are included in some reports. (DR)

At the Fayette Campus of Pennsylvania State University (which offers the first two years of baccalaureate education), volunteering faculty members are selected to serve as academic counselors during freshmen orientation on the basis of their student-orientation, motivation, realistic perspective on counseling objectives, and their willingness to be innovative and adaptive. An intensive two-day Counselors' Orientation Conference is conducted prior to freshman orientation to provide faculty with the basic information required to respond to freshman questions and to develop and refine their academic counseling skills. The training of faculty as academic counselors for freshman orientation is expected to enhance year-round instructional and academic advising. Information disseminated at the conference includes an overview of campus services and facilities, a review of the academic structure, and a summary of student data which includes scholastic preparation and grade expectancies. Through the use of slide-tape presentations and group interaction, faculty members learn how to interpret student test profiles, prepare and evaluate counseling interviews, and assist with appropriate course placement. Core faculty who have served as academic counselors use their acquired information and skills to train other faculty advisors. On-going evaluation of the program is being conducted, and will contribute to an in-depth analysis of the program. (DR)

Identifiers-*Industrial Campus Project

The activities of the Industrial Campus Project (Ind-Camp), designed by Parkersburg Community College to provide business/industry plant workers with access to educational opportunities directly at the scene of their employment, are described in this report. This final report, covering activity from January to June 1978, describes project objectives which attempt to blend quality teaching with the production-oriented strategies used by industry, with the intent to improve basic and professional skills and the potential for formal lifelong learning, and to link the traditionally separate worlds of education and work. A statement of intended outcomes is included, as well as a financial update and a description of the urban, blue-collar population served. Additionally, staffing arrangements, college and community relationships, specific course activity, and planning/development directions are examined, and the project is evaluated in terms of administration, population, instruction, and impact. An addendum describes and evaluates activities of an extension period from July to December 1978, which was intended to integrate the project into the college structure and the community and insure its continued operation. Over one-half of the summary is comprised of sample project proposal forms, student data sheets, course information and evaluation sheets, and records for each participating corporation. (DR)

Descriptors-Capital, Community Colleges, Costs, *Economic Change, *Educational Finance, Enrollment, Federal Aid, *Financial Problems, Financial Support, *Junior Colleges, State Aid, *Systems Approach, Tuition

A generic, descriptive system dynamics model is presented for a California community college district single campus. It provides an analytical tool for community college administrators who must consider the dynamic effects of policy changes on the system as a whole, rather than on isolated components of the system, when corrective financial policies are called for by revenue cutbacks. In figure 1 of this Community College Finance Model, a causal-loop diagram illustrates structural assumptions and basic feedback loops. Four major sectors are identified: enrollment, cost, revenue, and tuition. Beginning with the enrollment sector, an admission rate permits students from three income categories to enter the community college. As the number of students increases, the amount of state revenue increases, but there are corresponding increases in the costs of education (salaries, employee benefits, supplies, operating expenses, capital outlay, etc.). Total costs equal total revenues when no tuition is charged. Should this situation change and total costs exceed revenues, a deficit in available funds would be created. This could be alleviated by charging tuition, but tuition creates a disturbance in admission rate. The results of conceptualizing and programming this flow model appear in tabular and graphic form. A bibliography is included. (RC)

Survey of the Employment Needs of Business and Industry in Anderson, Oconee, and Pickens Counties: Executive Summary.

Tri-County Technical Coll., Pendleton, S.C.
Pub Date- 79
Note-24p.; Prepared for the Area Commission of Tri-County Technical College
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Employment Opportunities, *Employment Projections, Job Market, Junior Colleges, Labor Supply, Manpower Needs, *Manufacturing Industry, *Needs Assessment, *Occupational Surveys, State Surveys, Technical Education, *Technical Institutes

An employer needs assessment survey was administered to the business/industrial community in the service area of Tri-County Technical College (TCTC) to determine the need for TCTC graduates in various fields, employers' evaluation of TCTC graduate employees, and any trends or changes in local job market. All major industries listed in the 1978 South Carolina Industrial Directory were surveyed; 219 (94%) firms responded and an additional 250 small businesses participated. The survey questionnaire and interviews addressed only those jobs that required education typically provided by two-year technical colleges. Results indicated that local population growth and employment rates had exceeded national trends, and that manufacturing remained the primary source of employment. While no general manpower shortage was indicated, it was expected that the local labor supply would be exceeded by demands for highly skilled workers in non-textile manufacturing, particularly in the computer and data processing fields. TCTC-trained employees maintained good to excellent employment records but industry encouraged more supervisory, public relations, and communication skills training.

Student enrollment in TCTC was expected to continue to rise due to limited opportunities in the area for liberal arts graduates. (DR)

Descriptors-Administrative Organization, Annual Reports, Budgets, College Administration, College Curriculum, Community Colleges, Educational Facilities, Educational Finance, Educational History, Educational Planning, Enrollment Trends, Expenditures, *Institutional Characteristics, *Junior Colleges, Junior College Students, Space Utilization, State Aid, *Statewide Planning, Statistical Data, Student Characteristics, Tables (Data), *Technical Institutes
Identifiers-*North Carolina

The North Carolina community college system, which includes 37 technical institutes and 20 community colleges, is the subject of this descriptive report. Chapter I reviews the history of the system and its role, purpose, and educational goals. Chapter II describes the administrative network and reporting relationships of the State Board of Education, Community College Advisory Council, Controller, and Department of Community Colleges. Chapter III examines degree programs (Occupational, Transfer, General Education, and Developmental), continuing education programs (Industrial and Adult Education), special projects, and student services. Financial, enrollment, and space utilization data are presented in Chapter IV including institutional expenses and receipts, state expenditures for 1978-79, and proposed budget for 1979-1981. Student statistics include average enrollment by program and institution, and description of students by race, sex, and geographic origin. Space utilization is described in terms of capacity-enrollment ratios and assignable square footage per student. Chapter V of the report discusses planning the biennial program plan, long-range planning, and the civil rights plan and describes the Commission on Goals and the Liaison Committee between the community college system and the University of North Carolina. Chapter VI provides status reports from each campus listing activities and accomplishments for the reporting period. (DR)

Identifiers-Information Analysis Products

The findings and conclusions of a study of curriculum and instruction in two-year college social science, science, and science-related technology programs are summarized in three sections. The first selects from 1977-1978 curriculum data which were gathered from catalogs and class schedules of a representative national sample of 175 two-year colleges. Focus is placed on enrollments, and the availability and types of courses for transfer and occupational students, non-science majors, and students in developmental programs, revealing many introductory courses, few remedial courses, and an overall emphasis on serving students already disposed to the sciences. The second section deals with the courses themselves, based upon the results of an instructor survey mailed to 1,275 science and social science faculty members. Selected findings related to various subject areas are provided in terms of numbers of class sections, average class enrollments and completions, course level and objectives, use of instructional media and class activities, grading and examination practices, and instructor characteristics. Traditional teaching methods were found to predominate. The final section reviews the major findings and makes recommendations, stressing the role of the community college in improving science and social science literacy. The instructor survey instrument and responses are appended. (DR)

Identifiers-Michigan

Adjunct faculty, that is, part-time instructors employed for a specific purpose who may not be teachers by profession, comprise more than 50% of the total teaching faculty in community colleges. This study investigated what selected community colleges identified as professional development needs of adjunct faculty, and what adjunct faculty themselves perceived as their development needs; and presented guidelines for an adjunct faculty professional development model for community colleges. A Community College Data Form, completed by 29 administrators in 15 Michigan community colleges supplied data on institutional priorities and perceived needs for development as well as demographic characteristics of the colleges. Of the responding administrators, 88% indicated their college did not have a professional development program; a majority of the remaining respondents indicated that their programs were informal. A Needs Assessment Survey was sent to 15% (307) of all adjunct faculty members and was completed by 79% (243). Responses indicated that adjunct faculty felt they needed more information and development activities than they received. A majority responded that a faculty-instructed, departmental program would be the most beneficial, and expressed a need for closer liaison with full-time faculty and college administration. A model development program is outlined and survey instruments are appended. (DR)

An Empirical Study Toward a More Meaningful Philosophy Curriculum.
Pub Date- 79
Note-15p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*College Curriculum, Community Colleges, *Core Courses, *Curriculum Design, Curriculum Planning, Evaluation Methods, *Junior Colleges, *Philosophy, Preservice Education, Student Attitudes, Teacher Attitudes

As part of an effort to determine which basic philosophy courses are appropriate to a community college curriculum, 37 topics were itemized by clustering related philosophical concepts under a general concept or topic. Topics were in turn grouped under the following headings: knowledge, major schools of philosophy, logic, value theory and ethics, and applications of philosophical methods. Then, philosophy faculty members and college students and graduates were asked to evaluate each topic in terms of its importance. Agreement about the importance of a topic would be interpreted to mean that the topic is essential to a philosophy curriculum. Knowledge and value theory and ethics received higher than average ratings by all groups. In the schools of philosophy, Plato and existentialism received high ratings, along with logic and inductive reasoning. In the area of applied philosophy, the philosophies of religion, law, and business were rated higher than average. University and community college professors judged more topics important than the student groups. Community college students did not accord high ratings to as many topics as university students. Both faculty and students felt that those teaching philosophy could have primary expertise in another subject but must have some graduate training in philosophy. (DR)

A Program for the Blind at Randolph Technical College.
Pub Date- 79
Note-12p.
Pub Type- Reports - Descriptive (141)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Adult Education, Adult Education Programs, Blind, *Braille, *Communication Skills, Community Colleges, *Daily Living Skills, *Junior Colleges, Program Development, *Special Education, Travel Training, *Visually Handicapped, Visually Handicapped Mobility
Identifiers-Randolph Technical College NC

Randolph Technical College (RTC) and the Division of Services for the Blind of the North Carolina Department of Human Resources have cooperated for two years on a program to provide blind students with the opportunity to receive instruction in a traditional classroom setting on a college campus. Problems encountered in the early stages of the program, before and immediately after it was instituted at RTC, included: difficulties in administrative coordination, the financial burden, securing a classroom and transportation, and recruiting students and staff. Through the efforts of Randolph's Learning Resources Center, the Office of Continuing Education, and other campus departments, instruction is provided to 16 legally blind students by four Braille instructors and one aide. One morning a week, classes are offered in Braille, and Communication Awareness, which includes vocabulary, listening skills, and public speaking. Special learning units cover the metric system; manual dexterity through rug-making; daily nutrition, including shopping and actual meal preparation; and mobility training. Since many of these blind students live alone on limited incomes, programs are designed to help them become self-sufficient. Instruction is supplemented by numerous field trips with the financial assistance of local community organizations. The ultimate goal of the program is to fully integrate blind students into Randolph's Continuing Education Program. (DR)

University Credit for Remedial Work and Upper Division Credit for Lower Division Work: New Kinds of Grade Inflation?

Pub Date-Jun 79
Note-17p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*College Credits, Community Colleges, Composition (Literary), Junior Colleges, *Postsecondary Education, Programing Languages, *Remedial Courses, Remedial Mathematics, *State Universities, *Transfer Policy
Identifiers-*Lower Division Courses

A study was conducted to determine whether universities award degree credit for remedial courses, and whether certain lower division courses receive upper division credit. Courses under investigation included remedial English (Subject A at Ventura College, California), remedial math (Math X), and traditionally lower division courses in accounting, introductory statistics, COBOL, FORTRAN, and Assembler Language. The catalogs of 13 universities in California, that received 75% of the transfer students from Ventura College, were analyzed in terms of course descriptions and prerequisites. Five of the 13 universities surveyed offered unit credit in remedial English; four awarded credit for Subject A, and three awarded credit in the area of Study Skills, Reading Lab, or Spelling and Vocabulary. Credit for high school or sub-high school math presented the most frequent opportunity for remedial credit: 12 universities offered credit for Algebra II, four for Algebra I, and four for review arithmetic (Math X). At least one traditional lower division data processing course was offered by eight universities for upper division credit four offered more than one. A freshman could conceivably receive up to 12 units toward a bachelor's degree for remedial work and an entering junior could obtain up to nine upper division units for lower division courses. (DR)

Identifiers-*Ontario

The problems created by declining enrollments and fiscal stringencies have brought about a "new reality" for postsecondary institutions in Ontario and other Canadian provinces. The lean future that institutions face requires clear articulation and communication of institutional goals, retraining and reallocation of redundant academic staff, cost-effective instructional methods, new formulae for financing higher education, and inter-institutional cooperation. On a system-wide basis, an agency is needed that has enough concern to make difficult decisions, and enough authority to implement them. On a more localized level, entrenched academic traditions, excessive departmental autonomy, and outdated organizational structures represent significant obstacles to the problem-solving capabilities of the institutions. A cohesive plan for Educational Development, which includes organizational, staff, and instructional development, can provide an effective program for individual and institutional renewal. The underlying concept of Educational Development is cooperative, fluid, internally consistent activity at all levels of the institution. Programs dealing with professional needs, programs related to instructional concerns, and activities concerning the myriad of organizational problems must be interrelated and incorporate "partnership problem-solving" to adequately confront and resolve the problems of the new reality. Lorain County Community College (LCCC) has provided training programs for the employees of the United States Steel Corporation since 1969 and for the Lorain Telephone Company since 1977. These training programs are campus-based, and the students attend classes for four or five week periods at a time. An effort has been made to adhere as closely as possible to the regular class pattern of the college in order to integrate the trainees into the regular student body and minimize program visibility on campus. Program content is based on the occupational training needs determined by college representatives and company training officials. Currently, here are four trade areas involved: Basic Telephony, Electrical Skills, Mobile Equipment Repair, and Millwright. Several other trade areas have been serviced at times.

The curriculum, which is common to all students, is based upon a ``building block'' approach that helps alleviate problems of scheduling, student alienation and stress, and finding skilled instructors. The instructors are part-time, temporarily employed specialists in the various trade skill areas. Because of the unique nature of the apprentice groups, there were some problems early in the program. Some of these necessitated the clarification of college/union relationships. An appendix contains course schedules, outlines, and syllabi, and the report describes program costs and administrative structures. (DR)

Evaluation for Survival: A Model of Institutional Renewal.
Pub Date-Jun 78
Note-17p.; Paper presented at the International Institute on the Community College (9th, Sarnia, Ontario, June 12-15, 1978)
Pub Type- Speeches/Meeting Papers (150) - Guides - Non-Classroom (055)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Change Strategies, College Planning, Environmental Influences, *Organizational Change, *Postsecondary Education, Program Evaluation, Success Factors, *Systems Approach

An approach to help the line administrator conceptualize and direct institutional change is presented. Postsecondary institutions are described from a systems perspective and represented in a linear diagram to identify those areas that can become focal points for renewal activities. A three-dimensional typology provides a framework of alternative renewal strategies which may be characterized by their focus, scope (either institutional or sub-unit), and term or length of operation of the strategy. Seven ``common-sense'' principles which characterize institutional renewal were drawn from the typology. For example, the greater the scope, focus, and term of a strategy, the more reluctance it will meet and the more support it will need. The importance of the interplay between strategies for change and the environment in which the changes will occur is stressed and diagrammatically illustrated. Finally, the complete model for institutional renewal is presented and discussion focuses on two basic phases: (1) the preparation and planning phase, in which the administrator explores possibilities and develops a supportive environment, and (2) the implementation phase, in which the administrator may have to compromise between what is desirable and what is feasible in selecting strategies and goals. Further, the importance of careful and thorough evaluation is emphasized. (DR)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Community Colleges, Compensatory Education Programs, Integrated Activities, *Junior Colleges, Learning Theories, *Mnemonics, Recall (Psychological), *Remedial Instruction, Retention, *Teaching Techniques

Identifiers-*Pyramid Diagrams

The basic skills program at Norwalk Community College integrates the teaching of fundamental reading, writing, and study skills with an introductory course in psychology. The pyramid diagram is one of the key techniques used in the program. It is a visual outline which organizes information so that the subject, main idea, and details connect in a logical way. It is based on research about the way the brain retains and retrieves information, which indicates a limit to the number of separate items of information that the brain can remember, which can be overcome by categorizing the information. Pyramid diagrams are introduced as follows: (1) students read a chapter summary; (2) they read aloud facts from the summary which are recorded on separate index cards; (3) the instructor reads the cards randomly to the students who check off each fact; (4) students group the cards and label the groups; (5) a pyramid diagram is constructed recording first the subject of the summary, then the main categories, then the supporting details. Finally, students agree upon a complete sentence encompassing all details represented in the diagram. Students are encouraged to use the technique in textbook reading, organizing lecture notes, preparing for examinations, and organizing essays and research papers. (AYC)

The Legal Implications of Administrative Decision-Making.

Pub Date-1 May 79
Note-12p.; Paper presented at the Annual Convention of the American Association of Community and Junior Colleges (59th, Chicago, Illinois, April 29-May 2, 1979)
Pub Type- Speeches/Meeting Papers (150) - Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Administrator Responsibility, Constitutional Law, *Consumer Protection, Educational Accountability, Federal Aid, Federal Legislation, *Federal Regulation, Governance, *Government School Relationship, Institutional Autonomy, Interstate Programs, Policy Formation, *Postsecondary Education

Administrative decision-making encompasses three levels on which increasing legal challenges and liability and their implications need to be considered. At the local level, this may involve violations of procedural due process. A second level concerns state laws and regulations. Line administrators, who frequently make decisions on programs, personnel, and operations, are insufficiently knowledgeable about state authority in these areas. The third level, related to federal policy issues, involves administrators at higher echelons. In the 1960's, when college administrators accepted federal support through the Constitutional Welfare Clause, they also accepted federal guidelines, regulations, and procedures. In the 1970's, the Interstate Commerce Clause has become more critical because it establishes federal authority in interstate trade. The Federal Trade Commission, which has jurisdiction over proprietary institutions, also deals with consumer protection and false advertising. Principles of consumer protectionism invite federal supervision and instructional administrators must understand concepts such as truth in advertising and that the college catalog is a contract. Also related to the Commerce Clause are limits of autonomy placed upon multi-state institutions, which should be considered by state boards of education and state legislatures. (RC)

Identifiers-Information Analysis Products

Accurate data on the number of students who transfer from two-year colleges to senior colleges are not available because the ways of counting transfers vary greatly from system to system and state to state. While most studies define transfer students as those who have taken courses at a community college and subsequently enroll at a senior institution, there is little agreement as to the number of units that must be taken before the student achieves transfer status. Statewide definitions range from 30 semester credit hours to one quarter hour of credit some states set no credit hour limits at all. Methods of collecting the data on transfers also vary depending upon whether the researcher is based at a community college or at a state office. Data obtained by college-based researchers are frequently invalidated by low response rates to surveys due to the high mobility of community college students. Nonreturning students and interstate transfers are especially difficult to trace. In cases where the community colleges rely exclusively upon the universities in their region for transfer information, figures are particularly misleading due to missing and incomplete data and other imbalances caused by variations in data collection methods. Tracing students who ``stop in'' and ``stop out'' of different types of postsecondary institutions continues to be a problem as data collection systems do not accommodate them. A bibliography is included. (DR)

Descriptors-Community Colleges, *Course Objectives, *Curriculum Development, Faculty Development, *Instructional Design, *Junior Colleges, Noninstructional Responsibility, Program Improvement, Teacher Responsibility, *Technical Writing, Writing Skills
Identifiers-*Course Revision

A model designed to aid faculty in course development and revision is presented and discussed as it operates at the Community College of Philadelphia. Several guiding principles of instructional development are presented, stressing the importance of a positive approach and the view of instructional development as a mode of communication between students, faculty, administration, and others. A schematic model is presented to show the place of course development within a total program of staff development. The complete Course Development Model contains 21 sequential steps divided into six categories: Analyze, Design, Search, Develop, Implement, and Assess. The first eight steps, focusing primarily on the written development of course goals and objectives, a course outline, and a bibliography, constitute the minimum level of acceptable course development. Several criteria are used by the Instructional Development Specialists and faculty members to evaluate the written course proposals. These are discussed as are various techniques used by the Specialists to help faculty with constructing objectives (Harmes' four-step method is one) and with improving their technical writing. Problems often identified in technical writing include: inappropriate use of the,'' be able to,'' at least,'' and action verbs; lack of specificity and content description; undefined modifiers; and undefined or inappropriate relationship of task to criteria. Descriptors-Change Strategies, Community Colleges, Definitions, Faculty Development, *Inservice Programs, *Junior Colleges, *Organizational Development, Program Planning, *Staff Improvement

Claiming that staff development is a new concept that is not well-defined or understood by college administrators, this paper proceeds to define the concept in terms of organizational renewal theory, and present a model useful in planning, organizing, and analyzing staff development activities, programs, and processes in community colleges. A review of background literature stresses the concept of staff and organizational development as a planned, system-wide, educational activity designed to provide the organization with an on-going capacity to renew itself. The model follows in both tabular and descriptive forms and consists of four dimensions that should be outlined for any development program: (1) the purpose or need for the program, (2) the focus or goals of the program, (3) the mode of operation, that is, at what level the program is directed, and (4) strategies or methods which will be used to accomplish the renewal program. Each of these general dimensions is elaborated by specific variables that further explain each dimension. A detailed illustration of the use of the model for planning staff development is included and specific activities are listed that may be undertaken by a practitioner who desires to implement a similar program. Descriptors-Birth Rate, Cohort Analysis, *Dropout Rate, Dropouts, *Enrollment Projections, Enrollment Trends, Graduation, *High School Graduates, Migration Patterns, *Population Trends, *Postsecondary Education

Individual state projections of the number of public high school graduates from 1979 through 1995 are presented for each of thirteen western states Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. For each state, a four-page section presents detailed historical data, including annual birth patterns, population migration statistics, and rates of student persistence in high school major factors underlying the projections. Detailed enrollment projections are presented, along with analytical tables, and a comprehensive cohort graph. A brief written explanation accompanies each state section. A description of the report methodology is presented separately. The projections for each state (except Wyoming) show a common pattern including the following elements: (1) a peak in enrollments between 1975 and 1982, (2) a significant decrease from that peak to a low point in the 1984-86 period, (3) an increase until 1988 or 1989, (4) a decrease to another low point in 1990 or 1991, and (5) an increase to 1995, the last year of the projection. This basic pattern is the same as that for the country as a whole. However, in the West, projected graduates remain below the 1979 peak throughout the projection period but not nearly so far below as for the United States as a whole. (DR)

Learner Characteristics and Performance Effects in Self-Paced Instruction for Community College Students.

Pub Date- 79
Note-12p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Academic Achievement, Community Colleges, *Individualized Instruction, *Junior Colleges, *Junior College Students, Pacing, Student Attitudes, Student Characteristics, *Teaching Techniques, Time Factors (Learning)
Identifiers-*Self Paced Instruction

A study was conducted to assess the impact of self-paced instruction on community college students enrolled in an introductory psychology course. Self-paced instruction'' was operationally defined as learners working at their own rate toward standard objectives set by the instructor. Seventy-eight students were enrolled in three sections of the course; each section was randomly assigned to one of three types of instruction: Traditional, Modified Self-Paced, and Self-Paced. Teaching format, amount of time spent in structured class setting, and level of instructor interaction with the class varied with each group. All students were administered a series of personality, intelligence quotient, and attitudinal tests. In addition, they completed pre- and post-test cognitive examinations on course content and attitudinal questionnaires. Characteristics of students in each group were compared, and although students in the traditional group were older and worked more hours, these differences were not found to be statistically significant. Results indicated that while community college students have the cognitive ability to meet the demands of various instructional strategies, they showed a definite preference for a traditional format when compared to the other two approaches. The study also revealed significant attitudinal changes across the treatment groups, with the traditional group yielding the most positive changes. (DR)

Identifiers-Program Approval

The informational and procedural requirements of 30 states for approval of new educational degree programs in community colleges are outlined in this report to the National Council of State Directors of Community/Junior Colleges. A detailed table lists 36 potential elements of program proposals, such as program title, goals, and objectives; students' characteristics and needs data; admission and student selection criteria; enrollment projections; costs and income data; course descriptions; personnel, library, and equipment needs information; and evaluation plans. The table indicates what descriptive information is required by each state to support requests for approval of new programs. A subsequent section indicates to which state agencies or officers the program proposals are submitted for review and approval. Procedures and deadlines for submission of proposals are outlined, and the summary for each state may include information on the ways in which new program proposals are implemented and evaluated. A final section covers the educational requirements for the associate degree and certificate programs currently offered in each state, frequently listing the purpose or orientation of the degree, the total number of course hours required, and hours required in various subject areas. Identifiers-Basic Educational Opportunity Grants, California, College Work Study, National Direct Student Loan Program

A staff report on the availability of financial aid funds to students in California was presented to the Board of Governors of California Community Colleges and includes 13 recommendations for action. The report indicates a continuing increase in federal aid funds since 1955, with over $8 billion available in 1978-79. A review of federal and state programs, such as Basic Educational Opportunity Grant (BEOG), College Work Study Program (CWS), National Direct Student Loan Program (NDSL), and the California Guaranteed Student Loan Program, covers regulations as they affect aid operations, identifies problems and their potential impact, and provides explicit examples of such problems. Recent developments in financial aid are described including the work of the Student Financial Aid Policy Study Group, federal demands for accountability, and staff concerns regarding the effects of Proposition 13. Underutilization of funds is cited as a major concern and a list of contributing factors is enumerated. The effects of the possible imposition of tuition fees is examined including what amount students would pay and how fees will affect aid financing. A description of features and effects of the Middle Income Student Assistance Act (MISAA) concludes the report. A chart listing distribution of BEOG awards by college is appended along with related policy documents and regulations. (DR)

Montgomery College Student Follow-Up Study: First-Time Students, Fall 1974.

Montgomery Coll., Rockville, Md. Office of Institutional Research.
Pub Date-Feb 79
Note-88p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC04 Plus Postage.
Descriptors-Academic Aspiration, Age, College Majors, Community Colleges, Educational Background, Employment Patterns, Ethnic Groups, Females, *Followup Studies, Graduate Surveys, Institutional Research, Junior Colleges, *Junior College Students, Males, *Participant Satisfaction, Part Time Students, Relevance (Education), *Student Characteristics, Transfer Students, *Vocational Followup

A follow-up study of Montgomery College students was conducted to determine the extent to which the college assisted students in achieving educational goals, developing career plans, and preparing for transfer to senior institutions. The survey, conducted in 1978, gained responses from 1,840 of the 4,881 first-time students enrolled in Fall 1974, including transfer, career, and special'' (undecided major) students; part- and full-time students; and high school graduates and non-graduates. The questionnaire covered demographic data, goals at college entry, current employment status, transfer status, and satisfaction with the college. Results were compared with similar studies of first-time students of 1970, 1971, and 1972, and also to a statewide 1974 sample. The percentage of special'' students had increased since 1971 and was higher than statewide averages (38% vs. 16%), suggesting a need to reevaluate entry classifications. Respondents were older than in previous studies, more likely to be female, and more frequently transfer-oriented. Of those students currently employed full-time, 73% were in jobs related to their training. Two-thirds of survey respondents indicated they achieved their goals while at college, and 88% reported they would recommend the college to a friend. Minority students in particular (24%) cited job/study conflicts as a reason for leaving college. (DR)

Identifiers-*Student Objectives

Students (N 2,780) enrolled in Montgomery College's Community Services Program (MCCSP) in non-credit, continuing education courses during Fall 1978 were surveyed to identify the population being served by the program; the extent of their satisfaction with it and its relevance to their employment; how they learned of the courses; and their future course needs. Respondents (74% of those surveyed) were compared to the Montgomery County population in general, and to 16,770 individuals who were enrolled in a non-credit course in October 1978, and who responded to the same questionnaire administered statewide. The typical MCCSP student was female (63%), between 25 and 44 years of age (55%), a United States citizen (95%), white (90%), and employed full-time (58%); had earned a bachelor's degree or higher (51%); and was likely to be employed in a business-related, service, or government occupation. The MCCSP sample tended to be younger and better educated than the statewide sample. Half of the MCCSP students and 55% of the statewide respondents were ``extremely satisfied'' with the courses, citing ``quality of instruction'' most frequently as the reason. ``Inconvenient location of courses'' was cited most often as a reason for dissatisfaction. MCCSP students were more likely to have enrolled for career-related reasons. (DR)

Descriptors-Collective Bargaining, College Administration, *College Faculty, *College Governing Councils, Community Colleges, Conflict Resolution, Decision Making, *Faculty Organizations, *Junior Colleges, *Policy Formation, School Surveys, Teacher Administrator Relationship, *Teacher Attitudes, Teacher Role

A study was undertaken at Harrisburg Area Community College (Pennsylvania), a non-unionized institution, regarding the function and effectiveness of the Faculty Council in policy formation and decision-making. A three-part survey covered the role of the Council in policy-making, the function of standing committees, and possible alternative representative structures. Seventy-one full-time faculty (62%) completed the form. Of the respondents, 75% felt the faculty had a more limited role than administration in policy formation and 64% believed the faculty role should be expanded. A slight majority (51%) indicated that faculty standing committees did little meaningful work, but 56% also responded that committees were ineffective due to lack of participation by members. Comments made by faculty to open-ended questions in the survey also cited apathy on the part of some faculty as a reason for lack of committee effectiveness. Regarding alternative representation arrangements, 48% of responding faculty felt that an off-campus collective bargaining agency would not be more effective than the Faculty Council in resolving crisis situations. Forty-eight percent felt collective bargaining would not enhance faculty position in decision-making; 41% indicated it would. The survey form is appended. (DR)

The Impact of Values on the Community College Curriculum: A State of Double-Bind.

Pub Date-78
Note-12p.
Pub Type- Information Analyses (070) - Opinion Papers (120)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors-*College Curriculum, Community Colleges, Educational Discrimination, *Educational Objectives, Educational Philosophy, *Junior Colleges, Middle Class Values, *Observational Learning, Socialization, *Social Values, Teacher Attitudes, Teacher Influence

An investigation of interdisciplinary sources dealing with social values and the college curriculum reveals numerous examples of a double-bind'' situation, in which mutually contradictory signals are transmitted to the student. One example is the discrepancy between the stated purposes of the community college, as contained in its catalog and overt curriculum, and the covert curriculum, with its attendant values, that the student actually experiences. Although community colleges have accepted the traditional philosophy of value-free,'' objective education, charges were made during the 1960's that colleges and universities had abandoned neutral positions on controversial issues students began to articulate the discrepancies between the overt and hidden curricula and descry conflicting values in education. In and out of the classroom, consciously and unconsciously, values are transmitted through moralizing, modeling, laissez-faire attitudes, and values-clarification techniques. Studies have indicated that the attitudes and personalities of teachers have more influence on students than the subject matter taught. Unfortunately, studies of the community college instructor have revealed that their attitudes toward the educationally disadvantaged student are somewhat negative, and that middle class values are deeply entrenched in the institution as a whole. Numerous obstacles impinge on the possible resolution of the problems of the impact of values on the curriculum. (DR)

Identifiers-Hawaii

In order to facilitate the lifelong process of career development and to integrate the resources of the public educational institutions in Hawaii, the goals and learner objectives for the state's community colleges were developed in consonance with those of the Hawaii Career Development Continuum for grades K-12. The four major goals for career development are to help the individual: (1) achieve self-realization through the development of communication skills, clarification of personal values, and development of skills in decision-making and goal-setting; (2) establish and maintain healthy social relationships; (3) maintain economic efficiency as a producer and consumer of goods and services; and (4) fulfill civic responsibilities. Subgoals and learner objectives were developed for each of the major goals at three functional levels awareness, accommodation, and action. The study report presents in a chart the goals, subgoals, and specific skills and activities that should be successfully accomplished at each of the following grade level units: K-3, 4-6, 7-9, 10-12, 13-14. Additionally, the rationale for extending the Career Development Continuum to the community college level and underlying assumptions about the nature of career development and about effective implementation strategies are presented. Three papers focus on problems of women in higher education. The lead article by Janice Brandstrom presents a model plan to recruit and retain more women in non-traditional vocational programs, and to assist women in obtaining related employment after completion. It describes a five-phase Career Development Program including suggestions for recruiting activities, courses and programs, counseling and support services, and job placement programs. Carol Gross reports enrollment data in terms of unduplicated headcounts for fall 1971 and 1976 for 13 Oregon community colleges. Following nationwide trends, female enrollment increased from 48% of the total in 1971 to 56% in 1976. The percentage of females over 24 years of age increased from 33% to 58%. Helen Remick describes personnel audits conducted for Higher Education Personnel (HEP) and State Department of Personnel (DOP) positions in Washington in 1973 to establish comparable salaries for comparable jobs. The results presented are for HEP only and indicate that women's'' jobs (those where at least 70% of persons holding the job are female) did not receive compensation in the same manner as men's'' jobs (where at least 70% of persons holding the job are male). At the lowest level, women received $150 less per month; at the highest level, the difference was about $400 per month. The salaries of women's'' jobs averaged 75% of those of men's.'' (DR)

Note-8p.
Pub Type- Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Administrator Responsibility, *Administrator Role, *Board Administrator Relationship, *Chief Administrators, Community Colleges, *Junior Colleges, Leadership Responsibility, *Occupational Information, *Presidents

While numerous authors have addressed the subject of the college presidency, the literature does not contain an up-to-date job description of the community college president or the school district superintendent. A job description for the Superintendent/President as Executive Officer for the Board of Trustees would need to include a general statement of administrative relationships; the President/Superintendent will enforce all rules and regulations adopted by the Board, be subject only to the Board, have authority over all other Board employees, and represent the Board in all matters involving law and legal procedure. The description would also state the powers and duties of the office in the following areas: advisement to the Board, execution of Board policies, keeping informed of college programs, interpretation of college/district needs, improvement of instruction and programs, development of community relations, participation in community activities, and nomination of candidates for staff positions. Additionally, he has responsibility for operating costs, facility construction and repair, annual budgets, fiscal operations, information dissemination, regulations governing students, and instructional methods. Descriptors-Administrative Change, Administrative Policy, *Administrator Attitudes, *Changing Attitudes, College Administration, Community Colleges, Evaluation Criteria, Job Satisfaction, *Junior Colleges, *Management by Objectives, Management Systems, Organizational Climate, *Program Evaluation

An administrative program based on Management by Objectives (MBO) was instituted at William Rainey Harper College in 1969 and evaluated in 1973. The evaluation instrument used in 1973 was re-administered in 1977 in order to determine the effectiveness of the current MBO program and administrators' perceptions and evaluations. Subsections of the survey form, completed by 36 Harper administrators, included general evaluation of and commitment to MBO; formulation and implementation of objectives; appraisal process; perception of supervisor; and description of job, self, and institutional organization. Responses were compared to 1973 responses and the percentages of difference were tabulated. Results indicate that administrators of the MBO system at Harper College in 1977 were not as satisfied as those in 1973. There was a decrease in positive perceptions in the seven areas surveyed. Respondents indicated that MBO did not help them in planning; and that little supervisory assistance existed. A significant percentage of respondents stated that their job satisfaction had decreased over the four-year period and a large percentage perceived no increase in personal job effectiveness. A literature review is included and the survey instrument is appended. (DR)

There are several signs that a college can use to determine if a program needs evaluation from a consumer point of view. Answers to the following questions can be very revealing: How many students start the program per year? How many graduate per year? What do they do when they graduate? How much money do they make? How long do they remain in the job related to their training? What do employers say about the graduates? Finding the answers to these questions can help the college determine if a program should be supported, modified, or discontinued. Such an evaluation of the Dental Assisting program at Parkersburg Community College (PCC) was instigated when the enrollment and graduation rates began to steadily decline. The evaluation found that although the training was good, it was not necessary because those dentists who used dental assistants gave them extensive on-the-job training and did not consider prior training essential. The program was eventually phased out. In another instance, an evaluation of the Welding Technology program at PCC revealed that despite the low graduation rates, which had been of administrative concern, the program was meeting the training needs of students for an entry-level position. The student consumer is becoming very selective and often uses the stop in-stop out'' pattern of attendance to gain the education he/she wants. (AYC)

Identifiers-*Affiliation Agreements

In 1968, an affiliation agreement was developed between Spartanburg Technical College (STC) and the first clinical site that provided the medical and health laboratory facilities necessary for the on-site training of STC's allied health science students. By 1978, a number of administrative and policy changes that had taken place at Spartanburg and its clinical practicum sites necessitated the revision of the affiliation agreement. The revised agreement was based upon American Medical Association guidelines, recommendations by STC administrators and faculty, and major input from appropriate hospital officials. The agreement covers the educational and program administration responsibilities of STC, which include determination of curriculum and course content and maintenance of library and instructional materials and the rights and responsibilities of the clinical sites. Several items were deleted from the original agreement due to the financial restraints which prevented the hospitals from continuing to provide certain services to the students. This paper contains copies of both agreements, a bibliography, and a literature review which discusses legal definitions and justifications for written agreements and considers the opinions of medical and educational associations with regard to respective responsibilities in clinical affiliations. Instructional Facility Utilization.
Kalamazoo Valley Community Coll., Mich.
Pub Date-Jun 79
Note-26p.
Pub Type- Reports - Research (143) - Numerical/Quantitative Data (110)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-Classrooms, Class Size, Community Colleges, *Facility Utilization Research, *Junior Colleges, Laboratories, School Space, *Space Classification, *Space Utilization

Data describing campus facility use for instructional and related purposes for one week of activity in Fall 1978 were collected and evaluated at Kalamazoo Valley Community College. Four measures of space utilization were used: (1) percent of available time used; (2) percent of available space used; (3) percent of scheduled space utilized; and (4) percent of scheduled capacity utilized. Rooms were categorized as classroom, standard laboratory, open (free-access) laboratory, and combination laboratory (with multiple use). Three time blocks were established: Block 1 included Monday (M) through Friday, 8 a.m. to 4 p.m. and M through Thursday (T), 6 p.m. to 10 p.m.; Block 2 included M through T, 4 p.m. to 6 p.m.; and Block 3 included Saturday, 8 a.m. to 12 a.m. Time use was recorded in minutes. Percentages were computed by comparing the minutes the rooms were available in each of the time blocks to the minutes actually scheduled, and by computing room enrollment capacities with enrollment figures. Results indicated that open laboratories had the highest percentage of utilization of available minutes (83.2%). Standard laboratories had the lowest utilization rate (37.2%). Combination labs had the highest design (enrollment) utilization (80%), standard laboratories ranked second (72.6%), and classrooms ranked third (50.2%). Time Block 2 had between 5% and 6% utilization for classrooms and standard laboratories. (DR)

Stevenson, James A.

Materially Disadvantaged Students and the Transfer Function of Community College.

Pub Date-14 Jul 79
Note-7p.
Pub Type- Opinion Papers (120) - Information Analyses (070)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Academic Achievement, Academic Failure, Community Colleges, Developmental Programs, *Dropout Prevention, *Economic Disadvantagement, *Educationally Disadvantaged, Junior Colleges, *Junior College Students, Low Achievers, School Holding Power, Student Needs, Transfer Students

A number of sources have focused upon the lower socio-economic category of community college students and their success in completing a four-year college program. Some are pessimistic, claiming that very low percentages of two-year college students ever graduate from four-year college programs, and that most who drop out are from low income groups. Some sources explain these percentages with reference to the stop out'' phenomenon, others refute the contentions. Statistics show that, as of 1968, 49% of all community college students, but only 12.7% of transfer students, came from families with yearly incomes of less than $10,000. If the matrix of educational disadvantages and low educational aspirations can be broken by an educational institution, then the community college is in one of the best positions to do so. However, such an effort requires greater sensitivity on the part of college personnel, and specific programs to address the needs of economically disadvantaged students. One such effort was undertaken at Macomb County Community College. Almost 400 students from lower socio-economic families were placed in a highly structured, but autonomous, program of regular liberal arts courses. They were taught by 14 instructors and took their courses in blocks of time which kept them together as parts of small cohesive groups. The persistence rate of these students was much higher than that of the student body as a whole. (AYC)

Intended for use in adult basic education programs (ABE) by faculty members of Des Moines Area College, this annotated bibliography reviews textbooks and instructional materials in four coded categories: remedial language (coded R), English language and writing skills (L), arithmetic and mathematics (M), and teaching English as a second language (ESL). The remedial section stresses phonics and reading and includes some basic science and social studies materials. English and writing skills involve sentence construction, grammar, and vocabulary. The mathematics section covers basic operations, some geometry and algebra, and arithmetic in practical situations. English as a second language stresses vocabulary and conversation skills. Each item is structured to include document title, publisher, text format, general content, and reviewer's comments. Each category includes at least thirty references, and the materials reviewed offer a content range from remedial and elementary grade levels to high school and college levels. General Educational Development materials, designed to prepare students for the High School Equivalency exam, are also reviewed. Many resources incorporate practical and functional living skills, such as consumer awareness, career and job planning, and health and safety into their content areas. (DR)

Descriptors-Budgeting, Community Colleges, Correctional Education, Degrees (Titles), *Educational Finance, Educational Objectives, Equalization Aid, Expenditure Per Student, *Finance Reform, *Financial Support, *Incentive Grants, Job Training, *Junior Colleges, Mathematical Formulas, Occupational Guidance, Remedial Programs, Rural Schools, *State Aid, Statewide Planning, Tax Allocation, Tuition Grants, Vocational Education

Identifiers-*Guastello Zollar Formula, *Michigan

The Guastello-Zollar funding formula provides a foundation of state financial support to community colleges based on a "fair share partnership" concept of funding and a program of investment/incentive grants awarded to encourage colleges to implement programs which have high priority in Michigan's educational policy goals. The fair share partnership is based on state aid revenue as a percentage of total General Fund revenues for community colleges in 1976-77 (the prior fiscal year) resulting in a state share of 44%, local tax share of 22.6%, student tuition share of 26.4%, and miscellaneous revenue support of 7.0%. The formula equalizes state share based on average expenditures per student; equalizes local tax share based on regional ability to pay; and provides tuition relief when both tuition and local effort equals or exceeds state averages. The seven investment/incentive grants which may be awarded are: (1) Program Completion Grants, which are based on the number of degrees awarded; (2) Career Education Grants, which are based on commerce degrees and technical certificates; (3) Service Area Grants, which aid remotely located schools; (4) Remedial Program Grants, which encourage remedial education; (5) Target Training Grants, which promote special occupational skill training; (6) Student Counseling Grants, which encourage career planning; and (7) Prison Program Grants, which provide postsecondary education to inmates. Funding formulas are provided. (DR)

Academic Performance of L. A. C. C. Transfers to California State University at Los Angeles, 1977-78. Research Study Los Angeles City Coll., Calif.

Pub Date-Jun 79

Note-12p.

Pub Type- Reports - Research (143) - Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Academic Achievement, Academic Failure, *College Majors, Community Colleges, Grade Point Average, *Grades (Scholastic), Junior Colleges, Postsecondary Education, *State Universities, *Transfer Students

In order to assess the academic performance of transfer students from Los Angeles City College (LACC) to California State University, Los Angeles (CSULA), grade point averages (GPA's), completion rates, and departmental differences were calculated. Findings were based on first quarter grade reports for 691 students entering CSULA in 1977-78. Of the 691 entrants, 561 (81%) completed some work. The first quarter GPA earned by the 561 entrants was 2.47 0.18 grade points below their LACC average of 2.65. Thirty-nine percent of the students earned a B'' average or better at CSULA; 22% fell below a C'' average. Students in Engineering (3%) earned the highest GPA at CSULA (2.72), while students in Business (22%) and Education (1%) had the most difficulty, earning GPA's of 2.21 and 2.04, respectively. Highest averages (3.0 or better) were earned in courses in Music, Physical Education, Engineering, Pan-Afro Studies, and Art. Lowest averages occurred in courses in Counselor Education, Economics, and Criminal Justice. Since 1957, the GPA earned by new LACC transfers to CSULA has ranged from 2.36 to 2.60, with the differential between CSULA and LACC GPA's ranging from -0.18 to +0.21. The -0.18 differential in 1977-78 was apparently due to unusually high LACC GPA's. The number of 1977-78 transfers increased in 1976-77, stemming a five-year downward trend. (DR)

Descriptors-*Budgeting, Case Studies, Community Colleges, *Educational Finance, Expenditures, Financial Problems, *Financial Support, *Junior Colleges, *Retrenchment, State Aid, State Surveys, Tax Support, Tuition

California's community college system has depended heavily on property taxes, which have been reduced almost 60% by the recent Jarvis-Gann amendment. A statewide study sought some indication of responses to these constraints that might occur in community colleges. Summaries of budget reductions and other actions taken were compiled in 1978 for six community colleges varying in age of institution, total enrollment, geographic locale, and sources of financial support. These summaries indicate that the colleges' major responses were general budget reductions across all programs and activities. Four of the colleges experienced budget reductions ranging from 3.8% to 11.05%; two managed small increases in annual budget. Where reductions were insufficient, colleges cut community-service activities, eliminated evening and weekend classes, spent excess reserves, or deferred major expenditures for maintenance or compliance with federal regulations, e.g., handicapped access provisions. The result, for the present, is roughly the same mix and level of services, although convenience of offerings and college autonomy have been reduced. As salaries will have to increase and state support and enrollments will probably stabilize or decline, it is likely that colleges will have to further reduce services or charge tuition. (Author/DR)

Descriptors-Adult Basic Education, Community Colleges, *Instructional Materials Centers, Instructional Media, *Junior College Libraries, *Junior Colleges, Learning Laboratories, Librarians, Library Facilities, Library Programs, Library Role, Library Services, *Program Evaluation

The library-college'' philosophy conceives of a library as a total educational resource, that (1) fully uses media and instructional aids; (2) stresses independent study; (3) encourages teachers and librarians to share instructional and bibliographic duties; and (4) aids students in achieving competency in reading, speaking, and critical thinking. There is disagreement in the literature over the viability of the library-college concept, however, with several writers maintaining that any student with learning disabilities cannot utilize independent study techniques, and that the professions of teacher and librarian should remain distinct and specialized rather than integrated. A case study approach was used at Long Beach City College (LBCC) to evaluate the library-college program initiated there. LBCC, a two-year community college offering vocational and Associate of Arts degrees, merged four departments, the library, Media Services, Learning Centers, and Basic Adult Education, into the Learning Resources Division. All media are actively used and early studies indicate that students seem to benefit from this coordinated approach. Although librarians spend an increasing amount of time teaching, teachers and librarians do not share functional duties. Independent study is not stressed in the program as LBCC students are believed to require a more structured learning environment. (DR)

Descriptors-Academic Education, Associate Degrees, College Curriculum, *College Programs, Community Colleges, Educational Certificates, *Educational Programs, *Junior Colleges, *Master Plans, *Statewide Planning, Vocational Education
Identifiers-*California

The number and distribution of all academic and vocational programs offered in California community colleges in the academic years 1971-72 through 1977-78 are presented according to major Classification of Instructional Disciplines (CID) groupings. The program areas covered are agriculture and natural resources, architecture and environmental design, regional studies, biological sciences, business and management, communications, computer and information science, education, engineering and related fields, fine and applied arts, foreign languages, health services, home economics, law, letters, library science, mathematics, military studies, physical sciences, psychology, public affairs and services, social sciences, commercial services, interdisciplinary studies, and apprenticeship. In 1977-78 the largest number of programs was offered in engineering and related fields, and in business and management (the latter accounted for 17.7% of all new programs). Pre-Proposition 13 projections, which did not take into account limitations on local property tax funds available for community college support, indicated that the number of new programs was expected to be 1,851 by 1984, which would increase the 1977-78 figure by 24.9%. Charts list all existing, deleted, and planned programs at the state's 104 community colleges and whether each program is certificate or degree. (DR)

Vocational Education Operational Policies: Supplementary Information for the Implementation of the Education Amendments of 1976 Title II, Vocational Education (P.L. 94-482 and P.L. 95-40).

Descriptors-Community Colleges, *Educational Finance, *Eligibility, Federal Aid, Federal Legislation, *Federal Regulation, *Financial Support, *Junior Colleges, Program Budgeting, Program Development, *Vocational Education
Identifiers-*Vocational Education Amendments 1976

These guidelines for expenditures in vocational education programs were designed to provide assistance to community college districts in determining the types of expenditures allowable under PL 94-482 and PL 95-40, Title II of the 1976 Education Amendments on Vocational Education. General information is provided on maintenance of effort or per student expenditures, supplanting of funds, and use of matching funds and in-kind contributions. Formulas are provided for determining pro rate students, excess costs, and administrative and personnel costs, as well as methods for allocating matching funds. Allowable uses of basic grant funds are outlined in the areas of improvement, expansion, new manpower and program needs, and maintenance of effort. Specific activities which are fundable under various subparts of the Vocational Education Act are described, including activities relating to program administration, sex fairness, non-English-speaking students, economically and educationally disadvantaged students, handicapped students, and programs for economically depressed areas. General guidelines are provided for Cooperative Vocational Education Programs, Work Study Programs, Support Services for Women, Guidance Counseling and Placement Services. The guidelines explain appropriate activities, use of matching funds, and required documentation. (DR)

Foster Parent Training Project: Final Report.

California Community Colleges, Sacramento. Office of the Chancellor.

Identifiers-California, *Foster Parent Training Project, *Parenting

In 1978, the California State Department of Social Services issued a contract to the Los Rios Community College District to develop training programs for foster parents, prospective foster parents, and agency workers throughout California. Twenty-one California community colleges participated in the Foster Parent Training Program (FPTP) in Spring, 1979. Each college structured its program differently, some utilizing workshops and mini-courses, others offering quarter-long certificate programs. Course topics, covering a wide range, included parent effectiveness training; discipline; communication skills; alcohol, drug, and child abuse; dealing with behavior problems; and the role of community licensing and support agencies. Evaluation reports, compiled at the conclusion of the Spring program, are presented for each participating college. They outline planning and implementation strategies, participant recruitment activities, course descriptions, and final evaluations. Appendices list state advisory committee members, project directors at each site, and course and participant statistics. Also appended are selected samples of course announcements, course outlines, and bibliographic and audiovisual materials, as well as survey and evaluation forms used at some of the colleges. (DR)

Identifiers-*Washington

A description of current activities in instructional computing in Washington State community colleges is presented, along with curriculum content guidelines and planning procedures to assist colleges which plan to initiate or upgrade their activities in instructional computing. The document provides an overview of computing activities in the entire system and profiles 28 individual colleges, describing courses that are directly related to computing, such as data processing and computer science, and courses that use computing in an ancillary fashion, such as those that use computer-based instruction, computer-managed instruction, and computer-assisted instruction. A description of resources and equipment maintained by each college is provided. A section on planning procedures outlines curriculum objectives and typical content for instructional courses which require access to computing facilities; and describes software, hardware, personnel, and other requirements necessary to meet stated course objectives. The final section presents resource specifications and acquisition procedures, including examples of cost analyses and cost summaries, which will permit the colleges to move from their present level of instructional computing to a more advanced level in a phased growth manner. A glossary of terms and a bibliography conclude the document. (DR)

1978-79 Recruitment & Retention Program.

Moraine Valley Community Coll., Palos Hills, Ill.
Pub Date-Nov 78
Note-23p.
Pub Type- Reports - Descriptive (141)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Access to Education, College Bound Students, Community Colleges, Dropout Prevention, *Information Dissemination, *Junior Colleges, Outreach Programs, Program Development, Publicize, *School Holding Power, *Student Recruitment, Teacher Participation

The Moraine Valley Community College (MVCC) 1978-79 Recruitment Program seeks to increase the pool of students who wish to attend college rather than compete more aggressively for those students who have already decided to participate in higher education. A special adjunct Retention Program has been developed to enhance the entire recruitment process. Both recruiting and retention activities are based on a set of guidelines that stress equality of educational access, availability of accurate information, program manageability, and full involvement of all staff members. Recruiting activities include high school visitations, field trips to bring students to MVCC, and newsletters. In addition, a new shopping center project'' locates college staff and informational displays in target area shopping centers, particularly in low income, racial minority communities. The MVCC Retention Plan involves associate deans, faculty, and students from individual departments in evaluating departmental retention rates and planning corrective strategies. A curricular improvement project is underway and a special effort is being made to advise and counsel students with undecided goals in order to decrease attrition. All the strategies used in the programs, with timetables and specific task assignments are presented in chart and diagrammatic form. (DR)

Identifiers-*Hand Held Calculators

The annual reports of five subcommittees of the American Mathematical Association of Two-Year Colleges' Developmental Mathematics Curriculum Committee (AMATYC-DMC) are preceded by a statement of goals for a remedial mathematics curriculum. The Hand-Held Calculator Subcommittee reported the results of a 12-item questionnaire distributed to college mathematics instructors to determine teacher opinion and school policy regarding student use of hand-held calculators, how their use should be taught, and how they affect students' interest and skill in math. The Testing Subcommittee report cites a recently completed analysis of a booklet of categorized multiple-choice test questions for instructor use. The Teacher Qualification Subcommittee surveyed existing requirements for two-year college employment of developmental mathematics teachers. To help develop programs and standards for curriculum at the two-year college level, the Minimum Mathematics Competency Subcommittee surveyed AMATYC members to ascertain which study topics they would require for graduation. The goals of the Evaluation Subcommittee are to identify similarities among existing programs and develop an evaluative tool to determine relative success of various developmental programs. Survey forms and tabulations are included for the reports on hand-held calculators, teacher requirements, and minimal competency. (DR)

Identifiers-Information Analysis Products

A review of recent major studies of two-year college developmental mathematics programs shows that there has been much experimentation in curricular offerings, course formats, and instructional approaches, including expanded content related to the students' major fields, and the use of short courses and mini-courses. However, while many instructors are experimenting with new approaches, the traditional classroom-lecture-textbook format remains the dominant mode of instruction. In addition, most programs rely on voluntary enrollment by students rather than outreach or recruitment and instructors are frequently assigned by random selection and rotation. Considerable inconsistency exists in college policies regarding the granting of academic credit for these remedial courses, with one study reporting two-thirds of nationwide community colleges offering credit. Two-year colleges need to design developmental programs to deal effectively with such problems as widespread avoidance of basic mathematics by students, inadequate achievement levels, and high attrition rates. In an effort to increase the effectiveness of their programs, colleges should consider the use of highly motivated and interested instructors, special preparatory training for these instructors, support for teachers to develop innovative instructional methods and materials, and close evaluation of remedial mathematics programs. Identifiers-Alaska (Southeast)

The University of Alaska (UAJ) consists of Juneau-Douglas Community College and Southeastern Senior College. Enrollment is predominantly part-time and largely concentrated in the community college. Personal interviews were conducted in May-June 1979 with 16 UAJ personnel and 50 citizens in six adjacent communities to identify local and University needs and to help develop recommendations for institutional improvement. Needs which interviewees identified included: programs and offerings in such fields as fisheries, forestry, and conservation of natural resources and energy; native programs to preserve and extend indigenous culture; preparatory courses for teaching, business, clerical, and engineering careers; more vigorous community planning and cooperation to strengthen UAJ's image; and aggressive student recruitment. Among 25 program and policy recommendations resulting from the interviews are the following: (1) reinforce commitment to high quality programs by evaluating teaching and through research activities; (2) develop a cooperative relationship with community agencies through conferences, vocational internships, and cultural programs; (3) survey local employment needs and opportunities to create a vocational education program consistent with the job environment; (4) expand the library as a resource center; and (5) improve campus services and facilities. Identifiers-*California, Extended Opportunity Programs and Services, Vocational Education Act 1975

Actions adopted in July 1979 by the Board of Governors of the California Community Colleges are outlined in six areas. The first section deals with the priorities that were established for Vocational Education Act (VEA) programs and presents a timeline that was adopted for program improvements and the provision of support services. This section also supplies the percentage of total budget allocation and actual funding levels of various program elements; e.g., curriculum, research, guidance, and evaluation. The second section contains recommendations relating to student financial aid that direct districts to review policy and staffing procedures and that encourage greater support from the Chancellor's Office and the Board of Governors. The third section, 1980-81 Budget Request and Mandated Functions,'' presents budget changes and priorities. The fourth section, part of the Community College Long-Term Finance Plan, reviews principles of capital outlay. The fifth section covers Title V revisions relating to the Extended Opportunity Program and Services (EOPS). The final action was the approval of Glenn C. Gooder as interim Chancellor for the system. Identifiers-*Machine Shorthand

In order to aid admissions personnel and teachers at Vermont College in enrolling, counseling, and motivating adult learners in machine shorthand courses, a set of checklists was developed to gather useful information about student goals, entry-level knowledge and skills, motivation, need for discipline, perseverance, and materials used. Checklists were administered to 18 students in day and continuing education classes at various times from course entry through the completion of the first semester. While early surveys emphasized gathering student characteristics and background data, later surveys addressed specific skills and the degree to which students had attained them or were experiencing difficulty with them. Recommendations were made for expanded use of the checklists, which include the establishment of a card index system to provide instructors and counselors with easy access to achievement information. Transferability of various skills, such as typing, is discussed, and the checklist forms and the text of a preparatory study are appended. (DR)

Identifiers-*National Labor Relations Board, *Unit Determination

In higher education collective bargaining litigation, the determination of which academic personnel will be included in bargaining units has resulted in many contradictions. Supervisory and managerial personnel have been included with faculty in some schools, and excluded in others. Law and medical school faculty, support staff, and part-time employees have encountered the same treatment; being welcomed among the faculty units at some institutions and categorically excluded at others. These confusing distinctions have occurred in both public and private

sectors and afflict multi-campus schools as well as single campuses. In reviewing these cases, however, certain criteria can be distilled that coordinate these seeming contradictions. The primary criterion at the base of unit determination is community of interest,'' a concept developed in the private industrial sector. The list of criteria for unit determination of the National Labor Relations Board includes similarity in earnings, benefits, work performed, and job skill requirements, as well as the desires of the affected employees and the institution's history of collective bargaining. There may, of course, be more than one appropriate unit, but only one is chosen; and both sides are tempted to include those whose union views are similar to their own. Each diverse group represented in a unit must be adequately represented. Relevant cases are cited. (DR)

The Cooling Out Function Reconsidered.

Pub Date- 78
Note-15p.
Pub Type- Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Academic Aspiration, Academic Education, *Academic Failure, College Bound Students, Community Colleges, Counseling Programs, Enrollment Trends, Failure Factors, *Guidance Counseling, *Guidance Objectives, *Junior Colleges, *Nontraditional Students, Postsecondary Education, Student Personnel Workers, Vocational Education, Withdrawal

Cooling out'' was identified in 1960 as a specific function of the community college in redirecting students who experienced academic failure. The soft'' cooling out process, which re-directs students into less demanding curricula or out of the college through counseling and advising rather than academic discipline, will increasingly become a reality in the four-year college and university as patterns of student attendance change. There are indications that many recent high school graduates who previously would not have attended college or would have attended a two-year institution are now entering four-year schools, and these students bring new goals, needs, and requirements. If patterns of student attendance change as suggested, three areas need to be reconsidered. First, each institution needs to consider the cooling out function and its appropriateness to the college's mission. Second, student personnel staff must be trained in academic advising and career guidance to strengthen the work done in these areas by faculty. Third, there must be options within the college curriculum to serve a diverse student body. Consideration must be given to alternatives to the traditional academic and liberal arts curricula to make remedial, professional, and career education more available, even within the four-year colleges and universities. The intent of this study was to determine the influence of selected independent variables on the graduating grade point average (GPA) of community college students in various programs of study. A sample of 483 students from one community college represented seven programs of study: Business Administration-General, Business Administration-Transfer, Executive Secretarial, Law Enforcement, Liberal Arts, Engineering Technology, and Nursing Education. Other independent variables compiled for each student included age, gender, marital status, career objectives, Scholastic Aptitude Test verbal and mathematical scores (SATV and SATM), and high school math and English GPA and background. Forward stepwise multiple regression analysis was used to identify the relative ability of the independent variable to predict the graduating GPA. Results indicated that each program had its own predictive character, since variables in the analysis were not selected uniformly for each program. Overall, predictors which consistently accounted for variance in GPA were high school English average, and SATV and SATM scores. Secretarial, and Nursing programs, marital status also appeared as a significant predictor of student success. A literature review and recommendations for use of findings in admissions and academic counseling are included. (DR)

Play Spaces for Preschoolers: Design Guidelines for the Development of Preschool Play Spaces in Residential Environments.

Descriptors-*Basic Skills, Curriculum, *Demonstration Projects, Early Childhood Education, *Educational Innovation, Elementary Education, Longitudinal Studies, *Models, Parent Participation, Program Coordination, *Program Validation, *Skill Development, Teacher Role

Identifiers-*Project Head Start

This paper describes a new Head Start demonstration project which will focus on the acquisition of basic educational skills at the preschool level (e.g. positive attitudes toward learning, attention control, language skills) and at the elementary school level (e.g. basic academic skills, attention, memory). The first phase of the project, scheduled for completion in FY'78, involves the identification of 15 Head Start programs with existing exemplary basic skills programs reflecting a coordinated emphasis on curriculum, parent involvement, teacher attitudes and staff training, and continuity between preschool and elementary school learning and between school and home experiences. Phase I emphasizes the refinement and documentation of these existing Head Start models. Phase II, beginning in Fall 1979, will involve the development and testing of a variety of basic skills programs in selected field sites. These programs will emphasize a coordinated preschool-elementary school curriculum. Phase III, scheduled for FY'79, will focus on two research objectives: (1) to support the development of two new basic skills models spanning the developmental period from preschool through Grade 6, and (2) to design basic research studies with potential educational applications. The proposal includes guidelines for implementing the programs, budget information, and a timetable for the project. (BD)

Descriptors-Arousal Patterns, Attachment Behavior, Aural Stimuli, *Child Abuse, *Emotional Response, *Infant Behavior, Mother Attitudes, Mothers, *Parent Child Relationship, Parents, *Premature Infants, Visual Stimuli

Identifiers-*Crying

This paper discusses a series of three studies investigating the influence of infants' characteristics and signaling behavior on parents. Videotapes of either smiling/cooing/gurgling or crying infants were used to elicit parents' physiological and affective responses. Measured physiological responses included skin conductance, heart rate, and systolic and diastolic blood pressure. A 10-item mood adjective checklist, a demographic information sheet and the Infant Temperament Questionnaire were completed by parents after the videotape presentation. It was found that images of crying infants elicited a pattern of autonomic arousal usually associated with response to an aversive stimulus. Reported emotional responses to the crying infant were consistently aversive. A crying infant identified as premature was perceived as more aversive than a full-term infant. Mothers of premature infants rated themselves significantly more happy, attentive, and alert than mothers of full-term infants. However, they found the image of the premature infant less pleasant than did mothers of full-term infants. Mothers of premature infants also were more physiologically aroused when viewing the premature infant than were mothers of full-term infants. Insofar as premature infants are more likely to be abused than those born full-term, the findings that premature infants increased autonomic arousal or are perceived as especially aversive when crying may have important implications for the understanding of child abuse. Descriptors-Age Differences, *Aggression, *Birth Order, Family (Sociological Unit), Family Planning, *Imitation, *Interaction, Play, *Prosocial Behavior, Research, Role Models, Sex Differences, *Siblings
Identifiers-*Agonistic Behavior, Dyads, Sibling Spacing

This study of the interaction between first- and second-born preschool-aged siblings in a naturalistic setting investigates imitative, prosocial and agonistic (aggressive) behavior in terms of age, sex and spacing variables. Thirty-four dyads of same sex siblings were observed for two 1-hour periods in their homes. The younger siblings averaged 20 months of age and the age interval between siblings was either large (2.5 to 4 years) or small (1 to 2 years). The sex of the dyad affected agonistic and prosocial behavior but not imitation. Males were more physically aggressive. Older females were more prosocial in their behavior than any of the other groups. Age of the children within the dyad affected agonistic, prosocial, and imitative behavior. Older children initiated agonistic and prosocial acts more often than their younger siblings. In response to agonistic acts, older children more often made a counterattack, whereas younger siblings more often submitted. Younger siblings imitated their older siblings more often than the older siblings imitated the younger. The interval between siblings had little effect on the patterning of interaction, although there were some indications that the small-interval male dyads were somewhat more negative in their interactions than the other groups. The findings of sex and age patterns and the high levels of interaction in all groups are discussed in terms of the potential importance of sibling interaction for social development. (Author/RH)

Identifiers-*Development of Head Start Profiles Program Effects, *Project Head Start National Evaluation Program

This paper provides an overview of a project (now in its formative stages) to develop Head Start measures of program effects on children 3 to 7 years of age. The program approach is distinctive in emphasizing evaluation of all aspects of children's development that may affect their overall competence in reflecting the concerns, views, and values of a broad range of persons, and in recommending that the proposed measures be processed differently with children from different backgrounds in order to generate a plurality of scales of development. Specific descriptions of desired characteristics of children were collected from parents, public school teachers, Head Start staff members and child development scholars. Also, research literature was viewed, and special studies were commissioned. More than 1700 characteristics were identified and aggregated to form six domains: (1) health and physical development, (2) cognitive development, (3) social-emotional development, (4) aesthetic development, (5) moral and ethical development and (6) life skills. These domains include 26 dimensions of development. All domains except (4) and (5) are recommended for inclusion as evaluation measures. It is proposed that these measures be used to assess children's developmental status and that program effects be evaluated in terms of the relative change in children's development resulting from the program. Standards of significant change would be set in terms of the maximum change affected by the consistently most effective programs in a particular dimension for particular groups of children. (SS)

Identifiers-*Childrens Defense Fund, Public Neglect

This book is the seventh Children's Defense Fund report on major problems facing American children at risk of placement or already placed out of their homes. The findings are based on a survey of child welfare and probation offices in a stratified random sample of 140 counties (27 with populations over 300,000, and 113 with populations under 300,000); a national survey of out-of-state placement policies; an in-depth examination of the child care systems of seven states; and detailed analyses of federal legislation, regulations, funding patterns, program administration, and program innovations. In addition to its recommendations for reforming the state and federal role, the report describes a range of successful programs and strategies that offer detailed guidelines for advocates. The report is organized in three major sections: Part I describes the destructive forms of public neglect often resulting in the isolation of children from their families and from the purview of responsible public agencies; Part II takes a comprehensive look at the state and federal role concerning children at risk of or in out-of-home placement; Part III is concerned with how to change the ways child care systems now respond to children without homes and the families of these children. Eberhardt, Nancy J.
Towards a Cognitive Approach to the Study of Culture Acquisition.
Pub Date-79
Note-32p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-*Anthropology, Child Language, *Cognitive Development, Cognitive Processes, Culture, *Models, *Research Methodology, *Research Problems, *Socialization, Social Science Research, Theories
Identifiers-*Culture Acquisition

This paper discusses the process of culture acquisition and recommends a new methodology for investigating this process. An examination of the relationship between culture acquisition and cognitive development is followed by a discussion of the way previous research has dealt with this relationship. It is argued that recent developments in linguistics and psychology, as well as in anthropology motivate a reexamination of current assumptions concerning what constitutes a feasible and productive approach to the study of culture acquisition. A new approach is advocated in which culture acquisition is a life-long process of adaptation to one's social and physical environment which is punctuated by periods of relative congruence between one's current theory of reality and the information currently available about that reality. Some examples of how this approach might be applied are provided, using as data research by Williams and Danziger on children's use of kinship terminology, supplemented by some original research data on children's use of honorifics (terms denoting respect). Finally, a summary of the critical issues in the culture acquisition process is provided along with specific recommendations for future research on the topic. (Author/BH)

This report includes the keynote address and summaries of discussions from three workgroups and the plenary session of a conference on youth development and families. The key address, ''Reflections on Youth and Policies for Youth'' by Martin Trow, presented a typology which categorized youth in terms of adequacy of financial resources and adequacy of socialization. The typology was used to illustrate how the focus of programs for youth may vary depending on the type of youth served. The address also included observations on labor markets for youth and relationships between local politics and federal programs. A summary of the discussion following the address is included in the report. The three workgroup dicussions concerned youth development and families, youth development within the context of the larger society, and theory of youth development. Topics discussed in the first workgroup included definition of the family, the diversity of research orientations on youth development and families, methodological issues in research, and a variety of substantive issues. Topics of particular interest in the second workgroup were the quality of youth service programs, local involvement, public schools, alternative conceptualizations of youth development, labeling of antisocial youth, and means of stimulating and funding innovative research. Of concern in the third workgroup were conceptual issues, stages, the role of culture, role diffusion, and socialization. The plenary session focused on research priorities. Included in the report is an outline of the conference agenda and a list of the participants. (SS)

Identifiers-New Jersey (Newark), *Philosophy for Children Program, Texas (Denton)

This essay reports the results of a preliminary evaluation of the effects of Matthew Lipman's Philosophy for Children program on fifth and sixth graders in the first year of the program's use in two settings. The program, which involves the use of a novel about children to promote discussion, attempts to engage elementary students in philosophical debate about such issues as the bases of moral decisions and the justification of one's beliefs. The study involved multiple conditions differentiated by setting (Newark, New Jersey or Denton, Texas), by teacher preparation (attendance or non-attendance at workshops), by student ethnicity (black, Hispanic or white), and by the amount of time students spent on the program materials. Also, comparisons were made with control groups not in the program. The student factors measured included curiosity, questioning, reading, listening comprehension, logical thinking, creativity, attitudes toward experimentation, and understanding of interpersonal relations. In addition, the teachers were surveyed about their attitudes toward the program. Data are presented in 16 tables and samples of test items are appended. (BH)

Descriptors-*Attention, Elementary Education, *Elementary School Students, Individual Differences, Males, *Reading Development, *Reading Difficulty, Reading Failure, *Reading Research, Reading Skills
Identifiers-*Distraction

The series of studies discussed here was designed to provide an extensive investigation into the hypothesis that reading disabilities and deficits in selective attention are related. Three studies were carried out on three different groups of children from first grade through sixth grade, and five different tasks were employed. Subjects were selected from a group of boys diagnosed as reading-disabled. IQs and scores on a standardized test of reading achievement were used as a basis for further selection. Controls were obtained from subjects' classrooms and the same exclusionary criteria were applied. The tasks used in the studies were among those previously used to measure the development of selective attention: visual and auditory forms of a central-incidental learning task, a choice reaction time classification task, a dichotic listening task and a short-term memory task with distraction. As a whole, the results appear to demonstrate that children who are poor readers are not more distractible than and do not have deficits in selective attention relative to comparison children. These studies examined averaged group effects. Individual differences should be studied as well as group means in order to further understanding of reading disability. (Author/RH)

Descriptors-Affective Behavior, Children, Elementary Education, Females, Grade 3, Longitudinal Studies, Males, *Parent Child Relationship, *Parent Influence, *Parent Role, *Physical Activity Level, *Play, Psychological Studies, *Sex Differences, Socialization

Sex differences in children's physical activity levels, and associations between girls' activity level, childrearing characteristics and parent-child play behavior were investigated in a quasi-naturalistic situation. As part of a longitudinal project, 144 third grade children were videotaped in a 1-hour play session with one of their parents. A variety of toys, ranging from active (for example, a set of styrofoam sabres) to sedentary (puzzles) was available for play. The videotapes were coded for behavioral and mood variables, and these scores factor-analyzed to produce four factors for children (Physically Active Play, Solitary Play, Buoyant Mood and Physical Contact Seeking) and four for parents (Sociable Play, Active Play, Talkative Play and Buoyant Support). There was no difference between girls and boys in frequency of Physically Active Play, but girls engaged in more Buoyant Play and Physical Contact Seeking, boys in more Solitary Play. Discussion of parental characteristics focuses on parents of Physically Active girls, although data for boys is provided in tables. These girls' parents tended to be non-conventional and to be lax rather than firm. Mothers were career oriented and did not emphasize household structure and orderly schedules. Fathers encouraged independence in their daughters. In addition, girls from small families were most likely to be physically active. Ratings of parent behavior in the play session indicated that the parents of physically active girls were themselves significantly more active than parents of less active girls. (Author/SS)

Descriptors-Children, *Communicative Competence (Languages), Dramatic Play, *Language Development, Language Research, Linguistic Competence, *Models, *Pragmatics, *Pretend Play, Psychological Studies, *Research Methodology, Role Playing
Identifiers-*Naturalistic Studies

This introduction to, and comment upon, a symposium on communicative competence argues that the appropriate unit of analysis in language development is communicative competence and proposes that the development of communicative competence can be studied usefully through observing children's communication during role play. Communicative competence is distinguished from linguistic competence by the former's emphasis upon the context of discourse and the judgments involved in making speech appropriate to context. Role play is suggested as a source of data because it is a natural activity for children, yet it involves them in situations which do not arise in their real lives (e.g., acting as doctors or parents) and is therefore a setting in which the extent of their knowledge of language use can be assessed. Some problems with this approach are noted briefly. Principles which have been established in other areas of developmental research, e.g., children's tendency to abstract the invariant features in a situation, are recommended as starting points for the proposed research program. The potential utility of this program for other areas of research is suggested and questions are raised about the function of role play in child development. (BH)

Identifiers-*Defense Mechanisms

This study sought to explore the possible relationship between parental style of psychological defense and children's social competence in 50 families in which one parent had been hospitalized for a psychiatric disorder. The children sampled were nine 4-year-olds, eleven 7-year-olds and thirty 10-year-olds. Based upon a formal analysis of the logical transformations inherent in various defense mechanisms, three levels of complexity of defenses were identified, along with a counterpart set of cognitive operations necessary for decoding these defense levels. It was hypothesized that children lacking the requisite cognitive skills to grasp the logical complexities of their disturbed parent's primary mode of psychological defense would be less socially adjusted and judged less competent than children who can understand the defensive transformations of their parent. The results indicated that children who, due to their cognitive immaturity, cannot decipher their parent's defensive strategies are rated by peers and fathers as less competent than children who can understand their parent's defenses. Furthermore, children with a parent who employs defense mechanisms slightly too complex for them to comprehend are significantly more socially incompetent than children whose cognitive structures are largely mismatched with or are far too immature to understand the complexity of their parent's defenses. Implications of these results for psychotherapeutic interventions with children and families are discussed. (Author/BH)

Identifiers-Impulsivity, *Verbal Mediation

In addition to the prominent characteristics of high activity level, three other criteria are often used in identifying and understanding the hyperactive child. These criteria are impulsivity and cognitive tempo, cognitive immaturity and verbal mediation, and self-esteem. The purpose of this study was to demonstrate that third, fourth and fifth grade boys identified by teachers as disruptive when compared to less disruptive classmates, would exhibit a discontinuous style of responding on a variety of cognitive tasks and would have lower self-esteem responses. Two control groups were composed of normal active and nondisruptive high activity students. Several tasks and inventories were used to investigate the three criteria thought to be associated with hyperactivity. Results indicated that teachers had clearly selected three groups of boys whose rated behaviors fell along an activity continuum with the high-activity manageable group falling midway between the normal and disruptive groups. Cognitive test results suggest that hyperactive boys have more difficulty modifying performance to meet situation demands. The disruptive students did not demonstrate expected impulsivity or verbal mediation behaviors. Disruptive boys rated themselves significantly lower in self-esteem than normal-active peers. Identifiers-Early Periodic Screening Diagnosis And Treatment, *Nurse Practitioners

This book tells the story of how one school system in a medically underserved community near Chicago conceived and implemented primary care health facilities in two of its schools to serve all the children of the school district. The key to the preventive health care plan is the use of specially trained school nurse practitioners and health aides to provide primary care under the direction of a local pediatrician. Part I of the book describes public health conditions in the Posen-Robbins Elementary School District prior to the introduction of the comprehensive health care program. The planning and implementation of the program are described. In Part II the program's School Nurse Practitioner Program is discussed. Doctors' views of the expanded role of school nurses and the doctor's role in school health are examined. The role and training of nurse practitioners is described in detail. Part III overviews school health programs in Cambridge, Mass., Hartford, Conn., and the island of Galveston on the Gulf coast of Texas. Part IV provides a view of particular school health program activities and settings. The final section indicates problems and possibilities for implementing comprehensive, preventive health care services for children and their mothers in the school. (Author/RH)

Changes in Conceptual Tempo Over Time: Development vs. Logical Familiarization.

Pub Date-Mar 79

Note-12p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (San Francisco, California, March 15-18, 1979)

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-Adults, *Age Differences, *Conceptual Tempo, Efficiency, Elementary Education, Elementary School Students, *Longitudinal Studies, *Mental Development, *Performance, *Performance Tests, Preschool Children, Reaction Time, Test Interpretation

Age-related and test-retest changes in reflection and impulsivity were investigated among preschool and school age subjects and senior adults. A study of each age group was conducted using either the Matching Familiar Figures test (MFF) or the Kansas Reflection-Impulsivity Scale for Preschoolers (KRISP). In all three studies the procedure was to administer the tests individually on four occasions separated by 10 to 20 days. Results are compared to normative MFF data which indicate a sequence of two strategic shifts with age: first, a shift from relatively fast, inaccurate (impulsive) responding to slow, accurate (reflective) response; and then a shift from slow-accurate (reflective) to fast-accurate (efficient) responding. Results of Study 1 resemble the normative data. In Study 2 only the efficiency shift occurred. The reflection shift is prominant in Study 3, while the efficiency shift, though present, is not by itself significant. Similar results were found in the test-retest comparisons. The occurrence of the same shifts at different ages indicates that the shifts in strategy occur not so much as a consequence of age-linked developmental changes in preferred strategies, but more as a consequence of the discovery of optimal strategies for a particular kind of task at a particular level of difficulty. The changes found in the normative data and in this study may be a necessary sequence of strategy development at any age. (Author/RH)

Descriptors-*Age Differences, Children, Cognitive Development, Cognitive Processes, *Knowledge Level, *Memorizing, *Memory, *Mnemonics, Psychological Studies, *Recall (Psychological), Research

In addition to the important role of memory strategies in mediating age changes in recall performance, it is clear that the permanent memory system (or information available in the knowledge base) exerts a significant influence on the acquisition and retention of information. Age changes in memory performance will be fully understood only through the investigation of the interrelationships among memory processes and the evolving knowledge base. It seems likely that the knowledge base can affect memory performance either ``directly'' or mediated via the operation of deliberate memory strategies. Research on verbal rehearsal and organization provides an example of the ``direct'' case. Given a stimulus list with a strong built-in organization (such as a set of taxonomic categories presented in a blocked fashion), children who are active and passive rehearsers show minimal differences in performance. Investigations of the mediated case concern the effects of stimulus familiarity on rehearsal and recall. Preliminary data suggest that extended familiarity with to-be-remembered materials, perhaps resulting in stronger inter-item associations in the knowledge base, may be critical for the maximally efficient execution of active rehearsal techniques. This and other findings suggest that the implementation of a deliberate organizational strategy is not content free, but rather depends upon the nature of the to-be-remembered material to which the strategy is to be applied. Identifiers-*Group Homes

This booklet is intended primarily to assist persons who are planning and administering group care home programs for children. The fast growth of group homes has increased the variety of resources that are available for children. It may be questioned, however, whether placement skills have kept pace with the increase in placement choices. This material, in briefly overviewing the history, optimal size, program differences, coed populations, placement criteria, staffing and examples of group home care, indicates what some of the group home variables are and how they affect a child in care. Identifiers-*Latin America, *United States

This monograph derives from a conference sponsored by the Fogarty International Center for Advanced Study in the Health Sciences. The goals of the conference were (1) to establish channels of communication between health care evaluators from different disciplines and from different countries in the Americas, and (2) to promote an exchange of information and experience in evaluation techniques: comparing approaches, methods, needed resources, difficulties, achievements, and failures. Of primary concern was the need for a current evaluation of maternal and child health services delivery systems and the implications of this evaluation for health professional education in the Americas. The monograph consists of five position papers on child health care, 10 papers on case studies involving different methods of evaluation and different types of child health care programs, followed by discussions, and two papers on uses of evaluation in education. The contributors, representing a variety of perspectives and backgrounds, include experts in evaluation, health care, social science research, education, policymaking, and economics. (Author/SS)

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Females, *Imitation, *Infant Behavior, Infants, *Language Development, *Language Rhythm, Males, Modeling (Psychological), Phonemes, Psychological Studies, *Sex Differences, *Social Reinforcement

The acquisition of imitative responses without reinforcement was investigated with infants by eliminating contingent reinforcement through the use of videotaped models. Twenty-nine male and female infants were randomly assigned to one of two groups, a Rhythmic Vocalization Group or a Conversation Control Group. Infants in the first group were shown a videotape of an adult female model repeating a novel phoneme in a sequence of sounds and pauses. Infants in the second group were shown a 10-minute videotape of a conversation in a daytime television drama. Trained observers behind a one-way vision mirror scored the frequency and duration of six types of behavior, including vocalization of the novel phoneme. Two types of data analyses were performed: a 2 (Treatment Group) X 2 (Sex of subject) X 3 (Repeated Sessions) analysis of variance, and an event sequential analysis to determine whether observed vocalizations at any lag significantly exceeded expectation. The general findings were: (1) no infant in the study imitated the novel phoneme or repeated the precise phoneme pattern; (2) data from the sequential analysis indicated evidence for imitation of the rhythmic component of the phoneme pattern; and (3) the type of stimulus presented had differential effects on males and females. Although there were no differences at pretest, following treatment males increased their vocalizations in response to the conversation videotape while females decreased their vocalizations. Identifiers-Damons Moral Judgment Measure, Ecological Validity, *Naturalistic Research, Spivack and Shures Social Problem Solving Measures

Two classrooms of first graders (n-40) were administered Damon's moral judgment measure, Spivack and Shure's social problems solving measure and Stanford-Binet vocabulary. Concurrently, two observers recorded in the children's school environment incidences of successful resolutions of interactions, amount of derogation, and the number of times a child was approached by peers. A positive relationship was predicted between moral development and frequency of success, proportion of success, and number of times the child was approached by others. Negative relationships were predicted between morality and frequency of unsuccessful responses, proportion of such responses, and derogation. The same predictions were made for social problem solving and the behavioral variables. Vocabulary was the disciminant cognitive variable; thus, no relationship to behavior was predicted. Results confirmed the positive relationship of the moral variable with proportion of successes and numbers of times subjects were approached by peers. Further, the predicted negative relationship between the moral variable and proportion of unsuccessful outcomes held. When vocabulary was partialed out, these relationships did not hold for social problem solving reasoning. As expected, vocabulary did not relate to competent social behavior. The results support moral judgment as an ecologically valid social cognitive construct. (Author/SS)

Identifiers-Pennsylvania (Philadelphia), *Project Follow Through, *Project Head Start

This 1977-1978 annual report of the Social Services Component of Early Childhood Programs within the School District of Philadelphia provides a description of the types and quantities of activities undertaken in five early childhood programs by the social service workers. Data were obtained from periodic reporting forms designed by the Early Childhood Evaluation Unit. The data focused on three areas of services: (1) the number of families requiring services and the number receiving assistance; (2) the frequency of contacts with families; and (3) the types of assistance provided to families. Social services were mandated in four of the five programs discussed in this report: Child Care (CC); Get Set Day Care (GS); Prekindergarten Head Start (HS); and Follow Through (FT). The fifth program, Parent Cooperative Nurseries, (PCN) was included by program request. Each program was able to attain either fully or partially its specific objectives or its performance standards. Within the programs' mandated social services, 88 social service workers made 85,181 contacts, of which 54 percent were with a parent or guardian, 35 percent were with other program personnel, and 11 percent were with community agencies. Social service workers focused primarily on admission and recruitment, children's attendance, and home-school liaison functions. Although insufficient data were obtained regarding the frequency of contacts with families in two programs (GS, FT), 85 percent of the families in the other two programs were contacted one to three times, and 15 percent were contacted four or more times a month or quarter. Descriptors-*Administrator Attitudes, Day Care Programs, Early Childhood Education, *Instructional Staff, Parent Participation, Preschool Programs, *Staff Improvement, *Supervisors, Supervisory Activities, Teacher Aides, *Teacher Attitudes

Identifiers-Pennsylvania (Philadelphia), *Project Follow Through, *Project Head Start

This report discusses the views of early childhood supervisory and instructional staff regarding staff development activities across 11 Early Childhood Education Programs in Philadelphia. A comprehensive staff development questionnaire was completed by supervisory personnel, teachers, assistant teachers and aides in the Spring of 1978. Cumulative data indicate that at least 60 percent of the teachers of all 11 programs, and 50 percent of the aides in nine programs, had five or more years of early childhood experience. Greater specific program experience was in evidence among Kindergarten teachers, Original Follow Through aides, Get Set Day Care teachers, assistant teachers and aides, and Prekindergarten Head Start aides, than among other program staff. Based on total responses from all programs, most teachers felt that staff development provided during the year resulted in moderate to great'' change in their classroom effectiveness. The majority of supervisors indicated that they spent the greatest amount of time suggesting activities and offering support regarding parent involvement. The majority of program staff indicated satisfaction with all supervisory services. Generally, assistant teachers and aides in all 11 programs indicated a greater willingness to participate in non-reimbursed staff development than did teachers. A large majority of the Parent Cooperative Nursery teachers, however, indicated a willingness to participate in non-reimbursed activities related to parent involvement.

The areas selected most frequently across programs for future staff development were improving the basic skills, social behaviors, creative arts, individualizing instruction, and learning disabilities/classroom management. (Author/MP)

This bulletin for kindergarten teachers comprises five papers about the use and value of play in the kindergarten curriculum. Topics discussed include the values of various pieces of indoor and outdoor play equipment commonly found in the kindergarten; the nature of young children and their learning; the definition of play; the teacher's role as manager, observer, designer, evaluator and leader of children's play; the use of experiences with clay, including personification of clay forms, to make children aware of their own developmental phases; and the use of play to stimulate children's thinking and improve their approaches to problem solving. These papers are intended to encourage kindergarten teachers to reexamine the kindergarten curriculum and incorporate some of the suggestions into their classes. A questionnaire for the reader's evaluation of the bulletin is included. (Author/SS)

This collection of articles, intended for kindergarten teachers, focuses on the importance of the teacher's relationship with parents and the need for parents to be active participants in their child's educational development. The first article reviews the literature and research related to parent/early childhood education, touches on some current issues, and suggests that parent education is a necessary prerequisite to parent involvement in the school program. The second article presents a systematic plan for parent-child involvement which includes conducting a needs assessment, drafting an overview, formulating a plan, initiating contact and evaluating the process. The final article describes how parents and others from the community incorporated to provide various language arts experiences for children in the kindergarten. (Author/SS)

Descriptors-*Beginning Reading, *Curriculum Planning, Early Childhood Education, Elementary School Curriculum, Elementary School Students, Language Development, Parent Participation, *Reading Instruction, *Reading Skills, *Teacher Role, Teaching Methods

This paper, a response to questions raised on state and local levels on reading in kindergarten, deals with insights required to teach early reading rather than daily reading activities for children. Sections briefly discussed are: A view of reading as a communication process; the importance of teacher sensitivity to individual differences in children's development; curriculum considerations (the importance of story reading, oral language use, speaking and writing experiences, understanding the organization of print, and a good assessment program); organization considerations such as planning, grouping, and activity areas; and the importance of encouraging parent involvement. Also included are a list of available bulletins and brochures for parents on reading, and a joint statement by seven professional associations of concerns about present practices in pre-first grade reading instruction, with recommendations for improvements. The viewpoint taken is that reading is broader than any one method, commercial program or narrow skills approach, and that reading instruction goes beyond workbooks and ditto worksheets which do not adequately provide for creative and individual achievement. Identifiers-*Get Set Program, Pennsylvania (Philadephia), Project Head Start

This report summarizes results of an evaluation of the Get Set Day Care Program in the Philadelphia public schools. The program, which provides child care services to low income families, has three purposes: (1) to enable parents or other caretakers of children to work, to receive employment-related training or education, or to receive social or health services; (2) to provide children, including the developmentally handicapped, with individualized care which contributes to their development and self sufficiency; and (3) to prevent or remedy neglect, abuse or exploitation of children and adults unable to protect their own interests, or to preserve, rehabilitate or reunite families. In 1977-78 the program operated in 76 sites and served 4,200 children, primarily between the ages of 3 and 5. The aspects of the program examined and the measures employed were (1) child development (classroom observation, a developmental status checklist and the school achievement record of past participants), (2) social services (the number of social workers' contacts with staff and parents), (3) psychological services (members of referrals and services for developmental delay; speech, language and hearing difficulties; mental retardation; abuse and neglect; and medical or physical problems), (4) health services (screenings, treatment, health education and meals), (5) staff development (supervisors', teachers', assistants' and aides' perceptions of quantity and utility of on-site demonstrations and assistance) and (6) parent involvement (attendance at meetings and participation as volunteers). Identifiers-Get Set Program, Pennsylvania (Philadelphia), Project Follow Through, Project Head Start

This report describes in detail the health services of three Philadelphia programs which have mandated such services (Original Follow Through, Get Set Day Care, and Prekindergarten Head Start). It also highlights the services provided in the other eight early childhood programs in the Philadelphia school district (Child Care, Durham Child Development Center, Follow Through Expansion, Impact Aid, Kindergarten, Parent Cooperative Nursery, Primary Skills, and Project Bridge). Data indicate that although the method of health service delivery may differ among the various programs, provisions have been made to ensure that children's health problems are identified, referrals made, and treatment provided whenever necessary. The findings suggest that because of a more concentrated effort on the part of the school district's division of school health services and the program health staff, a greater number of children in the early childhood programs were served in 1978 than in the previous year. Appendices present data on the health services provided by the Follow Through, Get Set, and Head Start programs. (Author/BH)

This pamphlet provides guidelines for hospital play and recreation programs for children. A rationale for providing play activities for hospitalized children is developed and an administrative perspective on play in the hospital setting is Presented. A hospital play program initiated in 1957 by the Play Schools Association at an initial equipment cost of $1,000 is described. The way the Outpatient Department Play Project was planned and implemented when special monies became available is indicated. Special attention is given to the use of the Traveling Toyery,'' a movable toy cart, and standards for selecting good toys for children. Guides and suggestions for volunteers who work in play programs are listed. Also included are ideas for play program activities, suggestions for play equipment and materials, ways to make musical instruments and recipes for crafts materials. In conclusion, books that will help parents prepare their children for a hospital experience as well as other related materials are cited. (Author/RH)

Identifiers-Verbal Interaction Project

This essay discusses methodological and ethical problems in the implementation and evaluation of home-based intervention programs for young children and their families. Part I notes the difficulties in (1) selecting an appropriate research design to evaluate a program (e.g., preventing sample bias), (2) specifying precisely the intervention method (e.g., insuring uniformity of treatment), (3) making decisions concerning which program effects to measure, (4) implementing the program in new settings (e.g., maintaining quality control) and (5) delivering the program in an ethically acceptable manner (e.g., avoiding subtle coercion in obtaining the consent of the target population). Part II briefly outlines recommended procedures to avoid the problems discussed in Part I. (BH)

Developmental Characteristics of Urban Children: Contrasts Between Children Cared for in their Own Homes, in Homes of Grandparents and in Agency Foster Care. A Pilot Study. Final Report to the Office of Child Development - Agency for Children, Youth and Families.

Johns Hopkins Univ., Baltimore, Md. School of Medicine.
Spons Agency-Office of Child Development (DHEW), Washington, D.C.
Pub Date- 78
Grant-NIH-NINCDS-02371; Pub Type- Reports - Research (143)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors-Blacks, *Child Development, Comparative Analysis, *Early Experience, *Family (Sociological Unit), *Family Influence, Foster Family, Grandparents, Handicapped Children, Parents, Research, Socialization, Socioeconomic Status, *Special Health Problems, *Urban Youth

This descriptive study of the developmental characteristics of urban children, most of whom were black, was a pilot study designed to take a broad overview of agency foster children as compared with children who had been cared for by a grandparent (usually the grandmother) and children cared for by their parents. In this comparison, the agency foster child was disadvantaged in all areas examined; neurologic, psychologic, hearing, language and speech from birth through 7-8 years. By the age of seven years, four of every ten foster children were evaluated as either suspect or abnormal neurologically. On neonatal, first year and seventh year examinations 61% of the family group, 49% of the children living with their grandparents and only 40% of the foster children were described as normal. These differences give rise to the hypothesis that imperfections of children contribute to the decision to seek an alternative type of caretaker: in this case, foster parents or grandparents. Since six of the children in the foster group fared as well as or better than the children in the other two groups, additional research is indicated. It would be of particular importance to gain understanding of the ecological variables which relate to satisfactory or superior performance by foster children and the underlying biosocial risk factors, during the prenatal and early childhood periods, which relate to inadequate performance. Identifiers-Elementary Secondary Education Act Title I, Pennsylvania (Philadelphia), *Project Follow Through, Project Head Start

This report covers three aspects of the Follow Through program in Philadelphia: pupil absence, pupil continuance, and teacher continuance. Data are presented by grade, model, and total program for the 1975-1976, 1976-1977, and 1977-1978 school years. Patterns of attendance were identified for the total pupil population and two subgroups: pupils with previous Head Start (HS) or equivalent experience and those without such exposure. Absence rates varied across the K-3 range. Lower absence was found at higher grade levels. Pupils with prev[illegible] HS experience had significantly higher attendance than pupils [illegible]t previous HS experience at every grade level. The pupil co[illegible]ance rate was 66% in 1975-76, 62% in 1976-77, and only 27% in 1977-78, when the imposition of a strict interpretation of Title I guidelines caused a large number of former program pupils to become ineligible. This could be related to the reversal in the previous pattern of higher continuance rates for HS pupils. Teacher continuance rates increased as the size of the program diminished, since teachers with the most program experience were retained. (Author/RH)

Early Language Use and the Black Child: A Speech Act Analysis of Mother-Child Inputs and Outputs.

Pub Date-Mar 79

Note-17p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (San Francisco, California, March 15-18, 1979)

Pub Type- Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Black Mothers, *Child Language, Infants, Language Development, *Language Usage, *Linguistic Patterns, Low Income, *Parent Child Relationship, Parent Influence, Play, *Verbal Communication

The influence of maternal language use patterns on the use patterns of the child was investigated in a black, low-income mother-child pair over a 20-month period, beginning at the child's 11th month of age. Video recordings were made of the pair's interaction in an unstructured playroom setting approximately every four weeks. Child multi-word utterance types and maternal utterance types were analyzed using a speech act categorrization and classification procedure. Speech acts are identified primarily as what it is that a speaker wishes to communicate when she/he makes an utterance (a request, statement or objection). These speech acts were subsumed under two broader categories, pragmatic and mathetic speech functions. Two types of pragmatic function were identified: (1) a pragmatic function linked to the immediate context, in which the objective of interpersonal contact was to satisfy personal needs or desires; and (2) a pragmatic function conveying social information in which the objective of interpersonal contact appeared to be to increase the child's awareness of social information. The mathetic function is defined as language being used to learn more about one's world. Results indicated that the mother's use patterns did influence the direction of verbal interaction for the child, and that the mother expressed a preference for verbal interaction that was pragmatic in nature and conveyed social rather than referential information. Descriptors-*Abstract Reasoning, Childrens Art, *Cognitive Development, Cognitive Tests, Complexity Level, *Concept Formation, Conceptual Schemes, Elementary School Students, *Freehand Drawing, *Perceptual Development, Psychological Studies, Rating Scales, Research, Sex Differences
Identifiers-*Draw a Man Test, *Draw a Village Scale

The purpose of this study is to show that there is a gradual and measurable development in the drawing of space representation concepts. A further purpose is to show that children's drawings of a village (which represent relations among concepts) may be a better measure of their conceptual maturity than their drawings of a man (which represent a single concept). One hundred and fifty-eight normal children, ranging from age 5 through 13 and attending grades 1 through 7, were asked to make a drawing of a village. Each child was tested individually and was asked, prior to drawing, to define a village. Each was also asked to make a drawing of a man. A scale for scoring the children's drawings was constructed. The original scale comprised 62 items scored present or absent. These items were loosely classified under five categories: differentiation, diversification, complexity, animation, and spatial organization (topological, euclidian, projective). A revised scale of 53 items was used for statistical analyses. Findings indicate no clear-cut sex differences. Reliability between two judges on a sample of 45 drawings was .96. Split-half reliability was .94. The correlation of the total village score with the score on the Draw-A-Man Test (DAMT) was .69. Results show there is a steady development with age and grade in the ability to make a representation of a village. Advantages of the village scale over the DAMT are that it measures a more complex concept, can be used with older subjects more reliably, and that it relies more on integrative and spatial abilities. Twelve children's drawings showing the development of spatial representation are appended. (Author/RH)

This guide for teachers, supervisors and administrators offers a conceptual framework and resources for developing a complete nutrition education program. Included are: (1) a statement of need for nutrition education, (2) definition of what nutrition education should encompass; (3) goals identified by teachers, curriculum specialists and nutrition specialists, and (4) an outline of current issues in nutrition. These ideas are incorporated in an outline of concepts for a comprehensive kindergarten through grade 12 nutrition curriculum which includes a brief description of key ideas, and a description of a total school nutrition program which includes the components of food service, nutrition instruction, and community-family involvement. In addition, resources for teacher use in planning a nutrition curriculum or teaching unit are listed. Citations include audiovisuals, bibliographies, books and pamphlets, catalogues, curriculum guides and periodicals. Also included are names and addresses of people in state organizations and agencies related to public instruction and health. (Author/SS)

Why Play?

Pub Date-79
Note-16p.
Pub Type- Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-*Child Development, Cognitive Development, Discovery Learning, *Experiential Learning, Infant Behavior, *Learning Experience, *Play
Identifiers-*Psychiatric Perspectives

This paper draws together briefly theories and knowledge from research in morphology and cognitive psychology, as well as some hypothetical information from traditional psychiatry, to show the ramifications of play in children's development. Play is defined as any of a wide variety of behaviors through which an individual attempts to discover what sort of person he is, what he is able to do, and in this way learn about his environment. Play is said to: (1) help the infant to understand the potentialities of its own body, of its body in space, of the way in which stimuli will impinge upon it, and how it must organize itself in relationship to these incoming stimuli; (2) offer the opportunity for the child to ``chunk'' incoming information; (3) provide environmental learning and the opportunity for mastery; (4) help the infant acquire information about his potential creativity, his imagination, and his social skills through imitation and role-playing; (5) help the equilibration process, and ensures the use of developing schemata; (6) help the child distinguish the ``not me,'' and allows him to begin to recognize what is outside of his omnipotent and narcissistic control; (7) help the ``observing ego'' and act as a kind of self-healing mechanism. (Author/SS)

Descriptors-Elementary School Students, Followup Studies, Interaction Process Analysis, *Interpersonal Competence, *Peer Acceptance, Peer Relationship, Research, *Social Behavior, Social Isolation, Socialization, *Social Relations, Sociometric Techniques, *Verbal Communication
Identifiers-*Social Learning Theory

The purpose of this study was to see if a social learning method for training verbal social skills might influence the social effectiveness of third grade children with low peer acceptance. Children were trained in three verbal skills: asking questions of peers; leading peers (e.g., offering useful suggestions or directions); and, offering supportive statements to peers. In addition to being informed about specific social skills, children were taught how to perform these behaviors skillfully and effectively. Guided rehearsal was employed to help children translate the instructed skill concepts into behavior while receiving guidance and feedback from the instructor. Children's use of the trained social skills in peer group situations was encouraged. Children were also trained to self-evaluate the consequences of their skill performances. Three experimental conditions were employed to determine the effects of the training procedure on low-accepted children's social behaviors and peer status: verbal skills training, attention control, and non-treatment control. Change in children's social effectiveness was evaluated in terms of behavioral performance and peer acceptance. Observational and sociometric measures were administered upon completion of the experimental procedures and 4 weeks later. Among the results, the training procedure significantly increased the percentage of time children engaged in questioning and leading peers. Improvement was still observable after 4 weeks. Descriptors-*Age Differences, Cognitive Development, Elementary School Students, Kindergarten Children, *Memorizing, *Mnemonics, Psychological Studies, *Recall (Psychological), Research
Identifiers-*Metamemory Processes, Signal Detection Analysis

The nature of young children's inaccuracy in predicting their own memory performance was studied using categorical and unrelated material. Twenty-four children at each of four grade levels (kindergarten and grades two, four, and six) were presented with 18 cards bearing pictures of concrete nouns. Categorical pictures were presented on the right half of the array, and unrelated items were on the left. The children were asked to predict which items they would later recall, and to justify why they predicted recall for those particular items. Both recall and prediction accuracy increased developmentally. Kindergarteners were significantly less accurate than older children in predicting recall. Older children's justification indicated that they were aware of the characteristics of items which make them memorable; while younger children tended to refer to their own alleged cognitive abilities. For example, older children referred to the familiarity or difficulty of items, while kindergarteners mentioned their own smartness or good memory. Signal detection analysis of recall performance and recall prediction data indicated, however, that the mean level of separation of memorable from nonmemorable items varied as a function of list and not grade level. Also, there was no grade by list interaction. These results suggest that children's sensitivity to such information is not a developmental variable, and that young children's poorer performance is due instead to a more liberal response criterion, or a tendency to overpredict the number of items they will remember. Objectives of this state survey of school food service programs in Wisconsin public schools focused on (1) nutrition education in the schools, (2) students' food selection practices, (3) improving nutrition education and (4) increasing awareness of nutritional considerations. Four questionnaires were administered to stratified, randomly selected, representative samples of food service managers, principals, teachers, and public elementary and secondary school students. Part I introduces the background and objectives of the study. Part II provides an overview. Part III reviews selected literature. Part IV describes the methodology of the study. Part V gives survey results. Food service managers' and supervisors' views about student involvement in lunch programs, principals' attitudes and knowledge about nutrition education and teachers' views on improving nutrition education. Student food intake patterns for six specific nutrients, influence of snack foods, and comparisons of eating patterns with weight were also reported. Data are presented in 22 tables and 10 figures. Questionnaires are appended. (Author/RH)

Identifiers-Early Periodic Screening Diagnosis Testing, *South Carolina

The purpose of this book is to provide a uniform and current (1977) data base for persons involved in planning and administering human services programs in South Carolina. General statewide demographic data are given first in a brief introduction. Then, each of the state's counties is profiled in terms of general demographic characteristics, economic characteristics, family characteristics, health statistics, and the availability and use of services. Categories of the data include licensed day care facilities, kindergarten enrollment, child abuse, foster care, adoption, birth rate, premature births, prenatal care, immunization and infant mortality rate. County by county data are summed to give a statewide picture. References used in compiling the book are cited. (Author/RH)

Identifiers-*Piaget (Jean)

This collection of 14 papers explores aspects of open education for middle level schools. The first paper challenges open educators to work for the reform of absurd and obsolete educational practices. The second discusses management of the open environment. The third investigates problems of linking learners and learning activities. Other papers in the collection discuss preconditions for learning, how to open up classrooms, a laboratory approach to learning, an eighth grade unit on exploration, discipline, and parent-teacher-student conferencing. A step by step procedure for opening classroom learning is outlined. A study is reported in which 42 student teachers in special classes rated the classrooms in which they were teaching to determine similarities and differences between regular and special classes on open or traditional characteristics. Issues in Piagetian research which might bear on education are discussed. Last, a study of parochial and public primary teachers' attitudes toward learning centers is reported. (Author/RH)

Descriptors-*Developmental Stages, Longitudinal Studies, *Moral Development, Reliability, Research Methodology, Validity, *Young Adults, *Youth

Findings of this 20-year longitudinal study support Kohlberg's theoretical predictions of invariant structural consistency of subjects' responses to hypothetical moral dilemmas. Subjects were 58 American males chosen in 1955 according to age, social class and sociometric status. They were 10, 13, or 16 years of age at Time 1. Half of each age group were upper middle class, half working class. Half the subjects in each age and SES group were sociometric stars, half were sociometric isolates. Subjects were interviewed every 4 years between 1956 and 1977. Each interview included the presentation of nine hypothetical moral dilemmas with follow-up questions to probe the subject's reasoning. The Standard Form Scoring Manual (1978) was used to stage score the interviews. All scoring was done blind for each individual dilemma. A central point of the longitudinal analysis was to demonstrate the reliability and validity of the scoring system. If a stage is a structural whole, the individual should be consistent over various stimuli and occasions for testing. Reliability data are consistent with this requirement. Results indicate that in no case on either form did a subject reach a stage without having gone through each preceding stage. Almost all of the scores assigned an interview were at two adjacent stages. People seem in their development to go through certain qualitatively distant stages of moral reasoning. Development seems to be highly regular from stage to stage and highly consistent at each stage level. (Author/RH)

Descriptors-*Behavior Change, Infants, *Interaction Process Analysis, *Intervention, Mothers, *Parent Child Relationship, Parent Education, *Play, Preschool Children, *Program Evaluation

This document on mother-infant interaction reports differences found between mothers in a parent education program and a control group. The parent education program provided two different informal methods of stimulating mothers' awareness of their influence on their children's learning and development. Both programs stressed maternal responsivity to the child's needs and ongoing behaviors. The subjects were 68 mother-infant dyads grouped by program participation: (1) mothers in a discussion group (N 21), (2) mothers who had observed demonstrators modeling toy play with their children (N 19) and (3) the control dyads (N 28). The dyads were videotaped for 24 minutes each on two occasions in a simulated living room setting and behavior was coded at 10-second intervals. A higher degree of mother-infant interaction was found for program mothers (particularly in the discussion group) than for the controls at the second observation). Differences in the infants' play, however, were not found to be in a linear relation to program vs. control. The data appear to suggest that the three groups of children developed different structural patterns of play over time and that they used language differently during play. Five tables present results. (Author/BH)

Identifiers-*Levenstein Toy Demonstration Program

This report compares two parent education groups with a control group on three measures of maternal knowledge and attitudes. The subjects were low income Black mothers with 18- to 24-month-old toddlers as of the beginning of the 2-year programs in 1974. The two programs were Levenstein's Toy Demonstration Program, in which mothers (N 26) observed demonstrators modeling playing with their children in the home, and a mothers' discussion program, in which the mothers (N 26) shared experiences of personhood, home and family life. There were 31 control group mothers. The three measures employed in interviews were (1) maternal individuation (expressions of sensitivity to the child's needs as a developing person and openness to alternative perspectives on controlling children's behavior), (2) ability to give developmental explanations of child behavior and (3) expressed perceptions of the mother's role as a teacher. Although significant differences among groups were found at the end of the first year, they were not found at the end of the second year. Findings are presented in three tables. (Author/BH)

Descriptors-*Abstract Reasoning, Adolescents, *Background, *Developmental Stages, Junior High School Students, *Knowledge Level, Physics Experiments, *Rural Urban Differences, Secondary Education, Secondary School Students
Identifiers-*Formal Operational Thought, *Piagetian Tests

This document discusses the relation between adolescents' expertise (their informational background, which can be accurate or inaccurate, about a particular task or subject) and their formal operational reasoning, and reports the results of three studies of the effects of children's expertise on reasoning. In Study I, adolescents from a rural river delta area were compared with urban students in an experiential science program on three measures of the ability to control variables involving fishing, bending rods, and a third for which neither group had previous relevant experience. The river delta students performed better on the fishing task than on bending rods, the converse was found for the science students, and the two groups performed equally on the neutral task. In Study II, which involved high school seniors, a relationship was found between the ability to name variables in a particular problem and the ability to control them, and a relationship between field dependency and the ability to name variables. Study III examined the effects of prior expertise (accurate and inaccurate) and experience (increasing expertise) on the reasoning of seventh graders. Experience was found to influence reasoning, but the effects of experience were sometimes blocked by prior inaccurate expertise. These findings are discussed in connection with other relevant variables, e.g., field dependency and the question of whether or not to employ a given strategy (e.g., controlling variables). (BH)

Descriptors-Age Differences, Cognitive Processes, Elementary Education, Elementary School Students, Experience, *Knowledge Level, Language Processing, *Listening Comprehension, *Reading Comprehension, *Reading Processes, Reading Rate, Reading Research, *Story Reading
Identifiers-*Inconsistency Recognition

This document reports the findings of a study of children's comprehension of stories containing inconsistent information. The subjects were 84 children in kindergarten and the second, fourth and sixth grades. Twelve subjects from each grade listened to two stories and twelve other subjects from grades 2, 4, and 6 read two stories. Each subject was presented with one story in which the information was consistent and one story in which it was not consistent. Significant grade differences in recognition of anomalous information were found among the subjects who listened to the stories, but not among those who read the stories. The recognition of the anomalous information was positively related to story comprehension for the sample as a whole. These findings are discussed in terms of recent theories of the role that children's prior knowledge of the world and of story situations may play in children's story comprehension. (BH)

Descriptors-Anxiety, Attachment Behavior, Behavior Problems, *Comparative Analysis, *Day Care Services, *Emotional Development, *Followup Studies, *Parent Child Relationship, Predictive Validity, *Preschool Education, Social Relations

To determine whether the daily mother-infant separation involved in day care adversely affects children's emotional development, follow-up data on emotional development were compared for preschool children in day care and their home-reared counterparts. Follow-up assessments were done in the home at approximately age 3-1/2 for ten white middle class children who had been in infant day care from approximately 1 year of age and for 13 home-reared children. Measures included observations and tape recordings of mother-child interaction in structured situations, a semi-structured maternal interview which was tape recorded, and some standardized language tests. No differences were found between the two groups for the frequency and intensity of behavior problems, separation reactions, greeting responses to mothers after an hour's separation, or for anxiety manifested during testing. Significant group differences were found for compliance and temper tantrums, with day care children being less compliant with their mothers' requests to complete a boring task and exhibiting more temper tantrum behavior than the home reared children. These differences were interpreted as supporting the hypothesis that the day care children were somewhat delayed in their negotiation of autonomy from their mothers. Data on the degree to which social interactions in day care at 18 months were predictive of later emotional development are also presented. (JMB)

Descriptors-Contrast, *Dimensional Preference, *Infants, Longitudinal Studies, Neonates, Research, *Stimulus Behavior, Visual Measures, *Visual Perception, *Visual Stimuli

Identifiers-Brightness Density, Contour Density, *Visual Preference

This study followed the development of visual preferences in a single infant from birth to 10 weeks of age. The stimuli used were 5 x 10 item arrays of squares of lines in which a 3 x 3 target matrix of the other figure type (line or square) was embedded. The direction of first fixation and the total time spent looking at each side were determined by direct observation of the infant's eyes. Half of the stimulus cards contained black figures on a white background, half white figures on a black background. A brightness preference would be indicated by fixation on lines on white cards, and on squares on black cards. Preference for high contour density would lead to fixation on the squares on both types of cards. Control cards on which no target matrix appeared were used to determine whether response biases were present. The results indicate an abrupt shift from brightness to contour preference at 5 to 6 weeks of age, consistent with other evidence for a major reorganization of behavior at this time. Furthermore, these changes in visual behavior were found to coincide with changes in the distribution of time spent in different behavioral states. Figures present stimulus materials and findings. Descriptors-*Black Mothers, Intervention, Low Income, Mother Attitudes, Parent Education, Personality Change, *Personality Development, *Program Effectiveness, *Self Concept, *Stress Variables

This paper reports a study of the influence of two parent education programs on mothers' personality processes as measured by the Loevinger Scale of Ego Development. Participating in either a Discussion Group program focusing primarily on the mother's needs or a Toy Demonstration program focusing mainly on the child, low income black mothers (n 61) were administered the Loevinger Sentence Completion Test, a projective instrument, in their homes by black, female interviewers at the end of the first and second years of a 2-year study. Eighteen test items were scored for analysis. Results of several statistical manipulations indicate that Discussion Group effects on Loevinger performance were significant. Because an alternative explanation for positive program effects is a reduction of adversive influences in the program mothers' lives, stress was measured by the Slaughter-Pearson SOHE Scale. It was found that stress was positively related to ego growth in the overall sample, rather than negatively as might be expected. (Author/RH)

Descriptors-*Child Development, Early Childhood Education, *Educational Experience, Learning Processes, Memorizing, *Memory, Preschool Children, Recall (Psychological), Research, Retention
Identifiers-Recommendations

Written for professionals who design and teach in preschool programs this paper reviews research on memory abilities of young children and examines the relationship between knowledge and memory among preschool children. Preliminary research of the hypothesis that elementary school environments press children to develop memory strategies is reported. Parents of preschool children and teachers of pupils in the primary grades were interviewed and surveyed. Questions focused on home and school learning, memorization requirements at home and at school, and parent and teacher behaviors related to memorization demands. Data provide some support for the schooling press hypothesis. The memory abilities of the preschool child are characterized as unintentional and bound to the immediate and concrete goals of the activity in which the child acts. Preschool children do not seem to conceptualize memory activities as a distinct part of the on-going activity. Since preschool children do not realize the need to remember as they enter a situation, the adult must first present and emphasize the importance of remembering. Memory tasks should be arranged within the context of some activity that is meaningful for the child. Preschool children do not consciously employ memory strategies. Adults should provide situational means for remembering. (Author/RH)

Descriptors-Age Differences, *Aggression, *Comprehension, *Elementary School Students, *Motivation, Socialization, *Television Research, *Time Factors (Learning)

Second and fifth graders viewed one of two edited versions of a commercial action-adventure television program portraying an aggressive action associated with antisocial motives and punishing consequences. The versions differed only in the amount of time elapsing between the focal action and the motives for that action. Children's comprehension of explicit events in the program and inferences about relations among them (e.g., causality) were assessed using a recognition-memory measure. When motive information was portrayed in close proximity to the aggressive action (proximal-motive version), both second and fifth graders understood the explicit motive and action details and implicit relations between them better than they did when the motives and aggression occurred in different scenes (distal-motive version). Even when children understood the explicit motive and action information, those in the distal-motive version were less likely than those in the proximal-motive version to infer the motive-action relationship. Children in the distal-motive version were less likely than those in the proximal version to evaluate the aggressor negatively. Fifth graders comprehended better than second graders in both versions and were also more likely to infer implicit relations. Additional data indicated that the younger viewers' difficulties were not due to forgetting or interference effects in the course of viewing. Results are discussed in terms of characteristics of children's processing of audiovisual narratives and implications for social-learning and behavioral effects of televised dramatic content. Descriptors-*Attachment Behavior, *Development, *Emotional Response, Infants, Longitudinal Studies, *Mothers, Neonates, Observation, *Parent Attitudes, *Parent Education, Research

Identifiers-Caesarean Births, *Mother Infant Relationship, Self Reports

Summaries of papers presented in a symposium deal with a related series of four issues concerning the development of maternal attachment: Is maternal attachment best conceptualized and measured as an emotional tie or as observable behavior? Is there continuity in the development of maternal attachment from the prenatal to postpartum period? Can the development of maternal attachment be facilitated by teaching parents about their infant's capabilities and responses? What are the ramifications of caesarean versus vaginal delivery for the development of maternal attachment? Questionnaires covering eight areas of concern (e.g., confidence in caregiving, feelings toward pregnancy) were completed in the last trimester of pregnancy; birth information was obtained from hospital charts; and postpartum questionnaires analogous to the prenatal ones were completed at one month. Eighty-six mothers were randomly assigned to one of four groups which varied according to the number and content (teaching vs. no teaching) of home visits during the first month postpartum. Ainsworth Maternal Care Rating Scales were completed and one hour of mother-infant interaction was observed. Continuity in the development of maternal attachment from the prenatal to postpartum period was found, and there was some evidence that teaching parents about their infants may facilitate maternal attachment and behavior. Mode of delivery was not a significant variable. It was concluded that observation of maternal behavior may not provide a sufficient assessment of maternal attachment. (Author/RH)

Descriptors-*Birth, Child Rearing, *Infants, Interaction Process Analysis, Intervention, Mother Attitudes, *Mothers, Neonates, *Parent Child Relationship, *Parent Education, Participant Characteristics, *Program Effectiveness, Psychological Studies, Research

Identifiers-*Infant Feeding, *Maternal Sensitivity

The purpose of this study was to investigate the relationships among maternal and neonatal characteristics in two groups of women, those who had participated in childbirth education class (CE) and those who had not, and their newborn children. Two groups of eight mothers and their first born infants, matched on several demographic and medical factors, were observed during a scheduled feeding session 2 to 3 days after birth. Maternal sensitivity and provision of stimulation were rated. Infants' responsivity was rated during feeding and assessed by means of a Brazelton Neonatal Behavioral Assessment Scale. Overall, sensitive mothers tended to have responsive infants. CE mothers did not provide different types or amounts of stimulation to their infants but were rated as more sensitive. Patterns of correlations suggested that the more sensitive rating was a result of these mothers' basing their behavior on the infants' specific behaviors shown during the feeding session, rather than on more global infant characteristics. Four tables present data. (Author/BH)

Temperament and Child-Rearing Antecedents of Two-Year-Olds' Reactions to Male and Female Strangers.

Pub Date-Mar 79

Note-8p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (San Francisco, California, March 15-18, 1979)

Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors-*Infant Behavior, Infants, *Parent Child Relationship, *Reactive Behavior, Research, Social Behavior, *Stranger Reactions

Two-year-olds' reactions to strangers were related to ratings of their emotionality, sociability and activity and to ratings of parental love and control by both fathers and mothers. Each child received two sessions with strangers, one male and one female. Four times per session a stranger, in a friendly manner, approached each child as it sat in a highchair. Children did not react differently to male and female strangers. Parental ratings of child-rearing practices correlated significantly with the children's responses on the first session but not on the second. Parental ratings of children's temperaments, however, did correlate significantly with responses on the second session. It thus appears that social interactions with parents may influence initial reactions to strangers, whereas subsequent responses to strangers may be more consistent with children's enduring behavioral predispositions, particularly their emotionality and sociability. (Author/RH)

An Analysis of Marital and Infant Factors in Evolving Family Relationships.

Pub Date-Mar 79
Note-10p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (San Francisco, California, March 15-18, 1979)
Pub Type- Reports - Research (143) - Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Fathers, *Infant Behavior, Infants, *Interaction Process Analysis, *Marriage, Mothers, Nonverbal Communication, *Parent Child Relationship, *Parents, Research
Identifiers-*Marital Satisfaction

The impact of two levels of infant organization and marital satisfaction on parent-infant interaction patterns was investigated in 25 couples. It was predicted that (1) disorganized infants would have a negative impact on the parent-infant relationship, and that (2) parent-infant interaction with disorganized infants would be more negative among parents having low, rather than high, marital satisfaction. One-month-old infants were classified as either organized or disorganized using Factor II from the factor analysis of the Brazelton Neonatal Behavioral Assessment Scores. Marital satisfaction was assessed by the combined index of the Locke-Wallace Marital Adjustment Test and the Areas of Change Questionnaire. Three-minute videotapes of face-to-face interaction between the infants and each of their parents separately were coded for facial expressions and attentiveness as a measure of infant-parent responsiveness. The results of this coding were then analyzed using six variables of reciprocal communication patterns between parent and infant. Although the findings were not significant, they lent support to the predictions: the most negative interaction scores (measured by ratio of gaze to avert time and number of initiations of communication) occurred among family triads which had a disorganized infant and had parents with low marital satisfaction; the highest interaction scores occurred among family triads which had organized infant/high marital satisfaction parents. In addition, it was found that, as a group, couples with high marital satisfaction had the least amount of variance on their parent-infant interaction scores and that fathers, rather than mothers, seemed to be more affected by the organizational level of their infant. Validation of a Poison Prevention Program.
Pub Date- 78
Note-28p.
Pub Type- Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors-Comparative Analysis, *Discrimination Learning, Early Childhood Education, *Educational Programs, Improvement Programs, *Preschool Children, *Prevention, *Program Validation, Safety, *Safety Education, Verbal Ability, Visual Discrimination
Identifiers-*Poison Prevention

Two way analyses of variance and cross-group descriptive comparisons assessed the effectiveness of the Siop Poison Prevention Program, which included an educational program and the use of warning labels, on improving verbal and visual discrimination of poisonous and nonpoisonous products for preschool children. The study sample consisted of 156 day care and nursery school children randomly assigned to one of four treatment groups: (1) educational program with Siop warning labels, (2) educational program, (3) Siop warning labels, and (4) control. A combination of the educational program with the use of Siop warning labels proved to be the most effective approach in both verbal and visual discrimination. The educational program proved more effective for verbal discrimination and the Siop warning labels proved more effective in improving visual discrimination. The results suggest two components for an effective poison prevention program: an intellectual awareness of poisons and an ability to visually discriminate poisonous from nonpoisonous products. The educational program tended to facilitate intellectual awareness more, while Siop warning labels had a greater effect on visual discrimination. (Author/MP)

The Biological Imperative of Play: Form and Function in Primates and Other Animals.

Pub Date-Apr 79
Note-13p.; Paper presented at the National Conference on the Vital Role of Play in Learning, Development and Survival (1st, April, 1979)
Pub Type- Speeches/Meeting Papers (150) - Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Attachment Behavior, *Culture, *Mothers, Parent Child Relationship, *Parent Role, *Play, Psychology

This presentation underscores the importance of play and outlines a theory of play in terms of ego-psychology and a broadly defined concept of culture. Play is described as the royal road to the collective ego called ``culture.'' At the same time play also enables aspects and parts of culture to be changed. While children should be encouraged to learn through playfulness (curiosity, spontaneity and hands-on involvement with fascinating objects and materials), such playfulness can come about only if the player is given both leeway and limits. The importance of a mother's playful interaction with her child is emphasized. (Author/RH)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors-Age Differences, *Attachment Behavior, *Child Rearing, Comparative Analysis, *Day Care Services, Early Childhood Education, *Family Environment, Infant Behavior, *Play, Preschool Children, Sex Differences, Stranger Reactions

This study investigates the effects of age and prior experience with age-mates on attachment behavior and exploratory play with another child. Twenty home-reared children, half between 18 and 24 months and half between 24 and 30 months, and 20 day care children, also equally divided into the two age groups, were observed in the Ainsworth strange situation. The stranger was a 5-year-old female. The arrangement of the playroom was modified to create a forced-choice situation between the mother and a playmate and/or toys. Repeated measures of exploration and attachment behaviors were analyzed by computing multivariate analyses of variance and covariance. Age of the children affected exploratory and attachment behavior. Older children ventured a greater maximum distance from the mother and exhibited less crying associated with separation from the mother. Day care children ventured a greater maximum distance from the mother, spent more time away from the mother, more time out of mother's visual field and more time in exploratory play. No differences in intensity of attachment behavior at reunion attributable to rearing situation were found. Home-reared and day care children did not differ in the amount of time spent in social play. Significant rearing by sex interactions led to consideration of the differential effects of the rearing situations for boys and girls. (Author/RH)

Descriptors-Boards of Education, Community Involvement, *Decision Making, Elementary Secondary Education, Females, *Governance, *Governing Boards, *Individual Characteristics, Junior Colleges, Minority Groups, *Policy Formation, *Rural Education, Trustees

This annotated bibliography grew out of the need to extract information and opinion about educational policy-making boards in rural areas from the mass of governing board literature, since rural education institutions have distinct differences from urban ones in terms of financial support, student numbers, isolation, and resources. Annotated references are listed under 11 subjects identified as primary to the study of rural boards of educational governance: rural areas general background; rural education and schools, BOCES; boards of educational governance general background, role, policy and decision making; rural school boards; school board member and trustee recruitment patterns; characteristics of school board members and leaders; characteristics of community college trustees; women and boards of educational governance; minorities and boards of educational governance; school boards, trustees community representativeness and relations; and statistical data. Focus of the materials is on structure and processes of rural boards of educational governance in K-12 school districts and two-year colleges. Each annotation is coded to one or more subject section; the majority of the 86 references are from the sixties and seventies, though a landmark study on social composition of boards of education in 1926 is included. The FFHC/AD (Freedom From Hunger Campaign/Action for Development) is the Food and Agriculture Organization's (FAO) link with peoples' organizations in the world's poor and rich countries. During its 18 years of activities, FFHC/AD has channelled additional funds collected by private financing agencies in the industrialized countries to rural development projects in about 100 developing countries. This catalogue describes 64 reports on projects organized or supported in varying degrees by FFHC/AD during the last five years. Each title includes a brief summary identifying a characteristic feature or an unusual detail or a set of problems of the project. The projects are classified by region and by country, e.g., Africa, Asia, Europe, Latin America and the Caribbean, the Near East, Algeria, Cameroon, Gambia, Ivory Coast, Kenya, Madagascar, India, Indonesia, Philippines, Thailand, Brazil, Costa Rica, Ecuador, Panama, Iran, Iraq, and Sudan. An index lists the reports according to the project's subject areas, i.e., agrarian reform, agricultural credit, artisanal fisheries, commercial crops, cultures and customs, development agents, education and development, governmental structures for development, indigenous rural technology, land management, land structures, peasant life, marketing, neo-traditional structures, rural communication, rural community development, rural crafts and industries, rural hygiene, and theory of rural development. Information for obtaining the various reports is included. (NQ)

Rural schools have had a traditional role as major vehicles of rural economic development. During the rapid economic changes of the 20th century rural schools supplied the literate migrants who flocked to the cities to become the human capital for urban based expansion. Rural schools also provided the literate farmers who stayed at home and instituted commercialized agriculture. Massive dislocations of people led to a significant depletion of capital in rural areas and a disadvantaged population of ``people left behind''. Now, research and policy attention is needed to redress inequities between rural and urban schools. The environment in which rural schools function has six points of differentiation from that of the city: (1) rural heterogeneity; (2) patterns of decision making or leadership in the community; (3) broader functions of the school; (4) less institutional separation within the community; (5) marked demographic and economic differences in the population; and (6) distinctive features of the rural economy. Rural schools also differ from their city counterparts as they face special problems with regard to staffing, curriculum, financing, vocational education, and the question of ``best'' school size. While rural schools should be an objective of rural development, they may also serve to contribute to it in a number of ways as they produce both economic and non-economic benefits to rural inhabitants. Identifiers-Comprehensive Employment and Training Act

The role of education in the human development of rural areas is considered by some to be the single most important thing that can be done to raise rural standards of living. Recognizing this need, the Federal government has sponsored three types of training programs relative to rural development; each is the responsibility of a different agency. Career and Vocational programs sponsored by the Office of Education use half a billion dollars annually on preparation of students for nearly all nonprofessional occupations. Employment training programs under the Comprehensive Employment and Training Act (CETA) include the Comprehensive Manpower Services, the Migrant Farmworker Program, the Native American Program, and the Job Corps. With a budget of 4.5 billion in 1976, these programs delivered such services as recruitment, counseling, training, placement assistance, and employment to those who could not find work. Extension programs deliver education in the categories of agriculture and natural resources, home economics, 4-H youth and community resource development. This paper reviews implementation of the three types of education training programs in rural settings and discusses problems encountered both in terms of internal operation and external conditions. The analysis concludes with alternative policy directions as reflected in the literature on rural education training. (DS)

Identifiers-*Impact Studies

Rapid population growth in rural areas has confronted rural communities and particularly rural educational systems with a number of problems. Sudden, large increases in students crowd school facilities and strain budgets. The different values, attitudes, and orientations toward education of the newcomers act as a catalyst for changes and can cause conflict within the community. In 1978 the U.S. Department of Agriculture studied two communities confronted by such drastic, rapid population growth. In both cases the educational system was afflicted with student overload and crowded facilities. The town of Reliance'' had not experienced economic growth commensurate with its population boom and voters there were unwilling to bear increased taxation for schools. Unsatisfactory stop-gap solutions to overcrowding led to even greater dissatisfaction and negative attitudes among community members. The mining boom town of Appaloosa'' did have a strong economic base and townspeople there worked together to secure improved facilities, more teachers, and stronger school programs. The two community case studies include discussion of general community settings, the educational systems as impacted by rapid growth, school-community relations, and ways school districts and communities coped with the impacts. Identifiers-*Elementary Secondary Education Act Title IV

In recent years rural advocates have claimed that rural students do not get their ``fair share'' of the federal education dollar and that federal programs are sometimes poorly tailored to rural conditions. These claims of an anti-rural bias have led to a study of fiscal year 1977 federal funding patterns in the six sample states of Vermont, North Carolina, Georgia, Kansas, Maryland, and California. The study examines the distribution of federal funds between rural and non rural school districts for two parts of the amended Elementary and Secondary Education Act of 1965; Title IVB of the act deals with libraries and learning resources and Title IVC deals with education innovation and support. Analyses were carried out using several alternatives definitions of ruralness: the metropolitan/nonmetropolitan distinction and three finer-grained definitions. Preliminary findings indicate that Title IVB formulas are operating to provide rural districts in the sample states with at least a proportional share of federal funds and in most cases somewhat more. Even with a greater per capita share, however, a small rural district can buy fewer educational resources with its Title IVB grant than can a populous district with a lower per capita grant. Funding patterns of Title IVC, a competitive grant program differ across states; funding in Georgia, North Carolina, and Maryland seems to favor rural areas while funding in California, Kansas, and Vermont may discriminate against rural regions. The study offers several recommendations for reducing the possible competitive disadvantages of rural districts in grant programs. (Author/DS)

The United States government has no true national rural policy toward education and rural community development. The need exists for the federal government to assume a different role in these areas from what it has traditionally played. In the past the federal education enterprise has failed to relate the design, purpose, or implementation of its programs to the needs of rural Americans. Rural school districts thus continue to lag behind urban areas with respect to federal funds. When access to federal programs depends on number of disadvantaged students rather than proportions, small rural schools often lose out to affluent metropolitan ones. Federal policies are often based on preparing students for an urban life rather than answering the needs of a rural setting. Rural communities are in great need of institutions that will strengthen rural life, serve all members of all ages in the community, and link education to other social services and economic enterprises within the area. Education must be linked with other rural development activities, and rural development itself should be based on comprehensive rural studies rather than on applications of urban models as determinants of rural life. This document discusses rural problems, explores shortcomings in U.S. policy, and examines a number of successful rural community development efforts. Specific recommendations to improve federal programs in education and rural community development are also given. (Author/DS)

Measures such as years of school completed, functional illiteracy, grade retardation and percent of youths attending college indicate that schooling attainment in nonmetro areas falls short of that in metro areas. However, this is not to say that rural children on the average attend inferior schools or rank low in schooling attainment, for the discrepancies largely disappear when adjustments are made for migration patterns and the lower socio-economic status of rural students and parents. Deficiencies in rural schools are primarily concentrated in low income areas and among minorities. School quantity and quality can be improved through federal development of remedial programs, student retention programs, and supplementary funds. Additional schooling could enable white rural males to close the gap between their earnings and the amount earned by their metro counterparts. However, for females and black males, education alone would not reduce the large shortfalls in earnings; public policy must also focus on ending race and sex discrimination in jobs, on job creation in depressed rural areas, and on improved methods of funding schools. Progress in schooling attainment depends on the socio-economic position of parents and communities. Improving education alone is not sufficient to provide solutions to rural poverty and underemployment. Job development and expansion of the economic base are needed along with investments in human resources. (Author/DS)

Identifiers-*Energy Management

A number of disadvantages cripple school efforts to face current energy shortages. Most schools were built at a time when energy was inexpensive and abundant and their structural design gave little regard to energy efficiency. Coupled with poor maintenance programs, school facilities may waste as much as 25 to 50 percent of the energy used. As an increasing share of educational budgets is directed toward fuel expenses, higher student-teacher ratios and reductions in the quality of education will result. Extracurricular activities and community use of school facilities may be curtailed and short time school closings and complete disruption of the educational process may even occur. Small rural schools are particularly hard hit. Maintenance or conservation efforts are often assigned to personnel who have other full time responsibilities. Apathy, limited technical knowledge and lack of public support often stiffle attempts to improve energy efficiency. Seldom is there sufficient administrative time or financial support to permit participation in energy clinics or workshops. An energy management program for developing energy-efficient schools is needed. This systematic approach would include assessment by experts of how much energy is used by a school, inspection of facilities to find conditions that cause energy waste, and funds, guidance, and technical assistance given to implement energy efficient improvements. Recent organizational changes in the Bureau of Indian Affairs (BIA) as well as the formation of Alaska's Rural Education Attendance Areas (REAAs) have important implications for the education of rural Native American children. The Title XI Education Amendments passed in November, 1978 (P.L. 95-561) aim at solving some of the administrative problems caused by distance, diversity, and isolation of BIA-operated and funded schools. The legislation requires structural changes that will result in: funding (based on an equitable formula) going directly to the school level, allowing for development of programs to meet special student needs and for greater local policy control; more flexible personnel staffing; improved efficiency and communication due to direct line authority from the Office of Indian Education Programs to the schools; and development of uniform policies and procedures as the basis for system planning, development, and evaluation. Thus far, greater local control has resulted from the development of Alaska's REAAs. Local Native Alaskan authorities may choose to transfer their BIA school to the REAA system, contract with BIA to operate the school, or remain in the federal system. Court mandated secondary education is causing small, isolated high schools to proliferate but solutions to that problem are being sought in such options as satellite instruction and regional resource centers. Identifiers-Local Education Agencies

In recent years various structural approaches have been used in the United States to improve the delivery of elementary and secondary educational services to rural students. Post World War II interest in reorganization of local districts into larger administrative units has shifted to three other approaches popularized in the 1970's (each with supporters and opponents), i.e., provisions of specialized services from decentralized state education agencies (SEAs), formation of special district education service agencies (ESAs), and development of education cooperatives. A current study of characteristics of 31 networks of all types of service agencies in 26 states reveals that a majority of the Special District ESAs are making more significant contributions of programs and services to public Local Education Agencies (LEAs) than a majority of the Regionalized and Cooperative ESA networks. Most Special Districts have a more comprehensive, faster growing staff. Federal involvement in all three approaches appears crucial. Regional SEA/ESAs enjoy more state involvement and Cooperatives have more public LEA involvement. The federal government should adopt a consistent funding policy for ESAs and all districts should receive their fair share of services. Federal school improvement efforts should take advantage of the unique ability of ESAs to service rural schools. (SB)

Rapidly increasing Navajo enrollment in San Juan County, Utah, public schools in the 1960's forced the rural school district to improve educational services to a sizable Navajo population while attempting to preserve local control in the face of changing Indian self-determination policy. The district implemented a Curriculum Development Center, a bilingual/bicultural program, and new staffing patterns. In 1974 the district also contracted with Northwest Regional Educational Laboratory for the Rural Futures Development (RFD) Strategy, a method of achieving significant educational innovation via broad community support while preserving local control. Six education agencies helped plan for the Strategy activities which included selection of four facilitators, needs assessment, identification of three School Community Groups (SCGs), determination of educational concerns, and facility planning. By 1979, when 50% of district Navajo students attended public schools, the RFD Strategy of community involvement had resulted in passage of a $7 million bond issue, construction of one high school and planning of another, SCGs in every county community, and increased communication between educators and the community. In addition, the district had produced many Navajo language instructional materials and employed Indians in professional and paraprofessional positions. (SB)

Identifiers-*Vocational Education Act 1963

Rural conditions influence the implementation and effect of vocational education policies dealing with funding, accessibility, economics, and local values. By law funding formulas must consider two criteria: relative district wealth, often determined by property values, which have a low correlation to median family income; and concentration of low-income families, which depends on the number applying for aid at often inaccessible rural agencies or on historically underestimated rural unemployment rates. Inaccessibility and transportation problems can limit participation dispersed populations. Rural vocational education may not provide diversified skill training to offset rural underemployment or skills essential for rural living, such as auto repair. Rural conservatism and values may block implementation of nontraditional federal policy, such as women's education. Self-employment, self-reliance, and wide-ranging skills are rural values which run counter to those implied by imposed schedules and industrial specialization. (SB)

Rural American women number well over 25 million and represent all socio-economic and ethnic classifications, yet they share a conservative orientation towards sex roles and appropriate life styles, characteristic social and geographic isolation, and the dilemma of how to manage the traditional demands of rural culture and the contemporary pressures to enter the labor force. Rural women of all ages need locally available educational services including intensive literacy programs, job preparation programs (especially focusing on small business entreprenurial skills), and programs focusing on their rural values and heritage. They also need career planning to help with skills identification and development, and sensitive counseling regarding their problems Once trained, rural women need expanded and improved employment opportunities. The forceful implementation of existing federal policy could offset sex discrimination in public employment. Local education programs could help private employers reconsider their discriminatory practices. Finally, rural women need access to services, or to information and training that will help compensate for the lack of services. Federal policy can help by providing research on rural women, good educational programs based on rural strengths and values, and independent funding of rural and metropolitan programs. (SB)

Descriptors-Educational Change, Educational Finance, Educational Policy, Educational Problems, *Educational Research, Elementary Secondary Education, Government Role, *Government School Relationship, Inservice Teacher Education, *Policy Formation, *Rural Areas, Rural Education, *School Role, *Staff Improvement, Teacher Education

Federal policy and research regarding staff development in rural areas must take into consideration the inherent limitations in teacher inservice and preservice education, rural educational problems (limited human resources, migrant education, modern education services) that could be remedied by improved staff development, and the role of both the federal government and the schools in education and social reform. The primary role of rural schools is to instruct in basic content areas and career preparation, not to solve non-school problems. Realistic federal policy, related to specifically targeted federal dollars, should: deal directly with rural isolation problems in the delivery of staff development programs; focus on the recruitment and training of promising residents of specific rural areas for teaching careers; support the development of specialized training programs for teachers of rural children; and support the development and implementation of teacher training programs for both early childhood and adult education. Four significant areas for future research are regional projections of future employment opportunities, baseline data concerning youth and community aspirations about school goals, delineation of specific areas of educational deficit to rural school children, and realistic appraisal of school capability to support change and provide impetus for improving general rural conditions. Descriptors-Change Strategies, Cocurricular Activities, *Community Involvement, Community Leaders, *Educational Change, *Educational Improvement, Educational Problems, Educational Strategies, *Rural Education, *Rural Schools, Rural Urban Differences, School Community Relationship, *Small Schools

Four different assumptions about the nature of rural education govern major strategies to reform its deficiencies: rural education is a problem because it is not urban; some small isolated schools are necessarily existent''; small schools are desirable because of flexibility and responsiveness; and educational problems are independent of school size. An effectiveness study of 14 currently used U.S. rural education reform strategies reveals that successful strategies are highly congruent with community cultural setting and perceived needs, support and are supported by an important community sector, and are long lasting, low-budget programs. The one-best-system'' approach often seen in consolidation efforts is unsuccessful because rural schools are unique in their values, staff, and perception of total education. Rural education would be improved with better leadership and better teachers, access to services available to urban systems, more direct community involvement, heavily federally funded model systems, and more adoption of proven educational practices. State and federal eudcation policy should consider rural community differences, rural education development capability should be nourished, and alternative solutions to rural education problems should be encouraged. Identifiers-*National Assessment of Educational Progress

The National Assessment of Educational Progress (NAEP) was designed to measure knowledge, skills, and attitudes of young Americans at various ages in 10 learning areas, and to measure educational attainment over time. Community categories used in NAEP research were High and Low Metro, Urban Fringe, Main Big City, Medium City, Small Places (population under 25,000), and Extreme Rural Areas (population under 10,000). Rural students at ages 9, 13, and 17 were enrolled at near the national average grade level. The home environment of 9 year old rural students was similar to that of Urban Fringe students. At ages 13 and 17, the home environments were similar to Main Big City home environments. The baseline data trend, substantiated by change data, was toward improved rural performance, to the point of reaching national performance levels for some ages in science, reading, functional literacy, and social studies. Exercise-by-exercise data should be examined to isolate strengths and weaknesses of rural students in various learning areas. The federal government should explore the possibility of conducting a migrant children assessment. NAEP should be provided with the necessary resources to increase the sample size for rural students to provide more detailed information about their educational achievement. (Author/SB)

Structural and cultural inequalities hinder the attainment of approximately 25 million rural American youth. A characteristic lack of education and employment opportunities is combined with a restricted realm of attainment in rural areas. Rural people are negatively stereotyped by the mass society, as seen in an examination of linguistic terms describing rural people and activities. This results in cultural oppression with very real consequences in the competition for education and jobs. Social research findings regarding the positive relationship between attainment and social origin, and the influence of significant others'', have positive implications for the success of rural youth programs that encourage achievement. Research on adolescent formation of adult attainment attitudes among rural youth reveals rigid sex stereotyping in occupational choice. This critical difference in the individual processes of achievement between rural males and females is a crucial target for program development. The single most effective policy alternative would be to explicitly identify the rural youth population as a special needs group in existing government programs. Research and development in the areas of occupational knowledge acquisition and transition from education to work in rural areas is needed. (SB)

A complex and multi-faceted problem faces those seeking to provide special education to the thousands of handicapped children residing in the nation's rural areas. The major challenge facing rural administrators is how to deliver special education effectively to small numbers of handicapped children who are probably scattered geographically. A rural district may contain a wide range of handicapped conditions spread over multiple grade levels; few teachers can deal with such a diverse array of conditions. Rural districts tend to be those lowest in income and cannot easily supply facilities or special equipment or recruit specialists to provide the range of special educational services required by state and federal laws. Regionalization of several school districts can allow for a wider range of services, but often the distances involved are prohibitive. Federal, state, and court mandates have given rise to a number of training, analysis, and resource coordinating activities, and the 1970's have been a time of great expansion and change in special education for rural areas. The U.S. Bureau of Education for the Handicapped has invested in such endeavors as 16 Regional Resources Centers, 19 Direction Service Centers, and a number of collaborative agreements with other major federal agencies. Efforts undertaken within individual states are described at the conclusion of this document and the author lists a number of recommendations for future efforts. (DS)

Identifiers-*Migrant Student Record Transfer System

Economic pressures along with health, nutrition, housing, sanitation, and child labor problems contribute in large measure to the plight of the migrant population. The incomplete and fragmented education migrant children receive is further compounded by low expectations from teachers and inappropriate curriculums. Legislative action has attempted to address the special needs of migrants through numerous health assistance, housing, nutrition, job opportunity, and educational acts. The Migrant Student Record Transfer System was instituted to gather, store, and transmit student academic and health information. Although the national migrant program is working to provide solutions to migrant problems, findings from a review of the literature, research and state evaluations indicate areas for improvement. Some recommendations are that (1) the Migrant Students Record Transfer System Data Bank should be more timely and should also be used for gathering; (2) long range plans for the national migrant program should be developed; and (3) duplication should be eliminated in agency services to maximize the use of resources. This report reviews relevant literature and research pertaining to the migrant population, reports on legislative actions, and makes recommendations for consideration in decision making and policy development. Identifiers-*Alabama, *Tuskegee Institute AL

Planning for viable rural communities must seek elements inherent in a well-kept American home: lights, water, telephone, employment of the household head, children in school, access to transportation, sufficient food, clothing, health care, recreation, etc. If a community falls short in these necessities, the needs gap'' is where effective service delivery systems operate. In Alabama the Tuskegee Institute cooperates with philanthropic organizations and federal, state, and local governments in developing a wide variety of programs. A grant by the W.K. Kellogg Foundation established the Human Resources Development Center which was designed to coordinate all outreach programs to address the needs of rural people in the 12 Black Belt counties of Alabama. The Mott Foundation aids community education; the Ford Foundation provides management training to certain agriculture cooperatives. Others involved in the Institute's work include the Rockefeller, W.T. Morris, Ushkow and Twenty-First Century Foundations as well as such organizations as the Heifer Project International, Lutheran Church, and Control Data Corporation. Federally supported social, education, and economic programs are also carried out; state and local governments lend what assistance they can. To truly understand rural conditions, a staff of Institute people go into the rural areas, talk to the needy people, discern the actual problems, and determine what is being done or can be done to provide services. Identifiers-*Texas

In 1970-1972 a Texas high school in a bicultural community piloted a motivational program of English, Language Arts, and Social Studies skills designed to involve disadvantaged students (mostly Mexican American) in positive, creative outlets to alleviate a negative self-concept. Four teachers plus Title I Migrant aides used a team teaching approach to provide specialized counseling and raise student achievement to that of the peer group. Oral language development was reinforced using Buy's Speaking By Doing''; reading improvement was based on the Westinghouse PLAN kit; and social studies programs were centered around thematic film units. Project evaluation consisted of standardized testing, teacher observation, and academic success of students in other classes. In 1976 the program was changed to 18 individualized quarter courses including media study, reading skills, economics, American culture, Mexican culture, and Spanish. Proration of all students into the courses eliminated stigma but caused problems due to the inflexible guidelines created by various federal funding agencies. Therefore, it was recommended that all federal programs should be consolidated using Title I supervisors to regulate funding applications; all eligible students should be labeled disadvantaged''; and annual funding should be based on the number of students plus a percentage of additional monies. Brief descriptions of several program courses are included. (SB)

For educational delivery systems to meet the needs of special rural populations of minority children, teaching and learning strategies must take into account the three factors of human identity, culture, and ruralness itself. Children who are members of special populations often have an even greater need than most children for recognition, acceptance, and development of self-esteem. Their racial and ethnic culture must be considered and they need to know about their own cultural heritage. Negative prejudices based on race, ethnic origin, and social class status permeate our educational system; these attitudes can damage self concept, sense of environmental control, and students' interest. The individuality of students must be recognized, their respective backgrounds accepted and understood, and building done on the strengths populations the children bring to the classroom. The academic performance of minority children is also hampered by such teacher behavior as using inappropriate curriculum materials and expecting less of the children. These special populations of children frequently come from homes not oriented toward school and educators must devise more creative, imaginative, and innovative approaches to teaching and learning. (The author has a distinctive perspective on the education of special rural populations as he speaks from his own experiences as a minority member, a person raised in the rural South, and as an educator.) Identifiers-*Texas (Austin)

The 1974-75 Austin Independent School District bilingual/bicultural program was designed as a comprehensive program of bilingual (Spanish and English) education for schools with the highest concentrations of Spanish-dominant Mexican American students. Bicultural instruction was inherent in the program which used both languages for a portion of all the curriculum. On a budget of $271,530 the program served over 1400 elementary students in six schools using 6 1/2 professional staff, 20 teacher aides, and 7 support staff. Students receiving Spanish instruction met objectives regarding acquisition of basic concepts and improved language proficiency, but not Spanish reading skills. Students receiving English instruction met English reading objectives. The program met most objectives regarding staff training, supervision, materials, team teaching, and bilingual aides, but not the important objectives regarding curriculum development and parental involvement. Compared to students not in the program, students in bilingual classes learned more Spanish and as much English. It was recommended that the program be continued at all six schools and be available to all Spanish-dominant students and to those whose parents want them in a bilingual program. Other recommendations were that the position of parental involvement specialist be discontinued and that teacher training emphasize using teacher aides effectively. (SB)

Identifiers-Comprehensive Employment Training Act Title III, Federal Agencies

Federal statistical services grossly underestimate the size of the farmworker population; as a result, the current federal farmworker programs (CETA, Migrant Education, Migrant Headstart, Farm Labor Housing, and Migrant Health) are unable to identify a total target population in need of services and unable to allocate funds in ways which reflect the actual needs of the migrant and seasonal farmworker (MSFW) population. Population underestimation is directly attributable to the use of arbitrary and restrictive definitions of farmwork,'' seasonality,'' and migrancy'' and to the practice of counting the jobs available for hired agriculture labor rather than the agricultural laborers. A new model, constructed by refining and combining data currently used by the federal farmworker programs, produces estimates of the farmworker population 34% higher than the highest federal statistical services estimate and more than 6 times higher than the lowest estimate. The federal government should produce uniform standards for defining the MFSW population, gather demographic and socio-economic data for the population, and attempt to identify all eligible farmworkers and their families. Nineteen Wisconsin counties were the site of the four-year Rural Development Demonstration Project, one of five such projects in the nation. Among the project's objectives were to accelerate sound economic, social, cultural and environmental development and to provide alternatives for living in non-metropolitan areas while providing greater economic balance for the state. Several activities were undertaken in the nine-county West Central District of the project from April 1, 1971 to April 1, 1975. Economic development efforts included creation of Overall Economic Development Plans for six counties. Downtown Improvement programs centered around individual improvement in management skills, as well as analysis and improvement of the community's physical and social well being, were undertaken in seven communities. Health planning efforts included publication of county directories listing health care and related services and health summaries outlining health care available, health needs, and groups responsible for providing for specific areas. Title V and Title I programs provided funds for studies in such areas as land use, power structures, resource preservation and water resources. Youth activity programs ranged from environmental concerns to work with the elderly. Interagency cooperation was sought. An evaluation committee was established to develop evaluation procedures to monitor progress in the demonstration area. (DS)

The Institute for the Study of Sparsely Populated Areas is a multidisciplinary research unit which acts to coordinate, further, and initiate studies of the economic and social conditions of sparsely populated areas. Short summaries of the eight studies completed in the session of 1977-78 indicate work in such areas as the study of political life in a small burgh in northeast Scotland, the development of the Kuwait economy, and an analysis of the direct and indirect input and requirements of labour skills in Welsh industries. Other topics deal with oil tanker operations and pollution in the North Sea, and an economic appraisal of the loss of fishing grounds due to oil and gas installations in the North Sea. Fifteen studies are currently in progress dealing with such subjects as Scottish migration patterns, economic effects of oil and gas developments on local communities, Norwegian oil policies, cost of living and rural areas of Scotland, resource allocation in capital surplus economics, and education and migration from the rural Highlands and Islands of Scotland. Information given on each study includes title, staff members, timescale, finance source, and summary of the work. The final section of the paper lists the Institute's publications for 1977-78. (DS)

Identifiers-*Adventure Education, *Great Britain

Adventure is the most dynamic form of education currently available and as such should move from its peripheral position in British education to become a part of the core curriculum. This move will require that school administrators better understand the philosophy and content of Adventure Education and that staff receive more rigorous training for their demanding jobs. The objective of employing adventure in education is to help people mature through experiences which promote: physical, cognitive, and emotional growth; respect and love for others; and awareness of and respect for the environment. Adventure encompasses a wide range of activities (rock climbing, skiing, night journeys, man-made obstacles, etc.) which share with other outdoor pursuits a framework consisting of the need for safety in potentially dangerous situations; the need for technical, physical, and personal skills; and the goal of enjoyment and satisfaction. Of all the outdoor pursuits adventure is uniquely able to provide satisfaction because it presents the most meaningful challenge, i.e., it involves risk, a healthy degree of fear, and uncertainty about the final outcome. Until such time as adventure education for all students is a practical possibility, it is important to consider subjects such as drama, art, music, and sport which may provide, through different means, some of the challenges of adventure. The overall objective of the Dine Teacher Corps Project is to demonstrate the effectiveness of an interdisciplinary approach to the development and implementation of a bilingual/multicultural training and inservice training program for educators who will be cognizant of and responsive to the unique educational needs of the Indian child. The five year project, begun in 1978, is designed as a cooperative program between Northern Arizona University, Dine Teacher Corps, and two Bureau of Indian Affairs Navajo boarding schools (Kaibeto and Leupp). In order to perform the three phases of activities required by the project (planning, training programs, demonstration and dissemination), a Management Information System (MIS) has been developed and implemented to provide adequate, accurate, and timely information for decision making, reporting accomplishment, and using resources effectively. The MIS is an integrated information system comprised of seven subsystems: finance, school communities, management, facilities and equipment, personnel, students, and instructional programs. Diagrams, flow charts, models, and tables illustrate details of the MIS program design. (NEC/BR)

The basic premise behind the Dine Teacher Corps Project is that teacher pre-service and consequent inservice education and training is held to be a crucial factor in upgrading the quality of education received by American Indian students, particularly in a reservation setting. Although the Dine Teacher Corps Project includes three phases, only Phase I Planning has its management system developed thus far. The management system is organized into six categories: (1) planning, to provide management control of the analytic and decision making activities conducted by the appropriate staff, to identify needs, problems, objectives, and program direction, and to analyze the decision making essential to the conduct of other processes; (2) programming, to develop the specific program plans as identified in category 1; (3) budgeting, to develop the resource costs of each program plan and maintain fiscal information essential to the conduct of each program; (4) forming a community council, elected to insure the operation of parity decision making; (5) documenting and evaluating progress, by systematic collection of evidence to authenticate facts, to substantiate claims and opinions, and to support inferences drawn from the evidence; and (6) developing a chain of command or ladder of communications, to illustrate level, roles, and linkages of the Dine Teacher Corps Program '78. The Hawaii Bound School seeks to provide a significant physical and emotional wilderness experience to those participating in its course. For 24 days a group of 12 students live together and are exposed to a wide variety of wilderness experiences. Among the places visited are the Kohala Mountains, Mauna Loa, Ka'u Desert, and the ocean itself. During the course each student is trained to learn (1) to live and travel comfortably in four wilderness environments; (2) to provide wilderness emergency care and to be part of a search and rescue team, (3) to keep a personal journal; (4) to participate in group discussions; and (5) to gain an appreciation of the cultural, geological and historical heritage of Hawaii. This operations manual is intended for use in the field as a guide and reference for instructors in the Hawaii Bound School. The instructional techniques it explores include teaching models, communication skills, group procedures, and safety programs. It lists the course curriculum content, including first aid training, sanitation, solo experiences, rappel, food, map and compass use, etc. Resource material is given on astronomy, the Hawaiian calendar, Hawaiian skills, plants, fish identification and use as food sources, aquatic plants, Hawaiian history, land divisions, religion, legends and songs. An environmental summary and place names are given for each of the four wilderness sites. (DS)

Identifiers-*Commission on Indian Services OR, *Federal Indian Relationship, Oregon, Tribal Sovereignty

Highlighted in this report is the 1976-77 work of the ten member Commission on Indian Services which was established in 1976 to compile information on services available to Indians, to develop programs to inform Indians of services available to them, to develop programs to make Indian wants and needs known to public and private agencies, and to assess Indian programs of state agencies. Background for understanding the impact on Oregon of the relationships between Indian tribes, the states, and the federal government is presented through discussion of treaty obligations, PL 280 (1953), and the policy of termination. Commission efforts to promote increased communication and cooperation among Indians, federal agencies, national Indian organizations and multi-state organizations are outlined. Summaries are given of the Commission proposals made during the 1977 legislative session on alcoholism program funding, burial sites protection, confiscation of fishing equipment, tribal police training and certification, state taxation of Klamath distributions, and incomes earned on reservations. The activities of the Commission committees on budgets, children's services, corrections, education, and elderly services are reviewed. Other areas of concern described are affirmative action, alcohol and drug services, Columbia River Management Plan, employment assistance, housing, minority and small business assistance, legal services, and volunteer services. Native Americans know that they have a complex social, political, and economic heritage, and they have been concerned that social studies textbooks describe the history, traditions, and values of Indian tribes much too simplistically and generally. To address the need for Indian heritage to be presented without bias, use of stereotypes, or perpetuation of myths, the Commission on Indian Services established a working committee representing Indian communities to conduct an intensive review of 29 grade 4-12 United States history textbooks scheduled for possible adoption by the state of Oregon in 1978. Community committees composed of Title IV staff and concerned parents reviewed 7 or 8 tests using uniform criteria established by the working committee and the State Textbook Commission. The criteria evaluated such aspects as: accuracy of data; Indian history as an integral part of American history; Indian culture as a dynamic process; national and worldwide contributions of Indians; the special social, economic, and political position of the Indian in American history; religious and philosophical contributions; illustrations; overall objectives of the text; presentation of content; style and tone; and learner appropriateness. Six texts were judged acceptable, 3 were acceptable if supplemented, 1 was found not applicable, and 19 were rejected as unacceptable. Specific strengths and/or weaknesses were cited for each text. Identifiers-*Brain Hemispheres, Experiential Education

Focusing on outdoor education in a broad sense, this book comprehensively provides elementary school teachers with rationale, planning guidance, and specific ideas for using the outdoors to enhance the development of the whole child through the stimulation of both right and left hemispheres of the brain. Part I presents a definition, rationale, and set of goals for outdoor education. The thematic unit approach to planning integrated outdoor experiences is fully explained and outlined. There is an annotated bibliography of 69 resources to use in unit development. Nine exemplary'' resources are described in detail. Effective strategies are identified for planning outdoor experiences, managing children and teaching effectively outdoors, and evaluating the experience. Part II describes over 130 interdisciplinary activities from the four possible theme categories: processes, concepts, persistent problems, and natural or man made phenomena. Most activities are designed for specific environments (school site, urban area, water environments, desert, forest); some are appropriate for any site. Basic information for conducting the activities is presented on perforated pages. Appropriate grade level is noted. The book is also suitable as a supplement to undergraduate or graduate level methods courses. (SB)

Identifiers-*American Indian Literature, *Cultural Contributions, Oral Tradition, Oratory

From ancient stories of creation to contemporary poetry and prose, this volume ranges through thousands of years of the literature of the American Indian. Chapter One of the book deals with pre-Columbian religions and features accounts of the Creation by the Cheyenne, Navajo, Omaha, Yakima, Zuni, and Uitoto. Chapter Two has as its theme folk characters, tricksters, and heroes as it presents such material as three tales of Manabozho, one of Coyote, and stories like Winabojo and the Medicine Man'' and Ictinike and the Turtle''. Chapter Three contains 14 pre-Columbian poems. The fourth chapter presents the Iroquois epic of Dekanawida as well as the text of the world's oldest living consitution, The Law of the Great Peace of the People of the Longhouse (Iroquois, 1390 AD). The oratorical skills of American Indians are discussed in Chapter Five and famous speeches by such men as Metacomet, Logan, Little Turtle, Red Jacket, Red Bird, and Chief Joseph are presented. The sixth chapter deals with Native American religions after the Christian invasion and includes accounts of the Ghost Dance and peyote religions. Contemporary voices in poetry, prose, and protest are heard in the final chapter. The poetry is by such authors as Ted Berrigan, N. Scott Momaday, and Simon J. Ortiz. Five short stories are presented as well as five essays of protest. Each of the book's chapters is prefaced with a discussion of its thematic material. (DS)

Identifiers-Native Americans

The Indian woman has been viewed as a subservient and oppressed female; often overlooked were the economic, social and political positions women held within tribal societies. The biographies and autobiographies of Indian women that have been obtained over the last century can be used to examine this contradiction in perspectives. These accounts have undergone changes in several significant ways over the years, including changes in the perception of audience, purpose of revealing the life story, and the economic and/or political climate of the period of recording. The earliest material was told by the women through an interpretor to an anthropologist. The purpose was not to focus on an individual life but to illuminate a culture and the scientist or editor chose what was significant. Emphasis in early accounts was placed on the roles of males and females, the familial relationships, material culture, and a regret for the changes from the old ways. In recent narratives Indian women often are writing their own stories and choosing the material they themselves want to include. Many of these stories reflect the dilemma of the pulls between the traditional ways and the pushes toward acculturation. The Indian woman is and has been strong within her culture and the life stories of Indian women support this perspective. This document discusses specific biographies of Native American women; it provides bibliographic citations for the sources quoted and additional listings for other autobiographical works and resource material. Identifiers-Chicanos, *United States (Southwest)

Various explanations and possible solutions for the low social status and poor school achievement of the Mexican American are the subject of this book, which examines ethnic characteristics of the Mexican American, socioeconomic conditions in the five southwestern states, and practices and policies of the schools in the Southwest. This book grew out of an earlier work (Mexicans in School: A History of Educational Neglect'') based on the Mexican American Study Project; to supplement the background provided by that extensive investigation, the authors conducted 100 interviews and examined research studies of the past decade, as well as reports of special programs for Mexican Americans that resulted from federal funding for minority group education projects. Chapter headings include A History of Educational Neglect,'' The Outcome of Schooling,'' The Failure of the Chicano,'' The Default of the School,'' Efforts to Adjust the Child,'' and Efforts to Modify the Institution.'' A final chapter analyzes the failure of compensatory education programs and recommends strategies for effectively changing educational policies and practices. A bibliography of nearly 400 titles is appended. (JH)
